

7-13-09

Vol. 74 No. 132

Monday July 13, 2009

Pages 33319–33900

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see www.federalregister.gov.

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the Federal Register shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** www.gpoaccess.gov/nara, available through GPO Access, is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

For more information about GPO Access, contact the GPO Access User Support Team, call toll free 1-888-293-6498; DC area 202-512-1530; fax at 202-512-1262; or via e-mail at gpoaccess@gpo.gov. The Support Team is available between 7:00 a.m. and 9:00 p.m. Eastern Time, Monday–Friday, except official holidays.

The annual subscription price for the Federal Register paper edition is \$749 plus postage, or \$808, plus postage, for a combined Federal Register, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the Federal Register including the Federal Register Index and LSA is \$165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily Federal Register, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Printing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see bookstore.gpo.gov.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 74 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Printing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

FEDERAL REGISTER WORKSHOP

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

- The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
- 2. The relationship between the Federal Register and Code of Federal Regulations.
- 3. The important elements of typical Federal Register documents
- An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WHEN: Tuesday, July 14, 2009

9:00 a.m.-12:30 p.m.

WHERE: Office of the Federal Register

Conference Room, Suite 700 800 North Capitol Street, NW. Washington, DC 20002

RESERVATIONS: (202) 741-6008

Rules and Regulations

Federal Register

Vol. 74, No. 132

Monday, July 13, 2009

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Natural Resources Conservation Service

7 CFR Part 650

RIN 0578-AA55

Compliance With NEPA

AGENCY: Natural Resources Conservation Service (NRCS), United States Department of Agriculture ACTION: Interim final rule with request for comment.

SUMMARY: The Natural Resources Conservation Service (NRCS or the Agency) publishes this interim final rule to request comments on additional categorical exclusions, which are actions that the agency has determined do not individually or cumulatively have a significant effect on the human environment and, thus, should not require preparing an environmental assessment (EA) or environmental impact statement (EIS) under the National Environmental Policy Act (NEPA). NRCS' categorical exclusion actions promote restoration and conservation activities related to natural or human induced damage, or alteration of floodplain easements and watershed areas. For projects being funded under the American Recovery and Reinvestment Act of 2009 (ARRA), the interim final rule will assist NRCS in meeting mandates set forth in ARRA and NEPA for undertaking actions in the most expeditious manner and in compliance with NEPA.

DATES: Effective Date: The rule is effective July 13, 2009.

Comment date: Submit comments on or before September 11, 2009.

ADDRESSES: You may send comments (identified by Docket Number NRCS–0578–AA55) using any of the following methods:

- Government-wide rulemaking Web site: http://www.regulations.gov and follow the instructions for sending comments electronically.
 - E-mail: NEPA2008@wdc.usda.gov.
- Mail: Matt Harrington, National Environmental Coordinator, Ecological Sciences Division, Department of Agriculture, Natural Resources Conservation Service, 1400 Independence Avenue, SW., Washington, DC 20250.
 - Fax: (202) 720–2646.
- Hand Delivery: USDA South Building, 1400 Independence Avenue, SW., Room 6158, Washington, DC 20250, between 9 a.m. and 4 p.m., Monday through Friday, except Federal Holidays. Please ask the guard at the entrance to the South Building to call (202) 720–2587 in order to be escorted into the building.

This interim final rule may be accessed via Internet. Users can access the interim final rule at: http://www.nrcs.usda.gov/programs/Env_Assess/index.html. Persons with disabilities who require alternative means for communication (Braille, large print, audio tape, etc.) should contact the USDA TARGET Center at: (202) 720–2600 (voice and TDD).

FOR FURTHER INFORMATION CONTACT: Matt Harrington, National Environmental Coordinator, Ecological Sciences Division, Department of Agriculture, Natural Resources Conservation Service, 1400 Independence Avenue, SW., Washington DC 20250; Phone: (202) 720–4925; Fax: (202) 720–2646; or email NEPA2008@wdc.usda.gov, and identify in the subject line, "Information Requested."

SUPPLEMENTARY INFORMATION:

Regulatory Certifications

Executive Order 12866

The Office of Management and Budget has determined that this interim final rule is a non-significant regulatory action under Executive Order 12866.

Regulatory Flexibility Act

Pursuant to 5 U.S.C. 605(c) of the Regulatory Flexibility Act, NRCS has determined that this interim final rule will not have a significant economic impact on a substantial number of small entities as defined by that Act. Therefore, a regulatory flexibility analysis is not required for this interim final rule.

Environmental Analysis

This interim final rule amends the procedures for implementing NEPA at 7 CFR part 650 and will not directly impact the environment. An agency's NEPA procedures are guidance to assist that agency in its fulfillment of responsibilities under NEPA, but are not that agency's final determination of what level of NEPA analysis is required for a particular action. The CEQ set forth the requirements for establishing agency NEPA procedures in its regulations at 40 CFR 1505.1 and 1507.3. The CEQ regulations do not require agencies to conduct NEPA analyses or prepare NEPA documentation when establishing their NEPA procedures. The determination that establishing agency NEPA procedures does not require NEPA analysis and documentation has been upheld in Heartwood, Inc. v. U.S. Forest Service, 230 F.3d 947, 954–55 (7th Cir. 2000).

Paperwork Reduction Act

There are no requirements for information collection associated with this interim final rule that would require approval under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Unfunded Mandates Reform Act of

NRCS assessed the effects of this rulemaking action on State, local, or Tribal governments and the public. This action does not compel the expenditure of \$100 million or more in any one year (adjusted for inflation) by any State, local, or Tribal governments or anyone in the private sector; therefore, a statement under Section 202 of the Unfunded Mandates Reform Act of 1995 is not required.

Civil Justice Reform

This interim final rule has been reviewed under Executive Order 12988, Civil Justice Reform. After adoption of this interim final rule: (1) All State and local laws and regulations that conflict with this rule, or that would impede full implementation of this rule, will be preempted; (2) no retroactive effect would be given to this interim final rule; and (3) before an action may be brought in a Federal court of competent jurisdiction, the administrative appeal rights afforded persons at 7 CFR part 614 must be exhausted.

Federalism

NRCS has considered this interim final rule under the requirements of Executive Order 13132. NRCS has determined that this interim final rule would not impose any compliance costs on the States and would not have substantial direct effects on the States, on the relationship between the National Government and the States, nor on the distribution of power and responsibilities among the various levels of government. Therefore, NRCS has determined that this interim final rule conforms to the principles set forth in Executive Order 13132.

Energy Effects

NRCS has determined that this interim final rule does not constitute a significant energy action as defined in Executive Order 13211.

Background

NRCS finds that this amendment should proceed as an interim final rule. This interim final rule will facilitate the delivery of assistance under the ARRA for which timely delivery is of the essence. The actions identified have been subject to prior extensive environmental review that demonstrates that they do not individually or cumulatively have a significant effect on the human environment. The agency will evaluate each agency undertaking to ensure whether the undertaking meets the criteria of the categorical exclusion, or whether extraordinary circumstances exist which require additional environmental review. Given these safeguards, NRCS has determined that to proceed through a prior notice of proposed rulemaking would be impracticable, unnecessary, and contrary to the public interest in the efficient implementation of conservation programs.

I. National Environmental Policy Act

NEPA requires that Federal agencies consider the environmental effects or impacts of proposed Federal actions. NEPA requirements apply to any Federally funded or undertaken project, decision, or action, including grants. NEPA also established the Council on Environmental Quality (CEQ), which issued regulations at 50 CFR parts 1500–1508 implementing the procedural provisions of NEPA.

The CEQ regulations require Federal agencies to adopt their own implementing procedures to supplement the Council's regulations, and to establish and use categorical exclusions to define categories of actions that do not individually or cumulatively have a significant effect on

the human environment and, therefore, do not require preparation of an EA or EIS (40 CFR 1507.3(b)(2)(ii) and 40 CFR 1508.4).

II. NRCS' Environmental Review Process

NRCS follows CEQ regulations for complying with NEPA. In addition, NRCS has supplemental regulations for NEPA compliance at 7 CFR part 650. Consistent with the CEQ regulations at 40 CFR 1508.4, NRCS defines "categorical exclusion" to mean a category of actions that does not individually or cumulatively have a significant effect on the human environment * * *" and that has been found by NRCS to have no such effect. These supplemental regulations require that the Responsible Federal Official (RFO) must determine whether the proposed action fits within a categorical exclusion listed in the agency's implementing NEPA regulations (see 7 CFR 650.6(a)), and the proposed action does not involve any extraordinary circumstances (see 7 CFR 650.6(b)).

Section 650.6 currently identifies five actions that are categorically excluded from detailed review under NEPA. This interim final rule amends § 650.6 to identify an additional 21 actions as categorically excluded from detailed review through an EA or an EIS. Some of the new categorical exclusions are comparable in nature and scope to categorical exclusions of other Federal agencies. NRCS determined the new categorical exclusions routinely do not individually or cumulatively have a significant effect on the human environment. The statement supporting the categorical exclusions is available for review at the following Web site: http://www.nrcs.usda.gov/programs/ Env Assess/index.html or upon request from the NRCS National Environmental Coordinator.

NRCS has not updated its list of categorical exclusions since 1979. However, NRCS has over 70 years of experience (since the agency's establishment in 1935) with the actions being added to the agency's list of categorical exclusions. Based upon this experience and other data and analyses described below, NRCS has determined these actions as appropriate for incorporation in 7 CFR 650.6 as categorical exclusions.

As established in this interim final rule, NRCS will satisfy NEPA when using these categorical exclusions by determining whether a proposed agency action falls within the description of the activities and by reviewing the proposed agency action to determine whether extraordinary circumstances exist. In

the event extraordinary circumstances exist, NRCS will prepare an EA or an EIS before proceeding with the proposed action (see 7 CFR 650.6(a) and (b)).

As noted in the statement supporting the categorical exclusions, NRCS provides support for each action being added to the categorical exclusion list by citing: (1) Other agencies that currently have categorical exclusions for actions which are comparable in nature to the action(s) NRCS is adding as new categorical exclusions; (2) the findings of the NRCS interdisciplinary teams' reviews, which are explained below; and (3) previous environmental reviews prepared by NRCS for these actions. By identifying these additional actions as categorical exclusions, NRCS is better able to meet the mandates of NRCS and CEQ NEPA regulations by providing for the efficient and timely environmental review of restoration and conservation activities. CEQ does not require agencies to prepare a NEPA analysis or document before establishing agency protocols or procedures that supplement the CEQ regulations for implementing NEPA.

III. NRCS Restoration and Conservation Planning

Since 1935, NRCS has assisted private individuals, conservation districts, Indian Tribes, units of government, and other organizations to apply conservation plans to conserve the Nation's natural resources, primarily on private agricultural lands. This is accomplished in partnership with locally led decision-making processes by providing conservation assistance through a national network of technically skilled, professional conservationists. These conservationists deliver consistent, science-based, sitespecific solutions to help private landowners voluntarily conserve, maintain, and improve the Nation's natural resource base.

All NRCS actions are planned according to the requirements described in the NRCS National Planning Procedures Handbook. The Handbook prescribes that all planning be conducted through the use of a planning process, which includes the following nine steps:

- 1. Problem Identification.
- 2. Determine Objectives.
- 3. Inventory Resources.
- 4. Analyze Resource Data.
- 5. Formulate Alternatives.
- 6. Evaluate Alternatives.
- 7. Make Decisions.
- Implement Plan.
- 9. Evaluate Plan.

NRCS conducts an Environmental Evaluation (EE), as required by 7 CFR

650.5, throughout the planning process, and incorporates environmental considerations throughout planning, installation, and operation of NRCS-assisted actions. By conducting the EE, NRCS is able to identify the appropriate level of environmental documentation and analysis required for a particular action.

Conservation practices are required to meet sustainable levels of quality criteria established in Section III of the Field Office Technical Guide (FOTG), for soil, water, air, plant, animal, and human resources. See http://www.nrcs.usda.gov/technical/efotg/. Additionally, all conservation practice implementation is governed by established conservation practice standards contained in Section IV of the FOTG.

The design and implementation of conservation practices must also meet technical and environmental criteria in NRCS manuals, handbooks, and publications, which in turn are developed through a peer and public

review process.

NRCS obtains input about conservation practices from the State Technical Committees established pursuant to 16 U.S.C. 3861. NRCS also obtains public input about conservation practices by publishing in the **Federal** Register notice of any new conservation practice standard to be incorporated into the FOTG. In addition to State Technical Committee and Federal **Register** reviews, public participation is further accomplished through coordinating the implementation of NRCS activities with local Soil and Water Conservation Districts (SWCD). SWCD board members are comprised of local landowners, elected by the public, to represent community interests, advocate conservation, assist NRCS in setting local resource priorities, and approving conservation plans. All technical and financial assistance provided by NRCS is voluntary and is provided in partnership with the local SWCD at the request of an individual, unit of government, Indian Tribe, or sponsoring organization.

IV. Process Used To Identify the Categorical Exclusions

For all the actions added to 7 CFR 650.6 as categorical exclusions and described below, NRCS convened a group of interdisciplinary experts to review agency actions and determine whether the actions should be considered as a new categorical exclusion based upon their experience, expertise, and environmental review. The interdisciplinary team also considered comparable categorical

exclusions from other agencies throughout the Federal Government that conduct similar activities under similar circumstances. In addition to the interdisciplinary team, NRCS also collected environmental review information from a sample of its State and field offices that have undertaken these actions over the past 70 years. The State and field offices providing information were: California, Colorado, Georgia, Iowa, Kentucky, Louisiana, Massachusetts, Missouri, Nebraska, New Hampshire, Oklahoma, Oregon, Rhode Island, and Texas. Overall, the environmental documentation information reported by these States showed that implementation of these categorical exclusions has not resulted in individually or cumulatively significant environmental effects.

These 14 States provided a random sample of conservation activities, and coincidentally these random samples encompassed agency actions within 11 of the 12 major river basins in the continental United States. Concurrent with the public comment period, NRCS is requesting information to be submitted from State and field offices within the remaining 12th river basin [Great Lakes River Basin] which includes: Illinois, Indiana, Michigan, Minnesota, New York, Ohio, Pennsylvania, and Wisconsin, and will incorporate any additional information gained from this input and public comment in the development of the final rule. The information provided in the statement supporting the categorical exclusions includes Damage Survey Reports containing an EE, EA, and EIS prepared over a 9-year period (2000-2009) for the actions to be categorically excluded.

V. Categorical Exclusions for Restoration and Conservation Actions

All the actions identified as a categorical exclusion below require documentation in accordance with 7 CFR 650.6 that address whether extraordinary circumstances are determined to exist. Furthermore, the following categorical exclusions only apply to proposed actions that: (1) Include provisions to mitigate soil erosion, sedimentation, and downstream flooding; (2) require disturbed areas to be vegetated with adapted species; (3) are based on the principles of natural stream dynamics and processes presented in the Federal Interagency Stream Corridor Restoration Working Group document (http:// www.nrcs.usda.gov/technical/stream restoration/), "Stream Corridor Restoration, Principles, Processes, and Practices;" (4) incorporate the

applicable NRCS conservation practice standards as found in the FOTG [http://www.nrcs.usda.gov/technical/efotg/]; (5) do not require substantial dredging, excavation, or placement of fill; and (6) do not involve a significant risk of exposure to toxic or hazardous substances.

The identification of these actions as categorical exclusions under NEPA does not relinquish the responsibility of NRCS to comply with the mandatory consultation requirements under the National Historic Preservation Act and implementing regulations, the Endangered Species Act and implementing regulations, and any other legal requirements.

The following actions are being added to 7 CFR 650.6 as categorical exclusions:

- 1. Planting appropriate herbaceous and/or woody vegetation on disturbed sites to restore and/or maintain the site's pre-disturbance vegetative community or similar adaptive naturalized vegetative community that provides analogous ecological functions and services:
- 2. Removing dikes and associated appurtenances (such as culverts, pipes, valves, gates, and fencing) to allow waters to access floodplains to the extent that had existed prior to the installation of such dikes and associated appurtenances;

3. Plugging and filling excavated drainage ditches to allow hydrologic conditions to return to pre-drainage conditions to the extent practicable;

4. Replacing and repairing existing culverts, grade stabilization, and water control structures and other small structures that were damaged by natural disasters where there is no new depth required and only minimal dredging, excavation, or placement of fill is required;

5. Restoring the natural topographic features of agricultural fields that were altered by farming and ranching activities for the purpose of restoring

ecological processes;

6. Removing or relocating residential, commercial, and other public and private buildings and associated structures constructed in the 100-year floodplain or within the breach inundation area of an existing dam or other flood control structure in order to restore natural hydrologic conditions of inundation or saturation, vegetation, or reduce hazards posed to public safety;

7. Removing storm debris and sediment following a natural disaster where there is a continuing and eminent threat to public health or safety, property, and/or natural and cultural resources and removal is necessary to restore lands to pre-disaster conditions

to the extent practicable. Excavation shall not exceed the pre-disaster condition;

- 8. Stabilizing stream banks and associated structures to reduce erosion through bioengineering techniques following a natural disaster to restore pre-disaster conditions to the extent practicable (e.g., utilization of living and nonliving plant materials in combination with natural and synthetic support materials, such as rocks, riprap, and geo-textiles, for slope stabilization, erosion reduction, and vegetative establishment) and establishment of appropriate plant communities (bank shaping and planting, brush mattresses, log, root wad, and boulder stabilization methods);
- 9. Repairing or maintenance of existing small structures or improvements (including structures and improvements utilized to restore disturbed or altered wetland, riparian, in stream, or native habitat conditions). Examples of such activities include the repair or stabilization of existing stream crossings for livestock or human passage, levees, culverts, berms, dikes, and associated appurtenances;
- 10. Constructing small structures or improvements for the restoration of wetland, riparian, in stream, or native habitats. Examples of activities include: (1) Installation of fences, and (2) construction of small berms, dikes, and associated water control structures;
- 11. Restoring an ecosystem, fish and wildlife habitat, biotic community, or population of living resources to a determinable pre-impact condition;
- 12. Repairing or maintenance of existing constructed fish passageways, such as fish ladders or spawning areas, impacted by natural disasters or human alteration;
- 13. Repairing, maintaining, or installing fish screens to existing structures;
- 14. Repairing or maintaining principal spillways and appurtenances associated with existing serviceable dams, originally constructed to NRCS standards, in order to meet current safety standards. Work will be confined to the existing footprint of the dam, and no major change in reservoir or downstream operations will result;
- 15. Repairing or improving (deepening/widening/armoring) existing auxiliary/emergency spillways associated with dams, originally constructed to NRCS standards, in order to meet current safety standards. Work will be confined to the dam or abutment areas, and no major change in reservoir or downstream operation will result;

- 16. Repairing embankment slope failures on structures originally built to NRCS standards where the work is confined to the embankment or abutment areas;
- 17. Increasing the freeboard (which is the height from the auxiliary (emergency) spillway crest to the top of embankment) of an existing dam or dike, originally built to NRCS standards by raising the top elevation in order to meet current safety and performance standards. The purpose of the safety standard and associated work is to ensure that during extreme rainfall events, flows are confined to the auxiliary/emergency spillway so that the existing structure is not overtopped which may result in a catastrophic failure. Elevating the top of the dam will not result in an increase to lake or stream levels. Work will be confined to the existing dam and abutment areas, and no major change in reservoir operations will result. Examples of work may include the addition of fill material such as earth or gravel, or placement of parapet walls:

18. Modifying existing residential, commercial, and other public and private buildings to prevent flood damages, such as elevating structures or sealing basements to comply with current State safety standards and Federal performance standards;

- 19. Undertaking minor agricultural practices to maintain and/or restore ecological conditions in floodplains after a natural disaster or on lands impacted by human alteration. Examples of these practices include: mowing, haying, grazing, fencing, off-stream watering facilities, and invasive species control which are undertaken when fish and wildlife are not breeding, nesting, rearing young, or during other sensitive timeframes;
- 20. Implementing soil erosion control measures on existing agricultural lands, such as grade stabilization structures (pipe drops), sediment basins, terraces, grassed waterways, filter strips, riparian forest buffer, and critical area planting; and
- 21. Implementing water conservation activities on existing agricultural lands, such as minor irrigation land leveling, irrigation water conveyance (pipelines), irrigation water control structures, and various management practices.

In addition to identifying these actions as categorical exclusions, NRCS is making editorial adjustments to § 650.6 to clarify the process that applies to the programs originally identified as categorical exclusions under § 650.6(a), and the new categorical exclusions identified in a new paragraph (c). In particular,

paragraph (b) of § 650.6 is revised to indicate that the procedures identified therein apply specifically to the programs identified in paragraph (a).

The public is invited to submit comments on both the "The Statement Supporting the Proposed Categorical Exclusions" and the categorical exclusions listed above. See the **ADDRESSES** for instructions on submitting comments. "The Statement Supporting the Proposed Categorical Exclusions" is available at http:// www.nrcs.usda.gov/programs/ Env Assess/index.html under "NRCS" Proposed Expanded List of Categorical Exclusions." In addition, hard copies may be obtained by contacting the NRCS National Environmental Coordinator, as provided above.

List of Subjects in 7 CFR Part 650

Environmental impact statements, Flood plains.

■ For the reasons stated in the preamble, NRCS amends part 650 of Title 7 of the Code of Federal Regulations as set forth below:

PART 650—COMPLIANCE WITH NEPA

■ 1. The authority citation for part 650 is amended to read as follows:

Authority: 42 U.S.C. 4321 et seq.; Executive Order 11514 (Rev.); 7 CFR 2.62, unless otherwise noted.

■ 2. Section 650.6 is amended by revising paragraph (b) and adding a new paragraph (c) to read as follows:

§ 650.6 Categorical Exclusions

(b) When any new action is planned under the programs identified in paragraph (a) of this section, the EE performed by the RFO is to identify extraordinary circumstances that might lead to significant individual or cumulative impacts. Actions that have potential for significant impacts on the human environment are not categorically excluded.

(c) The NRCS restoration and conservation actions and activities identified in this paragraph (c) are eligible for categorical exclusion and require the RFO to document a determination that a categorical exclusion applies. Agency personnel will use the EE review process to evaluate proposed activities for significant impacts and extraordinary circumstances using the significance criteria provided in 40 CFR 1508.27. In the absence of any extraordinary circumstances as determined through NRCS' EE review process, the activities will be able to proceed without preparation of an EA or EIS. Where

either significant impacts or extraordinary circumstances are determined to exist, the categorical exclusion will not apply and the appropriate documentation for compliance with NEPA will be prepared. The following actions are eligible for categorical exclusion:

(1) Planting appropriate herbaceous and/or woody vegetation on disturbed sites to restore and/or maintain the site's pre-disturbance vegetative community or similar adaptive naturalized vegetative community that provides analogous ecological functions and services;

(2) Removing dikes and associated appurtenances (such as culverts, pipes, valves, gates, and fencing) to allow waters to access floodplains to the extent that had existed prior to the installation of such dikes and associated appurtenances;

(3) Plugging and filling excavated drainage ditches to allow hydrologic conditions to return to pre-drainage conditions to the extent practicable;

(4) Replacing and repairing existing culverts, grade stabilization, and water control structures and other small structures that were damaged by natural disasters where there is no new depth required and only minimal dredging, excavation, or placement of fill is required;

(5) Restoring the natural topographic features of agricultural fields that were altered by farming and ranching activities for the purpose of restoring

ecological processes;

(6) Removing or relocating residential, commercial, and other public and private buildings and associated structures constructed in the 100-year floodplain or within the breach inundation area of an existing dam or other flood control structure in order to restore natural hydrologic conditions of inundation or saturation, vegetation, or reduce hazards posed to public safety;

- (7) Removing storm debris and sediment following a natural disaster where there is a continuing and eminent threat to public health or safety, property, and/or natural and cultural resources and removal is necessary to restore lands to pre-disaster conditions to the extent practicable. Excavation shall not exceed the pre-disaster condition:
- (8) Stabilizing stream banks and associated structures to reduce erosion through bioengineering techniques following a natural disaster to restore pre-disaster conditions to the extent practicable, e.g., utilization of living and nonliving plant materials in combination with natural and synthetic support materials, such as rocks, rip-

rap, geo-textiles, for slope stabilization, erosion reduction, and vegetative establishment) and establishment of appropriate plant communities (bank shaping and planting, brush mattresses, log, root wad, and boulder stabilization methods);

(9) Repairing or maintenance of existing small structures or improvements (including structures and improvements utilized to restore disturbed or altered wetland, riparian, in stream, or native habitat conditions). Examples of such activities include the repair or stabilization of existing stream crossings for livestock or human passage, levees, culverts, berms, dikes, and associated appurtenances;

(10) Constructing small structures or improvements for the restoration of wetland, riparian, in stream, or native habitats. Examples of activities include:

- (i) Installation of fences, and (ii) Construction of small berms, dikes, and associated water control structures:
- (11) Restoring an ecosystem, fish and wildlife habitat, biotic community, or population of living resources to a determinable pre-impact condition;
- (12) Repairing or maintenance of existing constructed fish passageways, such as fish ladders or spawning areas impacted by natural disasters or human alteration;
- (13) Repairing, maintaining, or installing fish screens to existing structures;
- (14) Repairing or maintaining principal spillways and appurtenances associated with existing serviceable dams, originally constructed to NRCS standards, in order to meet current safety standards. Work will be confined to the existing footprint of the dam, and no major change in reservoir or downstream operations will result;
- (15) Repairing or improving (deepening/widening/armoring) existing auxiliary/emergency spillways associated with dams, originally constructed to NRCS standards, in order to meet current safety standards. Work will be confined to the dam or abutment areas, and no major change in reservoir or downstream operation will result;
- (16) Repairing embankment slope failures on structures originally built to NRCS standards where the work is confined to the embankment or abutment areas;
- (17) Increasing the freeboard (which is the height from the auxiliary (emergency) spillway crest to the top of embankment) of an existing dam or dike, originally built to NRCS standards by raising the top elevation in order to meet current safety and performance standards. The purpose of the safety

- standard and associated work is to ensure that during extreme rainfall events, flows are confined to the auxiliary/emergency spillway so that the existing structure is not overtopped which may result in a catastrophic failure. Elevating the top of the dam will not result in an increase to lake or stream levels. Work will be confined to the existing dam and abutment areas, and no major change in reservoir operations will result. Examples of work may include the addition of fill material, such as earth or gravel, or placement of parapet walls;
- (18) Modifying existing residential, commercial, and other public and private buildings to prevent flood damages, such as elevating structures or sealing basements to comply with current State safety standards and Federal performance standards;
- (19) Undertaking minor agricultural practices to maintain and/or restore ecological conditions in floodplains after a natural disaster or on lands impacted by human alteration.

 Examples of these practices include: Mowing, haying, grazing, fencing, offstream watering facilities, and invasive species control, which are undertaken when fish and wildlife are not breeding, nesting, rearing young, or during other sensitive timeframes;
- (20) Implementing soil control measures on existing agricultural lands, such as grade stabilization structures (pipe drops), sediment basins, terraces, grassed waterways, filter strips, riparian forest buffer, and critical area planting; and
- (21) Implementing water conservation activities on existing agricultural lands, such as minor irrigation land leveling, irrigation water conveyance (pipelines), irrigation water control structures, and various management practices.

Signed this 7th day of July, 2009, in Washington, DC.

Dave White,

Chief, Natural Resources Conservation Service.

[FR Doc. E9–16400 Filed 7–10–09; 8:45 am] BILLING CODE 3410–16–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 23

[Docket No. CE298; Special Condition No. 23–238–SC]

Special Conditions: Maule Aerospace Technology, Inc.; Maule Model M-7– 230, M-7–230C, and M-9–230 Airplanes; Diesel Cycle Engine Using Turbine (Jet) Fuel

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final special conditions; request

for comments.

SUMMARY: These special conditions are issued for the Maule Model M-7-230, M-7-230C, and M-9-230 airplanes with a Societe de Motorisation Aeronautiques (SMA) Model SR305-230 aircraft diesel engine (ADE). This airplane will have a novel or unusual design feature(s) associated with the installation of a diesel cycle engine utilizing turbine (jet) fuel. The applicable airworthiness regulations do not contain adequate or appropriate safety standards for installation of this new technology engine. These special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

DATES: The effective date of these special conditions is July 2, 2009.

We must receive your comments by August 12, 2009.

ADDRESSES: Mail two copies of your comments to: Federal Aviation Administration, Regional Counsel, ACE-7, Attention: Rules Docket CE298, 901 Locust, Room 506, Kansas City, Missouri 64106. You may deliver two copies to the Rules Docket at the above address. Mark your comments Docket No. CE298. You may inspect comments in the Rules Docket weekdays, except Federal holidays, between 7:30 a.m. and 4 p.m.

FOR FURTHER INFORMATION CONTACT:

Peter L. Rouse, Federal Aviation Administration, Aircraft Certification Service, Small Airplane Directorate, ACE–111, 901 Locust, Kansas City, Missouri, 816–329–4135, fax 816–329– 4090.

SUPPLEMENTARY INFORMATION: The FAA has determined that notice and opportunity for prior public comment hereon are impracticable because these procedures would significantly delay issuance of the design approval and thus delivery of the affected aircraft. In

addition, the substance of these special conditions has been subject to the public comment process in several prior instances with no substantive comments received. The FAA, therefore, finds that good cause exists for making these special conditions effective upon issuance.

Comments Invited

We invite interested persons to take part in this rulemaking by sending written comments, data, or views. The most helpful comments reference a specific portion of the special conditions, explain the reason for any recommended change, and include supporting data. We ask that you send us two copies of written comments.

We will file in the docket all comments we receive, as well as a report summarizing each substantive public contact with FAA personnel about these special conditions. You may inspect the docket before and after the comment closing date. If you wish to review the docket in person, go to the address in the ADDRESSES section of this preamble between 7:30 a.m. and 4 p.m. Monday through Friday, except Federal holidays.

We will consider all comments we receive by the closing date for comments. We will consider comments filed late if it is possible to do so without incurring expense or delay. We may change these special conditions based on the comments we receive.

If you want us to let you know we received your comments on these special conditions, send us a preaddressed, stamped postcard on which the docket number appears. We will stamp the date on the postcard and mail it back to you.

Background

On July 16, 2007, Maule Aerospace Technology, Inc., applied through the Atlanta Aircraft Certification Office to amend Type Certificate 3A23 by certifying derivative Maule airplane Models M–7–230, M–7–230C, and M–9–230 to include the installation of a Societe de Motorisation Aeronautiques (SMA) Model SR305–230 aircraft diesel engine. The SMA Model SR305–230 aircraft diesel engine was previously type certificated in the United States under type certificate number E00067EN.

In anticipation of the reintroduction of diesel engine technology into the small airplane fleet, the FAA issued Policy Statement PS-ACE100-2002-004 on May 15, 2004, which identified areas of technological concern involving introduction of new technology diesel engines into small airplanes. For a more

detailed summary of the FAA's development of diesel engine requirements, refer to this policy.

The general areas of concern involved the power characteristics of the diesel engines, the use of turbine fuel in an airplane class that has typically been powered by gasoline fueled engines, and the vibration characteristics and failure modes of diesel engines. These concerns were identified after review of the historical record of diesel engine used in aircraft and a review of the 14 CFR part 23 regulations, which identified specific regulatory areas that needed to be evaluated for applicability to diesel engine installations. These concerns are not considered universally applicable to all types of possible diesel engines and diesel engine installations. However, after review of the SMA installation on the Maule Airplane, and applying the provisions of the diesel policy, the FAA proposes these fuel system and engine related special conditions. Other special conditions issued in a separate notice include special conditions for HIRF and application of § 23.1309 provisions to the Full Authority Digital Engine Control (FADEC).

Type Certification Basis

Under the provisions of § 21.101, Maule Aerospace Technology, Inc., must show that the Maule Model M–7–230, M–7–230C, and M–9–230 airplanes with the installation of an SMA Model SR305–230 meet the applicable provisions of 14 CFR part 23, as amended by Amendments 23–1 through 23–55 and Civil Air Regulations (CAR) 3 thereto. In addition, the certification basis includes special conditions and equivalent levels of safety for the following:

Special Conditions

- Engine torque (Provisions similar to § 23.361, paragraphs (b)(1) and (c)(3)).
- Flutter (Compliance with § 23.629, paragraphs (e)(1) and (2)).
- Powerplant—Fuel System—Fuel system with water saturated fuel. (Compliance with § 23.951 requirements.)
- Powerplant—Fuel System—Fuel system hot weather operation. (Compliance with § 23.961 requirements.)
- Powerplant—Fuel system—Fuel tank filler connection. (Compliance with § 23.973(f) requirements.)
- Powerplant—Fuel system—Fuel tank outlet. (Compliance with § 23.977 requirements.)
- Equipment—General—Powerplant Instruments. (Compliance with § 23.1305 requirements.)

- Operating Limitations and Information—Powerplant limitations— Fuel grade or designation. (Compliance with § 23.1521(d) requirements.)
- Markings and Placards— Miscellaneous markings and placards— Fuel, oil, and coolant filler openings. (Compliance with § 23.1557(c)(1) requirements.)
- Powerplant—Fuel system—Fuel Freezing.
- Powerplant Installation—One cylinder inoperative.
- Powerplant Installation—High Energy Engine Fragments.

Equivalent levels of safety for:

• Ignition switches § 23.1145

The type certification basis includes exemptions, if any; equivalent level of safety findings, if any; and the special conditions adopted by this rulemaking action.

If the Administrator finds that the applicable airworthiness regulations (*i.e.*, part 23) do not contain adequate or appropriate safety standards for the Maule Model M–7–230, M–7–230C, and M–9–230 airplanes with the installation of an SMA Model SR305–230 ADE because of a novel or unusual design feature, special conditions are prescribed under the provisions of § 21.16.

In addition to the applicable airworthiness regulations and special conditions, the Maule Model M–7–230, M–7–230C, and M–9–230 airplanes with the installation of an SMA Model SR305–230 ADE must comply with the noise certification requirements of 14 CFR part 36.

The FAA issues special conditions, as appropriate, as defined in § 11.19, under § 11.38, and they become part of the type certification basis under § 21.101.

Special conditions are initially applicable to the model for which they are issued. Should the applicant apply for a supplemental type certificate or amended type certificate to modify any other model included on the same type certificate to incorporate the same novel or unusual design feature, the special conditions would also apply to the other model under the provisions of § 21.101.

Novel or Unusual Design Features

The Maule Model M–7–230, M–7–230C, and M–9–230 airplanes with the installation of an SMA Model SR305–230 ADE will incorporate the following novel or unusual design features: The Maule Model M–7–230, M–7–230C, and M–9–230 airplanes with the installation of an SMA Model SR305–230 ADE will incorporate an aircraft diesel engine utilizing turbine (jet) fuel.

Applicability

As discussed above, these special conditions are applicable to the Maule Model M–7–230, M–7–230C, and M–9–230 airplanes with the installation of an SMA Model SR305–230 ADE. Should Maule apply at a later date for a change to the type certificate to modify any other model included on Type Certificate No. 3A23 to incorporate the same novel or unusual design feature, the special conditions would apply to that model as well.

Conclusion

Under standard practice, the effective date of final special conditions would be 30 days after the date of publication in the **Federal Register**; however, as the certification date for the Maule Model M–7–230, M–7–230C, and M–9–230 airplanes is imminent, the FAA finds that good cause exists to make these special conditions effective upon issuance.

This action affects only certain novel or unusual design features on the Maule Model M–7–230, M–7–230C, and M–9–230 airplanes with the installation of an SMA Model SR305–230 ADE. It is not a rule of general applicability, and it affects only the applicant who applied to the FAA for approval of these features on the airplane.

List of Subjects in 14 CFR Part 23

Aircraft, Aviation safety, Signs and symbols.

Citation

■ The authority citation for these special conditions is as follows:

Authority: 49 U.S.C. 106(g), 40113 and 44701; 14 CFR 21.16, and 21.101; and 14 CFR 11.38 and 11.19.

The Special Conditions

Accordingly, pursuant to the authority delegated to me by the Administrator, the following special conditions are issued as part of the type certification basis for the Maule Model M–7–230, M–7–230C, and M–9–230 airplanes with the installation of an SMA Model SR305–230 ADE.

- 1. Engine torque (Provisions similar to $\S 23.361$, paragraphs (b)(1) and (c)(3)):
- (a) For diesel engine installations, the engine mounts and supporting structure must be designed to withstand the following:
- (1) A limit engine torque load imposed by sudden engine stoppage due to malfunction or structural failure.

The effects of sudden engine stoppage may alternately be mitigated to an acceptable level by utilization of isolators, dampers, clutches and similar

- provisions, so that unacceptable load levels are not imposed on any structure.
- (b) The limit engine torque obtained in CAR 3.195(a)(1) and (a)(2) or 14 CFR § 23.361(a)(1) and (a)(2) must be obtained by multiplying the mean torque by a factor of four in lieu of the factor of two required by CAR 3.195(b) and 14 CFR § 23.361(c)(3).
- 2. Flutter—(Compliance with § 23.629 (e)(1) and (e)(2) requirements):

The flutter evaluation of the airplane done in accordance with 14 CFR § 23.629 must include—

- (a) Whirlmode degree of freedom which takes into account the stability of the plane of rotation of the propeller and significant elastic, inertial, and aerodynamic forces, and
- (b) Propeller, engine, engine mount and airplane structure stiffness and damping variations appropriate to the particular configuration, and
- (c) Showing the airplane is free from flutter with one cylinder inoperative.
- 3. Powerplant—Fuel System—Fuel system with water saturated fuel (Compliance with § 23.951 requirements):

Considering the fuel types used by diesel engines, the applicant must comply with the following:

Each fuel system for a diesel engine must be capable of sustained operation throughout its flow and pressure range with fuel initially saturated with water at 80 °F and having 0.75cc of free water per gallon added and cooled to the most critical condition for icing likely to be encountered in operation.

Methods of compliance that are acceptable for turbine engine fuel systems requirements of § 23.951(c) are also considered acceptable for this requirement.

4. Powerplant—Fuel System—Fuel flow (Compliance with § 23.955(c) requirements):

In lieu of 14 CFR 23.955(c), engine fuel system must provide at least 100 percent of the fuel flow required by the engine, or the fuel flow required to prevent engine damage, if that flow is greater than 100 percent. The fuel flow rate must be available to the engine under each intended operating condition and maneuver. The conditions may be simulated in a suitable mockup. This flow must be shown in the most adverse fuel feed condition with respect to altitudes, attitudes, and any other condition that is expected in operation.

5. Powerplant—Fuel System—Fuel system hot weather operation (Compliance with § 23.961 requirements):

In place of compliance with § 23.961, the applicant must comply with the following:

Each fuel system must be free from vapor lock when using fuel at its critical temperature, with respect to vapor formation, when operating the airplane in all critical operating and environmental conditions for which approval is requested. For turbine fuel, or for aircraft equipped with diesel cycle engines that use turbine or diesel type fuels, the initial temperature must be 110 °F, -0°, +5° or the maximum outside air temperature for which approval is requested, whichever is more critical.

The fuel system must be in an operational configuration that will yield the most adverse, that is, conservative results.

To comply with this requirement, the applicant must use the turbine fuel requirements and must substantiate these by flight-testing, as described in Advisory Circular AC 23–8B, Flight Test Guide for Certification of Part 23 Airplanes.

6. Powerplant—Fuel system—Fuel tank filler connection (Compliance with § 23.973(f) requirements):

In place of compliance with § 23.973(e) and (f), the applicant must comply with the following:

For airplanes that operate on turbine or diesel type fuels, the inside diameter of the fuel filler opening must be no smaller than 2.95 inches.

7. Powerplant—Fuel system—Fuel tank outlet (Compliance with § 23.977 requirements):

In place of compliance with § 23.977(a)(1) and (a)(2), the applicant will comply with the following:

There must be a fuel strainer for the fuel tank outlet or for the booster pump. This strainer must, for diesel engine powered airplanes, prevent the passage of any object that could restrict fuel flow or damage any fuel system component.

8. Equipment—General—Powerplant Instruments (Compliance with § 23.1305):

In addition to compliance with § 23.1305, the applicant will comply with the following:

The following are required in addition to the powerplant instruments required in § 23.1305:

- (a) A fuel temperature indictor, or
- (b) An outside air temperature (OAT) indicator.
- (c) An indicating means for the fuel strainer or filter required by § 23.997 to indicate the occurrence of contamination of the strainer or filter before it reaches the capacity established in accordance with § 23.997(d).

Alternately, no indicator is required if the engine can operate normally for a specified period with the fuel strainer exposed to the maximum fuel contamination as specified in MIL—5007D and provisions for replacing the fuel filter at this specified period (or a shorter period) are included in the maintenance schedule for the engine installation.

9. Operating Limitations and Information—Powerplant limitations—Fuel grade or designation (Compliance with § 23.1521 requirements):

All engine parameters that have limits specified by the engine manufacturer for takeoff or continuous operation must be investigated to ensure they remain within those limits throughout the expected flight and ground envelopes (e.g., maximum and minimum fuel temperatures, ambient temperatures, as applicable, etc.). This is in addition to the existing requirements specified by 14 CFR 23.1521(b) and (c). If any of those limits can be exceeded, there must be continuous indication to the flight crew of the status of that parameter with appropriate limitation markings.

Instead of compliance with § 23.1521(d), the applicant must comply with the following:

The minimum fuel designation (for diesel engines) must be established so that it is not less than that required for the operation of the engines within the limitations in paragraphs (b) and (c) of § 23.1521.

10. Markings and Placards— Miscellaneous markings and placards— Fuel, oil, and coolant filler openings (Compliance with § 23.1557(c)(1) requirements):

Instead of compliance with § 23.1557(c)(1), the applicant must comply with the following:

Fuel filler openings must be marked at or near the filler cover with—

For diesel engine-powered airplanes—

(a) The words "Jet Fuel"; and

(b) The permissible fuel designations, or references to the Airplane Flight Manual (AFM) for permissible fuel designations.

(c) A warning placard or note that states the following or similar:

"Warning—this airplane equipped with an aircraft diesel engine, service with approved fuels only."

The colors of this warning placard should be black and white.

11. Powerplant—Fuel system—Fuel-Freezing:

If the fuel in the tanks cannot be shown to flow suitably under all possible temperature conditions, then fuel temperature limitations are required. These will be considered as part of the essential operating parameters for the aircraft and must be limitations.

A minimum takeoff temperature limitation will be determined by testing to establish the minimum cold-soaked temperature at which the airplane can operate. The minimum operating temperature will be determined by testing to establish the minimum operating temperature acceptable after takeoff from the minimum takeoff temperature. If low temperature limits are not established by testing, then a minimum takeoff and operating fuel temperature limit of 5 °F above the gelling temperature of Jet A will be imposed. The low temperature limit may be 5 °F above the gelling temperature of Jet A with fuel additives, if the additives are included in the limitations section of the Airplane Flight Manual. A display in the cockpit of either fuel temperature or outside temperature is required.

12. Powerplant Installation—One

cylinder inoperative:

It must be shown by test or analysis, or by a combination of methods, that the airframe can withstand the shaking or vibratory forces imposed by the engine if a cylinder becomes inoperative. Diesel engines of conventional design typically have extremely high levels of vibration when a cylinder becomes inoperative.

No unsafe condition will exist in the case of an inoperative cylinder before the engine can be shut down. The resistance of the airframe structure, propeller, and engine mount to shaking moment and vibration damage must be investigated. It must be shown by test or analysis, or by a combination of methods, that shaking and vibration damage from the engine with an inoperative cylinder will not cause a catastrophic airframe, propeller, or engine mount failure.

13. Powerplant Installation—High

Energy Engine Fragments:

It may be possible for diesel engine cylinders (or portions thereof) to fail and physically separate from the engine at high velocity (due to the high internal pressures). This failure mode will be considered possible in engine designs with removable cylinders or other non-integral block designs. The following is required:

(1) It must be shown by the design of the engine that engine cylinders, other engine components or portions thereof (fragments) cannot be shed or blown off of the engine in the event of a catastrophic engine failure; or

(2) It must be shown that all possible liberated engine parts or components do not have adequate energy to penetrate engine cowlings; or

(3) Assuming infinite fragment energy, and analyzing the trajectory of the probable fragments and components, any hazard due to liberated engine parts or components will be minimized and the possibility of crew injury eliminated. Minimization must be considered during initial design and not presented as an analysis after design completion.

Issued in Kansas City, Missouri, on July 2, 2009.

Scott A. Horn,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

SOCIAL SECURITY ADMINISTRATION

20 CFR Parts 404 and 416

[Docket No. SSA-2009-0023]

RIN 0960-AH01

Attorney Advisor Program Sunset Date Extension

AGENCY: Social Security Administration. **ACTION:** Final rule.

SUMMARY: We are extending for two years our rule authorizing attorney advisors to conduct certain prehearing procedures and to issue fully favorable decisions. The current rule is scheduled to expire on August 10, 2009. In this final rule, we are extending the sunset date to August 10, 2011. We are making no other substantive changes.

DATES: This final rule is effective July 13, 2009.

FOR FURTHER INFORMATION CONTACT:

Marilyn Hull, Social Security Administration, 5107 Leesburg Pike, Falls Church, VA 22041–3260, 703– 605–8500 for information about this final rule. For information on eligibility or filing for benefits, call our national toll-free number, 1–800–772–1213 or TTY 1–800–325–0778, or visit our Internet site, Social Security Online, at http://www.socialsecurity.gov.

SUPPLEMENTARY INFORMATION:

Electronic Version

The electronic file of this document is available on the date of publication in the **Federal Register** at http://www.gpoaccess.gov/fr/index.html.

Background

On August 9, 2007, we issued an interim final rule permitting some attorney advisors to conduct certain prehearing procedures. 72 FR 44763. We instituted this practice to enable us to provide more timely service to the increasing number of applicants for Social Security disability benefits and SSI payments based on disability. We considered the public comments we received on the interim final rule and, on March 3, 2008, issued the rule without change as a final rule. 73 FR 11349. Under this rule, attorney advisors may develop claims and, in appropriate cases, issue fully favorable decisions.

We included in the interim final rule a provision that the program would end on August 10, 2009, unless we decided to either terminate the rule earlier or to extend it beyond that date. We explained that we would announce any such termination or extension by publishing a final rule. 72 FR 44763, 44764 (August 10, 2007).

Explanation of Changes

The number of requests for hearings has increased significantly in recent years, and we expect that trend to continue. While we are pursuing a number of initiatives to address this increase, it will take time to feel the full effects. The attorney advisor program is an important part of our ongoing efforts to decide cases efficiently, issue decisions timely, and reduce the number of claims pending at the hearing level. Accordingly, we have decided to extend the attorney advisor rule for two more years, until August 10, 2011. As before, we are reserving the authority to end the program earlier, or to extend it, by publishing a final rule in the **Federal** Register.

We are also making a minor editorial change to the language in this rule. We are changing the term "wholly favorable" to "fully favorable" in §§ 404.942 and 416.1442, for clarity and consistency.

Regulatory Procedures

Justification for Issuing Final Rule Without Notice and Comment

We follow the Administrative Procedure Act (APA) rulemaking procedures specified in 5 U.S.C. 553 when developing regulations. Section

702(a)(5) of the Social Security Act, 42 U.S.C. 902(a)(5). The APA provides exceptions to its notice and public comment procedures when an agency finds there is good cause for dispensing with such procedures because they are impracticable, unnecessary, or contrary to the public interest. We have determined that good cause exists for dispensing with the notice and public comment procedures for this rule. 5 U.S.C. 553(b)(B). Good cause exists because this final rule only extends the sunset date of an existing rule. It makes no substantive changes to the rule. The current regulations expressly provide that we may extend or terminate this rule. Therefore, we have determined that opportunity for prior comment is unnecessary, and we are issuing this rule as a final rule.

In addition, because we are not making any substantive changes to an existing rule, there is good cause for dispensing with the 30-day delay in the effective date of a substantive rule provided by 5 U.S.C. 553(d)(3). To ensure that we have uninterrupted authority to use attorney advisors to reduce the number of pending cases at the hearing level, it is in the public interest to make this final rule effective on the date of publication.

Executive Order 12866

We have consulted with the Office of Management and Budget (OMB) and determined that this final rule does not meet the criteria for a significant regulatory action under Executive Order 12866 and was not subject to OMB formal review.

Regulatory Flexibility Act

We certify that this final rule will not have a significant economic impact on a substantial number of small entities as it affects only persons. Therefore, a regulatory flexibility analysis is not required under the Regulatory Flexibility Act, as amended.

Paperwork Reduction Act

This final rule contains reporting requirements in the regulation sections listed below. However, because there are fewer than ten respondents for each section, the Paperwork Reduction Act of 1995 does not require us to seek OMB clearance for these sections.

Regulation section	Description of public reporting requirement	Number of respond- ents (annually)	Frequency of response	Average burden per response (minutes)	Estimated annual burden
404.942(a), 416.1442(a).	If prehearing proceedings are not complete before the date of a hearing, an administrative law judge (ALJ) will receive the case unless a fully favorable decision is in process or all of the parties in the hearing agree in writing to delay the hearing until the proceedings are completed.	Less than 10 (PRA exempt).			
404.942(d), 416.1442(d).	If the attorney advisor issues a fully favorable decision under this section, we will mail a written notice of the decision to all parties at their last known address. We will state the basis for the decision and advise all parties that an ALJ will dismiss the hearing request unless a party requests that the hearing proceed. Parties who want to proceed with the hearing must request in writing within 30 days after the notice of the attorney advisor's decision is mailed.	Less than 10 (PRA-exempt).

Dated: July 7, 2009.

Michael J. Astrue,

Commissioner of Social Security.

■ For the reasons stated in the preamble, we are amending subpart J of part 404 and subpart N of part 416 of chapter III of title 20 of the Code of Federal Regulations as set forth below:

PART 404—FEDERAL OLD-AGE, SURVIVORS AND DISABILITY INSURANCE

(1950-)

Subpart J—[Amended]

■ 1. The authority citation for subpart J of part 404 continues to read as follows:

Authority: Secs. 201(j), 204(f), 205(a), (b), (d)–(h), and (j), 221, 223(i), 225, and 702(a)(5)

of the Social Security Act (42 U.S.C. 401(j), 404(f), 405(a), (b), (d)–(h), and (j), 421, 423(i), 425, and 902(a)(5)); sec. 5, Public Law 97–455, 96 Stat. 2500 (42 U.S.C. 405 note); secs. 5, 6(c)–(e), and 15, Public Law 98–460, 98 Stat. 1802 (42 U.S.C. 421 note); sec. 202, Public Law 108–203, 118 Stat. 509 (42 U.S.C. 902 note)

■ 2. In § 404.942, amend the second and fourth sentences of paragraph (a), paragraphs (b)(4) and (c)(2), and the first sentence of paragraph (d) by removing the words "wholly favorable" and adding in their place the words "fully favorable," and revise paragraph (g) to read as follows:

§ 404.942 Prehearing proceedings and decisions by attorney advisors.

* * * * *

(g) Sunset provision. The provisions of this section will no longer be effective on August 10, 2011, unless we terminate them earlier or extend them beyond that date by notice of a final rule in the **Federal Register**.

PART 416—SUPPLEMENTAL SECURITY INCOME FOR THE AGED, BLIND, AND DISABLED

Subpart N—[Amended]

■ 3. The authority citation for subpart N continues to read as follows:

Authority: Secs. 702(a)(5), 1631, and 1633 of the Social Security Act (42 U.S.C. 902(a)(5), 1383, and 1383b); sec. 202, Public Law 108–203, 118 Stat. 509 (42 U.S.C. 902 note).

■ 4. In § 416.1442, amend the second and fourth sentences of paragraph (a), paragraphs (b)(4) and (c)(2), and the first

sentence of paragraph (d) by removing the words "wholly favorable" and adding in their place the words "fully favorable," and revise paragraph (g) to read as follows:

§ 416.1442 Prehearing proceedings and decisions by attorney advisors.

* * * * *

(g) Sunset provision. The provisions of this section will no longer be effective on August 10, 2011, unless we terminate them earlier or extend them beyond that date by notice of a final rule in the **Federal Register**.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[USCG-09-0210]

Drawbridge Operation Regulations; Hackensack River, Jersey City, NJ, Maintenance

AGENCY: Coast Guard, DHS.

ACTION: Notice cancelling temporary deviation from regulations.

SUMMARY: The Coast Guard is cancelling the temporary deviation concerning the operation of the Witt Penn Bridge across the Hackensack River at mile 3.1, across the Hackensack River, at Jersey City, New Jersey. A temporary deviation was previously approved for the Lower Hack

Bridge at mile 3.4 across the Hackensack River and notice of that temporary deviation was made along with the notice for the Witt Penn Bridge. This temporary deviation was issued to facilitate bridge maintenance for the above bridges; however, the maintenance for the Witt Penn Bridge has been postponed necessitating the early cancellation of that portion of the temporary deviation. The maintenance of the Lower Hack Bridge will continue as planned, and the temporary deviation approved for the Lower Hack Bridge remains in effect. Once new dates are provided for the maintenance of the Witt Penn Bridge any new temporary deviation will be published in the Federal Register.

DATES: The temporary deviation published on April 29, 2009 (74 FR 19421) pertaining to the Witt Penn Bridge across the Hackensack River at mile 3.1, across the Hackensack River, at Jersey City, New Jersey is cancelled as of June 23, 2009.

ADDRESSES: The docket for this cancelled deviation is available for inspection or copying at the Docket Management Facility (M-30), U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. You may also find this docket on the Internet by going to http://www.regulations.gov, selecting the Advanced Docket Search option on the right side of the screen, inserting USCG-2009-0210 in the Docket ID box, pressing Enter, and then clicking on the item in the Docket ID column.

FOR FURTHER INFORMATION CONTACT: Gary Kassof, Project Officer, First Coast Guard District, *gary.kassof@uscg.mil*, telephone 212–668–7165.

SUPPLEMENTARY INFORMATION:

Background and Purpose

On April 29, 2009, we published a temporary deviation entitled "Drawbridge Operation Regulations; New Jersey" in the **Federal Register** (71 FR 19421). The temporary deviation concerned the Witt Penn Bridge at mile 3.1, and the Lower Hack Bridge, mile 3.4, both across the Hackensack River at Jersey City, New Jersey.

Cancellation

The Coast Guard received an additional request from the bridge owner of the Witt Penn Bridge, New Jersey Department of Transportation, on June 10, 2009, requesting the cancellation of the temporary deviation for the Witt Penn Bridge because the

scheduled maintenance repairs did not begin on schedule due to a contractual dispute.

The work for the Lower Hack Bridge began on schedule and will continue through July 22, 2009, as planned.

The remaining bridge closure time period necessary to complete the maintenance work for the Lower Hack Bridge remains in effect through July 22, 2009. If granted, a temporary deviation for the Witt Penn Bridge covering the revised maintenance work period will be published under a new temporary deviation in the **Federal Register**.

The need to cancel the temporary deviation for the scheduled maintenance at the Witt Penn Bridge was due to a contractual dispute which delayed the start date of the bridge maintenance.

Dated: June 17, 2009.

Garv Kassof.

Bridge Program Manager, First Coast Guard District.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA-R03-OAR-2009-0352; FRL-8929-2]

Approval and Promulgation of Air Quality Implementation Plans; Pennsylvania; Allegheny County, Continuous Opacity Monitor Regulation

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: EPA is taking direct final action to approve revisions to the Pennsylvania State Implementation Plan (SIP). This SIP revision, "Revision 58, Continuous Opacity Monitor Regulation Changes," consists of changes to the Allegheny County Health Department (ACHD) Rules and Regulations, Article XXI, Air Pollution Control. EPA is approving this revision to the Pennsylvania SIP in accordance with the requirements of the Clean Air Act (CAA).

DATES: This rule is effective on September 11, 2009 without further notice, unless EPA receives adverse written comment by August 12, 2009. If EPA receives such comments, it will publish a timely withdrawal of the direct final rule in the **Federal Register** and inform the public that the rule will not take effect.

ADDRESSES: Submit your comments, identified by Docket ID Number EPA–R03–OAR–2009–0352 by one of the following methods:

A. http://www.regulations.gov. Follow the on-line instructions for submitting comments.

B. E-mail:

fernandez.cristina@epa.gov.

C. Mail: EPA-R03-OAR-2009-0352, Cristina Fernandez, Chief, Air Quality Planning Branch, Mailcode 3AP21, U.S. Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103.

D. Hand Delivery: At the previously listed EPA Region III address. Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID No. EPA-R03-OAR-2009-0352. EPA's policy is that all comments received will be included in the public docket without change, and may be made available online at http:// www.regulations.gov, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through http:// www.regulations.gov or e-mail. The http://www.regulations.gov Web site is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through http:// www.regulations.gov, your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. Docket: All documents in the

Docket: All documents in the electronic docket are listed in the http://www.regulations.gov index. Although listed in the index, some information is not publicly available, i.e., CBI or other information whose disclosure is restricted by statute.

Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically in http:// www.regulations.gov or in hard copy during normal business hours at the Air Protection Division, U.S. Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103. Copies of the State submittal are available at the Allegheny County Health Department, Bureau of Environmental Quality, Division of Air Quality, 301 39th Street, Pittsburgh, Pennsylvania 15201.

FOR FURTHER INFORMATION CONTACT: Maria A. Pino, (215) 814–2181, or by e-mail at *pino.maria@epa.gov*.

SUPPLEMENTARY INFORMATION:

I. Background

On May 16, 2007, the Commonwealth of Pennsylvania submitted a formal revision to the Pennsylvania SIP. The SIP revision consists of changes to Article XXI of the ACHD Rules and Regulations to specify the method to determine compliance with opacity requirements for coke oven combustion stacks, allow the use of continuous opacity monitoring systems (COMS) to measure visual emissions, and remove a redundant phrase in the current approved SIP.

II. Summary of SIP Revision

The revisions in "Revision 58, Continuous Opacity Monitor Regulation Changes" make three changes to the ACHD Rules and Regulations, Article XXI. Air Pollution Control.

The revision to § 2105.21.f specifies the method to determine compliance with opacity requirements for coke oven combustion stacks. The new language states that opacity measurements are to be performed according to the methods established in § 2107.11. This addition to § 2105.21.f strengthens the Pennsylvania SIP because the current SIP does not specify visible emission compliance methods for coke oven combustion stacks.

The revision to § 2107.11 allows the use of COMS to measure visual emissions. Previously, compliance with visible emission requirements was determined only by EPA Method 9, which requires a certified smoke reader to observe the emissions leaving the stack during daylight hours. EPA Method 9 had been the only federally acceptable method to determine compliance with visibility emissions. However, on February 24, 1997, EPA promulgated its Credible Evidence

Revisions, which clarified that non-reference test data, i.e., any creditable evidence, can be used in enforcement actions and for compliance determinations under the Clean Air Act (62 FR 8314). Thus, Method 9 is not the exclusive means to determining compliance with visibility requirements, and the use of data from COMS is deemed acceptable. This change strengthens the Pennsylvania SIP by allowing the use of COMS data to determine compliance with visibility requirements, which will make compliance determinations easier.

The revision to § 2108.03 removes the redundant phrase, "within the time specified," in the current approved SIP. This revision does not change the meaning of § 2108.03, but adds clarity. Therefore, this revision is approvable.

III. Final Action

EPA is approving "Revision 58, Continuous Opacity Monitor Regulation Changes," submitted by the Commonwealth of Pennsylvania on May 16, 2007. The revision to § 2105.21.f specifies the method to determine compliance with opacity requirements for coke oven combustion stacks in Allegheny County. The revision to § 2107.11 allows the use of COMS to measure visual emissions in Alleghenv County. The revision to § 2108.03 removes a redundant phrase in the current approved SIP. EPA is approving these revisions to the Pennsylvania SIP in accordance with the requirements of the CAA.

EPA is publishing this rule without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comment. This revision to the Pennsylvania SIP serves to strengthen and add clarity to the SIP, but does not add any new regulatory requirements. However, in the "Proposed Rules" section of today's Federal Register, EPA is publishing a separate document that will serve as the proposal to approve the SIP revision if adverse comments are filed. This rule will be effective on September 11, 2009 without further notice unless EPA receives adverse comment by August 12, 2009. If EPA receives adverse comment, EPA will publish a timely withdrawal in the **Federal Register** informing the public that the rule will not take effect. EPA will address all public comments in a subsequent final rule based on the proposed rule. EPA will not institute a second comment period on this action. Any parties interested in commenting must do so at this time. Please note that if EPA receives adverse comment on an amendment, paragraph, or section of

this rule and if that provision may be severed from the remainder of the rule, EPA may adopt as final those provisions of the rule that are not the subject of an adverse comment.

IV. Statutory and Executive Order Reviews

A. General Requirements

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the State, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

B. Submission to Congress and the Comptroller General

The Congressional Review Act, 5 U.S.C. 801 et seq., as added by the Small **Business Regulatory Enforcement** Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the Federal Register. A major rule cannot take effect until 60 days after it is published in the Federal Register. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

C. Petitions for Judicial Review

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by September 11, 2009. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. Parties with objections to this direct final rule are encouraged to file a comment in response to the parallel notice of proposed rulemaking for this action published in the proposed rules section of today's Federal Register, rather than file an immediate petition for judicial review of this direct final rule, so that EPA can withdraw this direct final rule and address the comment in the proposed rulemaking.

This action, which revises the Pennsylvania SIP to establish the method to determine compliance with opacity requirements for coke oven combustion stacks and allows the use of COMS to measure visible emissions in Allegheny County, and removes a redundant phrase in the current

approved SIP, may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Nitrogen dioxide, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides.

Dated: July 1, 2009.

William C. Early,

Acting Regional Administrator, Region III.

■ 40 CFR part 52 is amended as follows:

PART 52—[AMENDED]

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 et seq.

Subpart NN—Pennsylvania

■ 2. In § 52.2020, the table in paragraph (c)(2) is amended by revising the entries for Article XXI, Sections 2105.21, 2107.11, and 2108.03 to read as follows:

§ 52.2020 Identification of plan.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[VA201-5202; FRL-8923-9]

Approval and Promulgation of Air Quality Implementation Plans; Virginia; **Update to Materials Incorporated by** Reference

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; administrative change.

SUMMARY: EPA is updating the materials submitted by Virginia that are incorporated by reference (IBR) into the State implementation plan (SIP). The regulations affected by this update have been previously submitted by the Virginia Department of Environmental Quality (DEQ) and approved by EPA. This update affects the SIP materials that are available for public inspection at the National Archives and Records Administration (NARA), the Air and Radiation Docket and Information Center located at EPA Headquarters in Washington, DC, and the Regional Office.

DATES: *Effective Date:* This action is effective July 13, 2009.

ADDRESSES: SIP materials which are incorporated by reference into 40 CFR part 52 are available for inspection at the following locations: Air Protection Division, U.S. Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103; the Air and Radiation Docket and Information Center, EPA Headquarters Library, Room Number 3334, EPA West Building, 1301 Constitution Ave. NW., Washington, DC 20460, and the National Archives and Records Administration. If you wish to obtain materials from a docket in the EPA Headquarters Library, please call the Office of Air and Radiation (OAR) Docket/Telephone number: (202) 566-1742; or the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to: http://www.archives.gov/ federal register/code of federal regulations/ibr locations.html.

FOR FURTHER INFORMATION CONTACT: Harold A. Frankford, (215) 814-2108 or by e-mail at frankford.harold@epa.gov. SUPPLEMENTARY INFORMATION:

I. Background

The SIP is a living document which the State revises as necessary to address the unique air pollution problems. Therefore, EPA from time to time must take action on SIP revisions containing new and/or revised regulations to make them part of the SIP. On May 22, 1997 (62 FR 27968), EPA revised the procedures for incorporating by reference Federally-approved SIPs, as a result of consultations between EPA and the Office of the Federal Register (OFR). The description of the revised SIP document, IBR procedures and "Identification of plan" format are discussed in further detail in the May 22, 1997 Federal Register document. On April 21, 2000 (65 FR 21315), EPA published a Federal Register action beginning the new IBR procedure for Virginia. On September 8, 2004 (69 FR 54216). November 3, 2005 (70 FR 66769) and July 16, 2007 (72 FR 38920), EPA published updates to the IBR material for Virginia.

II. EPA Action

In this document, EPA is doing the following:

- A. Announcing the update to the IBR material as of June 1, 2009.
- B. Making corrections to the following entries listed in the paragraph 52.2420(c) table, as described below:
- 1. In the entry 5-20-203, revising the text in the "Title/subject" column.
- 2. Revising the titles for the following entries: Chapter 40, Part II, Articles 49
- 3. Incorporating the entry for 5-40-1750.
- 4. In the entry 5-40-1670, reorganizing the text in the "Title/ subject" and "Explanation [former SIP citation]" columns without making any substantive revisions to the list of SIPapproved definitions.
- 5. In the entry 5–40–5610, removing the quotation marks from the terms listed in the "Explanation [former SIP section]" column.
- 6. In the entry 5-40-7810, removing the quotation marks from the terms listed in the "Title/subject" column.
- 7. Removing entries 5-80-1835, 5-80-1845, and 5-80-1855, they are designated as "reserved," and contain no text that is incorporated by reference.
- 8. In the entry 5–80–2130, correcting a typographical error to the text in the ''Title/subject'' column.
- 9. Correcting the date format in the "State effective date" column for the following entries: Chapter 10, section 5-10-20; Chapter 20, section 5-20-203; Chapter 40, Part II, Article 4, section 5-40-300; Article 36, section 5-40-5060;

Article 37, section 5-40-5200; Article 41, section 5-40-5700; Article 42, sections 5-40-5700, 5-40-5720, and 5-20-5750; Article 48, section 5-40-6970; Article 49, sections 5-40-7120, 5-40-7130, 5-40-7140, and 5-40-7210; Article 50, sections 5-40-7240, 5-40-7270, 5–40–7300, 5–40–7330, and 5–40– 7360; Article 53, all sections; and Chapter 230, all sections.

C. In the paragraph 52.2420(d) table, correcting the date format in the "State effective date" column for the following entries: Columbia Gas Transmission Company-Loudoun County Compressor Station, and Global Stone Chemstone

Corporation.

D. Making corrections to the following entries listed in the paragraph 52.2420(e) table, as described below:

- 1. Rearranging the order of entries for "Documents Incorporated by Reference."
- 2. Correcting the date format in the "State effective date" column for the following entries: All nonregulatory and quasi-regulatory entries associated with the Washington 1-hour ozone nonattainment area, and the entry for RACT under the 8-Hour NAAQS (Stafford County).
- 3. Removing the SIP effective date text in the "Additional explanation column" for the entry entitled "Documents Incorporated by Reference (9 VAC 5-20-21, Paragraphs E.4.a.(21) and (22))." EPA has determined that today's rule falls under the "good cause" exemption in section 553(b)(3)(B) of the Administrative Procedures Act (APA) which, upon finding "good cause," authorizes agencies to dispense with public participation, and section 553(d)(3) which allows an agency to make a rule effective immediately (thereby avoiding the 30-day delayed effective date otherwise provided for in the APA). Today's rule simply codifies provisions which are already in effect as a matter of law in Federal and approved State programs. Under section 553 of the APA, an agency may find good cause where procedures are "impractical, unnecessary, or contrary to the public interest." Public comment is "unnecessary" and "contrary to the public interest" since the codification only reflects existing law. Immediate notice in the CFR benefits the public by removing outdated citations and incorrect chart entries.

III. Statutory and Executive Order Reviews

A. General Requirements

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999):
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

B. Submission to Congress and the Comptroller General

The Congressional Review Act, 5 U.S.C. 801 et seq., as added by the Small **Business Regulatory Enforcement** Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the Federal Register. This rule is not a "major rule" as defined by 5 U.S.C. 804(2).

C. Petitions for Judicial Review

EPA has also determined that the provisions of section 307(b)(1) of the Clean Air Act pertaining to petitions for judicial review are not applicable to this action. Prior EPA rulemaking actions for each individual component of the Virginia SIP compilations had previously afforded interested parties the opportunity to file a petition for judicial review in the United States Court of Appeals for the appropriate circuit within 60 days of such rulemaking action. Thus, EPA sees no need in this action to reopen the 60-day period for filing such petitions for judicial review for this "Identification of plan" reorganization update action for Virginia.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Dated: June 11, 2009.

William C. Early,

Acting Regional Administrator, Region III.

■ 40 CFR part 52 is amended as follows:

PART 52—[AMENDED]

■ 1. The authority for citation for part 52 continues to read as follows:

Authority: 42.U.S.C. 7401 et seq.

Subpart VV—Virginia

■ 2. Section 52.2420 is amended by revising paragraphs (b), (c), (d), and (e) to read as follows:

§ 52.2420 Identification of plan.

(b) Incorporation by reference.

- (1) Material listed as incorporated by reference in paragraphs (c) and (d) was approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Material incorporated as
- it exists on the date of the approval, and notice of any change in the material will be published in the **Federal Register**. Entries in paragraphs (c) and (d) of this section with EPA approval dates on or after June 1, 2009 will be incorporated by reference in the next update to the SIP compilation.
- (2) EPA Region III certifies that the rules/regulations and source-specific requirements provided by EPA at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated State rules/regulations and source-specific requirements which have been approved as part of the State implementation plan as of June 1, 2009.
- (3) Copies of the materials incorporated by reference may be inspected at the EPA Region III Office at 1650 Arch Street, Philadelphia, PA 19103. For further information, call (215) 814–2108; the EPA, Air and Radiation Docket and Information Center, Room Number 3334, EPA West Building, 1301 Constitution Avenue NW., Washington, DC. 20460. For further information, call (202) 566-1742; or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to: http://www.archives.gov/ federal register/code of federal regulations/ibr locations.html.

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

44 CFR Part 65

[Docket ID FEMA-2008-0020; Internal Agency Docket No. FEMA-B-1059]

Changes in Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, DHS. **ACTION:** Interim rule.

SUMMARY: This interim rule lists communities where modification of the Base (1% annual-chance) Flood Elevations (BFEs) is appropriate because of new scientific or technical data. New flood insurance premium rates will be calculated from the modified BFEs for new buildings and their contents.

DATES: These modified BFEs are currently in effect on the dates listed in the table below and revise the Flood Insurance Rate Maps (FIRMs) in effect prior to this determination for the listed communities.

From the date of the second publication of these changes in a newspaper of local circulation, any person has ninety (90) days in which to request through the community that the Mitigation Assistant Administrator of FEMA reconsider the changes. The modified BFEs may be changed during the 90-day period.

ADDRESSES: The modified BFEs for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the table below.

FOR FURTHER INFORMATION CONTACT:

William R. Blanton Jr., Engineering Management Branch, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646–3151.

SUPPLEMENTARY INFORMATION: The modified BFEs are not listed for each community in this interim rule. However, the address of the Chief Executive Officer of the community where the modified BFE determinations are available for inspection is provided.

Any request for reconsideration must be based on knowledge of changed conditions or new scientific or technical data.

The modifications are made pursuant to section 201 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.*, and with 44 CFR part 65.

For rating purposes, the currently effective community number is shown and must be used for all new policies and renewals.

The modified BFEs are the basis for the floodplain management measures that the community is required to either adopt or to show evidence of being already in effect in order to qualify or to remain qualified for participation in the National Flood Insurance Program (NFIP).

These modified BFEs, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by the other Federal, State, or regional entities.

The changes in BFEs are in accordance with 44 CFR 65.4.

National Environmental Policy Act. This interim rule is categorically excluded from the requirements of 44 CFR part 10, Environmental Consideration. An environmental impact assessment has not been prepared.

Regulatory Flexibility Act. As flood elevation determinations are not within the scope of the Regulatory Flexibility Act, 5 U.S.C. 601–612, a regulatory flexibility analysis is not required.

Regulatory Classification. This interim rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Executive Order 13132, Federalism. This interim rule involves no policies that have federalism implications under Executive Order 13132, Federalism.

Executive Order 12988, Civil Justice Reform. This interim rule meets the applicable standards of Executive Order 12988.

List of Subjects in 44 CFR Part 65

Flood insurance, Floodplains, Reporting and recordkeeping requirements.

■ Accordingly, 44 CFR part 65 is amended to read as follows:

PART 65—[AMENDED]

■ 1. The authority citation for part 65 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.*; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

§65.4 [Amended]

■ 2. The tables published under the authority of § 65.4 are amended as follows:

BILLING CODE 9110-12-P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

44 CFR Part 67

Final Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Final rule.

SUMMARY: Base (1% annual chance) Flood Elevations (BFEs) and modified BFEs are made final for the communities listed below. The BFEs and modified BFEs are the basis for the floodplain management measures that each community is required either to adopt or to show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The date of issuance of the Flood Insurance Rate Map (FIRM) showing BFEs and modified BFEs for each community. This date may be obtained by contacting the office where the maps

are available for inspection as indicated on the table below.

ADDRESSES: The final BFEs for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the table below.

FOR FURTHER INFORMATION CONTACT:

William R. Blanton, Jr., Engineering Management Section, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646–3151.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) makes the final determinations listed below for the modified BFEs for each community listed. These modified elevations have been published in newspapers of local circulation and ninety (90) days have elapsed since that publication. The Mitigation Division Director of FEMA has resolved any appeals resulting from this notification.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR part 67. FEMA has developed criteria for floodplain management in floodprone areas in accordance with 44 CFR part 60.

Interested lessees and owners of real property are encouraged to review the proof Flood Insurance Study and FIRM available at the address cited below for each community.

The BFEs and modified BFEs are made final in the communities listed below. Elevations at selected locations in each community are shown.

National Environmental Policy Act. This final rule is categorically excluded from the requirements of 44 CFR part 10, Environmental Consideration. An environmental impact assessment has not been prepared.

Regulatory Flexibility Act. As flood elevation determinations are not within the scope of the Regulatory Flexibility Act, 5 U.S.C. 601–612, a regulatory flexibility analysis is not required.

Regulatory Classification. This final rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Executive Order 13132, Federalism. This final rule involves no policies that have federalism implications under Executive Order 13132.

Executive Order 12988, Civil Justice Reform. This final rule meets the applicable standards of Executive Order 12988.

List of Subjects in 44 CFR Part 67

Administrative practice and procedure, Flood insurance, Reporting and recordkeeping requirements.

■ Accordingly, 44 CFR part 67 is amended as follows:

PART 67—[AMENDED]

■ 1. The authority citation for part 67 continues to read as follows:

RIN 0648-AU26

Fisheries Off West Coast States; Coastal Pelagic Species Fishery; Amendment 12 to the Coastal Pelagic Species Fishery Management Plan

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule

SUMMARY: NMFS issues this final rule to implement Amendment 12 to the Coastal Pelagic Species (CPS) Fishery Management Plan (FMP) which would provide protection for all species of krill off the West Coast (i.e., California,

Oregon and Washington). This rule would prohibit the harvest of all species of krill by any fishing vessel operating in the Exclusive Economic Zone (EEZ) off the West Coast, and would also deny the use of exempted fishing permits to allow krill fishing.

DATES: Effective August 12, 2009.

ADDRESSES: Copies of Amendment 12, which includes an Environmental Assessment/Initial Regulatory
Flexibility Analysis/Regulatory Impact Review, are available from Rodney R.
McInnis, Regional Administrator,
Southwest Region, NMFS, 501 West
Ocean Blvd., Suite 4200, Long Beach,CA 90802.

FOR FURTHER INFORMATION CONTACT:

Joshua B. Lindsay, Sustainable Fisheries Division, NMFS, at 562–980–4034 or Mike Burner, Pacific Fishery Management Council, at 503–820–2280. SUPPLEMENTARY INFORMATION: The CPS fishery in the EEZ off the West Coast is

fishery in the EEZ off the West Coast is managed under the CPS FMP, which was developed by the Pacific Fishery Management Council (Council) pursuant to the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). The CPS FMP was approved by the Secretary of Commerce on June 10, 1999, and was implemented by a final rule (64 FR 69888, December 15, 1999) that was codified at 50 CFR part 660, subpart I.

Amendment 12, which was approved by the Secretary of Commerce on May 25, 2007, added all species of krill as a management unit species under the CPS FMP and placed krill under a newly established "prohibited harvest species" category. This new category differs from the existing "prohibited species" definition in the FMP because "prohibited harvest species" may not be taken by any fishery or gear type in the U.S. EEZ. In contrast, "prohibited species" may not be taken and retained incidentally by CPS fishery participants, but are legally harvested under provisions in Federal regulations implementing other Council FMPs.

As the principal food source for many fish and non-fish species, krill are a critical component of the marine ecosystem. Off the West Coast krill are important prey for a variety of fish species, including several overfished groundfish species, salmon and Pacific whiting. Krill are also a principal food source for many species of marine mammals and seabirds, some of which are listed as threatened or endangered under the Endangered Species Act and warrant special efforts for protection and recovery. Although there is no indication that the status of the krill resource has contributed to the overfished, endangered, or threatened status of these species, protecting krill will help to maintain these important ecological relationships and to ensure the long-term health and productivity of the West Coast ecosystem. Amendment 12 incorporates ecosystem conservation principles into fishery management programs by protecting, to the extent

⁺ North American Vertical Datum.

[#] Depth in feet above ground.

practicable, krill resources, which are an integral part of that ecosystem.

At this time, there are no Federal regulations that limit fishing for krill in the EEZ. While a krill fishery off the U.S. West Coast does not currently exist and there have been only limited expressions of interest in commercial exploitation of krill in the EEZ, NMFS is concerned such a fishery could develop, which could have an adverse impact on other West Coast fish stocks, marine mammals, seabirds and the ecosystem generally.

The states of Washington, Oregon, and California prohibit their vessels from fishing for krill and prohibit landings of krill into their respective ports. However, these prohibitions would not prevent a fishery from developing in the West Coast EEZ by vessels from outside of the region, as long as landings were not made into a West Coast port. A market for krill currently exists in Washington and Oregon, where salmon farms use krill products as a supplemental feed. Federal (EEZ) waters that lie outside of the state prohibitions on krill harvest may in the future be used for fish farming. Such future operations could use krill as feed stock, and a fishery could develop around the needs of these aquaculture facilities. Local krill would likely be a potential food source, which may significantly increase the likelihood of a krill fishery developing within West Coast EEZ waters.

NMFS is concerned about the potential impacts of a krill fishery based in part on information regarding largescale krill fishing methods and the impacts of existing krill fisheries in other areas of the world. Krill concentrations attract aggregations of marine mammals, seabirds, and fish predators, and bycatch and/or disturbance of these organisms is likely to occur due to the trawl-type gear used to catch krill. In the Antarctic krill fishery, there is known bycatch of fur seals as well as various sea birds. In British Columbia, a krill fishery began in 1970, and quotas were established in 1976 due to concerns for harvesting a forage species upon which salmon and other commercially important finfish depend. An annual catch was set at 500 tons with an open season from November to March to minimize the incidental catch of larval and juvenile

NMFS has considered the potential for development of a krill fishery and the potential impacts a fishery could have on krill resources and on the fish and other species, such as birds and mammals, that are dependent on, or that are sensitive to, the abundance and availability of krill. NMFS believes it is critical to take preventive action at this time to ensure that a krill fishery will not develop that could potentially harm krill stocks, and in turn harm other fish and non-fish stocks. In an environmental assessment prepared for this action, NMFS analyzed the option of allowing a small harvest of krill, but ultimately decided to approve the Council's recommendation to impose a simple prohibition, which is consistent with State law and easier to enforce and administer than a program allowing for low harvest levels.

Under Amendment 12, krill (all species) would be added to the management unit species of the CPS FMP. Further, a new category of management unit species - "prohibited harvest" - would be established under the FMP. Krill would be placed in that category. This means that optimum yield (OY) for krill would be zero, and the target, harvest and transhipment of krill would be prohibited. Also, exempted fishing permits (EFPs) would not be issued under the EFP procedures of the CPS FMP to allow individuals to harvest krill as an exception to the prohibition of harvest. These actions would fully achieve the objectives of the amendment to the extent practicable, but would not account for environmental conditions and the responses of krill and other resources to changes in environmental conditions. NMFS recognizes that de minimis or trace amounts of krill may be retained by fishermen while targeting other species; such inadvertent action is not intended to be the subject of this prohibition.

Four alternatives were analyzed for this action. For further background information on these alternatives and this action please refer to the Amendment 12 document entitled Management of Krill as an Essential Component of the California Current Ecosystem.

NMFS received thirteen comments regarding the proposed regulations to implement Amendment 12. All comments were supportive of the action.

Classification

The Administrator, Southwest Region, NMFS, determined that Amendment 12 to the CPS FMP is necessary for the conservation and management of krill and that it is consistent with the Magnuson-Stevens Fishery Conservation and Management Act and other applicable laws.

This final rule has been determined to be significant for the purposes of Executive Order 12866.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration during the proposed rule stage that this action would not have a significant economic impact on a substantial number of small entities. The factual basis for the certification was published in the proposed rule and is not repeated here. No comments were received regarding

this certification or the economic impact of the proposed rule. As a result, a regulatory flexibility analysis was not required and none was prepared.

List of Subjects in 50 CFR Part 660

Fisheries, Fishing, Reporting and recordkeeping requirements.

Dated: July 7, 2009.

Samuel D. Rauch III,

Deputy Assistant Administrator For Regulatory Programs, National Marine Fisheries Service.

■ For the reasons set out in the preamble, NMFS amends 50 CFR part 660 as follows:

PART 660—FISHERIES OFF WEST COAST STATES

■ 1. The authority citation for part 660 continues to read as follows:

Authority: 16 U.S.C. 1801 et seq.

2. In § 660.502 the definitions of "Krill" and "Prohibited harvest species" are added in alphabetical order to read as follows:

§ 660.502 Definitions.

Krill means all species of euphausiids that occur in the EEZ off the West Coast.

Prohibited harvest species means all krill species in the EEZ off the West Coast.

 \blacksquare 3. In § 660.505, add paragraph (o) as follows:

§ 660.505 Prohibitions.

* * * * *

(o) Fish for, target, harvest or land a prohibited harvest species in any fishery within the EEZ off the West Coast. [FR Doc. E9–16531 Filed 7–10–09; 8:45 am]

AGENCY: Food Safety and Inspection

Service, USDA.

ACTION: Supplemental notice of

proposed rulemaking.

SUMMARY: The Food Safety and Inspection Service (FSIS) is providing new information on, and re-proposing the definition and standard for, "roaster" and "roasting chicken." FSIS proposed this definition and standard in its September 29, 2003, proposed rule to amend the definitions and standards for the official U.S. classes of poultry. After the proposed rule was published, FSIS received from the U.S. Department of Agriculture's (USDA's) Agricultural Marketing Service (AMS) new information that would affect the definition and standard for "roaster" or "roasting chicken." FSIS has tentatively concluded that it should re-propose this definition and standard but no others in the proposed rule.

DATES: Comments must be received on or before August 12, 2009.

ADDRESSES: FSIS invites interested persons to submit comments on this proposed rule. Comments may be submitted by either of the following methods:

- Federal eRulemaking Portal: This Web site provides the ability to type short comments directly into the comment field on this Web page or attach a file for lengthier comments. Go to http://www.regulations.gov. Follow the online instructions at that site for submitting comments.
- Mail, including floppy disks or CD-ROMs, and hand- or courier-delivered items: Send to Docket Clerk, USDA, FSIS, Room 2–2127 George Washington

Carver Center, 5601 Sunnyside Avenue, Beltsville, MD 20705.

Instructions: All items submitted by mail or electronic mail must include the Agency name and docket number FSIS—2007—0048. Comments received in response to this docket will be made available for public inspection and posted without change, including any personal information, to http://www.regulations.gov.

Docket: For access to background documents or comments received, go to the FSIS Docket Room at the address listed above between 8:30 a.m. and 4:30 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Director, FSIS Labeling and Program

Delivery Division, *Phone*: (301) 504–0878, *Fax*: (301) 504–0872.

SUPPLEMENTARY INFORMATION:

Background

The Poultry Products Inspection Act (PPIA) prohibits the distribution of poultry products that are adulterated or misbranded (21 U.S.C. 458). The PPIA also authorizes the Secretary of Agriculture to prescribe, among other things, definitions and standards of identity or composition for poultry products whenever the Secretary determines that such action is necessary for the protection of the public (21 U.S.C. 457(b)). Poultry classes were established by USDA to aid in labeling poultry. The classes were based primarily on the age and sex of the bird. FSIS uses poultry class standards to ensure that poultry products are labeled in a truthful and non-misleading manner.

Before publishing the 2003 proposal, FSIS reviewed the poultry class definitions with AMS's Poultry Programs, and both agencies discussed the definitions and standards with members of the poultry industry and others knowledgeable about poultry genetics and breeding. After examining poultry production methods and reviewing the poultry classes defined in 9 CFR 381.170, FSIS and AMS determined that several poultry class definitions and standards did not reflect poultry characteristics or industry practices. As a result, FSIS and AMS determined that the poultry class definitions needed to be revised to more accurately and clearly describe poultry being marketed and to ensure that the

labels for poultry products are not false or misleading.

FSIS proposed to lower the age definitions for six classes of poultry (68 FR 55902), including reducing the age of "roaster" or "roasting chicken" from 3 to 5 months to less than 12 weeks (see 9 CFR 381.170(a)(1)(iv)). FSIS also solicited comments regarding the merit of establishing ready-to-cook (RTC) carcass weights or maximums for poultry classes (including the "roaster" or "roasting chicken"). FSIS did not propose to include a RTC carcass weight in the "roaster" or "roasting chicken" class definition. FSIS asked commenters to provide a factual basis for or against the establishment of weight requirements.

After the comment period closed, AMS provided FSIS with data that suggest that FSIS should include a RTC carcass weight in the definition of "roaster" and change the proposed weeks of age in that definition. AMS surveyed the segment of the industry that routinely produces "roasters" and obtained data on target weights from 8 of the 13 "roaster" suppliers. Based on these data, AMS has recommended that a "roaster" be defined as a chicken from 8 to 12 weeks of age and with a RTC carcass weight of 5 pounds or more. These AMS survey data are available for public inspection in the FSIS Docket Clerk's Office, USDA, FSIS, Room 2–2127 George Washington Carver Center, 5601 Sunnyside Avenue, Beltsville, MD 20705, between 8:30 a.m. and 4:30 p.m., Monday through Friday.

Comments on Establishing Maximum Weights and the Age for the "Roaster" Class

Several commenters from industry suggested a "roaster" be a chicken that is between the age of 60 days and 85 days at the time of slaughter from a flock that has an average live weight of 7.75 pounds or more. A commenter from industry suggested age definitions for a "roaster" should be between 9 and 12 weeks of age at the time of processing. This commenter also recommended that "roasters" come from a flock with an average daily flock weight of 8 pounds, at minimum. Also, two commenters from industry were concerned that the proposed age definition of "less than 12 weeks" will allow large broilers to be classified as "roasters". Another industry commenter recommended allowing the roaster class to include broilers, as long as the product meets weight requirements for roasters. One commenter opposed including RTC carcass weights in the definitions and standards. This commenter stated that including RTC carcass weights will lead to further abuse of chickens.

On the basis of AMS data, FSIS has tentatively concluded that a "roaster" or "roasting chicken" should be defined as a chicken from 8–12 weeks of age. Most of the comments supported use of this age range for roasters. By including the RTC carcass weight for this class of poultry, the standard and definition should effectively differentiate "roasters" and "broilers".

FSIS has tentatively concluded that a "roaster" or "roasting chicken" should be defined as a chicken with an RTC carcass weight of 5 pounds or more, based on recent survey information from AMS. In addition, FSIS has tentatively concluded that RTC carcass weight, instead of average live weight, is necessary in the class standard and definition so that FSIS can verify the appropriate use of the term "roaster" or "roasting chicken" on product labels.

Executive Orders 12866 and 12988, Regulatory Flexibility Act, and Paperwork Requirements

This proposed rule has been determined to be not significant and was reviewed by the Office of Management and Budget under Executive Order 12866.

The changes FSIS is proposing to the definition of "roaster" or "roasting chicken" do not affect the Executive Order 12866 analysis (68 FR 55903) or the Regulatory Flexibility Analysis (68 FR 55904). Similarly, the changes do not affect paperwork requirements (68 FR 55904) or review of the rule under Executive Order 12988.

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, in an effort to ensure that minorities, women, and persons with disabilities are aware of this proposed rule, FSIS will announce it online through the FSIS Web page located at http://www.fsis.usda.gov/regulations_directives_notices/index.asp.

FSIS will also make copies of this **Federal Register** publication available through the FSIS Constituent Update, which is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, and other types of

information that could affect or would be of interest to constituents and stakeholders. The Update is communicated via Listserv, a free electronic mail subscription service for industry, trade groups, consumer interest groups, health professionals, and other individuals who have asked to be included. The Update is also available on the FSIS Web page. Through the Listserv and Web page, FSIS is able to provide information to a much broader and more diverse audience. In addition, FSIS offers an electronic mail subscription service which provides automatic and customized access to selected food safety news and information. This service is available at http:// www.fsis.usda.gov/news and events/ email subscription/.

Options range from recalls to export information to regulations, directives and notices. Customers can add or delete subscriptions themselves, and have the option to password protect their accounts.

List of Subjects in 9 CFR Part 381

Food grades and standards, Poultry and poultry products.

For the reasons set forth in the preamble, FSIS proposed to further amend 9 CFR Part 381, as previously proposed to be amended on September 29, 2003 (68 FR 55902):

PART 381—POULTRY PRODUCTS INSPECTION REGULATIONS

1. The authority citation for part 381 continues to read as follows:

Authority: 7 U.S.C. 138f; 7 U.S.C. 450; 21 U.S.C. 451–470; 7 CFR 2.18, 2.53.

§ 381.170 Standards for kinds and classes, and for cuts of raw poultry.

2. Section 381.170 would be amended by revising paragraph (a)(1)(iii) to read as follows:

§ 381.170 Standards for kinds and classes, and for cuts of raw poultry.

(a) * * *

(1) * * *

(iii) Roaster or roasting chicken. A "roaster" or "roasting chicken" is a young chicken from 8 to 12 weeks of age, of either sex, with a ready-to-cook carcass weight of 5 pounds or more, that is tender-meated with soft, pliable, smooth-textured skin and breastbone cartilage that is somewhat less flexible than that of a broiler or fryer.

* * * *

Done at Washington, DC, on July 7, 2009. **Alfred V. Almanza**,

Administrator.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 25

[Docket No. NM408; Notice No. 25-09-04-SC]

Special Conditions: Alenia Model C-27J Airplane; Liquid Oxygen System

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed special conditions.

SUMMARY: This action proposes special conditions for the Alenia Model C-27J airplane. This airplane will have novel or unusual design features when compared to the state of technology described in the airworthiness standards for transport-category airplanes. These design features include a liquid-oxygen (LOX) system. The applicable airworthiness regulations do not contain adequate or appropriate safety standards for oxygen systems that use liquid oxygen. These proposed special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

DATES: We must receive your comments by August 12, 2009.

ADDRESSES: You must mail two copies of your comments to: Federal Aviation Administration, Transport Airplane Directorate, Attn: Rules Docket (ANM–113), Docket No. NM408, 1601 Lind Avenue, SW., Renton, Washington, 98057–3356. You may deliver two copies to the Transport Airplane Directorate at the above address. You must mark your comments: Docket No. NM408. You can inspect comments in the Rules Docket weekdays, except Federal holidays, between 7:30 a.m. and 4 p.m.

FOR FURTHER INFORMATION CONTACT:

Holly Thorson, FAA, International Branch, ANM–116, Transport Airplane Directorate, Aircraft Certification Service, 1601 Lind Avenue, SW., Renton, Washington 98057–3356; telephone (425) 227–1357, facsimile (425) 227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite interested people to take part in this rulemaking by sending written comments, data, or views. The most helpful comments reference a specific portion of the special conditions, explain the reason for any recommended change, and include supporting data. We ask that you send us two copies of written comments.

We will file in the docket all comments we receive, as well as a report summarizing each substantive public contact with FAA personnel concerning these special conditions. You can inspect the docket before and after the comment closing date. If you wish to review the docket in person, go to the address in the **ADDRESSES** section of this preamble between 7:30 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

We will consider all comments we receive on or before the closing date for comments. We will consider comments filed late if it is possible to do so without incurring expense or delay. We may change these special conditions based on the comments we receive.

If you want the FAA to acknowledge receipt of your comments on this proposal, include with your comments a self-addressed, stamped postcard on which the docket number appears. We will stamp the date on the postcard and mail it back to you.

Background

On March 27, 2006, the European Aviation Safety Agency (EASA) forwarded to the FAA an application from Alenia Aeronautica of Torino, Italy, for U.S. type certification of a twin-engine commercial transport designated as the Model C–27J. The C–27J is a twin-turbopropeller, cargotransport aircraft with a maximum takeoff weight of 30,500 kilograms.

Type Certification Basis

Under the provisions of § 21.17 of Title 14 Code of Federal Regulation (14 CFR) and the bilateral agreement between the U.S. and Italy, Alenia Aeronautica must show that the C–27J meets the applicable provisions of 14 CFR part 25, as amended by Amendments 25–1 through 25–87. Alenia also elects to comply with Amendment 25–122, effective September 5, 2007, for 14 CFR 25.1317.

If the Administrator finds that existing airworthiness regulations do not adequately or appropriately address safety standards for the C–27J due to a novel or unusual design feature, we prescribe special conditions under provisions of 14 CFR 21.16.

In addition to the applicable airworthiness regulations and special conditions, the C–27J must comply with the fuel-vent and exhaust-emission requirements of 14 CFR part 34 and the noise-certification requirements of 14 CFR part 36, and the FAA must issue a finding of regulatory adequacy pursuant to section 611 of Public Law 92–574, the "Noise Control Act of 1972."

The FAA issues special conditions, under §§ 11.19 and 11.38, and they become part of the type-certification basis under § 21.17(a)(2).

Special conditions are initially applicable to the model for which they are issued. Should the type certificate for that model be amended later to include any other model that incorporates the same or similar novel or unusual design feature, the special conditions also apply to the other model under § 21.101.

Novel or Unusual Design Features

The Alenia Model C-27J incorporates a liquid-oxygen system, including a liquid-oxygen converter, valves, evaporating coils, lines, regulators, indicators, fittings, etc. The existing airworthiness regulations do not adequately or appropriately address safety standards for the design and installation of oxygen systems that utilize liquid oxygen. These proposed special conditions for the C-27J contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards for these novel or unusual design features.

Discussion

There are no specific regulations that address the design and installation of oxygen systems that utilize liquid oxygen for storage. Existing requirements, such as §§ 25.1309, 25.1441(b) and (c), 25.1451, and 25.1453, in the Alenia C–27J certification basis, provide some design standards for crew and medical-oxygensystem installations. However, additional design standards for oxygen systems utilizing liquid oxygen are needed to supplement the existing applicable requirements. The quantity of liquid oxygen involved in this installation and the potential for unsafe conditions that may result when the oxygen content of an enclosed area becomes too high because of system leaks, malfunction, or damage from external sources, make it necessary to assure adequate safety standards are applied to the design and installation of the system in Alenia C-27J airplanes. These proposed special conditions

- require Alenia to preclude or minimize the risk of these potential unsafe conditions. These proposed special conditions are also intended to assure the safe operation of the liquid-oxygen system, and therefore require that:
- Adequate gaseous oxygen is available at temperatures appropriate for breathing;
- The liquid-oxygen converter and gaseous-oxygen-distribution lines are installed in locations that minimize their potential for damage;
- The quantity of available oxygen is clearly indicated to the flight crew;
- The system is designed to prevent leakage of oxygen into the cabin;
- Condensation from the system is collected and drained overboard;
- The system must be protected from possible ignition sources and structural damage; and
- Appropriate maintenance and operational instructions are provided to ensure the system's safe operation.

 Taken together, these requirements would ensure that this liquid-oxygen system provides an equivalent level of safety to traditional oxygen systems.

Applicability

As discussed above, these proposed special conditions are applicable to the Alenia C–27J. Should Alenia apply at a later date for a change to the type certificate to include another airplane model incorporating the same novel or unusual design features, these proposed special conditions apply to that model as well under § 21.101.

Conclusion

This action affects only certain novel or unusual design features of the Alenia C–27J. It is not a rule of general applicability, and it affects only the applicant that applied to the FAA for approval of these features on the airplane.

List of Subjects in 14 CFR Part 25

Aircraft, Aviation safety, Reporting and recordkeeping requirements.

The authority citation for these special conditions is as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701, 44702, 44704.

The Proposed Special Conditions

Accordingly, the Administrator of the Federal Aviation Administration (FAA) proposes the following special conditions as part of the typecertification basis for the C–27J.

General

 ${\it 1. The \ liquid-oxygen \ system \ must \ be \ located \ to \ minimize \ the \ possibility \ of }$

exposure of occupants to liquid oxygen from a leak or condensation.

2. The liquid-oxygen converter must be located in the airplane so that there is no risk of damage to the converter due to an uncontained rotor or propellerblade failure.

3. The liquid-oxygen system's associated gaseous-oxygen-distribution lines should be designed and located to minimize the hazard from uncontained rotor or propeller-blade debris.

4. The flight-deck oxygen system must meet the supply requirements of Part 121 in the event the oxygen-distribution line is severed by a rotor or propeller-

blade fragment.

- 5. The pressure-relief valves on the liquid-oxygen converters must be vented overboard. The ventilation means must be configured such that liquid and gaseous oxygen will be exhausted so that oxygen will not accumulate inside the airplane. Means must be provided to prevent hydrocarbon-fluid migration from impinging upon the vent outlet of the liquid-oxygen system.
- 6. The system must include provisions to ensure complete conversion of the liquid oxygen to gaseous oxygen. The resultant oxygen gas must be delivered to the first oxygen outlet for breathing such that the temperature is no more than 35 °F less than the cabin ambient temperature or 32 °F (whichever is greater), under the conditions of the maximum demand or flow of oxygen gas for normal use of the oxygen system. A liquid-oxygen shutoff valve must be installed on the main oxygen-distribution line prior to any secondary lines. The shutoff valve must be both compatible with liquid-oxygen temperatures and readily accessible (either directly if manual, or by remote activation if automatic).

7. If multiple converters are used, the design should ensure that a leak in one converter does not result in leakage of oxygen from any other converter.

- 8. Approved flexible hoses must be used for the airplane-systems connections to shock-mounted converters, where movement relative to the airplane may occur.
- Condensation from system components or lines must be collected by drip pans, shields, or other suitable collection means, and drained overboard through a drain fitting separate from the liquid-oxygen vent fitting, as specified in special condition 5, above.
- 10. Oxygen-system components must be burst-pressure tested to 3.0 times, and proof-pressure tested to 1.5 times, the maximum normal operating pressure. Compliance with the

requirement for burst testing may be shown by similarity analysis, or a combination of similarity analysis and

- 11. Oxygen-system components must be electrically bonded to the airplane structure.
- 12. All gaseous or liquid-oxygen connections located in close proximity to an ignition source must be shrouded and vented overboard using the system specified in special condition 5, above.
- A means must be provided to indicate to the flight crew the quantity of available oxygen.
- 14. Instructions for Continued Airworthiness (ICA) per § 25.1529 must be provided for the safe operation and maintenance of the liquid-oxygen system.
- 15. Emergency procedures must be developed for the aircraft crew to address aircraft-safety-related malfunctions of the liquid-oxygen system.
- 16. The liquid-oxygen-system equipment, including the tank, must be retained under all loads up to those specified in § 25.561(b)(3). The tank must be able to resist rupture and to retain the liquid oxygen, under the inertia forces prescribed for the emergency-landing conditions in § 25.561. In addition, the tank must be able to withstand, without failure, the vibration, inertia, fluid, and structural loads that it may be subjected to in operation. The liquid-oxygen components, including the tank, must be protected from scraping or impact from baggage, cargo, or other contents.

Issued in Renton, Washington, on July 7, 2009.

Stephen P. Boyd,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service. [FR Doc. E9-16504 Filed 7-10-09; 8:45 am] BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

[Docket No. FAA-2009-0607; Directorate Identifier 2009-NM-024-AD]

RIN 2120-AA64

Airworthiness Directives; Boeing Model 747-100B SUD, 747-200B, 747-300, 747-400, and 747-400D Series **Airplanes**

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede an existing airworthiness directive (AD) that applies to all Boeing Model 747-100B SUD, 747-300, 747-400, and 747-400D series airplanes; and Model 747–200B series airplanes having a stretched upper deck. The existing AD currently requires repetitively inspecting for cracking or discrepancies of the fasteners in the tension ties, shear webs, and frames at body stations 1120 through 1220; and related investigative and corrective actions if necessary. This proposed AD would also require modifying the frame-to-tension-tie joints at body stations 1120 through 1220 (including related investigative actions and corrective actions if necessary), which would provide a terminating action for the repetitive inspections. This proposed AD would also require new repetitive inspections after the modification, corrective actions if necessary, and additional modification requirements at a specified time after the first modification. This proposed AD would also remove certain airplanes from the applicability. This proposed AD results from reports of cracked and severed tension ties, broken fasteners, and cracks in the frame, shear web, and shear ties adjacent to tension ties for the upper deck. We are proposing this AD to detect and correct cracking of the tension ties, shear webs, and frames of the upper deck, which could result in rapid decompression and reduced structural integrity of the airplane.

DATES: We must receive comments on this proposed AD by August 27, 2009. ADDRESSES: You may send comments by

any of the following methods:

• Federal eRulemaking Portal: Go to http://www.regulations.gov. Follow the instructions for submitting comments.

- Fax: 202–493–2251. Mail: U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue, SE., Washington, DC 20590.
- Hand Delivery: U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue, SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this proposed AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P.O. Box 3707, MC 2H-65, Seattle, Washington 98124-2207; telephone 206-544-5000, extension 1; fax 206-766-5680; e-mail me.boecom@boeing.com; Internet

https://www.myboeingfleet.com. You may review copies of the referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington. For information on the availability of this material at the FAA, call 425–227–1221 or 425–227–1152.

Examining the AD Docket

You may examine the AD docket on the Internet at http://www.regulations.gov; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone 800–647–5527) is in the ADDRESSES section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Ivan Li, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Seattle Aircraft Certification Office, 1601 Lind Avenue, SW., Renton, Washington 98057–3356; telephone (425) 917–6437; fax (425) 917–6590.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the ADDRESSES section. Include "Docket No. FAA-2009-0607; Directorate Identifier 2009-NM-024-AD" at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD because of those comments.

We will post all comments we receive, without change, to http://www.regulations.gov, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

On November 15, 2007, we issued AD 2007–23–18, amendment 39–15266 (72 FR 65655, November 23, 2007), for all Boeing Model 747–100B SUD, 747–300, 747–400, and 747–400D series airplanes; and Model 747–200B series airplanes having a stretched upper deck. That AD requires repetitively inspecting for cracking or discrepancies of the fasteners in the tension ties, shear webs, and frames at body stations 1120

through 1220; and related investigative and corrective actions if necessary. That AD resulted from reports of multiple severed adjacent tension ties, in addition to the previous reports of cracked and severed tension ties, broken fasteners, and cracks in the frame, shear web, and shear ties adjacent to tension ties for the upper deck. We issued that AD to detect and correct cracking of the tension ties, shear webs, and frames of the upper deck, which could result in rapid decompression and reduced structural integrity of the airplane.

Actions Since Existing AD Was Issued

In AD 2007-23-18, we required inspection reports because the extent of cracking in the fleet was not known, and we specified that the inspection reports would help determine the damage condition of the fleet. We stated that, based on the results of those reports, we might determine that further corrective action is warranted. Since we issued that AD, the manufacturer has developed a new modification that would terminate the repetitive Stage 1 and Stage 2 inspections required by paragraphs (f) and (i) of AD 2007-23-18. Therefore, further corrective action is warranted; however, this proposed AD does not provide a terminating action for all repetitive inspections.

Boeing has also informed us that Model 747–400 airplanes converted to the 747–400 LCF (large cargo freighter) configuration (airplanes having variable numbers RT631, RT632, RT743, and RT876) no longer have the affected tension ties and, therefore, are not subject to the unsafe condition. These airplanes are no longer included in the effectivity of Boeing Alert Service Bulletin 747–53A2559, dated January 8, 2009, described below.

Relevant Service Information

We have reviewed Boeing Alert Service Bulletin 747-53A2559, dated January 8, 2009. The service bulletin describes procedures for modifying the frame-to-tension-tie joints at body stations 1120 through 1220. The modification includes installing a new frame and tension tie structure outboard of approximately buttock line 36, related investigative actions, and corrective actions if necessary. The related investigative actions include a detailed inspection for cracking of the remaining frame structure and tension tie structure and an open-hole high frequency eddy current inspection for cracking of the fastener holes opened during the modification. The corrective actions include contacting Boeing for repair instructions. The service bulletin also describes procedures for repetitive

post-modification detailed inspections for cracking from body stations 1120 through 1220. For airplanes on which any crack is found, the service bulletin specifies the corrective action of contacting Boeing for repair instructions. The service bulletin also specifies contacting Boeing for additional modification requirements at a specified time after doing the initial modification.

Modifying the frame-to-tension-tie joints at body stations 1120 through 1220 eliminates the need for the repetitive Stage 1 and Stage 2 inspection requirements of AD 2007–23–18.

The compliance times in Boeing Alert Service Bulletin 747–53A2559, dated January 8, 2009, are:

- For the initial modification: Before the accumulation of 17,000 total flight cycles, or within 3,000 flight cycles after the date on the service bulletin, whichever occurs later.
- For the repetitive post-modification detailed inspections: Within 8,000 flight cycles after the modification, or within 1,000 flight cycles after the date on the service bulletin, whichever occurs later; and repeated thereafter at intervals not to exceed 3,000 flight cycles.
- For repair of any crack: Before further flight after finding the crack. The inspection is repeated thereafter at intervals not to exceed 3,000 flight cycles.
- For the additional modification requirements: Before the accumulation of 14,000 flight cycles after the first modification, or within 1,000 flight cycles after the date on the service bulletin, whichever occurs later.

FAA's Determination and Requirements of the Proposed AD

We have evaluated all pertinent information and identified an unsafe condition that is likely to develop on other airplanes of the same type design. For this reason, we are proposing this AD, which would supersede AD 2007–23–18 and would retain the requirements of the existing AD. This proposed AD would also require accomplishing the actions specified in the service bulletin described previously, except as discussed under "Difference Between the Proposed AD and the Service Information."

Difference Between the Proposed AD and the Service Information

The service bulletin specifies to contact the manufacturer for instructions on how to repair certain conditions, but this proposed AD would require repairing those conditions in one of the following ways:

• Using a method that we approve; or

• Using data that meet the certification basis of the airplane, and that have been approved by an Authorized Representative for the Boeing Commercial Airplanes Delegation Option Authorization Organization whom we have authorized to make those findings.

Related Rulemaking

On December 26, 2007, we issued AD 2004-07-22 R1, amendment 39-15326 (73 FR 1052, January 7, 2008), which is applicable to all Boeing Model 747-100, 747–100B, 747–100B SUD, 747–200B, 747–200C, 747–200F, 747–300, 747– 400, 747-400D, 747-400F, 747SR, and 747SP series airplanes. (A correction to AD 2004-07-22 R1 was published in the **Federal Register** on February 14, 2008 (73 FR 8589).) That AD requires that the maintenance inspection program be revised to include inspections that will give no less than the required damage tolerance rating for each structural significant item, and repair of cracked structure. That AD resulted from a report of incidents involving fatigue cracking in transport category airplanes that are approaching or have exceeded their design service objective. We issued that AD to ensure the continued structural integrity of the affected airplanes. The repair and modification procedures of Boeing Alert Service Bulletin 747-53A2559, dated January 8, 2009, are alternative methods

of compliance (AMOCs) for paragraphs (h), (i), and (j) of AD 2004–07–22 R1, only for the areas modified as given in the alert service bulletin.

On August 2, 2007, we issued AD 2007–16–19, amendment 39–15158 (72 FR 45151, August 13, 2007), which is applicable to certain Boeing Model 747-200B, 747-300, and 747-400 series airplanes. That AD requires repetitive detailed inspections for cracking of the aft tension tie channels from body station (BS) 1120 to BS 1220 and from BS 880 to BS 1100, and corrective actions if necessary. That AD resulted from cracks found in the aft tension tie channels at four station locations on a Model 747–200B series airplane that had been modified to a special freighter. We issued that AD to detect and correct cracking of the aft tension tie channels; failure of more than one tension tie could result in rapid depressurization of the airplane. The applicable inspection, repair, and modification procedures of Boeing Alert Service Bulletin 747-53A2559, dated January 8, 2009, are AMOCs for paragraph (f) of AD 2007-16-19, only for the areas modified as given in the alert service bulletin.

Changes to Existing AD

This proposed AD would retain the requirements of AD 2007–23–18. Since AD 2007–23–18 was issued, the AD format has been revised, and certain paragraphs have been rearranged. As a

result, the corresponding paragraph identifiers have changed in this proposed AD, as listed in the following table:

REVISED PARAGRAPH IDENTIFIERS

| Requirement in AD 2007–23–18 | Corresponding requirement in this proposed AD |
|------------------------------|----------------------------------------------------------------------------------------------------------|
| paragraph (f) | paragraph (g).
paragraph (h).
paragraph (i).
paragraph (j).
paragraph (k).
paragraph (l). |

We have removed paragraph (b)(2) of AD 2007–23–18. Global AMOC approval has been previously given to Boeing for AD 2004–07–22 R1. Therefore, that paragraph is no longer necessary.

Interim Action

We consider this proposed AD interim action. If final action is later identified, we might consider further rulemaking then.

Costs of Compliance

There are about 618 airplanes of the affected design in the worldwide fleet, which includes 72 U.S.-registered airplanes. The following table provides the estimated costs for U.S. operators to comply with this proposed AD. The average labor rate is \$80 per work hour.

ESTIMATED COSTS

| Action | Work hours | Parts | Cost per airplane | Fleet cost |
|-----------------------------------------------------|------------|----------------------------|-------------------------------|-----------------------------------|
| Stage 1 inspections (required by AD 2007–23–18) | 19 | \$0 | \$1,520 per inspection cycle. | \$109,440 per inspection cycle. |
| Stage 2 inspections (required by AD 2007–23–18) | 83 | \$0 | \$6,640 | \$478,080 per inspection cycle. |
| Modification (new proposed action) | 257 to 263 | \$341,334 to
\$345,490. | \$361,894 to \$366,530 | \$26,056,368 to
\$26,390,160.1 |
| Post-modification inspections (new proposed action) | 6 | \$0 | \$480 per inspection cycle | \$34,560 per inspection cycle. |

¹ Depending on airplane configuration.

Because the manufacturer has not yet specified the additional modification actions commensurate with the additional modification specified by this proposed AD, we cannot provide specific information regarding the required number of work hours or the cost of parts to do the proposed additional modification. Additional modification costs will likely vary depending on the operator and the airplane configuration.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, "General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We have determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

- 1. Is not a "significant regulatory action" under Executive Order 12866;
- 2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and
- 3. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this proposed AD and placed it in the AD docket. See the **ADDRESSES** section for a location to examine the regulatory evaluation.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. The FAA amends § 39.13 by removing amendment 39–15266 (72 FR 65655, November 23, 2007) and adding the following new AD:

Boeing: Docket No. FAA-2009-0607; Directorate Identifier 2009-NM-024-AD.

Comments Due Date

(a) The FAA must receive comments on this AD action by August 27, 2009.

Affected ADs

(b) This AD supersedes AD 2007-23-18.

Applicability

(c) This AD applies to Boeing Model 747–100B SUD, 747–200B, 747–300, 747–400, and 747–400D series airplanes AD, certificated in any category, as identified in Boeing Alert Service Bulletin 747–53A2559, dated January 8, 2009.

Subject

(d) Air Transport Association (ATA) of America Code 53: Fuselage.

Unsafe Condition

(e) This AD results from reports of cracked and severed tension ties, broken fasteners, and cracks in the frame, shear web, and shear ties adjacent to tension ties for the upper deck. The Federal Aviation Administration is issuing this AD to detect and correct cracking of the tension ties, shear webs, and frames of the upper deck, which could result in rapid decompression and reduced structural integrity of the airplane.

Compliance

(f) You are responsible for having the actions required by this AD performed within the compliance times specified, unless the actions have already been done.

Restatement of the Requirements of AD 2007–23–18

Repetitive Stage 1 Inspections

(g) Do detailed inspections for cracking or discrepancies of the fasteners in the tension ties, shear webs, and frames at body stations 1120 through 1220, and related investigative and corrective actions as applicable, by doing all actions specified in and in accordance with "Stage 1 Inspection" of the Accomplishment Instructions of Boeing Alert Service Bulletin 747–53A2507, dated April 21, 2005, except as provided by paragraph (k) of this AD. Do the Stage 1 inspections at the applicable times specified in paragraphs (h) and (i) of this AD, except as provided by paragraphs (g)(1) and (g)(2) of this AD. All applicable related investigative and corrective actions must be done before further flight. Doing the modification required by paragraph (m) of this AD terminates the repetitive inspection requirements of this paragraph.

(1) Where paragraph 1.E., "Compliance," of Boeing Alert Service Bulletin 747–53A2507, dated April 21, 2005, specifies a compliance time relative to the original issue date of the service bulletin, this AD requires compliance before the specified compliance time after April 26, 2006 (the effective date of AD 2006–06–11, amendment 39–14520, which was superseded by AD 2007–23–18).

(2) For any airplane that reaches the applicable compliance time for the initial Stage 2 inspection (as specified in Table 1, Compliance Recommendations, under paragraph 1.E. of Boeing Alert Service Bulletin 747–53A2507, dated April 21, 2005) before reaching the applicable compliance time for the initial Stage 1 inspection: Accomplishment of the initial Stage 2 inspection eliminates the need to do the Stage 1 inspections.

Compliance Time for Initial Stage 1 Inspection

(h) Do the initial Stage 1 inspection at the earlier of the times specified in paragraphs (h)(1) and (h)(2) of this AD.

(1) At the earlier of the times specified in paragraphs (h)(1)(i) and (h)(1)(ii) of this AD.

- (i) At the applicable time specified in paragraph 1.E., "Compliance," of Boeing Alert Service Bulletin 747–53A2507, dated April 21, 2005.
- (ii) Before the accumulation of 10,000 total flight cycles, or within 250 flight cycles after November 28, 2007 (the effective date of AD 2007–23–18), whichever occurs later.
- (2) At the later of the times specified in paragraphs (h)(2)(i) and (h)(2)(ii) of this AD. (i) Before the accumulation of 12,000 total
- flight cycles.

 (ii) Within 50 flight cycles or 20 days
- (ii) Within 50 flight cycles or 20 days, whichever occurs first, after November 28, 2007.

Compliance Times for Repetitive Stage 1 Inspections

(i) Repeat the Stage 1 inspection specified in paragraph (g) of this AD at the time specified in paragraph (i)(1) or (i)(2), as applicable. Repeat the inspection thereafter at intervals not to exceed 250 flight cycles, until the initial Stage 2 inspection required by paragraph (j) of this AD has been done.

(1) For airplanes on which the initial Stage 1 inspection had not been accomplished as of November 28, 2007: Do the next inspection before the accumulation of 10,000 total flight cycles, or within 250 flight cycles after the initial Stage 1 inspection done in accordance with paragraph (g) of this AD, whichever occurs later.

(2) For airplanes on which the initial Stage 1 inspection had been accomplished as of November 28, 2007: Do the next inspection at the applicable time specified in paragraph (i)(2)(i) or (i)(2)(ii) of this AD.

(i) For airplanes that had accumulated fewer than 12,000 total flight cycles as of November 28, 2007: Do the next inspection before the accumulation of 10,000 total flight cycles, or within 250 flight cycles after November 28, 2007, whichever occurs later.

(ii) For airplanes that had accumulated 12,000 total flight cycles or more as of the effective date of this AD: Do the next inspection at the later of the times specified in paragraphs (i)(2)(ii)(A) and (i)(2)(ii)(B) of this AD.

(A) Within 250 flight cycles after accomplishment of the initial Stage 1 inspection.

(B) Within 50 flight cycles or 20 days, whichever occurs first, after November 28,

Repetitive Stage 2 Inspections

(j) Do detailed and high frequency eddy current inspections for cracking or discrepancies of the fasteners in the tension ties, shear webs, and frames at body stations 1120 through 1220, and related investigative and corrective actions as applicable, by doing all actions specified in and in accordance with "Stage 2 Inspection" of the Accomplishment Instructions of Boeing Alert Service Bulletin 747–53A2507, dated April 21, 2005, except as provided by paragraph (k) of this AD. Do the initial and repetitive Stage 2 inspections at the applicable times specified in paragraph 1.E., "Compliance," of Boeing Alert Service Bulletin 747-53A2507, dated April 21, 2005. All applicable related investigative and corrective actions must be done before further flight. Accomplishment of the initial Stage 2 inspection ends the repetitive Stage 1 inspections. Doing the modification required by paragraph (m) of this AD terminates the repetitive inspection requirements of this paragraph.

Exception to Corrective Action Instructions

(k) If any discrepancy, including but not limited to cracking, or broken, loose, or missing fasteners, is found during any inspection required by paragraphs (g) through (j) of this AD, and Boeing Alert Service Bulletin 747–53A2507, dated April 21, 2005, specifies to contact Boeing for appropriate action: Before further flight, repair the discrepancy using a method

approved in accordance with the procedures specified in paragraph (n) of this AD.

Reporting Requirement

(l) At the applicable time specified in paragraph (l)(1) or (l)(2) of this AD, submit a report of the findings (both positive and negative) of each Stage 1 inspection required by paragraph (g) of this AD to Boeing Commercial Airplanes; Attention: Manager, Airline Support; P.O. Box 3707 MC 04-ER; Seattle, Washington 98124–2207; fax (425) 266-5562. The report must include the inspection results, a description of any discrepancies found, the inspections performed, the airplane serial number, and the number of total accumulated flight cycles on the airplane. Under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.), the Office of Management and Budget (OMB) has approved the information collection requirements contained in this AD and has assigned OMB Control Number 2120-0056.

- (1) For any inspection done after November 28, 2007: Submit the report within 30 days after the inspection.
- (2) For any inspection done before November 28, 2007: Submit the report within 30 days after November 28, 2007.

New Requirements of This AD

Modification

- (m) Except as provided by paragraphs (m)(1) and (m)(2) of this AD: At the times specified in paragraph 1.E, "Compliance," of Boeing Alert Service Bulletin 747-53A2559, dated January 8, 2009, modify the frame-totension-tie joints at body stations 1120 through 1220; do all related investigative and applicable corrective actions; do the repetitive post-modification detailed inspections for cracking of the tension tie and frame structure and all applicable corrective actions; and do the additional modification. Do all actions in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin 747-53A2559, dated January 8, 2009. Modifying the frame-to-tension-tie joints at body stations 1120 through 1220 terminates the repetitive inspection requirements of paragraphs (g) and (j) of this
- (1) Where paragraph 1.E., "Compliance," of Boeing Alert Service Bulletin 747–53A2559, dated January 8, 2009, specifies a compliance time relative to the original issue date of the service bulletin, this AD requires compliance within the specified compliance time after the effective date of this AD.
- (2) Where Boeing Alert Service Bulletin 747–53A2559, dated January 8, 2009, specifies to contact Boeing for repair instructions or additional modification requirements: Before further flight, repair the discrepancy or do the modification using a method approved in accordance with the procedures specified in paragraph (n) of this AD

Alternative Methods of Compliance (AMOCs)

(n)(1) The Manager, Seattle Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14

- CFR 39.19. Send information to ATTN: Ivan Li, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Seattle Aircraft Certification Office, 1601 Lind Avenue, SW., Renton, Washington 98057–3356; telephone (425) 917–6437; fax (425) 917–6590. Or, e-mail information to 9-ANM-Seattle-ACO-AMOC-Requests@faa.gov.
- (2) To request a different method of compliance or a different compliance time for this AD, follow the procedures in 14 CFR 39.19. Before using any approved AMOC on any airplane to which the AMOC applies, notify your principal maintenance inspector (PMI) or principal avionics inspector (PAI), as appropriate, or lacking a principal inspector, your local Flight Standards District Office. The AMOC approval letter must specifically reference this AD.
- (3) An AMOC that provides an acceptable level of safety may be used for any repair required by this AD, if it is approved by an Authorized Representative for the Boeing Commercial Airplanes Delegation Option Authorization Organization who has been authorized by the Manager, Seattle ACO, to make those findings. For a repair method to be approved, the repair must meet the certification basis of the airplane and 14 CFR 25.571, Amendment 45, and the approval must specifically refer to this AD.
- (4) AMOCs approved previously in accordance with AD 2007–23–18 are approved as AMOCs for the corresponding requirements of paragraphs (g) and (j) of this AD.

Issued in Renton, Washington, on June 24, 2009.

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA-2009-0552; Airspace Docket No. 09-ANM-7]

Proposed Establishment of Class E Airspace; Ronan, MT

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This action proposes to establish Class E airspace at Ronan, MT. Additional controlled airspace is necessary to accommodate aircraft using a new Area Navigation (RNAV) Global Positioning System (GPS) Standard Instrument Approach Procedure (SIAP) at Ronan Airport, Ronan, MT. The FAA is proposing this action to enhance the safety and management of aircraft operations at Ronan Airport.

DATES: Comments must be received on or before August 27, 2009.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, M—30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590. Telephone (202) 366–9826. You must identify FAA Docket No. FAA–2009–0552; Airspace Docket No. 09–ANM–7, at the beginning of your comments. You may also submit comments through the Internet at http://www.regulations.gov.

FOR FURTHER INFORMATION CONTACT:

Eldon Taylor, Federal Aviation Administration, Operations Support Group, Western Service Center, 1601 Lind Avenue, SW., Renton, WA 98057; telephone (425) 203–4537.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers (FAA Docket No. FAA 2009–0552 and Airspace Docket No. 09–ANM–7) and be submitted in triplicate to the Docket Management System (see ADDRESSES section for address and phone number). You may also submit comments through the Internet at http://www.regulations.gov.

Commenters wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed stamped postcard on which the following statement is made: "Comments to FAA Docket No. FAA–2009–0552 and Airspace Docket No. 09–ANM–7." The postcard will be date/time stamped and returned to the commenter.

All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this action may be changed in light of comments received. All comments submitted will be available for examination in the public docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the Internet at http://www.regulations.gov. Recently published rulemaking documents can also be accessed through the FAA's Web page at http://www.faa.gov/airports_airtraffic/air_traffic/publications/airspace_amendments/.

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the ADDRESSES section for the address and phone number) between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. An informal docket may also be examined during normal business hours at the Northwest Mountain Regional Office of the Federal Aviation Administration, Air Traffic Organization, Western Service Area, Operations Support Group, 1601 Lind Avenue, SW., Renton, WA 98057.

Persons interested in being placed on a mailing list for future NPRMs should contact the FAA's Office of Rulemaking, (202) 267–9677, for a copy of Advisory Circular No. 11–2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) part 71 by establishing Class E airspace at Ronan, MT. Controlled airspace extending upward from 700 feet above the surface is necessary to accommodate aircraft using the new RNAV (GPS) SIAP at Ronan Airport, Ronan, MT. This action would enhance the safety and management of aircraft operations at the airport.

Class E airspace designations are published in paragraph 6005 of FAA Order 7400.9S, signed October 3, 2008, and effective October 31, 2008, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in this Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a

routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the U.S. Code. Subtitle 1, Section 106, describes the authority for the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it establishes controlled airspace at Ronan, MT.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the FAA Order 7400.9S, Airspace Designations and Reporting Points, signed October 3, 2008, and effective October 31, 2008, is amended as follows:

Paragraph 6005. Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

ANM MT E5 Ronan, MT [New]

Ronan Airport, MT

(Lat. 47°34′02″ N., long. 114°06′04″ W.)

That airspace extending upward from 700 feet above the surface within an 8.4-mile radius of Ronan Airport, excluding that airspace within Federal airways.

14 CFR Part 73

[Docket No. FAA-2009-0490; Airspace Docket No. 09-AWP-3]

RIN 2120-AA66

Proposed Establishment of Restricted Area R-2502A; Fort Irwin, CA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This action proposes to establish a restricted area (R-2502A) at Fort Irwin, CA, as part of a Department of the Army initiative at the National Training Center (NTC). The NTC is being expanded to meet the critical need of the Army for additional training land and airspace suitable for maneuvering large numbers of military personnel and equipment. Additionally, this action would modify the Silver military operation area (MOA) in the vicinity of the NTC Complex. Unlike restricted areas, which are designated under 14 CFR part 73, MOAs are not rulemaking airspace actions. However, since the proposed R-2502A infringes on the Silver MOA, the FAA is including a description of the Silver MOA change in this rule. The MOA change described here will also be published in the National Flight Data Digest (NFDD). The Army requested these airspace changes to provide the additional special use airspace (SUA) above the expanded ground maneuver area to facilitate realistic combat training at the NTC.

DATES: Comments must be received on or before August 27, 2009.

ADDRESSES: Send comments on the proposal to the U.S. Department of Transportation, Dockets Operations, M—30, 1200 New Jersey Avenue, SE., West Building Ground Floor, Room W12–140, Washington, DC 20590–0001; telephone: (202) 366–9826. You must identify docket No. FAA–2009–0490 and Airspace Docket No. 09–AWP–3, at the beginning of your comments. You may also submit comments on the Internet at http://www.regulations.gov.

FOR FURTHER INFORMATION CONTACT: Ken McElroy, Airspace and Rules Group,

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers (FAA Docket No. FAA–2009–0490 and Airspace Docket No. 09–AWP–3) and be submitted in triplicate to the Federal Docket Management System (see ADDRESSES section for address and phone number). You may also submit comments through the Internet at http://www.regulations.gov.

Commenters wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to FAA Docket No. FAA-2009-0490 and Airspace Docket No. 09-AWP-3." The postcard will be date/time stamped and returned to the commenter.

All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this action may be changed in light of comments received. All comments submitted will be available for examination in the public docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the Internet at http://www.regulations.gov.
Recently published rulemaking documents can also be accessed through the FAA's Web page at http://www.faa.gov/airports_airtraffic/air_traffic/publications/airspace amendments/.

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see ADDRESSES section for address and phone number) between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. An informal docket may also be examined during normal business hours at the office of the Western Service Center, Operations Support Group, Federal Aviation Administration, 1601 Lind Avenue, SW., Renton, WA 98055.

Persons interested in being placed on a mailing list for future NPRMs should contact the FAA's Office of Rulemaking, (202) 267–9677, for a copy of Advisory Circular No. 11–2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

Background

The NTC at Fort Irwin, California, is the only instrumented training area in the world suitable for force-on-force and live fire training of heavy brigade-sized military forces. It provides the Army with essential training opportunities necessary to maintain and improve military readiness and promote national security.

The Congress in 2001, directed the Department of the Army and the Department of the Interior to draft a proposed plan that would expand the maneuver training lands at the NTC.

This airspace proposal aligns with that land expansion in order to provide overlying airspace to conduct realistic combat training. The expanded airspace enhances the training value of the land based on training goals, equipment capabilities, and Army requirements. Additionally, the employment of aviation assets, explosives, flares, smoke, and other pyrotechnics devices will be deployed in the new airspace.

The FAA supports this proposal. However, the FAA would have concerns for any additional expansion of the airspace in this area higher than 16,000 feet mean sea level (MSL) in the proposed R-2502A due to impacts to the National Airspace System (NAS). A review by the FAA Los Angeles Air Route Traffic Control Center personnel made the following observations: (1) The airspace adjacent to the south of proposed R-2502A is used for separation and sequencing of arriving and departing aircraft for the Los Angeles basin. Air traffic in this area regularly operates at system capacity. A reduction of usable airspace would significantly affect air traffic control services and cause delays to system users. (2) The airspace along the northeast boundary of proposed R-2502A is used for the separation and sequencing of air traffic into Las Vegas, McCarran Airport. A reduction of usable airspace would significantly affect air

traffic control services and cause delays to system users. (3) Because of R–2501, the usable airspace along the southern and eastern boundaries of R–2502 East is very constrained. This narrow corridor is heavily used for arrivals and departures at the Los Angeles, Burbank, Van Nuys, and Las Vegas airports. Keeping aircraft from deviating into the proposed R–2502A vertical addition during the months when extensive convective weather is common would be difficult.

Military Operation Area (MOA)

Restricted areas are regulatory airspace designations, under Title 14 Code of Federal Regulations (CFR) part 73, which are established to confine or segregate activities considered hazardous to non-participating aircraft. A MOA is a non-rulemaking type of SUA established to separate or segregate certain non-hazardous military flight activities from aircraft operating in accordance with instrument flight rules (IFR), and to identify for visual flight rules (VFR) pilots where those activities are conducted. IFR aircraft may be routed through an active MOA only when air traffic control can provide approved separation from the MOA activity. VFR pilots are not restricted from flying in an active MOA, but are advised to exercise caution while doing

Unlike restricted areas, which are designated through rulemaking procedures, MOAs are non-rulemaking airspace areas that are established administratively and published in the National Flight Data Digest. Normally MOA proposals are not published in a NPRM, but instead, are advertised for public comment through a non-rule circular that is distributed by an FAA Service Center office to aviation interests in the affected area. However, when a non-rulemaking action is connected to a rulemaking action, FAA procedures allow for the nonrulemaking proposal to be included in the NPRM. In such cases, the NPRM replaces the non-rule circularization requirement. Because the change to the Silver MOA North is necessary, due to the proposed establishment of the restricted area, the MOA is being modified to exclude the airspace contained in the proposed R-2502A.

Proposed MOA Change Silver MOA North, CA

Boundaries. Beginning at lat. 35°39′00″ N., long. 115°53′03″ W.; to lat. 35°24′30″ N., long. 115°53′03″ W.; to lat. 35°06′50″ N., long. 116°20′00″ W.; to lat. 35°04′30″ N., long. 116°29′00″ W.; to lat.

35°07′00″ N.; long. 116°34′03″ W.; to point of beginning. Excluding the airspace below 3,000 feet AGL within a 3NM radius of the town of Baker, CA (lat. 35°16′00″ N. long. 116°04′33″ W.;) and R2502A.

The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) part 73 to establish Restricted Areas R–2502A at Fort Irwin, CA. The U.S. Army has requested this restricted area because the existing special use airspace does not include the airspace above the expanded land maneuver area created to support the NTC. This proposed action is required to ensure a safe training environment, isolated from the public, for military air and ground maneuvers from the surface to the upper limits of restricted airspace.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority.

This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it proposes to establish restricted area airspace at Fort Irwin, CA.

Environmental Review

This proposal will be subjected to the appropriate environmental analysis in accordance with FAA Order 1050.1E,

Environmental Impacts: Policies and Procedures, prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 73

Airspace, Prohibited areas, Restricted areas.

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 73 as follows:

PART 73—SPECIAL USE AIRSPACE

1. The authority citation for part 73 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 73.25 [Amended]

2. § 73.25 is amended as follows:

R-2502A Fort Irwin, CA [New]

Boundaries. Beginning at lat. 35°25′48″ N., long. 116°18′48″ W.; to lat. 35°25′30″ N., long. 116°09′46″ W.; to lat. 35°23′15″ N., long. 116°09′47″ W.; to lat. 35°06′54″ N., long. 116°30′17″ W.; to lat. 35°07′00″ N., long. 116°34′03″ W.; to lat. 35°18′45″ N., long. 116°18′48″ W. to point of beginning.

Designated altitudes. Surface to 16,000 feet MSL.

Time of designation. Continuous. Controlling agency. FAA, Hi-Desert TRACON, Edwards, CA.

Using agency. Commander, Fort Irwin, CA.

Issued in Washington, DC, on July 6, 2009. Edith V. Parish,

Manager, Airspace and Rules Group.

DEPARTMENT OF THE INTERIOR

National Park Service

36 CFR Part 7 RIN 1024-AD50

Special Regulations; Areas of the National Park System

AGENCY: National Park Service, Interior. **ACTION:** Proposed Rule.

SUMMARY: The National Park Service is proposing this rule to update its regulations for managing use of the Colorado River and adjoining federally owned lands administered by the National Park Service within Grand

Canyon National Park. Changes to the current rule are necessary to implement portions of the park's recently revised Colorado River Management Plan. Current regulations govern boat trips on the Colorado River within the park upstream from Diamond Creek (approximately River Mile 226). In accordance with the new Colorado River Management Plan, the proposed rule will apply to the entire Colorado River within the park, including the reach of the river downstream from Diamond Creek to the boundary between the park and Lake Mead National Recreation Area (approximately River Mile 277). **DATES:** Comments must be received by

DATES: Comments must be received by September 11, 2009.

ADDRESSES: You may submit your comments, identified by Regulatory Information Number 1024—AD50 (RIN), by any of the following methods:

• Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments.

• *Mail:* National Park Service, WASO, Mike Archer, Chief Ranger, Grand Canyon National Park, P.O. Box 129, Grand Canyon, Arizona.

All submissions received must include the agency name and RIN. For additional information see "Public Participation" under SUPPLEMENTARY INFORMATION below.

FOR FURTHER INFORMATION CONTACT:

Palma Wilson, Deputy Superintendent—Operations, Grand Canyon National Park, P.O. Box 129, Grand Canyon, Arizona 86023, Palma_Wilson@nps.gov, (fax) (928) 638–7815.

SUPPLEMENTARY INFORMATION:

Description of the Park

Grand Canyon National Park, Arizona, contains and protects what many people consider to be the most scenic and scientifically significant arid-land canvon in the world. Congress established the park in the Act of February 26, 1919, and enlarged its boundaries in subsequent legislation enacted in 1926, 1928, and 1975. As described in the latest such enactment, the Grand Canyon National Park Enlargement Act, the park consists of approximately one million, two hundred thousand acres of lands, waters, and interests therein, all as depicted on a boundary map referenced in the legislation.

The reach of the Colorado River in the park provides a unique combination of thrilling whitewater adventure and magnificent vistas of a remarkable geologic landscape, including remote and intimate side canyons. The 277-mile-long river corridor is home to

unique and abundant natural and cultural resources, including diverse wildlife, threatened and endangered species, archeological sites, caves, and natural soundscapes. For these reasons, a river trip through the Grand Canyon is one of the most sought-after backcountry experiences in the country, and nearly 30,000 visitors per year run the river. In addition, more than 50,000 visitors per year take flat-water excursions lasting several hours in the lower gorge on pontoon boats operated by or for the Hualapai Tribe.

Purposes of the Park

In the Act of February 26, 1919, Congress dedicated and set apart certain described lands under the name of the Grand Canyon National Park "as a public park for the benefit and enjoyment of the people." In the Grand Canyon National Park Enlargement Act, Congress recognized "that the entire Grand Canyon, from the mouth of the Paria River to the Grand Wash Cliffs, including tributary side canyons and surrounding plateaus, is a natural feature of national and international significance." In that act Congress also recognized the need for "further protection and interpretation of the Grand Canyon in accordance with its true significance."

The park's General Management Plan, finalized in 1995, states that as a place of national and global importance Grand Canyon National Park is to be managed to "preserve and protect its natural and cultural resources and ecological processes, as well as its scenic, aesthetic, and scientific values" and to "provide opportunities for visitors to experience and understand the environmental interrelationships, resources, and values of Grand Canyon without impairing the resource."

The park's Colorado River Management Plan was revised (Record of Decision published in the **Federal** Register on March 23, 2006) to address both long-standing and recent issues concerning resource protection, visitor experience, and public services along the Colorado River corridor; to consider the impact of National Park Service river management on federally recognized American Indian tribes whose reservations adjoin Grand Canyon National Park; and to fulfill the requirements of a 2002 agreement that settled litigation over the previous river management plan.

Resource Issues

Nearly 30,000 visitors per year participate in commercial or noncommercial river trips on the Colorado River within Grand Canyon

National Park. In addition, more than 50,000 visitors per year take flat-water excursions lasting several hours in the lower gorge on pontoon boats operated by or for the Hualapai Tribe. Recreational activities along the river corridor in the park may impact the park's natural and cultural resources (including resources possessing wilderness values), the experiences of park visitors, park operations, and adjoining lands owned or administered by other federal agencies or neighboring American Indian tribes. Those impacts are analyzed in depth in Chapter 4 of the Final Environmental Impact Statement for the recently revised Colorado River Management Plan.

As currently written, 36 CFR 7.4(b) governs the use of the Colorado River within the park upstream from Diamond Creek (approximately River Mile 226). This proposed rule would apply to the entire Colorado River and adjoining federally owned lands within the park, including the reach of the river downstream from Diamond Creek (River Mile 226) to the boundary between the park and Lake Mead National Recreation Area (approximately River Mile 277). This proposed rule (1) would clarify that commercial river trips below Diamond Creek, including those operated by or for the Hualapai Tribe, must obtain National Park Service approval in the form of a permit, contract, or other written agreement, as required by 36 CFR 5.3 and other applicable laws, and (2) would require that noncommercial river trips using any part of the Colorado River within Grand Canyon National Park, including the river downstream from Diamond Creek, obtain a permit issued by the Superintendent. The proposed rule also would update visitor-use restrictions and camping closures and delete unnecessary provisions in the current regulation.

The Colorado River Management Plan planning process involved extensive public scoping beginning in 1997 and included numerous public meetings and stakeholder workshops; opportunity for the public to comment in person or via email or regular mail; and consultation with other agencies and culturally affiliated American Indian tribes. During the planning process, approximately 2,000 people attended public meetings, and the National Park Service received approximately 24,000 written responses from the public containing over 90,000 individual comments. For additional information see the Purpose of and Need for the Action, Background Information and Appendix B: Public Scoping Summary sections of the Final Environmental

Impact Statement, which detail the public scoping process and the issues and concerns raised in scoping; Volume II, Chapter 5 of the Final Environmental Impact Statement, which includes a list of organizations and agencies consulted during the planning process; and Volume III of the Final Environmental Impact Statement, which includes responses to all substantive comments received during the process. The Final Environmental Impact Statement can be found on the park's Web site at http:// www.nps.gov/archive/grca/crmp/ or at Grand Canyon National Park, 823 N. San Francisco, Ste A, Flagstaff, AZ 86001.

The National Park Service's management of the Colorado River within Grand Canyon National Park may affect resources of the Navajo Nation, the Havasupai Tribe, or the Hualapai Tribe, each of which shares a boundary with the park. Furthermore, the National Park Service's management of the Colorado River within the park will affect businesses operating on the river under agreements with the Hualapai Tribe. Potential impacts for culturally affiliated American Indian tribes were addressed in the park's recently revised Colorado River Management Plan.

At its request, the Hualapai Tribe served as a cooperating agency in the preparation of the Environmental Impact Statement for the new Colorado River Management Plan. The final plan represents agreement between the National Park Service and the Tribe on most issues relating to river use in the park. However, the Tribe's preferred alternative for the lower gorge envisioned even greater pontoon boat use than the increase authorized by the final plan. The National Park Service intends to offer the Tribe a noncompetitive concession contract for its lower gorge operations in accordance with the final plan and with the National Park Service Concessions Management Improvement Act of 1998 and implementing regulations found in 36 CFR Part 51.

For more information on consultation and coordination with American Indian tribes see Chapter 5 of the Final Environmental Impact Statement for the Colorado River Management Plan. The Final Environmental Impact Statement can be found on the park's Web site at http://www.nps.gov/archive/grca/crmp/ or at Grand Canyon National Park, 823 N. San Francisco, Ste A, Flagstaff, AZ 86001.

The Draft and Final Environmental Impact Statements

This rule would implement portions of Grand Canyon National Park's recently revised Colorado River Management Plan. The National Park Service prepared a Draft Environmental Impact Statement and a Final Environmental Impact Statement. A Record of Decision was published in the Federal Register on March 23, 2006. The planning process began in 1997 with public scoping and stakeholder workshops. During the process, approximately 2,000 people attended a total of 14 public meetings and the NPS received approximately 24,000 written responses from the public containing over 90,000 individual comments. Impacts associated with this rule are analyzed in the Final Environmental Impact Statement for the Colorado River Management Plan. The Record of Decision and the Final Environmental Impact Statement are available on the park's Web site at http://www.nps.gov/ archive/grca/crmp/ or at Grand Canyon National Park, 823 N. San Francisco, Ste A, Flagstaff, AZ 86001.

Section-by-Section Analysis

Section 7.4(b) Colorado River Boat Trips

Section 7.4(b), "Colorado River boat trips" would amend the existing regulation, which applies to boat trips on the Colorado River only between Lee's Ferry (River Mile 0) and Diamond Creek (approximately River Mile 226). The amended section would apply to all boat trips on the entire length of the Colorado River in Grand Canyon National Park.

Section 7.4(b)(1) would clarify that all commercial boat trips on the Colorado River in Grand Canyon National Park must be authorized by the National Park Service through a permit, contract, or other written agreement, as required by 36 CFR 5.3 and other applicable laws.

Section 7.4(b)(2) would require all noncommercial river trips on the entire length of the Colorado River in Grand Canyon National Park to be authorized under a permit issued by the Superintendent. Currently section 7.4 only requires permits for noncommercial river trips from Lee's Ferry (River Mile 0) to Diamond Creek (approximately River Mile 226). This section would extend the permit requirement to the entire river within the park.

Section 7.4(b)(3) would renumber and clarify the definition of "commercial" river trips and "noncommercial" river trips. This section is currently found at 7.4(b)(3)(iii).

Section 7.4(b)(4) would create a new standalone section with language that is currently found in section 7.4(b)(3) and that authorizes the Superintendent to limit the number of permits, contracts and other written agreements, or amend the terms and conditions of those permits, contracts and other written agreements, to ensure public safety or to protect park resources.

Section 7.4(b)(5)(i),(ii),(iii), and (iv) would set out operational conditions required for all river trips. These conditions are not new except that they would apply to the entire length of the Colorado River within the park. These four conditions are currently found in sections 7.4(b)(1) and (2).

Section 7.4(b)(6) would renumber the section that requires human waste to be removed from the park in a manner prescribed by the Superintendent. This section is currently found at 7.4(b)(4).

Section 7.4(b)(7) would renumber and update the section that contains requirements for camp fires currently found at 7.4(b)(4). This section would continue to require that fires be kindled only on beaches and that fires be completely extinguished with water. It would add the requirements that fires must be kindled in elevated metal pans and that ash and charcoal must be removed from the park. These restrictions are currently included in permit conditions for both commercial and noncommercial river trips.

Section 7.4(b)(8)(i) through (vii) would list camping closures that are currently found at 7.4(b)(9) and would add camping closures in the following areas: the Phantom Ranch area, on the banks of the Colorado River between the Black Bridge and 0.25 miles below the mouth of Pipe Creek; the Elves Chasm drainage from Royal Arch to the Colorado River; and the Deer Creek drainage from Deer Creek Falls to the Colorado River. Section 7.4(b)(8)(vi) would clarify that the camping closure at the mouth of Havasu Creek includes the Havasu Creek drainage from the boundary between the park and the Havasupai Indian reservation to the Colorado River. These areas are heavily visited by river trips and the closures would protect resources in the areas by limiting river trip participants to dayuse only.

The revision of section 7.4(b) would remove sections 7.4(b)(5), (b)(7), and (b)(8). Current section 7.4(b)(5) prohibits pets on river trips. Pets are prohibited in all areas below the rim of the Grand Canyon, including the Colorado River corridor, by the Superintendent under the authority granted in 36 CFR 2.15(a)(1), making the current section 7.4(b)(5) unnecessary.

Current section 7.4(b)(7) allows picnicking on beach areas along the Colorado River. This use is currently authorized by 36 CFR 2.11, making the current section 7.4(b)(7) unnecessary.

Current section 7.4(b)(8) allows swimming and bathing in the waters of the Colorado River except in locations immediately above rapids, eddies and riffles or near rough water. Removing this section would allow swimming and bathing in all areas of the Colorado River, as authorized by 36 CFR 3.16. The National Park Service expects swimmers and bathers to take responsibility for their own safety and exercise good judgment while using the waters of the Colorado River.

Compliance With Other Laws

Regulatory Planning and Review (Executive Order 12866)

This document is a significant rule and has been reviewed by the Office of Management and Budget under Executive Order 12866. We have made the assessments required by E.O. 12866 and the results are available by writing to the address in the addresses section or as supporting material to this rulemaking found at http://www.regulations.gov.

(1) This rule would not have an effect of \$100 million or more on the economy. It would not adversely affect in a material way the economy, productivity, competition, jobs, the environment, public health or safety, or local, governments or communities. However, it may affect the Hualapai Tribal economy in the future by capping the number of people who may take flat water excursions in the lower gorge operated by or for the Hualapai Tribe.

(2) This rule would not create a serious inconsistency or otherwise interfere with an action taken or planned by another agency.

(3) This rule does not alter the budgetary effects of entitlements, grants, user fees, or loan programs or the rights or obligations of their recipients.

(4) OMB has determined that this rule raises novel legal or policy issues.

Regulatory Flexibility Act

The Department of the Interior certifies that this document would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601–12 (2000)).

A qualitative regulatory flexibility analysis was published on January 11, 2008, using data from a cost-benefit analysis prepared for the river management plan. The analysis showed a net benefit of \$2.9 million to the regional economy and an increase of 47 jobs for the area above Diamond Creek. For the area on the Colorado River below Diamond Creek the result was a predicted major beneficial economic impact on Hualapai tribal revenue, and a negligible impact on the regional economy.

Small Business Regulatory Enforcement Fairness Act

This rule is not a major rule under 5 U.S.C. subsection 804(2) of the Small Business Regulatory Enforcement Fairness Act. This rule:

- a. Does not have an annual effect on the economy of \$100 million or more.
- b. Will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions.
- c. Does not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreignbased enterprises.

Unfunded Mandates Reform Act

This rule does not impose an unfunded mandate on State, local, or tribal governments or the private sector of more than \$100 million per year. Except as described elsewhere with respect to the Hualapai Tribe, the rule does not have a significant or unique effect on State, local or tribal governments or the private sector.

Takings (Executive Order 12630)

In accordance with Executive Order 12630, this rule does not have significant takings implications.

Federalism (Executive Order 13132)

In accordance with Executive Order 13132, this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Civil Justice Reform (Executive Order 12988)

This rule meets the applicable standards set forth in sections 3(a) and 3(b)(2) of the executive order.

Paperwork Reduction Act

This regulation does not require information collection from 10 or more parties and a submission under the Paperwork Reduction Act is not required. An OMB form 83–I is not required.

National Environmental Policy Act

This rule would implement portions of the recently revised Colorado River Management Plan. All impacts associated with this rule are fully analyzed in the Final Environmental Impact Statement for the Colorado River Management Plan. The Final Environmental Impact Statement is available on the park's Web site at http://www.nps.gov/archive/grca/crmp/ or at Grand Canyon National Park, 823 N. San Francisco, Ste A, Flagstaff, AZ 86001.

Government-to-Government Relationship With Tribes

The National Park Service's management of the Colorado River within Grand Canyon National Park may affect the resources of the Navajo Nation, the Havasupai Tribe, and the Hualapai Tribe, each of which shares a boundary with the park, and historic properties in the park to which those and other tribes might attach religious and cultural significance. Therefore, in accordance with the provisions of the National Environmental Policy Act; the National Historic Preservation Act; the April 29, 1994, Presidential Memorandum on Government-to-Government Relations with Native American Tribal Governments: Executive Order 13007, 3 CFR 196 (1997); Executive Order 13175, 3 CFR part 304 (2001); 512 Department of Interior Manual 2; National Park Service Management Policies 2001 and 2006: and National Park Service Director's Order #71: Relationship with Indian Tribes, the National Park Service established regular consultation with culturally affiliated, federally recognized American Indian tribes during the revision of the Colorado River Management Plan to try to understand and address tribal issues and concerns. For a list of American Indian tribes consulted and a description of the process and issues identified during the process, see Chapter 5 of the Final Environmental Impact Statement for the Colorado River Management Plan. The Final Environmental Impact Statement can be found on the park's Web site at http:// www.nps.gov/archive/grca/crmp/ or at Grand Canyon National Park, 823 N. San Francisco, Ste A, Flagstaff, AZ 86001.

Clarity of Rule

Executive Order 12866 requires each agency to write regulations that are easy to understand. We invite your comments on how to make this rule easier to understand, including answers to questions such as the following: (1) Are the requirements in the rule clearly stated? (2) Does the rule contain technical language or jargon that interferes with its clarity? (3) Does the

format of the rule (grouping and order of sections, use of headings, paragraphing, etc.) aid or reduce its clarity? (4) Would the rule be easier to read if it were divided into more (but shorter) sections? (A "section" appears in bold type and is preceded by the symbol "§" and a numbered heading; for example § 7.XX * * *) (5) Is the description of the rule in the SUPPLEMENTARY INFORMATION section of the preamble helpful in understanding the proposed rule? What else could we do to make the rule easier to understand?

Send a copy of any comments that concern how we could make this rule easier to understand to: Office of Regulatory Affairs, Department of the Interior, Room 7229, 1849 C Street, NW., Washington, DC 20240. You may also email the comments to this address: Exsec@ios.doi.gov.

Drafting Information: The principal contributors to this proposed rule are: Chris Pergiel, Alaska Regional Chief Ranger; Robin Martin, Program Analyst, Grand Canyon National Park; and Jerry Case, Superintendent, Bighorn Canyon National Recreation Area.

Public Availability of Comments

Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

List of Subjects in 36 CFR Part 7

National Parks, Reporting and recordkeeping requirements.

In consideration of the foregoing, the National Park Service proposes to amend 36 CFR part 7 as follows:

PART 7—SPECIAL REGULATIONS, AREAS OF THE NATIONAL PARK SYSTEM

1. The authority for part 7 continues to read as follows:

Authority: 16 U.S.C. 1, 3, 9a, 460(q), 462(k); Sec. 7.96 also issued under DC Code 8–137(1981) and DC Code 40–721 (1981).

2. In § 7.4, paragraph (b) is revised as follows:

§ 7.4 Grand Canyon National Park.

(b) *Colorado River boat trips.* The following applies to all persons using the waters of the Colorado River, or

federally owned lands administered by the National Park Service along the river, within Grand Canyon National Park:

(1) Commercial use of the Colorado River within Grand Canyon National Park must be authorized by the National Park Service through a permit, contract, or other written agreement. Each commercial river trip must designate a trip leader who is responsible for ensuring that all trip participants comply with the terms and conditions of the authorizing instrument.

(2) Noncommercial use of the Colorado River within Grand Canyon National Park, including research by any agency, entity, or person except the National Park Service, must be authorized by a permit issued by the Superintendent. The permit holder is deemed to be the trip leader and is responsible for ensuring that all trip participants comply with the terms and conditions of the permit.

(3) A river trip is commercial if any participant receives money or other compensation for organizing, outfitting, or guiding the trip. A river trip is

noncommercial if:

(i) There is a bona fide sharing of expenses among trip participants; and

(ii) No participant receives any money or other compensation for organizing, outfitting, or guiding the trip.

- (4) At any time the Superintendent may limit the number of permits, contracts, and other written agreements issued or may amend the terms and conditions of those permits, contracts, and other written agreements to ensure public safety or to protect park resources.
- (5) From Lees Ferry (River Mile 0) to Separation Canyon (approximately River Mile 239.5):
- (i) No one may operate a vessel engaging in predominately upstream travel;
- (ii) No one may operate a vessel powered by a motor or motors whose total horsepower exceeds 55;
- (iii) Every person aboard a vessel must wear a personal floatation device approved by the United States Coast Guard for the specific activity in which the person is engaged; and

(iv) One additional personal floatation device must be carried on each vessel for every ten persons on board.

(6) All solid human waste must be removed from the park and disposed of in the manner prescribed by the Superintendent.

(7) Fire may be kindled only on beaches in an elevated metal fire pan that contains the fire. All fires must be completely extinguished with water before the river trip participants leave the area. All ash and charcoal must be removed from the park.

(8) The following areas are closed to camping:

- (i) The banks of the Colorado River from the mouth of the Paria River to Navajo Bridge;
 - (ii) Red Wall Cavern;
- (iii) The banks of the Colorado River from the Black Bridge to 0.25 miles below the mouth of Pipe Creek;
- (iv) The Elves Chasm drainage from Royal Arch to the Colorado River;
- (v) The Deer Creek drainage from Deer Creek Falls to the Colorado River;
- (vi) The Havasu Creek drainage from the boundary between the park and the Havasupai Indian reservation to the Colorado River; and

(vii) Any other areas closed to camping by the Superintendent.

(9) The Superintendent may temporarily limit, restrict, or terminate access to or use of areas after taking into consideration public health and safety, natural and cultural resource protection, and other management activities and objectives.

Will Shafroth,

Acting Assistant Secretary, Fish and Wildlife and Parks.

[FR Doc. E9–16482 Filed 7–10–09; 8:45 am] BILLING CODE 4312–ED–P

POSTAL REGULATORY COMMISSION

39 CFR Parts 3001 and 3004

[Docket No. RM2009-6; Order No. 230]

Freedom of Information Act Regulations

AGENCY: Postal Regulatory Commission. **ACTION:** Proposed rulemaking.

SUMMARY: The Commission is proposing to revise rules related to the Freedom of Information Act. The proposed revisions implement recent amendments, clarify the relationship of these rules to others, and make minor editorial and conforming changes.

DATES: Initial comments due: August 12, 2009; reply comments due August 27, 2009.

ADDRESSES: Submit comment electronically via the Commission's Filing Online system at *http://www.prc.gov*.

FOR FURTHER INFORMATION CONTACT: Stephen L. Sharfman, General Counsel, 202–789–6820.

SUPPLEMENTARY INFORMATION:

I. Introduction

II. Discussion of the Proposed Rules III. Section-by-Section Analysis of Changes IV. Public Representative V. Ordering Paragraphs

I. Introduction

The Postal Regulatory Commission (Commission) proposes to update its rules governing Freedom of Information Act (FOIA), 5 U.S.C. 552, requests. The Openness Promotes Effectiveness in our National Government Act of 2007, Public Law 110–175, 121 Stat. 2524 (OPEN Government Act) was signed into law on December 31, 2007 and amends 5 U.S.C. 552. The amendments require an update to the Commission's FOIA rules published in 39 CFR part 3004.

On January 21, 2009, President Obama issued a memorandum for the heads of all Federal agencies and departments directing a presumption of disclosure for all decisions involving FOIA.¹ At the direction of the President, the Attorney General issued a memorandum for the heads of all Federal agencies and departments which instructs agencies to use "a presumption of openness" and take proactive steps to publicly post information online in advance of any request.²

Ås a result of amendments to 5 U.S.C. 552, policy memoranda from the President and Attorney General, and changes to the regulatory framework and organization under the Postal Accountability and Enhancement Act (PAEA), Public Law 109–435, 120 Stat. 3198 (2006), the Commission proposes to amend its FOIA rules in 39 CFR part 3004.

II. Discussion of the Proposed Rules

The Commission proposes to implement the OPEN Government Act with modifications to its FOIA rules in 39 CFR part 3004. First, the Commission adds proposed rule 3004.42, which provides each person making a FOIA request with a unique tracking number, and a mechanism to track the status of a FOIA request. Second, the Commission adds a paragraph to the section governing fees charged for requests. Proposed rule 3004.52(e) is added to reflect a change in the statute that does not allow an agency to collect fees if it fails to meet applicable time limits imposed by the statute. Third, the Commission adds proposed rule 3004.60, which designates the Director

¹ Memorandum for the Heads of Executive Departments and Agencies, January 21, 2009 (74 FR 4683 (January 26, 2009)).

² Office of the Attorney General, Memorandum for Heads of Executive Departments and Agencies, March 19, 2009.

of the Office of Public Affairs and Government Relations as the FOIA Public Liaison.

To align the Commission's FOIA policies with the President's vision for a more open and accountable government, the Commission makes several changes to part 3004. First, the Commission adds proposed rule 3004.2, announcing the "presumption of openness" to be applied to any requests under FOIA, and stating that it proactively posts public records on its Web site in advance of any public request. Second, the Commission adds proposed rule 3004.43(c), which allows for a partial grant of a request, rather than a denial, when the Commission cannot make a full disclosure. Third, the Commission edits the language in proposed rule 3004.43 and requires, when a request is denied in whole or in part, an explanation of the basis for withholding the records and a description of the foreseeable harm.

To make the information pertaining to FOIA contained in part 3004 easier to find, the proposed amendment divides the regulations into several smaller individual regulations. For example, proposed rule 3004.6 Fees is separated into five regulations. Paragraph (a) of section 3004.6 becomes proposed rule 3004.50 Fees—definitions as used in this subpart. The information in paragraph (b) is relocated to proposed rule 3004.52 Fees—general provisions, and the information in paragraph (c)(1) is moved to proposed rule 3004.51 Fees—category of requests. Paragraph (c)(2) becomes proposed rule 3004.53 Fee schedule. Miscellaneous information currently in sections 3004.6(b), (c)(2)(i) and (f) is consolidated in proposed rule 3004.52 Fees—general provisions. Finally, paragraphs (d) and (e) are relocated to proposed rule 3004.54 Procedure for assessing and collecting fees. The substance of the regulations being divided is not modified, although the existing text is simplified. Similar minor editing is employed throughout the proposed rules and noted in the sectionby-section analysis.

Finally, the Commission references its rules governing the treatment of non-public materials in several sections.³ Proposed rule 3004.10 references section 3007.10 as an exception to "public records" as section 3007.10 allows persons to designate materials as non-public and initially exempt from disclosure. Similarly, proposed rule

3004.30(d) is added which formalizes that FOIA requests for Postal Service records will be referred to the Postal Service. The paragraph also indicates that records may be requested through the Commission's rules in part 3007. Finally, proposed rule 3004.70, which governs submission of business information, references part 3007 and the submitter's ability to file an application for non-public treatment pursuant to that part.

III. Section-by-Section Analysis of Changes

Section 3004.1 Purpose. In proposed rule 3004.1 the original language of paragraph (a) is modified to better describe the function of the rules devoted to implementing FOIA. The information in paragraph (b) is updated to state that certain information is available on the Commission's Web site rather than in the electronic reading room or elsewhere on the site.

Section 3004.2 Presumption of openness. Proposed rule 3004.2 is added to recognize the "presumption of openness" mandated by the President and further explained by the Attorney General and Department of Justice.

Section 3004.10 Public records. Proposed rule 3004.10 replaces sections 3001.42(b)(1) through (b)(11). The information contained in section 3001.42(b) does not change, although the paragraphs are relabeled. For example, paragraph (b)(1) becomes paragraph (a) and paragraph (b)(2) becomes paragraph (b). Currently, section 3001.42(b)(2) is lengthy and contains a long list separated by commas. To make the information in the list easier to find, section 3001.42(b)(2) is divided into paragraphs (b)(1) through (7) of proposed rule 3004.10. Finally, the statement that offers of settlement are not public would be deleted as it is repeated in section 3001.42(b)(13)(ii)

Section 3004.11 Non-public records. Proposed rule 3004.11 replaces paragraphs (b)(12) and (13) of section 3001.42. Paragraphs (i) through (vii) of section 3001.42(b)(12) are redesignated as proposed rule 3004.11(a) through (g), and section 3001.42(b)(13) is redesignated as proposed rule 3004.11(h).

Section 3004.12 Reading room.
Proposed rule 3004.12 contains the same substantive information as current rule 3004.2. The information contained in section 3004.2(c), which concerns the electronic reading room, is divided into proposed rule 3004.12(a) and (b).
Proposed paragraph (a) indicates that the Commission has two reading rooms—one at its offices and one on its Web site. Proposed paragraph (b) lists

examples of materials accessible in the reading rooms.

Section 3004.13 Notice and publication of public information. Current section 3001.42(a) is redesignated as proposed rule 3004.13, and is divided into two paragraphs—one concerning the availability and service of Commission rulings, decisions and reports, and the second regarding the availability of the Commission's guiding principles.

Section 3004.20 Commission procedure when served a subpoena. This proposed rule sets forth the procedure the Commission or its officers or employees shall follow when served with a subpoena for materials which are not public files or records. It requires that service of the subpoena shall be immediately reported to the Commission, along with a statement of relevant facts, and the Commission shall take the appropriate action to respond to the subpoena.

Section 3004.30 Relationship among the Freedom of Information Act, the Privacy Act, and the Commission's procedures for according appropriate confidentiality. Proposed rule 3004.30 replaces sections 3004.1(b) and 3004.6(c)(1)(v). The proposed rule is amended to include a reference to the Commission's rules governing the treatment of non-public materials, and the policy of referring a FOIA request for Postal Service records to the Postal Service.

Section 3004.40 Hard copy requests for records and for expedited processing. Section 3004.3, which governs the contents of requests for information made to the Commission under FOIA, is redesignated as proposed rule 3004.40. Paragraph (a) is divided into six paragraphs (a)(1) through (a)(6) to clearly delineate the requirements for hard copy requests, including a new requirement that the requester identify the category of request under proposed rule 3004.51. The substantive information in paragraphs (b) and (c) is consolidated into proposed paragraph (b) and rewritten to make the regulations more clear.

Section 3004.41 Electronic requests for records and for expedited processing. Proposed rule 3004.41 sets forth the requirements for electronically submitted requests for information made to the Commission under FOIA. The rule contains similar requirements to proposed rule 3004.40, but requires that the electronic request utilize the form for FOIA requests on the Commission's Web site.

Section 3004.42 Tracking of requests. Proposed rule 3004.42 is

³ See Docket No. RM2008-1, Final Rules Establishing Appropriate Confidentiality Procedures, June 19, 2009. 74 FR 30938 (June 29, 2009).

added to reflect an amendment to FOIA which requires that agencies provide a tracking number and mechanism to monitor requests that take longer than 10 days to complete.

Section 3004.43 Response to requests. Proposed rule 3004.43 explains the Commission's actions upon receiving a request. Currently, the information in this proposed regulation is found in section 3004.3. The information contained in paragraph (a) is reorganized in multiple paragraphs within proposed rule 3004.43. Paragraph (c) is added to require that partial disclosures shall be made, if feasible, when a full disclosure is not possible. Former section 3004.3(b) contains superfluous information and is deleted. Paragraph (f) is added to proposed rule 3004.43 replacing section 3004.3(d).

Section 3004.44 Appeals. Proposed rule 3004.44 replaces section 3004.5(a). The substantive information in paragraph (a) is reorganized into three paragraphs to simplify the regulations.

Section 3004.45 Extension of response time limit. The information currently in section 3004.4(d) and section 3004.5(b) is consolidated and reorganized into two paragraphs in

proposed rule 3004.45. Section 3004.50 Fees—definitions as used in this part. Current section 3004.6(a) is redesignated as proposed rule 3004.50. In addition, rather than making each definition its own paragraph as in section 3004.6(a), the definitions are arranged in alphabetical order without any paragraph designation. This allows definitions to be added alphabetically in the future without a redesignation of paragraphs. The definition of "Representative of the news media" is modified to conform with an amendment to the definition in the statute.

Section 3004.51 Fees—category of requests. The fees the Commission charges for processing FOIA requests are determined by the category of the requester—commercial, educational and scientific, news media, and other. Proposed rule 3004.53 replaces section 3004.6(c)(1) in identifying the processing fees for each type of requester. The language of sections 3004.6(c)(1)(i) through (iv) is not modified, although titles identifying the category of user are added to each paragraph. Section 3004.6(c)(1)(v) is rewritten to clarify the types of fees.

Section 3004.52 Fees—general provisions. Proposed rule 3004.52 consolidates general fee information currently found in sections 3004.6(b), (c)(2)(i), and (f). The part of section 3004.6(c)(2)(i) that explains that the

Commission may charge for conducting a search even if no records are found or the records located are exempt from disclosure is relocated to proposed rule 3004.53(a). The information in section 3004.6(b) is moved to proposed rule 3004.52(b) and (c). Paragraph (f) is redesignated as proposed rule 3004.52(d). Proposed rule 3004.52(e) is added to reflect a change in the statute which does not allow an agency to recover fees if it fails to comply with time limits imposed by the statute. However, paragraph (e) does allow the Commission to charge fees for a partial disclosure while review continues on other sensitive records which may be responsive to the request.

Section 3004.53 Fee schedule. Section 3004.6(c)(2) is redesignated as proposed rule 3004.53.

Section 3004.54 Procedure for assessing and collecting fees. Proposed rule 3004.54 explains the Commission's assessment of interest and the circumstances under which the Commission requires advance payment of fees. Currently, the information in this proposed rule can be found in section 3004.3. Section 3004.6(e) is replaced by proposed rule 3004.54(a), which edits the original text to clarify the information. Paragraph (d) of section 3004.6 is redesignated as proposed rule 3004.54(b).

Section 3004.60 Freedom of Information Act public liaison.
Proposed rule 3004.60 is added to designate the Director of the Office of Public Affairs and Government Relations as the FOIA Public Liaison. The FOIA Public Liaison provides an avenue for the public to informally resolve FOIA disputes with the Commission.

Section 3004.70 Submission of business information. Section 3004.8 is redesignated as proposed rule 3004.70. Titles are added to each paragraph to clarify the information contained therein. Proposed rule 3004.70(a) is added to indicate the overlap between this rule and application for non-public treatment pursuant to part 3007.

IV. Public Representative

Pursuant to 39 U.S.C. 505, Jeremy L. Simmons is appointed the officer of the Commission (Public Representative) to represent the interests of the general public in the captioned docket.

V. Ordering Paragraphs

It is ordered:

1. Docket No. RM2009–6 is established for the purpose of amending the Commission's rules governing the Freedom of Information Act.

- 2. Pursuant to 39 U.S.C. 505, Jeremy L. Simmons is appointed to serve as officer of the Commission (Public Representative) to represent the interests of the general public in these proceedings.
- 3. Interested persons may submit initial comments no later than 30 days from the date of publication of this notice in the **Federal Register**.
- 4. Reply comments may be filed no later than 45 days from the date of publication of this notice in the **Federal Register**.
- 5. The Secretary shall arrange for publication of this Notice in the **Federal Register**.

List of Subjects

39 CFR Part 3001

Administrative practice and procedure, Confidential business information, Postal Service.

39 CFR Part 3004

Administrative practice and procedure, Archives and records, Freedom of information, Organization, Privacy, Reporting and recordkeeping requirements.

By the Commission.

Judith M. Grady,

Acting Secretary.

For the reasons stated in the preamble, under the authority at 39 U.S.C. 504, the Postal Regulatory Commission proposes to amend 39 CFR chapter III as follows:

PART 3001—RULES OF PRACTICE AND PROCEDURE

1. The authority citation for Part 3001 continues to read as follows:

Authority: 39 U.S.C. 404(d) 503; 3661.

§ 3001.42 [Removed]

2. Remove § 3001.42 in its entirety.

PART 3004—PUBLIC RECORDS AND FREEDOM OF INFORMATION ACT

3. Part 3004 is revised to read as follows:

PART 3004—PUBLIC RECORDS AND FREEDOM OF INFORMATION ACT

Sec.

3004.1 Purpose.

3004.2 Presumption of openness.

3004.10 Public records.

3004.11 Non-public records.

3004.12 Reading room.

3004.13 Notice and publication of public information.

3004.20 Commission procedure when served a subpoena.

3004.30 Relationship among the Freedom of Information Act, the Privacy Act, and the

Commission's procedures for according appropriate confidentiality.

3004.40 Hard copy requests for records and for expedited processing.

3004.41 Electronic requests for records and for expedited processing.

3004.42 Tracking of requests.

3004.43 Response to requests.

3004.44 Appeals.

3004.45 Extension of response time limit.

3004.50 Fees-definitions as used in this subpart.

3004.51 Fees-category of requests.

3004.52 Fees-general provisions.

3004.53 Fee schedule.

3004.54 Procedure for assessing and collecting fees.

3004.60 Freedom of Information Act Public Liaison.

3004.70 Submission of business information.

Authority: 5 U.S.C. 552; 39 U.S.C. 503.

§ 3004.1 Purpose.

(a) This part implements the Freedom of Information Act (FOIA), 5 U.S.C. 552, and describes the procedures by which a person may request copies of Commission records pursuant to FOIA. It contains the rules that the Commission follows in handling requests, such as the amount of time it has to make a determination regarding release of records and what fees to charge. It also describes how a submitter of trade secrets or confidential business information can identify information that the submitter believes to be exempt from disclosure under 5 U.S.C. 552(b).

(b) Information required to be published or made available pursuant to 5 U.S.C. 552(a)(1) and (a)(2) may be found in 39 CFR part 3002, in the **Federal Register**, or on the Commission's Web site at http://www.prc.gov. The Commission's guide to FOIA, all required FOIA indexes, and any available annual FOIA reports are also available on the Web site.

(c) Section 3004.10 identifies records that the Commission has determined to be public.

§ 3004.2 Presumption of openness.

(a) The Commission shall be proactive and systematically, in a timely manner, post public records online in advance of any public request.

(b) It is the stated policy of the Commission that FOIA requests shall be administered with a clear presumption of openness.

§ 3004.10 Public records.

- (a) Except as provided in § 3004.11 and in § 3007.10 of this chapter, the public records of the Commission include all submissions and filings as follows:
- (1) Requests of the Postal Service for decisions or advisory opinions, public

reports, complaints (both formal and informal), and other papers seeking Commission action;

- (2) Financial, statistical and other reports to the Commission, and other filings and submittals to the Commission in compliance with the requirements of any statute, executive order, or Commission rule, regulation or order;
- (3) All answers, replies, responses, objections, protests, motions, stipulations, exceptions, other pleadings, notices, depositions, certificates, proofs of service, transcripts and briefs in any matter or proceeding;
- (4) Exhibits, attachments and appendices to, amendments and corrections of, supplements to, or transmittals or withdrawals of any of the foregoing; and

(5) Commission correspondence

related to the foregoing.

(b) All other parts of the formal record in any matter or proceeding set for formal or statutory hearing and any Commission correspondence related thereto, including:

(1) Notices or Commission orders initiating the matter or proceeding;

- (2) Designation of the presiding officer;
 - (3) Transcript of hearings;
- (4) Offers of proof, motions and stipulations made during a hearing;
- (5) Exhibits received in evidence during a hearing;
- (6) Certifications to the Commission; and
- (7) Anything else upon which action of a presiding officer or the Commission may be based.
- (č) Proposed testimony or exhibit filed with the Commission but not yet offered or received in evidence.
- (d) Presiding officer actions and all presiding officer correspondence and memoranda to or from anyone other than staff assigned to provide assistance to the presiding officer.
- (e) Commission decisions, reports, opinions, orders, notices, findings, determinations and other actions in any matter or proceeding and all Commission minutes which have been approved.

(f) Commission correspondence relating to any furnishing of data or information by the Postal Service.

(g) Commission correspondence with respect to the furnishing of data, information, comments or recommendations to or by another branch, department, or agency of the Government where furnished to satisfy a specific requirement of a statute or where made public by that branch, department or agency.

(h) Commission correspondence and reports on legislative matters under

consideration by the Office of Management and Budget or Congress, but only if and after authorized for release or publication by that office, the Commission or the Member of Congress involved.

(i) Commission correspondence on the interpretation or applicability of any statute, rule, regulation, decision, advisory opinion or public report issued by the Commission and letters of opinion on that subject signed by the General Counsel and sent to persons other than the Commission, a Commissioner or any of the staff.

(j) Copies of all filings by the Commission, and all orders, judgments, decrees and mandates directed to the Commission in court proceedings involving Commission action and all correspondence with the courts or clerks of court.

(k) The Commission's administrative and operating manuals as issued.

§ 3004.11 Non-public records.

- (a) The public records of the Commission do not include records that are:
- (1) Specifically authorized under criteria established by an executive order to be kept secret in the interest of national defense or foreign policy and, in fact, properly classified pursuant to such executive order;
- (2) Related solely to the internal personnel rules and practices of the Commission;
- (3) Specifically exempted from disclosure by statute;
- (4) Trade secrets and commercial or financial information obtained from a person and privileged or confidential;
- (5) Interagency or intra-agency memoranda or letters which would not be available by law to a party other than a person or entity in litigation with the Commission;
- (6) Personnel and medical files and similar files, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy; and

(7) Investigatory records compiled for law enforcement purposes to the extent specified in 5 U.S.C. 552(b)(7).

(b) The following are examples of information that are not part of the public records of the Commission:

(1) Written communications between or among the Commission, members of the Commission, the Secretary, and expressly designated members of the staff while particularly assigned, in accordance with all applicable legal requirements, to aid the Commission in the drafting of any decision, advisory opinion, or public report and findings, with or without opinion, or report in any matter or proceeding;

- (2) Reports and records compiled or created by the Inspector General of the Commission designated as confidential; and
- (3) Unaccepted offers of settlement in any matter or proceeding unless or until made public by act of the offeror.

§ 3004.12 Reading room.

- (a) The Commission maintains a public reading room at its offices (901 New York Avenue, NW., Suite 200, Washington, DC 20268–0001) and an electronic reading room at http://www.prc.gov. The public reading room at its offices is open during business hours.
- (b) The records available for public inspection and printing include, for example, decisions; reports; opinions; orders; notices; findings; determinations; statements of policy; copies of selected records released under FOIA; indexes required to be maintained under FOIA; and records described in § 3004.10 relating to any matter or proceeding before the Commission.

§ 3004.13 Notice and publication of public information.

- (a) Decisions, advisory opinions, orders and public reports will be made available to the public by posting on the Commission's Web site at http://www.prc.gov and will be served upon parties to the proceedings in accordance with 3001.9 through 3001.12.
- (b) Descriptions of the Commission's organization, its methods of operation, statements of policy and interpretations, procedural and substantive rules, and amendments thereto are published in the **Federal Register**, and are available on the Commission's Web site, http://www.prc.gov.

§ 3004.20 Commission procedure when served a subpoena.

If an officer or employee of the Commission is served with a subpoena duces tecum, material that is not part of the public files and records of the Commission shall be produced only as authorized by the Commission. Service of such a subpoena shall immediately be reported to the Commission with a statement of all relevant facts. The Commission will thereupon enter such order or give such instructions as it deems advisable.

§ 3004.30 Relationship among the Freedom of Information Act, the Privacy Act, and the Commission's procedures for according appropriate confidentiality.

(a) Coverage. FOIA applies to all Commission records and provides the public with access to government records.

- (b) Requesting records subject to the Privacy Act. A request by an individual for his or her own records contained in a system of records will be considered under the Privacy Act pursuant to part 3003 of this chapter. If there is any record that the Commission need not release to such individual under those provisions, the Commission will also consider that request under FOIA, and will release the record if FOIA requires it.
- (c) Requesting another individual's record. Request for records of individuals which may not be granted under the Privacy Act shall be considered under FOIA.
- (1) If the Commission makes a disclosure in response to a request and the disclosure is permitted by the Privacy Act's disclosure provision, 5 U.S.C. 552a(b), the Commission will rely on the Privacy Act to govern the disclosure.
- (2) In some circumstances, the Privacy Act may prohibit the Commission's ability to release records which may be released under FOIA.
- (d) Requesting a Postal Service record. The Commission maintains custody of Postal Service records.
- (1) Postal Service records which are covered by the Commission's treatment of non-public materials under part 3007 of this chapter may be requested following the procedures set forth in that part.
- (2) A request to the Commission for Postal Service records via a Freedom of Information Act request pursuant to 5 U.S.C. 552 shall be referred to the Postal Service.

§ 3004.40 Hard copy requests for records and for expedited processing.

- (a) A hard copy request for records must:
 - (1) Be in writing;
- (2) Reasonably describe the records sought;
- (3) Include a daytime telephone number;
- (4) Be clearly identified as "Freedom of Information Act Request" both in the text of the request and on the envelope;
- (5) Identify the category of requester under § 3004.51; and
- (6) Be submitted to the Secretary of the Commission at the offices of the Commission (901 New York Avenue, NW., Suite 200, Washington, DC 20268– 0001).
- (b) Expedited processing. A person demonstrating a compelling need as defined in 5 U.S.C. 552(a)(6)(E)(v) may request expedited processing at the time of an initial request (or appeal) or at a later time. In addition to the requirements in paragraph (a) of this

- section, an expedited request for records must:
- (1) Demonstrate a compelling need as defined in 5 U.S.C. 552(a)(6)(E)(v);
- (2) Be clearly identified as "Expedited Freedom of Information Act Request" both in the text of the request and on the envelope; and
- (3) Certify the statement of compelling need to be true and correct to the best of the requester's knowledge and belief. At its discretion, the Commission may waive the requirement for certification.

§ 3004.41 Electronic requests for records and for expedited processing.

- (a) An electronic request for records must:
- (1) Be made via the Commission's online FOIA request form at http://www.prc.gov;
- (2) Reasonably describe the records sought;
- (3) Include a daytime telephone number and valid e-mail address; and
- (4) Identify the category of requester under § 3004.51.
- (b) Expedited processing. A person satisfying the requirements of subsection (a) may request expedited processing at the time of the initial request or at a later time by:
- (1) Demonstrating a compelling need as defined in 5 U.S.C. 552(a)(6)(E)(v);
- (2) Clearly identifying the request as an "Expedited Freedom of Information Act Request" in the body of the submission; and
- (3) Certifying the statement of compelling need to be true and correct to the best of the requester's knowledge and belief. At its discretion, the Commission may waive the requirement for certification.

§ 3004.42 Tracking of requests.

- (a) Upon receipt of a request, the Commission shall assign a unique tracking number to the request and within 3 days (excluding Saturdays, Sundays and legal holidays) and provide that number to the person making the request.
- (b) Any person with a tracking number may call or e-mail the Commission's Office of Public Affairs and Government Relations (PAGR) to check the status of a request. PAGR may be e-mailed at *PRC-PAGR@prc.gov* or called at 202–789–6800.

§ 3004.43 Response to requests.

(a) Within 20 days (excluding Saturdays, Sundays and legal holidays) after receipt of a request for a Commission record, the Secretary of the Commission will notify the requester of its determination to grant or deny the request.

(b) Granting request. If granting the request, the Commission will notify the requester of any fees that must be paid.

(c) Partial granting of request. If the Commission is unable to grant the request in its entirety, any reasonably segregable portion of the request shall be provided, with deleted portions treated as specified in paragraph (d) of this section, and the Commission will notify the requester of any fees that must be paid.

(d) *Denying request*. If denying the request, in whole or in part, the Commission will inform the requester in

writing of:

- (1) The reason for the denial, including each exemption used as a basis for withholding of the records sought and, if applicable, the harm to an interest protected by a statutory exemption;
- (2) An estimate of the volume of requested matter that was denied:
- (i) If disclosure of a record has been partially denied, the amount of information deleted will be indicated on the released portion if technically feasible; and
- (ii) If revealing the amount or location of a denied record will harm an interest protected by an exemption, then the description of the amount or location of deleted information shall be withheld.

(3) The right to appeal the denial to the Commission within 1 year.

- (e) Expedited processing. Within 10 days (excluding Saturdays, Sundays and legal holidays) after receipt of a request for expedited processing, the Secretary of the Commission will:
- (1) Grant the request for expedited processing and process the request for records as soon as practicable; or
- (2) Deny the request for expedited processing by informing the individual of:

(i) The denial in writing;

- (ii) The right to appeal the denial to the Commission in writing; and
- (iii) The procedures for appealing the denial.
- (3) Any request for records that has been denied expedited processing will be processed in the same manner as a request that did not seek expedited processing.
- (f) Where a compelling need is not shown in an expedited request as specified in § 3004.21(b)(1), the Commission may grant requests for expedited processing at its discretion.

§ 3004.44 Appeals.

(a) The Commission may review any decision of the Secretary of the Commission on its own initiative.

(b) A requester who seeks to appeal any denial must file an appeal with the Commission. (c) Response to appeal.

(1) The Commission will grant or deny the appeal in writing within 20 days (excluding Saturdays, Sundays and legal holidays) of the date the appeal is received. If on appeal the denial of the request for records is upheld, the Commission will notify the requester of the provisions for judicial review of that determination pursuant to 5 U.S.C. 552(c).

(2) The Commission will expeditiously consider an appeal of a denial of expedited processing.

§ 3004.45 Extension of response time limit.

- (a) The Commission may extend the time limit for a response at the request stage and at the appeal stage up to 10 working days due to unusual circumstances as specified in 5 U.S.C. 552(a)(6)(B)(iii).
 - (b) The Commission will:

(1) Notify the requester of any extension and the reason for the extension in writing; and

(2) Provide the requester with an opportunity to limit the scope of the request or to arrange an alternative timeframe for processing the request or a modified request. The applicable time limits are not tolled while the Commission waits for a response from the requester under this subsection.

§ 3004.50 Fees—definitions as used in this part.

Commercial use means a request from or on behalf of a person seeking information for a use or purpose that furthers the commercial, trade, or profit interests of the requester or person on whose behalf the request is made. In determining the applicability of this term, the use to which a requester will put the document is considered first; where reasonable doubt exists as to the use, the Commission may seek clarification before assigning the request to a category.

Direct costs means the expenditures the Commission incurs in searching for, duplicating, and, where applicable, reviewing documents to respond to a request. They include (without limitation) the salary of the employee(s) performing work (the basic pay rate of such employee(s) plus 16 percent to cover benefits).

Duplication means copying the documents necessary to respond to a request. Such copies may be paper, microform, audiovisual, or machine-readable.

Educational institution means a preschool, a public or private elementary or secondary school, an institution of graduate or undergraduate higher education, an institution of professional education, and an institution of vocational education, which operates a program or programs of scholarly research.

Noncommercial scientific institution means an institution, not operated on a commercial basis (as referenced above), which is operated solely for the purpose of conducting scientific research whose results are not intended to promote any particular product or industry.

Representative of the news media means any person or entity that gathers information of potential interest to a segment of the public, uses its editorial skills to turn the raw materials into a distinct work, and distributes that work to an audience. The term "news" means information that is about current events or that would be of current interest to the public. Examples of news media entities are television or radio stations broadcasting to the public at large and publishers of periodicals (but only if such entities qualify as disseminators of "news") who make their products available for purchase or by subscription or by free distribution to the general public. These examples are not all inclusive and may include alternate media to disseminate news. A freelance journalist shall be regarded as working for a news media entity if the journalist can demonstrate a solid basis for expecting publication through that entity (e.g., by a publication contract or prior publication record), whether or not the journalist is actually employed by the entity.

Review means examining documents located in response to a commercial use request to determine whether any portion is exempt from disclosure, and processing or preparing documents for release, but not determination of general legal or policy issues regarding application of exemptions.

Search includes all time spent looking for material responsive to a request, including identification of pages or lines within documents. The term covers both manual and computerized searching.

§ 3004.51 Fees—category of requests.

- (a) The level of fee charged depends on the category of requester.
- (1) Commercial use. A request appearing to be for commercial use will be charged the full direct costs of searching for, reviewing and duplicating the records sought.
- (2) Educational and noncommercial scientific institutions. A request from an educational or noncommercial scientific institution will be charged for the cost of duplication only (excluding charges for the first 100 pages). To be eligible for this category, a requester must show that the request is made under the

auspices of a qualifying institution and that the records are not sought for commercial use but are in furtherance of scholarly (in the case of educational institutions) or scientific (in the case of noncommercial scientific institutions)

(3) News media. A request from a representative of the news media will be charged the cost of duplication only (excluding charges for the first 100

pages).

(4) Other requesters. A request from any other person will be charged the full direct cost of searching for, review of, and duplicating records responsive to the request, except that the first 100 pages of duplication and the first 2 hours of search will be furnished without charge.

(b) Privacy Act. A request by an individual for his or her own records in a system of records will be charged fees as provided under the Commission's Privacy Act regulations in part 3003 of

this chapter.

§ 3004.52 Fees—general provisions.

- (a) The Commission may charge search fees even if no records are found or if the records found are exempt from disclosure.
- (b) Except in the case of commercial use requesters, the first 100 pages of duplication and the first 2 hours of search time are provided without

(1) A page for these purposes is a letter- or legal-size sheet, or the equivalent amount of information in a medium other than paper copy.

(2) Search time for these purposes refers to manual searching; if the search is performed by computer, the 2 hours provided without charge will be equal to 2 hours' salary of the person

performing the search.

- (c) No requester will be charged a fee when the Commission determines that the cost of collecting the fee would equal or exceed the fee itself. In determining whether cost of collection would equal or exceed the fee, the allowance for 2 hours' search or 100 pages of duplication will be made before comparing the remaining fee and the cost of collection.
- (d) Records will be provided without charge or at a reduced charge if disclosure of the information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government and is not primarily in the commercial interest of the requester.
- (e) \hat{N} o requester will be charged a fee after any search or response which occurs after the applicable time limits as

described in §§ 3004.42 and 3004.44, so long as there are no unusual or exceptional circumstances, such as those used to justify an extension of the time limit as described in § 3004.44. The Commission may, however, charge fees for a partial grant of a request while it reviews other sensitive records, which may be responsive to the request, if it is made within the applicable time limits.

§ 3004.53 Fee schedule.

- (a) Fees will be calculated as follows:
- (1) Manual search. At the salary rate (basic pay plus 16 percent) of the employee(s) making the search. Search time may be charged for even if the Commission fails to locate records or if records located are exempt from disclosure.
- (2) Computer search. At the direct cost of providing the search, including computer search time directly attributable to searching for records responsive to the request runs and operator salary apportionable to the search.
- (3) Review (commercial use). At the salary rate (basic pay plus 16 percent) of the employee(s) conducting the review. Charges are imposed only for the review necessary at the initial administrative level to determine the applicability of any exemption, and not for review at the administrative appeal level of an exemption already applied.
- (4) Duplication. At 15 cents per page for paper copy, which the Commission has found to be the reasonable direct cost thereof. For copies of records prepared by computer (such as tapes or printouts), the actually incurred cost of production, including employee time, will be charged.
- (5) Additional services. Postage, insurance, and other additional services that may be arranged for by the requester will be charged at actually incurred cost.
- (b) Fees may be waived at the discretion of the Commission.

§ 3004.54 Procedure for assessing and collecting fees.

- (a) Advance payment may be required if the requester failed to pay previous bills in a timely fashion or when the fees are likely to exceed \$250.
- (1) Where the requester has previously failed to pay within 30 days of the billing date, the Commission may require the requester to pay an advance payment of the estimated fee together with either the past due fees (plus applicable interest) or proof that the past fees were paid.
- (2) When advance payment is required, the administrative time limits prescribed in 5 U.S.C. 552(a)(6)

- (§ 3004.42) begin only after such payment has been received.
- (b) Interest at the rate published by the Secretary of the Treasury as prescribed in 31 U.S.C. 3717 will be charged on unpaid fee bills starting on the 31st day after the bill was sent. Receipt of a fee by the Commission, whether processed or not, will stay the accrual of interest.

§ 3004.60 Freedom of Information Act Public Liaison.

The Commission designates the Director of the Office of Public Affairs and Government Relations as the FOIA Public Liaison who shall assist in the resolution of any dispute between a requester and the Commission. The FOIA Public Liaison may be contacted via e-mail at PRC-PAGR@prc.gov or telephone at 202-789-6800.

§ 3004.70 Submission of business information.

- (a) Overlap with treatment of nonpublic materials. Any person who submits materials to the Commission (submitter) that the person reasonably believes to be exempt from public disclosure may submit materials under seal and lodge an application for nonpublic treatment as described in § 3007.10.
- (b) Notice of request. If a FOIA request seeks materials designated as exempt from public disclosure, the Commission will provide the submitter with notice of the request. The Commission may also provide notice when it has reason to believe that business information possibly exempt from disclosure may fall within the scope of any FOIA request.
- (c) Objections to disclosure. A submitter may file written objections to the request specifying all grounds for withholding the information under FOIA within 7 days of the date of the notice. If the submitter fails to respond to the notice, the submitter will be considered to have no objection to the disclosure of the information.
- (d) Notice of decision. If, after considering the submitter's objections to disclosure the Commission decides to disclose the information, it will give the submitter written notice of the decision and a brief explanation of the reasons for not sustaining the submitter's objections. The actual disclosure will not be made before 3 days after the submitter has received the notice.

[EPA-R03-OAR-2009-0352; FRL-8929-3]

Approval and Promulgation of Air Quality Implementation Plans; Pennsylvania; Allegheny County, Continuous Opacity Monitor Regulation

AGENCY: Environmental Protection

Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA proposes to approve the State Implementation Plan (SIP) revision submitted by the Commonwealth of Pennsylvania for the purpose of establishing the method to determine compliance with opacity requirements for coke oven combustion stacks in Allegheny County, allowing the use of continuous opacity monitoring systems (COMS) to measure visible emissions in Allegheny County, and removing a redundant phrase in the current approved SIP. In the Final Rules section of this Federal Register, EPA is approving the Commonwealth's SIP submittal as a direct final rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this action, no further activity is contemplated. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time.

DATES: Comments must be received in writing by August 12, 2009.

ADDRESSES: Submit your comments, identified by Docket ID Number EPA–R03–OAR–2009–0352 by one of the following methods:

- A. http://www.regulations.gov. Follow the online instructions for submitting comments.
- B. E-mail: fernadez.cristina@epa.gov.
- C. Mail: EPA-R03-OAR-2009-0352, Cristina Fernandez, Chief, Air Quality Planning Branch, Mailcode 3AP21, U.S. Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103.
- D. Hand Delivery: At the previouslylisted EPA Region III address. Such deliveries are only accepted during the Docket's normal hours of operation, and

special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID No. EPA-R03-OAR-2009-0352. EPA's policy is that all comments received will be included in the public docket without change, and may be made available online at http:// www.regulations.gov, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through http:// www.regulations.gov or e-mail. The http://www.regulations.gov Web site is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through http:// www.regulations.gov, your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the electronic docket are listed in the http://www.regulations.gov index. Although listed in the index, some information is not publicly available, i.e., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically in http:// www.regulations.gov or in hard copy during normal business hours at the Air Protection Division, U.S. Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103. Copies of the State submittal are available at the Allegheny County Health Department, Bureau of Environmental Quality, Division of Air Quality, 301 39th Street, Pittsburgh, Pennsylvania 15201.

FOR FURTHER INFORMATION CONTACT:

Maria A. Pino, (215) 814–2181, or by e-mail at pino.maria@epa.gov.

SUPPLEMENTARY INFORMATION: For further information on this SIP revision, which revises the Pennsylvania SIP to establish the method to determine compliance with opacity requirements for coke oven combustion stacks and allows the use of COMS to measure visible emissions in Allegheny County, and removes a redundant phrase in the current approved SIP, please see the information provided in the direct final action, with the same title, that is located in the "Rules and Regulations" section of this Federal Register publication. Please note that if EPA receives adverse comment on an amendment, paragraph, or section of this rule and if that provision may be severed from the remainder of the rule, EPA may adopt as final those provisions of the rule that are not the subject of an adverse comment.

Dated: July 1, 2009.

William C. Early,

Acting Regional Administrator, Region III. [FR Doc. E9–16363 Filed 7–10–09; 8:45 am] BILLING CODE 6560–50–P

Revisions to the California State Implementation Plan

AGENCY: Environmental Protection

Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve revisions to the San Joaquin Valley Unified Air Pollution Control District (SJUVAPCD) portion of the California State Implementation Plan (SIP). These revisions concern oxides of nitrogen (NO_X) emissions from Stationary Gas Turbines. We are approving a local rule that regulates these emission sources under the Clean Air Act as amended in 1990 (CAA or the Act). We are taking comments on this proposal and plan to follow with a final action.

DATES: Any comments must arrive by August 12, 2009.

ADDRESSES: Submit comments, identified by docket number EPA–R09–OAR–2009–0384, by one of the following methods:

- 1. Federal eRulemaking Portal: http://www.regulations.gov. Follow the online instructions.
 - 2. E-mail: steckel.andrew@epa.gov.

3. Mail or deliver: Andrew Steckel (Air–4), U.S. Environmental Protection Agency Region IX, 75 Hawthorne Street, San Francisco, CA 94105–3901.

Instructions: All comments will be included in the public docket without change and may be made available online at http://www.regulations.gov, including any personal information provided, unless the comment includes Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Information that you consider CBI or otherwise protected should be clearly identified as such and should not be submitted through http://www.regulations.gov or e-mail. http://www.regulations.gov is an "anonymous access" system, and EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send email directly to EPA, your e-mail address will be automatically captured and included as part of the public

comment. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Docket: The index to the docket for this action is available electronically at http://www.regulations.gov and in hard copy at EPA Region IX, 75 Hawthorne Street, San Francisco, California. While all documents in the docket are listed in the index, some information may be publicly available only at the hard copy location (e.g., copyrighted material), and some may not be publicly available in either location (e.g., CBI). To inspect the hard copy materials, please schedule an appointment during normal business hours with the contact listed in the FOR FURTHER INFORMATION CONTACT section.

FOR FURTHER INFORMATION CONTACT:

Idalia Perez, EPA Region IX, (415) 972–3248, perez.idalia@epa.gov.

SUPPLEMENTARY INFORMATION:

Throughout this document, "we," "us" and "our" refer to EPA.

 - C. EPA Recommendations To Further Improve the Rule
- D. Public Comment and Final Action III. Statutory and Executive Order Reviews

I. The State's Submittal

A. What rule did the State submit?

Table 1 lists the rule addressed by this proposal with the date that it was adopted by the local air agency and submitted by the California Air Resources Board (CARB).

TABLE 1—SUBMITTED RULES

| Local agency | Rule # | Rule title | Adopted | Submitted |
|--------------|--------|-------------------------|----------|-----------|
| SJVUAPCD | 4703 | Stationary Gas Turbines | 09/20/07 | 03/07/08 |

On April 17, 2008, this rule submittal was found to meet the completeness criteria in 40 CFR Part 51, Appendix V, which must be met before formal EPA review.

B. Are there other versions of this rule?

We approved a version of Rule 4703 into the SIP on May 18, 2004. The SJVUAPCD adopted an earlier revision to the SIP-approved version on August 17, 2006 and CARB submitted it to us on December 29, 2006. While we can act on only the most recently submitted version, we have reviewed materials provided with previous submittal.

C. What is the purpose of the submitted rule revision?

NO_X helps produce ground-level ozone, smog and particulate matter, which harm human health and the environment. Section 110(a) of the CAA requires States to submit regulations that control NO_x emissions. Rule 4703 regulates emissions of oxides of nitrogen (NO_X) and carbon monoxide (CO) from stationary gas turbine systems with ratings equal to or greater than 0.3 MW or a maximum heat input rating greater than 3 million Btu/hr. The Rule was revised to include more stringent emission limits and eliminate some exemptions present in the SIP-approved version. EPA's technical support

document (TSD) has more information about this rule.

II. EPA's Evaluation and Action

A. How is EPA evaluating the rule?

Generally, SIP rules must be enforceable (see section 110(a) of the Act), must require Reasonably Available Control Technology (RACT) for each category of sources covered by a Control Techniques Guidelines (CTG) document as well as each major source in nonattainment areas (see sections 182(a)(2) and 182(f)), and must not relax existing requirements (see sections 110(l) and 193). The SJVUAPCD regulates an ozone nonattainment area (see 40 CFR part 81), so Rule 4703 must fulfill RACT.

Guidance and policy documents that we use to help evaluate enforceability and RACT requirements consistently include the following:

- 1. "State Implementation Plans; Nitrogen Oxides Supplement to the General Preamble; Clean Air Act Amendments of 1990 Implementation of Title I; Proposed Rule," (the NO_X Supplement), 57 FR 55620, November 25, 1992.
- 2. "Issues Relating to VOC Regulation Cutpoints, Deficiencies, and Deviations," EPA, May 25, 1988 (the Bluebook).

- 3. "Guidance Document for Correcting Common VOC & Other Rule Deficiencies," EPA Region 9, August 21, 2001 (the Little Bluebook).
- 4. "Improving Air Quality with Economic Incentive Programs," EPA, 452/R-01-001, January 2001.
- 5. "Alternative Control Technology Document, NO_X Emissions from Stationary Gas Turbines," EPA, 453/R–93–007, January 1993.
- B. Does the rule meet the evaluation criteria?

We believe this rule is consistent with the relevant policy and guidance regarding enforceability, RACT, and SIP relaxations. The TSD has more information on our evaluation.

C. EPA Recommendations To Further Improve the Rule

The TSD describes additional rule revisions that do not affect EPA's current action but are recommended for the next time the local agency modifies the rule.

D. Public Comment and Final Action

Because EPA believes the submitted rule fulfills all relevant requirements, we are proposing to fully approve it as described in section 110(k)(3) of the Act. We will accept comments from the public on this proposal for the next 30 days. Unless we receive convincing new

information during the comment period, we intend to publish a final approval action that will incorporate this rule into the Federally enforceable SIP.

III. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by State law. For that reason, this action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the state, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Intergovernmental relations, Nitrogen dioxide, Ozone, Reporting and recordkeeping requirements.

Authority: 42 U.S.C. 7401 et seq.

Dated: June 22, 2009.

Jane Diamond,

Acting Deputy Regional Administrator, Region IX.

[FR Doc. E9–16495 Filed 7–10–09; 8:45 am]

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA-R09-OAR-2009-0371, FRL-8929-7]

Revisions to the California State Implementation Plan, Northern Sierra Air Quality Management District and San Joaquin Valley Unified Air Pollution Control District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve revisions to the Northern Sierra Air Quality Management District (NSAQMD) and San Joaquin Valley Unified Air Pollution Control District (SJVUAPCD) portions of the California State Implementation Plan (SIP). Under authority of the Clean Air Act as amended in 1990 (CAA or the Act), we are proposing to approve local rules that address volatile organic compound emissions from asphalt paving, gasoline bulk storage tanks, and gasoline dispensing stations.

DATES: Any comments must arrive by August 12, 2009.

ADDRESSES: Submit comments, identified by docket number EPA-R09-OAR-2009-0371, by one of the following methods:

- 1. Federal eRulemaking Portal: http://www.regulations.gov. Follow the on-line instructions.
 - 2. E-mail: steckel.andrew@epa.gov.
- 3. Mail or deliver: Andrew Steckel (Air-4), U.S. Environmental Protection Agency Region IX, 75 Hawthorne Street, San Francisco, CA 94105–3901.

Instructions: All comments will be included in the public docket without

change and may be made available online at http://www.regulations.gov, including any personal information provided, unless the comment includes Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Information that you consider CBI or otherwise protected should be clearly identified as such and should not be submitted through http://www.regulations.gov or e-mail. http://www.regulations.gov is an "anonymous access" system, and EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send email directly to EPA, your e-mail address will be automatically captured and included as part of the public comment. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Docket: The index to the docket for this action is available electronically at http://www.regulations.gov and in hard copy at EPA Region IX, 75 Hawthorne Street, San Francisco, California. While all documents in the docket are listed in the index, some information may be publicly available only at the hard copy location (e.g., copyrighted material), and some may not be publicly available in either location (e.g., CBI). To inspect the hard copy materials, please schedule an appointment during normal business hours with the contact listed in the FOR FURTHER INFORMATION CONTACT section.

FOR FURTHER INFORMATION CONTACT: Mae Wang, EPA Region IX, (415) 947–4124, wang.mae@epa.gov.

SUPPLEMENTARY INFORMATION:

Throughout this document, "we," "us" and "our" refer to EPA.

TABLE 1—SUBMITTED RULES

On April 17, 2008, CARB's submittal of March 7, 2008, was found to meet the completeness criteria in 40 CFR part 51, appendix V, which must be met before formal EPA review.

B. Are There Other Versions of These Rules?

There is no previous version of NSAQMD Rule 227 in the SIP. We approved previous versions of SJVUAPCD Rules 4621 and 4622 into the SIP on April 19, 2000 (65 FR 20912) and March 24, 2003 (68 FR 14156), respectively. We approved a previous version of SJVUAPCD Rule 4651 into the SIP on July 24, 1996 (61 FR 38571).

C. What Is the Purpose of the Submitted Rules and Rule Amendments?

Volatile organic compounds (VOCs) help produce ground-level ozone and smog, which harm human health and the environment. Section 110(a) of the CAA requires States to submit regulations that control VOC emissions. NŠAQMD Rule 227 provides standards to control VOC emissions during the use or manufacture of cutback asphalt and emulsified asphalt paving materials. SJVUAPCD Rule 4621 limits VOC emissions from gasoline storage containers and delivery vessels, and gasoline transfer operations at bulk plants. SJVUAPCD Rule 4622 limits VOC emissions from the transfer of gasoline into motor vehicle fuel tanks. SJVUAPCD Rule 4651 regulates VOC emissions from excavation, transportation, handling, decontamination, and disposal of soil that has been contaminated with a VOCcontaining liquid. EPA's technical support documents (TSDs) have more information about these rules.

II. EPA's Evaluation and Action

A. How Is EPA Evaluating the Rules?

Generally, SIP rules must be enforceable (*see* section 110(a) of the CAA) and must not relax existing requirements (*see* sections 110(l) and 193 of the CAA).

CAA subpart 1 VOC rules must require Reasonably Available Control Measures (RACM), including Reasonably Available Control Technology (RACT), for each major VOC source in ozone nonattainment areas (see section 172(c)(1) of the CAA). The NSAQMD regulates a subpart 1 8-hr ozone nonattainment area in Western Nevada County (see 40 CFR part 81) and must fulfill the requirements of RACM/RACT in that area.

CAA subpart 2 VOC rules must require RACT for each significant source category covered by a Control Technique Guideline (CTG) document and for each major source in ozone nonattainment areas (see sections 182(a)(2) and (b)(2) of the CAA). The SJVUAPCD regulates a subpart 2 8-hr ozone nonattainment area which was classified under the 1-hr standard as an extreme nonattainment area (see 40 CFR part 81). Additionally, gasoline storage, transfer, and dispensing rules must fulfill the special requirements for gasoline vapor recovery in ozone nonattainment areas (see section 182(b)(3)(A) of the CAA) and special requirements for vehicle fleets (see section 202(a)(6) of the CAA).

Guidance and policy documents that we use to help evaluate specific enforceability and RACT requirements consistently include the following:

- 1. Portions of the proposed post-1987 ozone and carbon monoxide policy that concern RACT, 52 FR 45044 (November 24, 1987).
- 2. Issues Relating to VOC Regulation Cutpoints, Deficiencies, and Deviations, EPA (May 25, 1988) [The Bluebook].
- 3. Guidance Document for Correcting Common VOC & Other Rule Deficiencies, EPA Region 9 (August 21, 2001) [The Little Bluebook].
- 4. Control of VOC from the Use of Cutback Asphalt, EPA-450/2-77-037 (December 1977).
- 5. SJVUAPCD 2004 Extreme Ozone Attainment Demonstration Plan.
- 6. SJVUAPCD 2007 Ozone Plan, http://www.arb.ca.gov/planning/sip/ 2007sip/sjv8hr/sjvozone.htm.
- 7. SJVÚAPCD Final Staff Report, Proposed Amendments to Rule 4651 (September 20, 2007).

B. Do the Rules Meet the Evaluation Criteria?

We believe that NSAQMD Rule 227 and SJVUAPCD Rules 4621, 4622, and

4651 are consistent with the relevant policy and guidance regarding enforceability, RACT, and SIP relaxations. The TSDs have more information on our evaluation.

C. Public Comment and Final Action

Because EPA believes the submitted rules fulfill all relevant requirements, we are proposing to fully approve them as described in section 110(k)(3) of the Act. We will accept comments from the public on this proposal for the next 30 days. Unless we receive convincing new information during the comment period, we intend to publish a final approval action that will incorporate these rules into the Federally enforceable SIP.

III. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve State choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves State law as meeting Federal requirements and does not impose additional requirements beyond those imposed by State law. For that reason, this action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive

Order 13132 (64 FR 43255, August 10, 1999):

- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act;
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this rule does not have Tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the State, and EPA notes that it will not impose substantial direct costs on Tribal governments or preempt Tribal law.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: June 22, 2009.

Jane Diamond,

Acting Regional Administrator, Region IX. [FR Doc. E9–16496 Filed 7–10–09; 8:45 am] BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA-R09-OAR-2009-0473; FRL-8929-6]

Revisions to the California State Implementation Plan, San Joaquin Valley Air Pollution Control District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve revisions to the San Joaquin Valley Air Pollution Control District portion of the California State Implementation Plan (SIP). These revisions concern volatile organic compound (VOC) emissions from graphic arts printing operations, digital printing operations, adhesives, cleaning solvents, transfer of organic liquids, and facilities engaged in coating of wood products, flat paneling, paper, film, foil, and fabric. We are approving 4 local rules that regulate these emission sources under the Clean Air Act as amended in 1990 (CAA or the Act). We are taking comments on this proposal and plan to follow with a final action.

DATES: Any comments must arrive by August 12, 2009.

ADDRESSES: Submit comments, identified by docket number [EPA-R09-OAR-2009-0473], by one of the following methods:

- 1. Federal eRulemaking Portal: http://www.regulations.gov. Follow the on-line instructions.
 - 2. E-mail: steckel.andrew@epa.gov.
- 3. Mail or delivery: Andrew Steckel (Air–4), U.S. Environmental Protection Agency Region IX, 75 Hawthorne Street, San Francisco, CA 94105–3901.

Instructions: All comments will be included in the public docket without change and may be made available online at http://www.regulations.gov, including any personal information provided, unless the comment includes Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Information that you consider CBI or otherwise protected should be clearly identified as such and should not be submitted through http://www.regulations.gov or e-mail.

http://www.regulations.gov is an "anonymous access" system, and EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send email directly to EPA, your e-mail address will be automatically captured and included as part of the public comment. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Docket: The index to the docket for this action is available electronically at http://www.regulations.gov and in hard copy at EPA Region IX, 75 Hawthorne Street, San Francisco, California. While all documents in the docket are listed in the index, some information may be publicly available only at the hard copy location (e.g., copyrighted material), and some may not be publicly available in either location (e.g., CBI). To inspect the hard copy materials, please schedule an appointment during normal business hours with the contact listed in the FOR FURTHER INFORMATION CONTACT section.

FOR FURTHER INFORMATION CONTACT:

Nicole Law, EPA Region IX, (415) 947–4126, Law.Nicole@epa.gov.

SUPPLEMENTARY INFORMATION:

Throughout this document, "we," "us" and "our" refer to EPA.

I. The State's Submittal

A. What Rules Did the State Submit?

Table 1 lists the rules addressed by this proposal with the dates that they were adopted by the local air agency and submitted by the California Air Resources Board.

TABLE 1—SUBMITTED RULES

| Local agency | Rule No. | Rule title | Adopted | Submitted |
|------------------------------------------|--------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------|----------------------------------------------|
| SJVAPCD

03/17/09
03/07/08
03/07/08 |

On April 17, 2008 and April 20, 2009, EPA determined that these rule submittals met the completeness criteria in 40 CFR Part 51, Appendix V, which must be met before formal EPA review.

B. Are There Other Versions of These Rules?

There are no previous versions of Rule 4624 in the SIP. We approved earlier versions of Rules 4606 and 4607 into the SIP on June 26, 2002 (67 FR 42999). SJVAPCD adopted revisions to the SIP-approved version of Rule 4606 on September 20, 2007 and October 16, 2008 and CARB submitted them to us on March 7, 2008 and December 23, 2008. SJVAPCD adopted revisions to the SIP-approved version of Rule 4607 on September 20, 2007 and December 18, 2008 and CARB submitted them to us on March 7, 2008 and March 17, 2009. We approved an earlier version of Rule 4653 into the SIP on May 7, 2002 (57 FR 30591). SJVAPCD adopted revisions to the SIP-approved version of Rule 4653 on September 20, 2007 and CARB submitted it to us on March 7, 2008. While we are only acting on the most recently submitted version, we have reviewed materials provided with previous submittals.

C. What Is the Purpose of the Submitted Rules and Rule Revisions?

VOCs help produce ground-level ozone and smog, which harm human health and the environment. Section 110(a) of the CAA requires States to submit regulations that control VOC emissions. These rules control VOC emissions by limiting VOC content in coatings used for graphic arts operations, printing operations, wood products, flat paneling, paper, film, foil, and fabric. In addition, the rules limit VOCs by regulating adhesives, cleaning solvents, and transfer of organic liquids. EPA's technical support documents (TSDs) have more information about these rules.

II. EPA's Evaluation and Action

A. How Is EPA Evaluating the Rules?

Generally, SIP rules must be enforceable (see section 110(a) of the Act), must require Reasonably Available Control Technology (RACT) for each category of sources covered by a Control Techniques Guidelines (CTG) document as well as each major source in nonattainment areas (see sections 182(a)(2) and (b)(2)), and must not relax existing requirements (see sections 110(l) and 193). The SJVAPCD regulates an extreme (for the 1-hour NAAQS) and serious (for the 8-hour NAAQS) ozone nonattainment area (see 40 CFR part 81),

so Rules 4606, 4607, 4626, and 4653 must fulfill RACT.

Guidance and policy documents that we use to evaluate enforceability and RACT requirements consistently include the following:

- 1. Portions of the proposed post-1987 ozone and carbon monoxide policy that concern RACT, 52 FR 45044, November 24, 1987.
- 2. "Issues Relating to VOC Regulation Cutpoints, Deficiencies, and Deviations," EPA, May 25, 1988 (the Bluebook).
- 3. "Guidance Document for Correcting Common VOC & Other Rule Deficiencies," EPA Region 9, August 21, 2001 (the Little Bluebook).
- 4. "State Implementation Plans, General Preamble for the Implementation of Title I of the Clean Air Amendments of 1990," 57 FR 13498, April 16, 1992.
- 5. "Preamble, Final Rule to Implement the 8-hour Ozone National Ambient Air Quality Standard" 70 FR 71612; Nov. 29, 2005.
- 6. Letter from William T. Hartnett to Regional Air Division Directors, "RACT Qs & As—Reasonable Available Control Technology (RACT) Questions and Answers," May 18, 2006.
- 7. "Control of Volatile Organic Compound Emissions from Wood Furniture Manufacturing Operations," EPA-453/R-96-007, April 1996.
- 8. "Control Techniques Guidelines for Flat Wood Paneling Coatings," EPA– 453/R–06–004, September 2006.
- 9. "Control Technique Guidelines for Control of VOCs from Existing Stationary Sources—Volume II: Surface Coating of Cans, Coils, Paper, Fabrics, Automobiles, and Light-Duty Trucks," EPA-450/2-77-008, May 1977.
- 10. "Control Techniques Guidelines for Control of VOCs from Existing Stationary Sources—Volume VIII: Graphic Arts—Rotogravure and Flexography," EPA-450/2-78-033, December 1978.
- 11. "Control Techniques Guidelines for Offset Lithographic Printing and Letterpress Printing," EPA-453/R-06-002, September 2006.
- 12. "Control Techniques Guidelines for Flexible Package Printing," EPA–453/R–06–003, September 2006.
- 13. "Control Techniques Guidelines for Paper, Film, and Foil Coatings," EPA-453/R-07-003, September 2007.
- 14. "Control of Hydrocarbons from Tank Truck Gasoline Loading Terminals," EPA–450/2–77–026, October 1977.
- 15. "Control Techniques Guidelines for Miscellaneous Industrial Adhesives," EPA-453/R-08-005, September 2008.

16. "Determination of Reasonably Available Control Technology and Best Available Retrofit Control Technology for Adhesives and Sealants," CARB, December 1998.

B. Do the Rules Meet the Evaluation Criteria?

We believe these rules are consistent with the relevant requirements, policy, and guidance regarding enforceability, RACT, and SIP relaxations. The TSDs have more information on our evaluation.

C. EPA Recommendations To Further Improve the Rules

The TSDs describe additional rule revisions that do not affect EPA's current action but are recommended for the next time the local agency modifies the rules.

D. Public Comment and Final Action

Because EPA believes the submitted rules fulfill all relevant requirements, we are proposing to fully approve them as described in section 110(k)(3) of the Act. We will accept comments from the public on this proposal for the next 30 days. Unless we receive convincing new information during the comment period, we intend to publish a final approval action that will incorporate these rules into the Federally enforceable SIP.

III. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve State choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves State law as meeting Federal requirements and does not impose additional requirements beyond those imposed by State law. For that reason, this action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely

affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);

- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999):
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355. May 22, 2001):
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994). In addition, this rule does not have Tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the State, and EPA notes that it will not impose substantial direct costs on Tribal governments or preempt Tribal law.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Intergovernmental relations, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Authority: 42 U.S.C. 7401 et seq.

Dated: June 26, 2009.

Jane Diamond,

Acting Regional Administrator, Region IX. [FR Doc. E9–16490 Filed 7–10–09; 8:45 am] BILLING CODE 6560–50–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

42 CFR Part 73

Possession, Use, and Transfer of Select Agents and Toxins; Proposed Addition of SARS-Associated Coronavirus (SARS-CoV)

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice of proposed rulemaking.

SUMMARY: The biological agents and toxins listed in § 73.3 of Title 42 of the

Code of Federal Regulations have been determined by the Secretary of the U.S. Department of Health and Human Services (HHS Secretary) to have the potential to pose a severe threat to public health and safety. We are now proposing to add SARS-associated coronavirus (SARS-CoV) to the list of HHS select agents and toxins. We are proposing this action because (1) SARS-CoV can cause significant mortality, especially in the elderly; (2) the virus has the capability of easily being transmitted from human to human; (3) there is currently no vaccine or antiviral approved for the prevention or treatment of infections caused by the SARS-CoV virus; and (4) it has been documented that the virus may persist in the environment.

DATES: Written comments must be received on or before September 11, 2009. Comments received after September 11, 2009 will be considered to the extent practicable.

ADDRESSES: Comments on the proposed addition of SARS–CoV to the list of select agents and toxins should be marked "SARS–CoV" and mailed to: Centers for Disease Control and Prevention, Division of Select Agents and Toxins, 1600 Clifton Road, MS A–46, Atlanta, GA 30333. Comments may be e-mailed to: *SAPcomments@cdc.gov*.

FOR FURTHER INFORMATION CONTACT: Robbin Weyant, Director, Division of Select Agents and Toxins, Centers for Disease Control and Prevention, 1600 Clifton Road, MS A–46, Atlanta, GA 30333. Telephone: (404) 718–2000.

SUPPLEMENTARY INFORMATION: The Public Health Security and Bioterrorism Preparedness and Response Act of 2002, Subtitle A of Public Law 107-188 (42) U.S.C. 262a) (the Bioterrorism Act), requires the HHS Secretary to establish by regulation a list of each biological agent and each toxin that has the potential to pose a severe threat to public health and safety. In determining whether to include an agent or toxin on the list, the HHS Secretary considers the effect on human health of exposure to an agent or toxin; the degree of contagiousness of an agent and the methods by which an agent or toxin is transferred to humans; the availability and effectiveness of pharmacotherapies and immunizations to treat and prevent illnesses resulting from an agent or toxin; the potential for an agent or toxin to be used as a biological weapon; and the needs of children and other vulnerable populations.

SARS-associated coronavirus (SARS–CoV) causes a viral respiratory illness, severe acute respiratory syndrome (SARS), which was first reported in Asia

in February 2003. According to the World Health Organization (WHO), a total of 8,098 people worldwide became sick with SARS during the 2003 outbreak, resulting in 774 deaths. SARS-CoV is thought to be transmitted most readily by respiratory droplets (droplet spread) produced when an infected person coughs or sneezes. The virus also can spread when a person touches a surface or object contaminated with infectious droplets and then touches his or her mouth, nose, or eye(s). In addition, it is possible that SARS-CoV might be spread more broadly through the air (airborne spread) or by other ways that are not now known. There is currently no known SARS transmission anywhere in the world. The last known human cases of SARS-CoV infection as reported by the World Health Organization occurred in China in April 2004 in an outbreak resulting from laboratory-acquired infections.

After consulting with subject matter experts from the CDC, the National Institutes of Health (NIH), the Food and Drug Administration (FDA), the United States Department of Agriculture (USDA)/Animal and Plant Health Inspection Service (APHIS), USDA/ Agricultural Research Service (ARS), USDA/CVB (Center for Veterinary Biologics), and the Department of Defense (DOD)/United States Army Medical Research Institute for Infectious Diseases (USAMRIID) and conducting a review of relevant published studies, we are proposing that SARS-CoV should be added to the list of HHS select agents and toxins because:

- The virus causes significant mortality, especially in the elderly.
- The virus has the capability of easily being transmitted from human-tohuman.iv
- There is currently no method to treat infections caused by the virus.
- It has been demonstrated that the virus may persist in the environment.

We will consider comments that are received within 60 days of publication of this notice in the **Federal Register**. After the comment period closes, we will publish another document in the **Federal Register**. The document will include a discussion of any comments we receive and any changes to the list of HHS select agents and toxins.

Compliance Dates

We recognize that there may be some individuals and/or entities that are not currently registered under either the HHS or USDA Select Agent Programs, but that do possess SARS—CoV and would therefore be required to register

with HHS should this proposed amendment be finalized.

Accordingly, as a result of this rule, an individual or entity that currently possesses SARS-CoV, if they are not already a registered entity, would have to either transfer the SARS-CoV to an individual or entity that was registered to possess SARS-ČoV or become a registered individual or entity themselves. We recognize that an individual or entity that chooses to become registered for possession of SARS-CoV will need time to come into full compliance with the requirements of the regulations, including the granting of individual access through the security risk assessment process. To minimize the disruption of research, educational projects (e.g., teaching demonstrations), or other important activities involving SARS-CoV that might be underway as of the effective date of these proposed regulations, we are also proposing to provide that any unregistered individual or entity possessing SARS-CoV as of the effective date (current unregistered possessors) will be afforded time to reach full compliance with the select agent regulations (42 CFR part 73). Therefore, we are proposing that any current possessor of SARS-CoV must be fully registered and in full compliance with all provisions of the Select Agent Regulations not later than 180 days after the effective date of a final rule.

The Responsible Official for currently registered individuals or entities that possess SARS—CoV would be required to provide notice in the form of an amendment to their registration to HHS or USDA regarding their possession of SARS—CoV not later than 15 days after the effective day of this proposed amendment.

Regulatory Analyses

Paperwork Reduction Act

This proposed rule contains no new information collection or recordkeeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Executive Order 12866 and Regulatory Flexibility Act

This rule will add SARS—CoV to the HHS select agent list. The purpose of the regulation of select agents and toxins is to reduce the potential for these agents and toxins to pose a severe threat to public health and safety by establishing Federal requirements for biosafety, security, training, and personnel surety. Should any select agent or toxin be intentionally or accidentally introduced into the

population of the United States, the consequences could be significant. The individuals and entities most likely to be affected by this proposed rule are those individuals at laboratories and other institutions conducting research and related activities that involve the use of SARS–CoV.

Based on CDC data, there are 138 entities that currently possess SARS—CoV. Of those 138 entities, 73 entities are registered with the select agent program of either HHS or USDA. The majority of the non-registered entities are commercial entities.

Costs. Our estimate of the long-term cost of implementing the select agent regulations is based on the actual costs incurred by registering entities implementing the interim final rule that became fully applicable on November 12, 2003. Additionally, before the interim final rule was issued in December 2002, CDC contacted a number of entities to assess existing practices. Because many of the laboratories that will register under this proposal are already substantially in compliance with the required practices, the costs of the rule should be limited.

Benefits. The benefits to public health and safety from implementation of the rule are clear, although difficult to quantify. The benefits of the final rule will be the decreased risk of accidental or intentional release of a select agent derived from the establishment of Federal requirements for biosafety, security, training, and personnel surety. The cost of such an event in human life could be very high. The release of a select agent or toxin could result in a public health emergency requiring an extensive and expensive response. This effort could include extensive public health measures, such as quarantine, preventative treatment and health testing for large numbers of potentially exposed persons, and extensive decontamination. Substantial costs could be incurred by hospitals and other medical facilities and institutions of government at all levels. A release, or widespread fear of one, also would create significant secondary effects. It could disrupt business, transportation, and many other aspects of normal behavior, on both a short-term and potentially a long-term basis.

The impacts resulting from the October 2001 anthrax attacks provide an example of the costs that a release could incur. The anthrax attacks caused five fatalities and 17 illnesses, disrupted business and government activities, and caused widespread apprehension and changes in behavior. Costs included more than \$23 million to decontaminate one Senate office building;

approximately \$2 billion in revenues lost to the postal service, and as much as \$3 billion in additional costs to the postal service for cleanup of contamination and procurement of mail sanitizing equipment. Substantial costs due to lost productivity throughout the economy and from ongoing costs of the investigations into the incident are additional impacts.

Implementation of this rule will continue to provide a means for the registration of those who possess select agents; ensure that their transfer, storage, and use can be tracked; provide for the screening of personnel with access to such agents; and require that entities in possession of such agents develop and implement effective means of biosafety and physical security. The benefit of these provisions is a reduced likelihood of either an accidental or intentional release of select agents or the consequent avoidance of costs associated with such a release.

Impacts resulting from the costs of the rule should not be significant. The annualized cost on small entities would not exceed one percent of sales or revenue stream and the initial cost would not exceed three percent of sales or revenue stream, according to the economic analysis, "Regulatory Impact Analysis, 42 CFR part 73, Possession, Use, and Transfer of Select Biological Agents and Toxins Final Rule." To request a copy of this report, send an email to SAPcomments@cdc.gov. The HHS Secretary hereby certifies that the final rule will not have a significant economic impact on a substantial number of small entities.

Insert on Small Entity Impact

The Regulatory Flexibility Act (RFA) of 1980, as amended by the Small Business Regulatory Enforcement Fairness Act of 1996, requires agencies to prepare an initial regulatory flexibility analysis for any rule subject to notice and comment rulemaking unless the agency is able to certify that the rule will not have a significant economic impact on a substantial number of small entities.

HHS guidance on the treatment of small entities suggests that a "substantial number" should be considered to mean 5 percent or more of the affected small entities within an identified industry. The U.S. Small Business Administration (SBA) has established size standards for all forprofit industries based on either the

¹Regulatory Impact Analysis for 42 CFR Part 73: Possession, Use, and Transfer of Select Biological Agents and Toxins Final Rule. Centers for Disease Control and Prevention, Department of Health and Human Services. February 3, 2005.

number of employees or annual revenue, depending on the North American Industry Classification System (NAICS) classification. Most affected entities would be considered part of NAICS code 5417102 Research and Development in Life Sciences. Per the SBA's Table of Small Business Size Standards, the Research and Development entities in NAICS code 5417102 are considered small if they have fewer than 500 employees.2 According to the Economic Census, there are 4,674 life sciences research and development establishments that are categorized as "small" using this standard.³ Based on CDC data, there are 138 entities that are known to currently possess SARS-Co-V, and even if all 138 entities were considered small, less than 3 percent of the small facilities in NAICS code 5417102 would be affected by the rule.

Furthermore, the HHS guidance defines a "significant economic impact" as an average annual impact of 3 to 5 percent or more of total costs or revenues. The 65 entities that are not registered with the select agent program must comply with the select agent regulations, including becoming registered and ensuring adequate biosafety and containment measures, physical security, training, and recordkeeping. The average cost for a facility to register with CDC and otherwise comply with 42 CFR part 73 is estimated to range from \$15,300 to \$170,000 (70 FR 13315, March 18, 2005). The 73 entities that are already registered because they possess other listed select agents or toxins would need to amend their registrations, but they are likely to already have adequate physical security, training programs, and recordkeeping systems to enable them to safely and securely possess and use SARS-CoV. The average revenue for the small establishments in NAICS code 5417102 is about \$3,493,000, so the average annual impact for facilities to comply with the rule would range from less than 1 percent to less than 5

Therefore, the HHS Secretary has certified that the final rule will not have a significant economic impact on a substantial number of small entities. Executive Order 12988

This Notice of Proposed Rulemaking has been reviewed under Executive Order 12988, Civil Justice Reform. This rule: (1) Would preempt all State and local laws and regulations that are inconsistent with this rule; (2) would have no retroactive effect; and (3) would not require administrative proceedings before parties may file suit in court challenging this rule.

List of Subjects in 42 CFR Part 73

Biologics, Incorporation by reference, Packaging and containers, Penalties, Reporting and recordkeeping requirements, Transportation.

Dated: June 9, 2009.

Kathleen Sebelius,

Secretary.

For the reasons stated in the preamble, we are proposing to amend 42 CFR part 73 as follows:

PART 73—SELECT AGENTS AND TOXINS

1. The authority citation for part 73 continues to read as follows:

Authority: 42 U.S.C. 262a; sections 201–204, 221 and 231 of Title II of Public Law 107–188, 116 Stat. 637 (42 U.S.C. 262a).

2. Amend paragraph (b) of § 73.3 by adding the following entry in alphabetical order to read as follows:

§73.3 HHS select agents and toxins.

* * * * * * (b) * * *

Medicare Program; Payment Policies Under the Physician Fee Schedule and Other Revisions to Part B for CY 2010; Correction

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS. **ACTION:** Correction of proposed rule.

SUMMARY: This document corrects a technical error in the proposed rule entitled "Medicare Program; Payment Policies Under the Physician Fee Schedule and Other Revisions to Part B for CY 2010" which appears elsewhere in this **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Diane Milstead, (410) 786–3355.

SUPPLEMENTARY INFORMATION:

I. Background

In FR Doc. E9–15835 of July 13, 2009, there was a technical error that is identified and corrected in the Correction of Errors section below.

II. Summary of Errors

In section V., Regulatory Impact Analysis, of the preamble of the proposed rule entitled "Medicare Program; Payment Policies Under the Physician Fee Schedule and Other Revisions to Part B for CY 2010" that is published elsewhere in this **Federal Register**, we inadvertently omitted language regarding the impact of the proposed Physician Fee Schedule Update for CY 2010.

III. Correction of Errors

In FR Doc. E9–15835 of July 13, 2009, to make a correction to section V. of the preamble, the Regulatory Impact Analysis, prior to the section labeled "U. Alternatives Considered," the following language should be inserted:

"L. Physician Fee Schedule Update for CY 2010 In section II.P. of the proposed rule, we describe our proposal to remove physician-administered drugs from the definition of physicians' services for purposes of calculating allowed and actual expenditures for all years since the 1996/1997 base year, and for purposes of calculating the SGR for 2010 and all subsequent years. While this proposal would not change the

DEPARTMENT OF AGRICULTURE

Farm Service Agency

Information Collection Request, **Servicing Minor Program Loans**

AGENCY: Farm Service Agency, USDA. **ACTION:** Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FSA is requesting comments from all interested individuals and organizations on a currently approved information collection to support the FSA Farm Loan Programs (FLP).

DATES: We will consider comments that we receive by September 11, 2009. **ADDRESSES:** We invite you to submit

comments on this notice. In your comments, include date, volume, and page number of this issue of Federal Register. You may submit comments by any of the following methods:

• Mail: Mel Thompson, USDA, Farm Service Agency, Loan Servicing and Property Management Division, 1250 Maryland Avenue, SW., Suite 500, Washington, DC 20024;

• *E-mail*:

mel.thompson@wdc.usda.gov;

- Fax: 720-5804.
- Hand Delivery or Courier: Deliver comments to Farm Service Agency, Loan Servicing and Property Management Division, 1280 Maryland Avenue, SW., Suite 500, Washington, DC 20024.

You may also send comments to the Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Mel Thompson, Senior Loan Officer, (202) 720-7862.

SUPPLEMENTARY INFORMATION:

Title: Servicing Minor Program Loans. OMB Control Number: 0560-0230. Expiration Date: January 31, 2010.

Type of Request: Extension. Abstract: Section 331 of the Consolidated Farm and Rural Development Act, 7 U.S.C. 1981, ("CONACT") in part, authorizes the Secretary of Agriculture to modify, subordinate and release terms of security instruments, leases, contracts, and agreements entered into by FSA. That section also authorizes transfers of security property, as the Secretary deems necessary, to carry out the purpose of the loan or protect the Government's financial interest. Section 335 of the CONACT (7 U.S.C. 1985), provides servicing authority for real estate security; operation or lease of realty; disposition of property; conveyance of real property interest of the United States; easements; and condemnations. The information collection relates to a program benefit recipient or loan borrower requesting action on security they own, which was purchased with FSA loan funds, improved with FSA loan funds or has otherwise been mortgaged to FSA to secure a Government loan. The information collected is primarily financial data not already on file, such as borrower asset values, current financial information and public use and employment data.

Estimate of Annual Burden: Public reporting burden for this collection of information is estimated to average .52

hours per response.

Respondents: Individuals, associations, partnerships, or corporations.

Estimated Number of Respondents:

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 117.5 hours.

We are requesting comments on all aspects of this information collection including the follow to help us to:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used:
- (3) Enhance the quality, utility and clarity of the information to be collected:
- (4) Minimize the burden of the collection of information on those who

are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All responses to this Notice will be summarized and included in the information collection request for Office of Management and Budget approval. All comments will also become a matter of public record.

Signed in Washington, DC, on July 6, 2009. Douglas J. Caruso,

Administrator, Farm Service Agency. [FR Doc. E9-16403 Filed 7-10-09; 8:45 am] BILLING CODE 3410-05-P

DEPARTMENT OF AGRICULTURE

Natural Resources Conservation Service

Notice of Proposed Change to Section IV of the Virginia State Technical Guide

AGENCY: Natural Resources Conservation Service (NRCS), U.S. Department of Agriculture.

ACTION: Notice of availability of proposed changes in the Virginia NRCS State Technical Guide for review and comment.

SUMMARY: It has been determined by the NRCS State Conservationist for Virginia that changes must be made in the NRCS State Technical Guide specifically in practice standards: #314, Brush Management; #382, Fence; #646, Shallow Water Development and Management; #658, Wetland Creation; #659, Wetland Enhancement; #657, Wetland Restoration; and #644, Wetland Wildlife Habitat Management. These practices will be used to plan and install conservation practices on cropland, pastureland, woodland, and wildlife

DATES: Comments will be received for a 30-day period commencing with this date of publication.

FOR FURTHER INFORMATION CONTACT: John A. Bricker, State Conservationist, Natural Resources Conservation Service (NRCS), 1606 Santa Rosa Road, Suite 209, Richmond, Virginia 23229-5014; Telephone number (804) 287–1691; Fax number (804) 287-1737. Copies of the practice standards will be made available upon written request to the address shown above or on the Virginia

NRCS Web site: http:// www.va.nrcs.usda.gov/technical/ draftstandards.html.

SUPPLEMENTARY INFORMATION: Section 343 of the Federal Agriculture Improvement and Reform Act of 1996 states that revisions made after enactment of the law to NRCS State technical guides used to carry out highly erodible land and wetland provisions of the law shall be made available for public review and comment. For the next 30 days, the NRCS in Virginia will receive comments relative to the proposed changes. Following that period, a determination will be made by the NRCS in Virginia regarding disposition of those comments and a final determination of change will be made to the subject standards.

Dated: July 1, 2009.

W. Ray Dorsett,

Assistant State Conservationist for Operations, Natural Resources Conservation Service, Richmond, Virginia.

Light-Walled Rectangular Pipe and **Tube from Mexico; Extension of Time** Limit for Final Results of Antidumping **Duty Changed Circumstances Review**

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) finds that it is not practicable to complete the final results of this changed circumstances review within the original time frame as it would be impossible to consider the parties comments and to complete the final results of this changed circumstances review within the original time frame. Accordingly, the Department is extending the time limit for completion of the final results of this changed circumstances review by 31 days to August 17, 2009.

FOR FURTHER INFORMATION CONTACT: John Drury or Brian Davis, AD/CVD Operations, Office 7, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-0195 or (202) 482-7924, respectively.

SUPPLEMENTARY INFORMATION:

Background

On October 27, 2008, the Department published its notice of initiation of antidumping duty changed circumstances review. See Notice of Initiation of Antidumping Duty Changed Circumstances Review: Light-Walled Rectangular Pipe and Tube from Mexico, 73 FR 63686 (October 27, 2008) (Notice of Initiation). On June 18, 2009, the Department preliminarily determined that Ternium is the successor-in-interest to Hylsa and should be treated as such for antidumping duty cash deposit purposes. See Notice of Preliminary Results of Antidumping Duty Changed Circumstances Review: Light-Walled Rectangular Pipe and Tube from Mexico, 74 FR 28887 (June 18, 2009) (Preliminary Results).

Extension of Time Limits for Preliminary Results

The antidumping statute does not provide for a specific time limit for completing a changed circumstances review. However, under 19 CFR 351.216(e), the Department will issue the final results of a changed circumstances review within 270 days after the date on which the Department initiates the changed circumstances review. Currently, the final results of the antidumping duty changed circumstances review, which cover Hylsa, a producer/exporter of lightwalled rectangular pipe and tube from Mexico, and its successor Ternium, are due by July 17, 2009.

In the Preliminary Results, we stated that interested parties could request a hearing and submit case briefs to the Department no later than 30 days after the publication of the Preliminary Results, and submit rebuttal briefs, limited to the issues raised in those case briefs, five days subsequent to the case briefs' due date. As comments are currently due no later than July 20, 2009,1 and the final results are currently due July 17, 2009, it would be impossible to consider the parties comments and to complete the final results of this changed circumstances review within the original time frame. Accordingly, pursuant to 19 CFR 351.302(b), the Department is extending the time limit for completion of the final results of this changed circumstances review by 31 days to August 17, 2009. See, e.g., Certain Pasta from Italy: Notice of Extension of Final Results of Antidumping Duty Changed Circumstances Review, 73 FR 46871

(August 12, 2008) and Polvethylene Terephthalate Film Sheet and Strip from the Republic of Korea: Extension of Time Limit for Final Results of Changed Circumstances Review, 73 FR 6931 (February 6, 2008).

This notice is issued and published in accordance with sections 751(b) and 777(i) of the Tariff Act of 1930, as amended.

Dated: July 8, 2009.

John M. Andersen,

Acting Deputy Assistant Secretaryfor Antidumping and Countervailing Duty Operations.

Certain Cased Pencils from the People's Republic of China: Final **Results and Partial Rescission of Antidumping Duty Administrative** Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: On January 7, 2009, the Department of Commerce (the "Department") published the preliminary results of the administrative review of the antidumping duty order on certain cased pencils from the People's Republic of China, covering the period December 1, 2006, through November 30, 2007. See Certain Cased Pencils from the People's Republic of China; Preliminary Results and Partial Rescission of Antidumping Duty Administrative Review, 74 FR 673 (January 7, 2009) ("Preliminary Results"). We gave the interested parties an opportunity to comment on the Preliminary Results. After reviewing the interested parties' comments, we made changes to our calculations for the final results of the review. The final dumping margin for this review is listed in the "Final Results of the Review" section

EFFECTIVE DATE: July 13, 2009.

FOR FURTHER INFORMATION CONTACT: David Layton or Alexander Montoro, AD/CVD Operations, Office 1, Import Administration, International Trade Administration, U.S. Department of

Commerce, 14th Street and Constitution Avenue, N.W., Washington, DC 20230; telephone (202) 482-0371 or (202) 482-0238, respectively.

SUPPLEMENTARY INFORMATION:

¹Day 30 falls on a Saturday. Therefore, interested parties have until Monday, July 20, 2009, to request a hearing and submit case briefs to the Department.

Background

The Department published the Preliminary Results on January 7, 2009. On January 12, 2009, the Department sent supplemental questionnaires to mandatory respondents China First Pencil Co., Ltd. ("China First"), Shanghai Three Star Stationery Industry Corp. ("Three Star"), and Shandong Rongxin Import & Export Co., Ltd. ("Rongxin") (collectively, "the respondents"), and received responses from China First and Three Star on February 2, 2009, a response from Rongxin on January 29, 2009, and an addendum to Rongxin's response on February 18, 2009. The Department sent a supplemental questionnaire to Three Star on February 20, 2009, and received a response on February 23, 2009. China First, Three Star, and the petitioners, Sanford L.P., Musgrave Pencil Company, RoseMoon Inc., and General Pencil Company (collectively, "the petitioners"), submitted comments on Three Star's February 23, 2009, supplemental response on February 25, 2009. Additional supplemental questionnaires were sent to Rongxin, China First, and Three Star on March 25, and April 21, 2009, respectively, and responses were received from Rongxin on April 3, 2009, and from China First and Three Star on April 28, 2009.

China First, Three Star, and the petitioners, submitted surrogate value comments on February 10, 2009. On February 9 and 10, 2009, the petitioners submitted factual information, and China First and Three Star issued a rebuttal to that factual information on February 12, 2009.

From February 16 through February 28, 2009, we conducted verification of the questionnaire responses submitted by China First and Three Star. The Department released its verification reports for China First and Three Star to interested parties on May 22, 2009.

As noted in the *Preliminary Results*, five respondents subject to this review were not selected as mandatory respondents. We issued separate rate applications and certifications to all five of these companies. We are rescinding one of these respondents, Dixon, as requested, on the basis that it had no shipments in the POR, as discussed below. SFTC filed its separate rate certification on July 24, 2008. In our analysis of the information on the record regarding SFTC, we found no

information indicating the existence of government control of SFTC's export activities. See SFTC's submission of July 24, 2008. Consequently, we determine that SFTC has met the criteria for the application of a separate rate. The remaining three non-mandatory respondents did not submit either a separate rates certification or application. One of these three companies, Tianjin, qualified for a separate rate in an earlier administrative review. See Certain Cased Pencils from the People's Republic of China; Final Results and Partial Rescission of Antidumping Duty Administrative Review, 68 FR 43082, 43084 (July 21, 2003). However, because Tianjin did not submit a separate rate certification in the instant review, it will now be treated as part of the PRC-wide entity. Consequently, Anhui, Guangdong, and Tianjin have not satisfied the criteria for separate rates for the POR and are considered as being part of the PRCwide entity.

The petitioners and the respondents submitted case briefs on June 2, 2009 and rebuttal briefs on June 8, 2009. None of the parties requested a hearing.

Final Partial Rescission

On July 3, 2008, Beijing Dixon Stationery Company Ltd. ("Dixon") requested that the Department rescind the administrative review with respect to Dixon and certified that it had no exports, sales or entries of subject merchandise to the United States during the Period of Review ("POR"). We reviewed U.S. Customs and Border Protection ("CBP") import data and found no evidence that Dixon had any shipments of subject merchandise during the POR. In addition, on July 17, 2008, we made a "No Shipments Inquiry" to CBP to confirm that there were no exports of subject merchandise by Dixon during the POR. We asked CBP to notify us within ten days if CBP "has contrary information and is suspending liquidation" of subject merchandise exported by Dixon. CBP did not reply with contrary information. See Memorandum from Alexander Montoro to the File, entitled "Intent to Rescind in Part the Antidumping Duty Administrative Review on Certain Cased Pencils from the People's Republic of China," August 7, 2008 ("Intent to Rescind Memo"). The Department provided interested parties in this review until August 14, 2008, to submit comments on the Intent to Rescind Memo. No interested party submitted any comments. Accordingly, we are rescinding this review with respect to Dixon.

Scope of the Order

Imports covered by the order are shipments of certain cased pencils of any shape or dimension (except as described below) which are writing and/ or drawing instruments that feature cores of graphite or other materials, encased in wood and/or man-made materials, whether or not decorated and whether or not tipped (e.g., with erasers, etc.) in any fashion, and either sharpened or unsharpened. The pencils subject to the order are currently classifiable under subheading 9609.10.00 of the Harmonized Tariff Schedule of the United States ("HTSUS"). Specifically excluded from the scope of the order are mechanical pencils, cosmetic pencils, pens, noncased crayons (wax), pastels, charcoals, chalks, and pencils produced under U.S. patent number 6,217,242, from paper infused with scents by the means covered in the above–referenced patent, thereby having odors distinct from those that may emanate from pencils lacking the scent infusion. Also excluded from the scope of the order are pencils with all of the following physical characteristics: (1) length: 13.5 or more inches; (2) sheath diameter: not less than one-and-one quarter inches at any point (before sharpening); and (3) core length: not more than 15 percent of the length of the pencil.

In addition, pencils with all of the following physical characteristics are excluded from the scope of the order: novelty jumbo pencils that are octagonal in shape, approximately ten inches long, one inch in diameter before sharpening, and three—and-one eighth inches in circumference, composed of turned wood encasing one—and-one half inches of sharpened lead on one end and a rubber eraser on the other end.

Although the HTSUS subheading is provided for convenience and customs purposes, the written description of the scope of the order is dispositive.

Analysis of Comments Received

All issues raised in the case briefs are addressed in the "Issues and Decision Memorandum for the 2006-2007 Administrative Review of Certain Cased Pencils from the People's Republic of China" ("Issues and Decision Memorandum"), which is dated concurrently with and hereby adopted by this notice. A list of the issues which parties raised and to which we responded in the Issues and Decision Memorandum is attached to this notice as an Appendix. The Issues and Decision Memorandum is a public document which is on file in the Central Records Unit in room 1117 in the main

¹ Beijing Dixon Stationery Company Ltd. ("Dixon"), Oriental International Holding Shanghai Foreign Trade Co., Ltd. ("SFTC"), Guangdong Provincial Stationery & Sporting Goods Import & Export Corporation ("Guangdong"), Tianjin Custom Wood Processing Co., Ltd. ("Tianjin"), and Anhui Import & Export Co., Ltd. ("Anhui").

Department building, and is accessible on the web at http://www.ia.ita.doc.gov/frn. The paper copy and electronic version of the memorandum are identical in content.

Changes Since the Preliminary Results

Based on our analysis of the comments received, we made the following changes in calculating dumping margins: (1) we adjusted the surrogate value for slats to reflect wood loss in producing slats from lumber; (2) we corrected the World Trade Atlas ("WTA") data, which we used as surrogate values, for certain exclusions and errors made in the Preliminary Results; (3) we made corrections to certain clerical errors. In addition, we have calculated separate antidumping margins for China First and Three Star. See Comment 1 of the Issues and Decision Memorandum. For further details, see "Analysis for the Final Results of Antidumping Duty Administrative Review of Certain Cased Pencils from the People's Republic of China: Shanghai Three Star Stationerv Industry Co., Ltd.," "Analysis for the Final Results of Antidumping Duty Administrative Review of Certain Cased Pencils from the People's Republic of China: China First Pencil Co., Ltd.," "Analysis for the Final Results of Antidumping Duty Administrative Review of Certain Cased Pencils from the People's Republic of China: Shandong Rongxin Import & Export Co." and "2006-2007 Antidumping Duty Administrative Review of Certain Cased Pencils from the People's Republic of China: Factor Valuation for the Final Results" memoranda, all dated July 6, 2009.

Final Results of the Review

We determine that the following percentage weighted—average dumping margin exists for the period December 1, 2006, through November 30, 2007:

| Manufacturer/exporter | Margin (percent) | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|--|
| China First Pencil Company, Ltd. (which includes its affiliates China First Pencil Fang Zheng Co., Shanghai First Writing Instrument Co., Ltd., and Shanghai Great | | |
| Wall Pencil Co., Ltd.) Shanghai Three Star Stationery Industry | 26.32 | |
| CorpShandong Rongxin Import & Export Co., | 60.91 | |
| Ltd | 11.48 | |

| Manufacturer/exporter | Margin (percent) |
|--------------------------------------------------------------|------------------|
| Orient International Holding Shanghai Foreign Trade Co., Ltd | 32.90
114.90 |
| rno-wide Effility | 114.90 |
| | |

²The PRC-wide entity includes Anhui Import Export Co., Ltd. ("Anhui"), Guangdong Provincial Stationery and Sporting Goods Import Export Corporation ("Guangdong"), and Tianjin Custom Wood Processing Co., Ltd. ("Tianjin"). A review was requested for these three companies.

As stated above in the "Background" section of this notice, SFTC qualifies for a separate rate in this review. Moreover as stated above in the "Background" section of this notice, we did not select SFTC as a mandatory respondent in this review. Therefore, SFTC is being assigned a dumping margin based on the calculated margins of mandatory respondents which are not de minimis or based on adverse facts available, in accordance with Department practice. Accordingly, we have assigned SFTC the simple-average of the dumping margins assigned to the China First, Three Star, and Rongxin.

Assessment Rates

The Department has determined, and CBP shall assess, antidumping duties on all appropriate entries. The Department intends to issue assessment instructions to CBP 15 days after the date of publication of the final results of review.

For China First, Three Star, and Rongxin, we calculated customerspecific antidumping duty assessment amounts for subject merchandise based on the ratio of the total amount of antidumping duties calculated for the examined sales of subject merchandise to the total quantity of subject merchandise sold in these transactions. We calculated these per unit assessment amounts in this fashion, as opposed to calculating import-specific ad valorem rates in accordance with 19 CFR 351.212 (b)(1), because the entered values and importers of record for China First's, Three Star's, and Rongxin's reported U.S. sales are not on the record. Where the customer-specific assessment rate is above de minimis, we will instruct CBP to assess the customer-specific rate uniformly on the entered customs value of all POR entries of subject merchandise sold to the customer. To determine whether the per–unit duty assessment rates were de minimis (i.e., less than 0.50 percent ad valorem), in accordance with the requirement set forth in 19 CFR 351.106 (c) (2), we calculated customer–specific

ad valorem ratios based on the export prices.

For SFTC, the company which was not selected for individual review and met the separate application status, we calculated an assessment rate based on the weighted—average margin calculated for the mandatory respondents, which are not *de minimis* or based on adverse facts available, in accordance with Department practice. We will instruct CBP to assess antidumping duties on this company's entries equal to the margin this company has received in the final results, regardless of the importer of, or customer who purchased its subject merchandise.

The other three companies for whom a review was requested, Anhui, Guangdong, and Tianjin, did not provide separate rate information. Therefore, the Department finds that they are not entitled to a separate rate. As a result, these three companies will be considered part of the PRC–wide entity. We will instruct CBP to liquidate entries for all companies in the PRC–wide entity at the PRC–wide rate of 114.90 percent.

For entries of the subject merchandise during the POR from companies not subject to this review, we will instruct CBP to liquidate them at the cash deposit rate in effect at the time of entry. The final results of this review shall be the basis for the assessment of antidumping duties on entries of merchandise covered by the final results of this review and for future deposits of estimated duties, where applicable.

Cash Deposit Requirements

The following cash-deposit requirements will apply to all shipments of certain cased pencils from the PRC entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review, as provided by section 751(a)(1) of the Tariff Act of 1930, as amended (the "Act"): (1) the cash deposit rates for the reviewed companies named above will be the rates for those firms established in the final results of this administrative review; (2) for any previously reviewed or investigated PRC or non-PRC exporter, not covered in this review, with a separate rate, the cash deposit rate will be the company-specific rate established in the most recent segment of this proceeding; (3) for all other PRC exporters, the cash deposit rate will be the PRC-wide rate established in the final results of this review which is 114.90 percent; and (4) the cash-deposit rate for any non-PRC exporter of subject merchandise from the PRC will be the rate applicable to the PRC exporter that

supplied that exporter. These deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Interested Parties

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This notice also serves as a final reminder to parties subject to the administrative protective order ("APO") of their responsibility concerning the return or destruction of proprietary information disclosed under the APO in accordance with 19 CFR 351.305. Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

This notice of final results is issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act

Dated: July 6, 2009.

John M. Andersen,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

Certain Frozen Warmwater Shrimp From India: Final Results and Partial Rescission of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: On March 9, 2009, the Department of Commerce (the Department) published the preliminary results of the administrative review of the antidumping duty order on certain frozen warmwater shrimp (shrimp) from India. This review covers 156 producers/exporters ¹ of the subject merchandise to the United States. The period of review (POR) is February 1, 2007, through January 31, 2008.

After analyzing the comments received, we have made no changes in the margin calculations. Therefore, the final results do not differ from the preliminary results. The final weighted-average dumping margins for the reviewed firms are listed below in the section entitled "Final Results of Review."

DATES: Effective Date: July 13, 2009. **FOR FURTHER INFORMATION CONTACT:** Elizabeth Eastwood or Henry Almond, AD/CVD Operations, Office 2, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 482–3874 or (202) 482–

SUPPLEMENTARY INFORMATION:

Background

0049, respectively.

This review covers 156 producers/ exporters. The respondents which the Department selected for individual review are Devi Sea Foods Limited (Devi) and Falcon Marine Exports Limited (Falcon). The respondents which were not selected for individual review are listed in the "Final Results of Review" section of this notice.

On March 9, 2009, the Department published in the Federal Register the preliminary results of administrative review of the antidumping duty order on shrimp from India. See Certain Frozen Warmwater Shrimp From India: Preliminary Results and Preliminary Partial Rescission of Antidumping Duty Administrative Review, 74 FR 9991 (Mar. 9, 2009) (Preliminary Results).

We invited parties to comment on our preliminary results of review. In April 2009, we received case and rebuttal briefs from the petitioner (*i.e.*, the Ad Hoc Shrimp Trade Action Committee), a group of 32 U.S. shrimp processors,² and the two respondents selected for individual examination (*i.e.*, Devi and Falcon).

The Department has conducted this administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

Scope of the Order

The scope of this order includes certain frozen warmwater shrimp and prawns, whether wild-caught (ocean harvested) or farm-raised (produced by aquaculture), head-on or head-off, shell-on or peeled, tail-on or tail-off, deveined or not deveined, cooked or raw, or otherwise processed in frozen form.

The frozen warmwater shrimp and prawn products included in the scope of this order, regardless of definitions in the Harmonized Tariff Schedule of the United States (HTSUS), are products which are processed from warmwater shrimp and prawns through freezing and which are sold in any count size.

The products described above may be processed from any species of warmwater shrimp and prawns. Warmwater shrimp and prawns are generally classified in, but are not limited to, the Penaeidae family. Some examples of the farmed and wild-caught warmwater species include, but are not limited to, whiteleg shrimp (Penaeus vannemei), banana prawn (Penaeus merguiensis), fleshy prawn (Penaeus chinensis), giant river prawn (Macrobrachium rosenbergii), giant tiger prawn (Penaeus monodon), redspotted shrimp (Penaeus brasiliensis), southern brown shrimp (Penaeus subtilis),

 $^{^{1}\}mathrm{Collapsed}$ entities are treated as one producer/ exporter.

² These companies are: (1) Bayou Shrimp Processors, Inc.; (2) Biloxi Freezing & Processing Co.; (3) CF Gollot and Son Seafood, Inc.; (4) Carson and Co., Inc.; (5) Custom Pack, Inc.; (6) Deep Sea Foods Inc./Jubilee Foods; (7) Dominick's Seafood, Inc.; (8) Dunamis Towing, Inc., (9) Fisherman's Reef Shrimp Co., Inc.; (10) Golden Gulf Coast Pkg. Co., Inc; (11) Gollott's Oil Dock and Ice House, Inc.; (12) Graham Fisheries; (13) Gulf Crown Seafood Co., Inc., (14) Gulf Fish, Inc.; (15) Gulf Pride Enterprises, Inc.; (16) Gulf Island Shrimp & Seafood, LLC; (17) Hi Seas of Dulac, Inc.; (18) JBS Packing Co., Inc.; (19) Lafitte Frozen Foods Corp.; (20) Louisiana Newpack Shrimp Co., Inc.; (21) Louisiana Shrimp & Packing Co., Inc.; (22) M&M Seafood; (23) Ocean Springs Seafood, Market, Inc.; (24) Pascagoula Ice & Freezer Co., Inc.; (25) Paul Piazza and Son, Inc.; (26) Pearl, Inc. d/b/a Indian Ridge Shrimp Co.; (27) Price Seafood, Inc.; (28) RA Lesso Brokerage Co., Inc.; (29) Sea Pearl Seafood Company, Inc., (30) Tidelands Seafood Co., Inc.; (31) Vincent Piazza Jr., & Sons Seafood, Inc.; and (32) Woods Fisheries and Country, Inc.

³ "Tails" in this context means the tail fan, which includes the telson and the uropods.

southern pink shrimp (Penaeus notialis), southern rough shrimp (Trachypenaeus curvirostris), southern white shrimp (Penaeus schmitti), blue shrimp (Penaeus stylirostris), western white shrimp (Penaeus occidentalis), and Indian white prawn (Penaeus indicus).

Frozen shrimp and prawns that are packed with marinade, spices or sauce are included in the scope of this order. In addition, food preparations, which are not "prepared meals," that contain more than 20 percent by weight of shrimp or prawn are also included in the scope of this order.

Excluded from the scope are: (1) Breaded shrimp and prawns (HTSUS subheading 1605.20.10.20); (2) shrimp and prawns generally classified in the Pandalidae family and commonly referred to as coldwater shrimp, in any state of processing; (3) fresh shrimp and prawns whether shell-on or peeled (HTSUS subheadings 0306.23.00.20 and 0306.23.00.40); (4) shrimp and prawns in prepared meals (HTSUS subheading 1605.20.05.10); (5) dried shrimp and prawns; (6) canned warmwater shrimp and prawns (HTSUS subheading 1605.20.10.40); (7) certain dusted shrimp; and (8) certain battered shrimp. Dusted shrimp is a shrimp-based product: (1) That is produced from fresh (or thawed-from-frozen) and peeled shrimp; (2) to which a "dusting" layer of rice or wheat flour of at least 95 percent purity has been applied; (3) with the entire surface of the shrimp flesh thoroughly and evenly coated with the flour; (4) with the non-shrimp content of the end product constituting between four and 10 percent of the product's total weight after being dusted, but prior to being frozen; and (5) that is subjected to IQF freezing immediately after application of the dusting layer. Battered shrimp is a shrimp-based product that, when dusted in accordance with the definition of dusting above, is coated with a wet viscous layer containing egg and/or milk, and par-fried.

The products covered by this order are currently classified under the following HTSUS subheadings: 0306.13.00.03, 0306.13.00.06, 0306.13.00.09, 0306.13.00.12, 0306.13.00.15, 0306.13.00.18, 0306.13.00.21, 0306.13.00.24, 0306.13.00.27, 0306.13.00.40, 1605.20.10.10, and 1605.20.10.30. These HTSUS subheadings are provided for convenience and for customs purposes only and are not dispositive, but rather the written description of the scope of this order is dispositive.

Period of Review

The POR is February 1, 2007, through January 31, 2008.

Partial Rescission

In the Preliminary Results, we assigned company-specific rates to Falcon, Manufacturer Falcon Marine Exports, Sandhya Aqua Exports, and Sandhya Aqua Exports Pvt. Ltd. However, after reviewing information from the 2008-2009 review, the Department has determined that two of these company names are duplicate names of the other two companies. The correct names of the companies listed in pairs above are Falcon and Sandhya Aqua Exports Pvt. Ltd. See the May 8, 2009, memorandum from Elizabeth Eastwood to the File, entitled, "Placing Public Information from the 2008–2009 Antidumping Duty Administrative Review on the Record of the 2007–2008 Antidumping Duty Administrative Review on Certain Frozen Warmwater Shrimp from India" (Name Clarification *Memo*). Therefore, the Department is rescinding this review with respect to Sandhya Aqua Exports and Manufacturer Falcon Marine Exports.

Collapsing

Prior to the Preliminary Results, one of the non-mandatory respondents in this case, Ananda Aqua Exports (AAE), informed the Department that it is affiliated with Ananda Foods (AF) and Ananda Aqua Applications (AAA), producers/exporters of shrimp in India. Consequently, it requested that the Department treat it and these two companies as a single entity for purposes of this administrative review. At the Department's request, AAE, AF, and AAA (hereinafter referred to as "the Ananda Group'') provided information to support this claim. Although the Ananda Group's most recent submission, containing additional information with respect to the ownership of the three companies and the relationships among the owners, was filed in a timely manner, it was not received in time to consider for purposes of the preliminary results.

Nonetheless, in the *Preliminary Results* we preliminarily determined that, in accordance with 19 CFR 351.401(f), it is appropriate to collapse the companies in the Ananda Group for purposes of this proceeding because: (1) Entities within the group are affiliated and two of these entities have production facilities for identical or similar merchandise that would not require significant retooling in order to restructure manufacturing priorities; and (2) a significant potential for

manipulation exists due to common ownership, overlapping management and board of directors, and intertwined operations. *See Preliminary Results*, 74 FR at 9994.

We have now analyzed the Ananda Group's March 2009 submission clarifying certain aspects of the companies' partners, including familial relationships of partners/owners of the three companies. Based on this additional information provided by the Ananda Group, we continue to find that it is appropriate to collapse the companies AAA, AAE, and AF into the Ananda Group, and consequently we have continued to treat these companies as a single entity for purposes of our final determination.

Cost of Production

As discussed in the preliminary results, we conducted an investigation to determine whether Devi and Falcon made third country sales of the foreign like product during the POR at prices below their costs of production (COP) within the meaning of section 773(b) of the Act. See Preliminary Results, 74 FR at 9997. For these final results, we performed the cost test following the same methodology as in the Preliminary Results.

We found 20 percent or more of each respondent's sales of a given product during the reporting period were at prices less than the weighted-average COP for this period. Thus, we determined that these below-cost sales were made in "substantial quantities" within an extended period of time and at prices which did not permit the recovery of all costs within a reasonable period of time in the normal course of trade. See sections 773(b)(1)–(2) of the Act.

Therefore, for purposes of these final results, we found that Devi and Falcon made below-cost sales not in the ordinary course of trade. Consequently, we disregarded these sales for each respondent and used the remaining sales as the basis for determining normal value pursuant to section 773(b)(1) of the Act.

Analysis of Comments Received

All issues raised in the case briefs by parties to this administrative review are listed in the Appendix to this notice and addressed in the Issues and Decision Memorandum (the Decision Memo), which is adopted by this notice. Parties can find a complete discussion of all issues raised in this review and the corresponding recommendations in this public memorandum, which is on file in the Central Records Unit, Room 1117, of the main Department building.

In addition, a complete version of the Decision Memo can be accessed directly on the Web at http://ia.ita.doc.gov/frn/. The paper copy and electronic version of the Decision Memo are identical in content.

Changes Since the Preliminary Results

Based on our analysis of the comments received, we have made no changes in the margin calculations.

Final Results of Review

We determine that the following weighted-average margin percentages exist for the period February 1, 2007, through January 31, 2008:

| Manufacturer/exporter | Percent margin |

^{*} De minimis.

Assessment

The Department shall determine, and Customs and Border Protection (CBP) shall assess, antidumping duties on all

appropriate entries.

Pursuant to 19 CFR 351.212(b)(1), because Devi and Falcon reported the entered value for some or all of their U.S. sales, we have calculated importerspecific ad valorem duty assessment rates based on the ratio of the total amount of antidumping duties calculated for the examined sales to the total entered value of the sales which entered value was reported. For Falcon's U.S. sales reported without entered values, we have calculated importerspecific per-unit duty assessment rates by aggregating the total amount of antidumping duties calculated for the examined sales and dividing this amount by the total quantity of those sales. To determine whether the duty assessment rates are de minimis, in

accordance with the requirement set forth in 19 CFR 351.106(c)(2), we have calculated importer-specific ad valorem ratios based on the estimated entered value.

For the companies which were not selected for individual review, we have calculated an assessment rate based on the weighted average of the cash deposit rates calculated for the companies selected for individual review excluding any which are de minimis or determined entirely on AFA.

Pursuant to 19 CFR 351.106(c)(2), we will instruct CBP to liquidate without regard to antidumping duties any entries for which the assessment rate is de minimis (i.e., less than 0.50 percent). The Department intends to issue assessment instructions to CBP 15 days after the date of publication of these final results of review.

The Department clarified its "automatic assessment" regulation on May 6, 2003. See Antidumping and Countervailing Duty Proceedings: Assessment of Antidumping Duties, 68 FR 23954 (May 6, 2003). This clarification will apply to entries of subject merchandise during the POR produced by companies included in these final results of review for which the reviewed companies did not know their merchandise was destined for the United States. In such instances, we will instruct CBP to liquidate unreviewed entries at the all-others rate established in the less-than-fair-value (LTFV) investigation if there is no rate for the intermediate company(ies) involved in the transaction.

Cash Deposit Requirements

Further, the following deposit requirements will be effective for all shipments of shrimp from India entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review, as provided for by section 751(a)(2)(C) of the Act: (1) The cash deposit rates for the reviewed companies will be the rates shown above, except if the rate is less than 0.50 percent, de minimis within the meaning of 19 CFR 351.106(c)(1), the cash deposit will be zero; (2) for previously investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, or the LTFV investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will continue to be 10.17 percent, the all-others rate established in the LTFV investigation. See Notice of Amended Final Determination of Sales at Less Than Fair Value and Antidumping Duty Order: Certain Frozen Warmwater Shrimp from India, 70 FR 5147, 5148 (Feb. 1, 2005). These deposit requirements shall remain in effect until further notice.

Notification to Importers

This notice serves as a final reminder to importers of their responsibility, under 19 CFR 351.402(f)(2), to file a certificate regarding the reimbursement of antidumping duties prior to

⁴ This rate is based on the weighted average of the margins calculation for those companies selected for individual review, excluding de minimis margins or margins based entirely on adverse facts available (AFA).

The Department initiated the 2007–2008 administrative review for this company under the name Sri Chandrakantha Marine Exports, Ltd. However, subsequent to the Preliminary Results, we discovered that the company's correct name is Sri Chandrakantha Marine Exports, See Name Clarification Memo. Therefore, we have included this company in our final results under its correct

⁶ The Department initiated the 2007-2008 administrative review for this company under the name Teekay Maine P. Ltd. However, subsequent to the Preliminary Results, we discovered that the company's correct name is Teekay Marine P. Ltd. See Name Clarification Memo. Therefore, we have included this company in our final results under its correct name

liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Notification to Interested Parties

This notice serves as the only reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

We are issuing and publishing these results of review in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: July 7, 2009.

Ronald K. Lorentzen,

Acting Assistant Secretary for Import Administration.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XP76

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Reef Fish of the Gulf of Mexico; Exempted Fishing Permit

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce. **ACTION:** Notice of receipt of an application for an exempted fishing permit; request for comments.

SUMMARY: NMFS announces the receipt of an application for an exempted fishing permit (EFP) from the Florida Fish and Wildlife Conservation Commission, Fish and Wildlife Research Institute. This study would place observers aboard vessels of opportunity in the Gulf of Mexico recreational for-hire fishery to collect reef fish for determination of age structure and sex composition and to tag and release reef fish to evaluate discard mortality. If granted, the EFP would authorize the applicant, within certain conditions, to collect and possess reef fish that would otherwise be prohibited because of existing fishing regulations.

DATES: Comments must be received no later than 5 p.m., eastern time, on August 12, 2009.

ADDRESSES: You may submit comments on the application by any of the following methods:

- E-mail: Rich.Malinowski@noaa.gov. Include in the subject line of the e-mail comment the following document identifier: "FFWCC EFP".
- Mail: Rich Malinowski, Southeast Regional Office, NMFS, 263 13th Avenue South, St. Petersburg, FL 33701.
 - Fax: 727-824-5308.

The application and related documents are available for review upon written request to any of the above addresses.

FOR FURTHER INFORMATION CONTACT: Rich Malinowski, 727–824–5305; fax 727–824–5308; e-mail Rich.Malinowski@noaa.gov.

SUPPLEMENTARY INFORMATION: The EFP is requested under the authority of the Magnuson–Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*), and regulations at 50 CFR 600.745(b) concerning exempted fishing.

The described research is part of a Cooperative Research Program Grant and the Emergency Disaster Relief Program. The Cooperative Research Program is a means of involving commercial and/or recreational fishermen in the collection of fundamental fisheries information. Resource collection efforts support the development and evaluation of fisheries management and regulatory options. The Emergency Disaster Relief Program is administered by the Gulf States Marine Fisheries Commission, to assist in an assessment of the status of the forhire fishery fleets operating in counties impacted by the 2005 hurricane season.

The proposed collection for scientific research involves activities otherwise prohibited by regulations implementing the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico. The applicants require authorization to harvest and possess snapper and grouper species for scientific research activities during the period from June 15, 2009, through June 15, 2012. Specimens would be collected from Federal waters off the west coast of Florida. Sampling would occur during normal fishing operations of the recreational for-hire fishery. Data collections for this study would support improved information about the catch, bycatch, discards, discard mortality, age structure and sex determinations for species in the reef fish complex. These data would provide insight on a stock's resilience to fishing and would help refine estimates of long-term biological productivity of the stocks. It is anticipated project results would yield valuable data within this fishery.

NMFS finds this application warrants further consideration. Based on a preliminary review, NMFS intends to issue an EFP. Possible conditions the agency may impose on this permit, if it is indeed granted, include but are not limited to, a prohibition of conducting research within marine protected areas, marine sanctuaries, or special management zones, without additional authorization. Additionally, NMFS may prohibit the possession of Nassau or goliath grouper and would require any sea turtles taken incidentally during the course of fishing or scientific research activities to be handled with due care to prevent injury to live specimens, observed for activity, and returned to the water. A final decision on issuance of the EFP will depend on a NMFS review of public comments received on the application, consultations with the affected states, the Gulf of Mexico Fishery Management Council, and the U.S. Coast Guard, and a determination that it is consistent with all applicable

Authority: 16 U.S.C. 1801 et seq.

Dated: July 8, 2009.

BILLING CODE 3510-22-S

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board [Docket 26-2009]

Foreign-Trade Zone 73 - Baltimore/ Washington International Airport, MD, Application for SubzonelKEA Wholesale, Inc. (Home furnishings and accessories), Perryville, MD

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Maryland Department of Transportation/ Maryland Aviation Administration, grantee of FTZ 73, requesting special-purpose subzone status for the warehousing and distribution facility of IKEA Wholesale Inc. (IKEA), located in Perryville, Maryland. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the Board (15 CFR part 400). It was formally filed on July 2, 2009.

The IKEA facility (400 full-time and part-time employees, 242 acres/ 1.7 million square feet) is located at 100 Ikea Way, Perryville, Maryland. The facility is used for the storage and distribution of merchandise that includes: housewares and home furnishings, home textiles, glassware, kitchenware, appliances, cutlery, furniture, flooring and floor coverings, window treatments and fixtures, lighting fixtures, lamps, electrical products, batteries, hand tools, closet and storage accessories, office accessories, paper products, computers, CDs and DVDs, clocks and timers, toys, sporting goods, seasonal decorations, home recreation/entertainment items, and brooms and brushes (duty rate range: from free to 38%).

FTZ procedures could exempt IKEA from customs duty payments on the foreign goods exported from the proposed subzone. The company anticipates that some 25 percent of the facility's shipments will be exported. On its domestic sales, the company would be able to defer duty payments until merchandise is shipped from the facility and entered for consumption. FTZ designation would further allow IKEA to realize logistical benefits through the use of weekly customs entry procedures. The request indicates that the savings from FTZ procedures would help improve the facility's international competitiveness.

In accordance with the Board's regulations, Pierre Duy of the FTZ Staff is designated examiner to evaluate and analyze the facts and information presented in the application and case

record and to report findings and recommendations to the Board.Public comment is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is September 11, 2009. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period to September 28, 2009.

A copy of the application will be available for public inspection at the Office of the Executive Secretary, Foreign–Trade Zones Board, Room 2111, U.S. Department of Commerce, 1401 Constitution Avenue, NW, Washington, DC 20230–0002, and in the "Reading Room" section of the Board's website, which is accessible via www.trade.gov/ftz.

For further information, contact Pierre Duy at: pierre _duy@ita.doc.gov, or (202) 482–1378.

Dated: July 2, 2009.

Andrew McGilvray,

Executive Secretary.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

Order No. 1627

Grant of Authority For Subzone Status, Black & Decker Corporation (Power Tools, Lawn and Garden Tools and Home Products Warehousing and Distribution), Jackson, Tennessee

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a-81u), the Foreign-Trade Zones Board (the Board) adopts the following Order:

Whereas, the Foreign-Trade Zones Act provides for "... the establishment ... of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes," and authorizes the Foreign-Trade Zones Board to grant to qualified corporations the privilege of establishing foreign-trade zones in or adjacent to U.S. Customs and Border Protection ports of entry;

Whereas, the Board's regulations (15 CFR Part 400) provide for the establishment of special—purpose subzones when existing zone facilities cannot serve the specific use involved, and when the activity results in a significant public benefit and is in the public interest;

Whereas, the City of Memphis, Tennessee, grantee of FTZ 77, has made application to the Board for authority to establish special—purpose subzone status at the power tools/lawn and garden tools and home products warehousing and distribution facilities of Black & Decker Corporation, located in Jackson, Tennessee (FTZ Docket 44—2008, filed 8/5/2008);

Whereas, notice inviting public comment has been given in the **Federal Register** (73 FR 47585, 8/14/2008); and,

Whereas, the Board adopts the findings and recommendations of the examiner's report, and finds that the requirements of the FTZ Act and the Board's regulations are satisfied, and that approval of the application is in the public interest;

Now, therefore, the Board hereby grants authority for subzone status for activity related to power tools/lawn and garden tools and home products warehousing and distribution at the Black & Decker Corporation facility located in Jackson, Tennessee (Subzone 77D), as described in the application and Federal Register notice, and subject to the FTZ Act and the Board's regulations, including Section 400.28.

Signed at Washington, DC, this 26th day of June 2009.

Ronald K. Lorentzen,

Acting Assistant Secretary of Commerce for Import Administration, Alternate Chairman, Foreign-Trade Zones Board

Attest:

Andrew McGilvray,

Executive Secretary.

National Oceanic and Atmospheric Administration

RIN 0648-XQ06

Magnuson-Stevens Act Provisions; General Provisions for Domestic Fisheries; Application for Exempted Fishing Permits

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and AtmosphericAdministration (NOAA), Commerce.

ACTION: Notification of a proposal to conduct exempted fishing; request for comments.

SUMMARY: The Assistant Regional Administrator for Sustainable Fisheries, Northeast Region, NMFS (Assistant Regional Administrator), has made a preliminary determination that the subject Exempted Fishing Permit (EFP) application that was submitted by the Cornell Cooperative Extension of Suffolk County (CCE) warrants further consideration and should be issued for public comment. The EFP would exempt participating vessels from summer flounder size restrictions and summer flounder minimum mesh size regulations. The Assistant Regional Administrator has also made a preliminary determination that the activities authorized under the EFP would be consistent with the goals and objectives of the Summer Flounder, Scup, and Black Sea Bass Fishery Management Plan (FMP). However, further review and consultation may be necessary before a final determination is made.

DATES: Comments must be received on or before July 28, 2009.

ADDRESSES: Comments may be submitted by e-mail to: nero.efp@noaa.gov. Include in the subject line of the e-mail comment the following document identifier: "Comments on CCE Inshore Fluke Discard EFP." Written comments should be sent to Patricia A. Kurkul, Regional Administrator, NMFS, Northeast Regional Office, 55 Great Republic Drive, Gloucester, MA 01930. Mark the outside of the envelope, "Comments on CCE Inshore Fluke Discard EFP." Comments may also be sent via facsimile (fax) to (978) 281–9135.

FOR FURTHER INFORMATION CONTACT: Anna Macan, Fishery Management Specialist, phone: 978–281–9165, fax: 978–281–9135.

SUPPLEMENTARY INFORMATION: In 2007, the Science and Research Director for NMFS's Northeast Fisheries Science Center selected the proposal submitted by the CCE under the Summer Flounder, Scup, and Black Sea Bass Research Set-Aside (RSA) titled: "Evaluation of Summer Flounder Discard Mortality in the Bottom Trawl Fishery." The research was conducted to improve and enhance fishery information relative of discard mortality of summer flounder in the bottom trawl fishery. An extension to utilize available funds was granted to CCE, so an EFP to conduct additional research trips is being requested.

This EFP would allow for additional research trips to further enhance the existing data on mortality of trawl—caught summer flounder. The research would be carried out from July 2009 through July 2010, up to a total of 10 research trips, and would be in conjunction with normal fishing operations of the mixed trawl fishery. Only one vessel would be used for each trip, but up to six vessels could be used, depending on availability. Vessels

would be compensated to make three specific tows for summer flounder to assess trawl mortality. Duration of these tows would be 1, 2, and 3 hours. Summer flounder from each tow would be culled and sorted between live and dead. Sorting would occur at predetermined time intervals until the deck is cleared of fish. The fish would then be weighed and, as time allows, scale and otolith samples from both groups would be collected. The research trips would be conducted inshore along the coast of southern Long Island from Jones Inlet to Montauk Point, reaching depths of 240 ft (73 m). Areas sampled would include NMFS statistical areas 611, 612, and 613. In order to conduct the research, the vessels would need exemptions from the summer flounder minimum fish size and mesh size regulations at §§ 648.103 and 648.104(a)(1), respectively. These exemptions are needed to retain the fish on deck for the purpose of scientific research. Additionally, since the research trips may be conducted during a commercial squid trip, an exemption from the summer flounder minimum mesh size regulation is also needed in order for the vessels to retain more than the incidental limit of 100 lb (45.4 kg) of summer flounder. After the research, is conducted the fish would be returned to sea, unless the vessel is currently allocated 2009 research set- aside and has been issued a current and separate EFP to harvest research set-aside quota.

Regulations under the Magnuson ndash;Stevens Fishery Conservation and Management Act require publication of this notification to provide interested parties the opportunity to comment on applications for proposed EFPs. The applicant may place requests for minor modifications and extensions to the EFP throughout the year. EFP modifications and extensions may be granted without further notice if they are deemed essential to facilitate completion of the proposed research and minimal so as not to change the scope or impact of the initially approved EFP request.

Authority: 16 U.S.C. 1801 et seq.

Dated: July 8, 2009.

BILLING CODE 3510-22-S

DEPARTMENT OF COMMERCE

Patent and Trademark Office [Docket No. PTO-T-2009-0026]

Trademark Examination Guides 01–09 and 02–09 on Deceptiveness Refusals

AGENCY: United States Patent and Trademark Office, Commerce.

ACTION: Notice

SUMMARY: The United States Patent and Trademark Office ("USPTO" or "Office") is publishing two Trademark Examination Guides ("Guides") regarding deceptiveness refusals for non-geographic and geographic marks. These Guides, issued on May 11, 2009, are being published to give members of the public notice of them in addition to the notice already provided on the USPTO's Web site. Members of the public may submit comments regarding the Guides. Comments will be given consideration in connection with developing future examination guidance dealing with the subjects of the Guides.

ADDRESSES: The Office prefers that any comments be submitted via electronic mail message to

TMFRNotices@uspto.gov. Written comments may also be submitted by mail addressed to: Commissioner for Trademarks, P.O. Box 1451, Alexandria, VA 22313–1451, marked to the attention of Cynthia C. Lynch; or by hand delivery to the Trademark Assistance Center, Concourse Level, James Madison Building—East Wing, 600 Dulany Street, Alexandria, Virginia, marked to the attention of Cynthia C. Lynch.

The comments will be available for public inspection on the Office's Web site at http://www.uspto.gov and will also be available at the Office of the Commissioner for Trademarks, Madison East, Tenth Floor, 600 Dulany Street, Alexandria, Virginia. Because comments will be made available for public inspection, information that is not desired to be made public, such as an address or phone number, should not be included in the comments.

FOR FURTHER INFORMATION CONTACT:

Cynthia C. Lynch, Office of the Deputy Commissioner for Trademark Examination Policy, by electronic mail at: cynthia.lynch@uspto.gov; or by mail addressed to: Commissioner for Trademarks, P.O. Box 1451, Alexandria, VA 22313–1451, marked to the attention of Cynthia C. Lynch.

SUPPLEMENTARY INFORMATION: On May 11, 2009, the Office issued Examination Guides 01–09 and 02–09 regarding examination procedures for marks that may be deceptive under either section

2(a) or section 2(e)(3). Section 2(a) of the Trademark Act, 15 U.S.C. 1052(a), prohibits, inter alia, the registration of deceptive matter. Section 2(e)(3) of the Trademark Act, 15 U.S.C. 1052(e)(3), prohibits the registration of primarily geographically deceptively misdescriptive marks. Each Guide reviews and discusses case law regarding: (1) The elements of the refusal; (2) evidentiary issues with respect to the refusal; and (3) procedures for issuing refusals. The Guides may be found on the Office's Web site at: http://www.uspto.gov/web/ offices/tac/notices/notices.htm.

The purpose of these Guides is to promote consistency in examination and to provide guidance to examining attorneys regarding when deceptiveness refusals must be issued. These Guides do not constitute substantive rulemaking and hence do not have the force and effect of law. They have been developed as a matter of internal Office management and are not intended to create any right or benefit, substantive or procedural, enforceable by any party against the Office. To the extent that earlier guidance from the Office, including certain sections of the Trademark Manual of Examining Procedure (TMEP), 5th edition, is inconsistent with the guidance set forth in the Guides, Office personnel are to follow the Guides. The next revision of the TMEP will be updated accordingly.

Any member of the public may submit written comments on either or both of the Guides. The Office will consider any comments received in connection with developing future examination guidance dealing with the subjects of the Guides. Persons submitting comments should note that the USPTO does not plan to provide a response to or analysis of any comments, as these Guides are not notices of proposed rulemaking.

Dated: July 6, 2009.

John J. Doll,

Acting Under Secretary of Commerce for Intellectual Property and Acting Director of the United States Patent and Trademark Office.

CONSUMER PRODUCT SAFETY COMMISSION

Proposed Extension of Approval of Information Collection; Comment Request-Safety Standard for Walk-Behind Power Lawn Mowers

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: As required by the Paperwork Reduction Act (44 U.S.C. Chapter 35), the Consumer Product Safety Commission (CPSC or Commission) requests comments on a proposed request for an extension of approval of a collection of information from manufacturers and importers of walkbehind power lawn mowers. This collection of information consists of testing and recordkeeping requirements in certification regulations implementing the Safety Standard for Walk-Behind Power Lawn Mowers (16 CFR Part 1205). The Commission will consider all comments received in response to this notice before requesting an extension of approval of this collection of information from the Office of Management and Budget (OMB).

DATES: The Office of the Secretary must receive written comments not later than September 11, 2009.

ADDRESSES: Written comments should be captioned "Walk-Behind Power Lawn Mowers" and sent by e-mail to cpsc-os@cpsc.gov. Written comments may also be sent to the Office of the Secretary by facsimile at (301) 504–0127, or by mail to the Office of the Secretary, Consumer Product Safety Commission, Room 502, 4330 East-West Highway, Bethesda, MD 20814.

FOR FURTHER INFORMATION CONTACT: For information about the proposed collection of information call or write Linda Glatz, Division of Policy and Planning, Office of Information Technology and Technology Services, Consumer Product Safety Commission, 4330 East-West Highway, Bethesda, MD 20814; telephone: (301) 504–7671 or by e-mail to *lglatz@cpsc.gov*.

SUPPLEMENTARY INFORMATION: In 1979, the Commission issued the Safety Standard for Walk-Behind Power Lawn Mowers (16 CFR Part 1205) under provisions of the Consumer Product Safety Act (CPSA) (15 U.S.C. 2051 et seq.) to eliminate or reduce risks of amputations, avulsions, lacerations, and other serious injuries which have resulted from the accidental contact of some part of an operator's body with the rotating blade of a power lawn mower. The standard contains performance and labeling requirements for walk-behind power lawn mowers to address risks of blade-contact injuries.

A. Certification Requirements

Section 14(a) of the CPSA (15 U.S.C. 2063(a)) requires manufacturers, importers, and private labelers of a consumer product subject to a consumer product safety standard under the CPSA

or similar rule, ban, standard, or regulation under any other act enforced by the Commission to issue a certificate stating that the product complies with all applicable rules, bans, standards or regulations. Section 14(a) of the CPSA also requires that the certificate of compliance must be based on a test of each product or upon a reasonable testing program and specify each such rule, ban, standard or regulation applicable to the product.

Section 14(b) of the CPSA (15 U.S.C. 2063(b)) authorizes the Commission to issue regulations to prescribe a reasonable testing program to support certificates of compliance with a consumer product safety standard under the CPSA or similar rule, ban, standard, or regulation under any other act enforced by the Commission, Section 16(b) of the CPSA (15 U.S.C. 2065(b)) authorizes the Commission to issue rules to require that firms "establish and maintain" records to permit the Commission to determine compliance with rules issued under the authority of the CPSA.

The Commission has issued regulations prescribing requirements for a reasonable testing program to support certificates of compliance with the standard for walk-behind power mowers under the CPSA. These regulations also require manufacturers, importers, and private labelers of walk-behind power mowers to establish and maintain records to demonstrate compliance with the requirements for testing to support certification of compliance. 16 CFR Part 1205, Subpart B.

The Commission uses the information compiled and maintained by manufacturers and importers of walkbehind power mowers to protect consumers from risks of injuries associated with walk-behind power lawn mowers. More specifically, the Commission uses this information to determine whether the mowers produced and imported comply with the applicable standard. The Commission also uses this information to obtain corrective actions if walkbehind power mowers fail to comply with the standard in a manner which creates a substantial risk of injury to the public.

OMB approved the collection of information requirements for walk-behind mowers under control number 3041–0091. OMB's most recent extension of approval will expire on September 30, 2009. The Commission proposes to request an extension of approval for these collection of information requirements.

B. Estimated Burden

The Commission staff estimates that about 20 firms are subject to the testing and recordkeeping requirements of the certification regulations. The Commission staff estimates further that the annual testing and recordkeeping burden imposed by the regulations on each of these firms on average is approximately 390 hours if 3 hours are expended by each firm over 130 estimated seasonal production days each year. The estimated annual burden imposed by the testing and recordkeeping requirements on all manufacturers and importers of walkbehind power mowers is 7,800 hours.

In addition, the manufacturer is required to include permanent labels attached to the lawn mowers. The Commission staff estimates an additional hour per production day to collect the information and place it on the label. Accordingly an additional 130 hours per firm is added to the total burden. For the 20 firms, the estimated additional burden related to labeling is 2,600 hours. The estimated total burden hours related to testing recordkeeping and labeling is 520 hours per firm and 10,400 hours for the industry.

Annual testing and recordkeeping costs burden is estimated to be \$428,064 based on 7,800 hours \times 54.88 (the average hourly total compensation for U.S. management, professional, and related occupations in goods-producing industries, Bureau of Labor Statistics, September 2008). Annual costs burden for labeling is estimated to be \$70,564 based on 2,600 hours \times \$27.14 (the average hourly total compensation for sales and office workers in goodsproducing industries, Bureau of Labor Statistics, September 2008). The total estimated burden costs related to testing, recordkeeping, and labeling to the industry is \$498,626.

The Commission staff will expend approximately one half of one staff month reviewing records required to be maintained for walk-behind power lawn mowers. The annual cost to the Federal government of the collection of information in these regulations is estimated to be \$6,920.

C. Request for Comments

The Commission solicits written comments from all interested persons about the proposed collection of information. The Commission specifically solicits information relevant to the following topics:

 Whether the collection of information described above is necessary for the proper performance of the Commission's functions, including whether the information would have practical utility;

—Whether the estimated burden of the proposed collection of information is accurate;

 Whether the quality, utility, and clarity of the information to be collected could be enhanced; and

—Whether the burden imposed by the collection of information could be minimized by use of automated, electronic or other technological collection techniques, or other forms of information technology.

Dated: July 7, 2009.

Todd A. Stevenson,

Secretary, Consumer Product Safety Commission.

DEPARTMENT OF DEFENSE

Office of the Secretary

[Docket No. DoD-2008-HA-0168]

Submission for OMB Review; Comment Request

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance, the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

DATES: Consideration will be given to all comments received by August 12, 2009.

Title and OMB Number: Prospective Department of Defense Studies of U.S. Military Forces: The Millennium Cohort Study—OMB Control Number 0720– 0029.

Type of Request: Extension. Number of Respondents: 36,599. Responses per Respondent: 1. Annual Responses: 36,599. Average Burden per Response: 45 minutes.

Annual Burden Hours: 27,450.

Needs and Uses: The Millennium
Cohort Study responds to recent
recommendations by Congress and by
the Institute of Medicine to perform
investigations that systematically collect
population-based demographic and
health data so as to track and evaluate
the health of military personnel
throughout the course of their careers
and after leaving military service.

Affected Public: Individuals or households.

Frequency: On occasion.
Respondent's Obligation: Voluntary.
OMB Desk Officer: Mr. John Kraemer.
Written comments and
recommendations on the proposed

information collection should be sent to Mr. Kraemer at the Office of Management and Budget, Desk Officer for DoD, Room 10236, New Executive Office Building, Washington, DC 20503.

You may also submit comments, identified by docket number and title, by the following method:

• Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments.

Instructions: All submissions received must include the agency name, docket number and title for this Federal Register document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at http://www.regulations.gov as they are received without change, including any personal identifiers or contact information.

DOD Clearance Officer: Ms. Patricia Toppings.

Written requests for copies of the information collection proposal should be sent to Ms. Toppings at WHS/ESD/Information Management Division, 1777 North Kent Street, RPN, Suite 11000, Arlington, VA 22209–2133.

Dated: June 30, 2009.

DEPARTMENT OF EDUCATION

Office of Special Education and Rehabilitative Services; Overview Information; Technical Assistance and Dissemination To Improve Services and Results for Children With Disabilities—Model Demonstration Projects on Tiered Approaches for Improving the Writing Proficiency of High School Students; Notice Inviting Applications for New Awards for Fiscal Year (FY) 2009

Catalog of Federal Domestic Assistance (CFDA) Number: 84.326M. DATES:

Applications Available: July 13, 2009. Deadline for Transmittal of Applications: August 12, 2009. Deadline for Intergovernmental Review: August 24, 2009.

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: The purpose of the Technical Assistance and Dissemination to Improve Services and Results for Children with Disabilities program is to promote academic achievement and to improve results for children with disabilities by providing technical assistance (TA), supporting model demonstration projects, disseminating useful information, and implementing activities that are supported by scientifically based research.

Priority: In accordance with 34 CFR 75.105(b)(2)(v), this priority is from allowable activities specified in the statute (see sections 663 and 681(d) of the Individuals with Disabilities Education Act (IDEA), 20 U.S.C. 1400 et seq.).

Absolute Priority: For FY 2009 and any subsequent year in which we make awards from the list of unfunded applicants from this competition, this priority is an absolute priority. Under 34 CFR 75.105(c)(3), we consider only applications that meet this priority.

This priority is:

Technical Assistance and Dissemination to Improve Services and Results for Children With Disabilities— Model Demonstration Projects on Tiered Approaches for Improving the Writing Proficiency of High School Students.

Background

Writing skills are critical to success in both college and the workplace. With the inclusion of a writing portion on college entrance exams, such as the Scholastic Assessment Test (SAT), and the writing requirements in high stakes 1 high school graduation exams, there is an increased emphasis on writing for all students in high school. Furthermore, college faculty and employers recognize that writing is a skill that students need to succeed in many postschool settings (Alliance for Excellent Education, 2007). Yet, according to the National Assessment of Educational Progress (NAEP), in 2007, despite overall gains in performance on the eighth- and twelfthgrade NAEP Writing assessment, only 33 percent of eighth-grade students and 24 percent of twelfth-grade students scored at or above the proficient level in writing (Salahu-Din, Persky & Miller, 2008). Students with disabilities scored almost 40 points below the scores of all students who participated in the assessment. The NAEP data and recommendations from policymakers (National Association of State Boards of Education, 2006) indicate the need to identify strategies that can improve writing proficiency among high school students.

Students who have writing difficulties, including those at risk for and with learning disabilities, may benefit from a variety of instructional interventions, especially those that provide authentic writing opportunities, facilitate the development of selflearning strategies, and allow for extensive peer-to-peer interaction (MacArthur & Graham, 1993). Examining methodologies and interventions that have been effective in other educational settings may assist with developing strategies that can improve writing proficiency among high school students.

In an educational context, schoolwide tiered approaches are sometimes used to improve student learning and behavior. Tiered approaches typically use the following evidence-based components: Universal screening, progress monitoring, high-quality core instruction, and instructional interventions at varying levels of intensity based on students' learning needs. Using a tiered approach, educators monitor student progress and make data-based decisions about curriculum, instructional interventions, and student supports (Johnson, Mellard, Fuchs & McKnight, 2006). In tiered approaches, students' responses to instruction are monitored to identify those students in need of more targeted and customized instruction (Fuchs & Fuchs, 2007).

Educators most commonly implement tiered approaches in elementary schools (Deshler & Kovaleski, 2007; Duffy, n.d.; Johnson & Smith, 2008) and typically incorporate evidence-based instructional interventions related to reading, math, or behavior. Tiered approaches in elementary schools show promise for increasing students' achievement in each of these three areas (Burns, 2008; Canter, Klotz, & Cowan, 2008) and may be applied with writing instruction as well (Hessler & Konrad, 2008). Further, there is evidence that tiered approaches may serve as an impetus for educators to examine the referral process for special education services and promote early identification of children at risk for, or with, learning disabilities, particularly, students with specific learning disabilities (Fuchs & Fuchs, 2007; National Research Center on Learning Disabilities, 2004). Practices inherent in the application of tiered approaches, such as the alignment of expected outcomes, teaching strategies, and assessment, along with the improvement of instructional decisionmaking by educators in both regular and special education that is associated with tiered approaches may

also offer secondary benefits for students (Cummings, Atkins, Allison, & Cole, 2008). These benefits include reductions in the frequency of challenging behaviors exhibited by students and enhanced academic engagement (Iovannone & Dunlap, 2006; March & Peters, 2002). Additionally, tiered approaches are characterized by collaboration between regular and special educators and teaching is tailored to student needs because instructional approaches are linked to student achievement (Duffy, n.d.).

Less is known about the potential of these approaches for improving outcomes for high school students. Due to the differences between elementary and secondary school settings (i.e., increased student mobility across classes, variation in student schedules, and increased emphasis on academic content), there is a need for additional work on assessing the effectiveness of tiered approaches for specific content areas in high schools. Further, the field is learning that many of the same strategies used at the elementary level, are also effective, or may be effective, at the secondary level (Heartland Area Education Agency 11, 2004). However, there continues to be a need to identify adaptations that need to be made based upon the high school context. Therefore, the Office of Special Education Programs (OSEP) is establishing a priority for Model Demonstration Projects on Tiered Approaches for Improving the Writing Proficiency of High School Students.

Priority

The purpose of this priority is to fund cooperative agreements to support the establishment and operation of three Model Demonstration Projects on Tiered Approaches for Improving the Writing Proficiency of High School Students (Projects) who have writing difficulties, including those at risk for and with learning disabilities. Each project must design, implement, and evaluate a tiered approach in high schools that incorporates evidenced-based components including screening, progress monitoring, core instruction, and instructional interventions at varying levels of intensity based on students' learning needs. The models must have writing as the core instructional component.

To be considered for funding under this absolute priority, applicants must meet the application requirements contained in this priority. All projects funded under this absolute priority also must meet the programmatic and administrative requirements specified in

the priority.

¹ "High stakes testing" is "the term used for assessments that determine if a student is retained in a grade or allowed to receive a diploma and graduate" (Lynch, 2000, p. 216).

Application Requirements. An applicant must include in its

application-

(a) A logic model that depicts, at a minimum, the goals, activities, outputs, and outcomes of the proposed project. A logic model communicates how a project will achieve its outcomes and provides a framework for both the formative and summative evaluations of the project; **Note:** The following Web site provides more information on logic models and lists multiple online resources: http://www.cdc.gov/eval/ resources.htm.

(b) A plan to implement the activities described in the Project Activities

section of this priority;

- (c) A plan, linked to the proposed project's logic model, for a formative evaluation of the proposed project's activities. The plan must describe how the formative evaluation will use clear performance objectives to ensure continuous improvement in the operation of the proposed project, including objective measures of progress in implementing the project and ensuring the quality of products and
- (d) A description of the proposed model (tiered approach), supporting evidence for the model as a whole, and empirical support of the critical evidence-based components, including the writing instruction and interventions that comprise the model:
- (e) The methods to be used for recruiting and selecting high schools if the applicant has not identified schools that are willing to participate in the model demonstrations. Applicants must put into place strategies for recruiting low-performing high schools. If the applicant has identified high schools willing to participate in the model demonstrations, also include a description of the demographics of the student population typically served by the schools, including information about the cultural and linguistic diversity of students. The final site selections must be determined in consultation with the OSEP Project Officer following the kick-off meeting;

(f) A budget for attendance at the

following:

- (1) A one and one half day kick-off meeting to be held in Washington, DC, within four weeks after receipt of the award and a one day annual planning meeting held in Washington, DC, with the OSEP Project Officer during each subsequent year of the project period.
- (2) A three-day Project Directors' Conference in Washington, DC, during each year of the project period; and
- (3) Two two-day trips annually to attend Department briefings,

Department-sponsored conferences, and other meetings, as requested by OSEP.

Project Activities. To meet the requirements of this priority, each Project, at a minimum, must-

- (a) In year one of the project, collaborate with the other Projects funded under this competition to conduct a systematic review of the research on:
- (1) Tiered approaches, including tiered writing approaches in high school, and their evidence-based components; and
- (2) Writing instruction and interventions for high school students. To the extent possible, build on existing research reviews, such as those on tiered approaches conducted by the OSEP-funded National Research Center on Learning Disabilities (http:// www.nrcld.org) and use the standards established by the What Works Clearinghouse for identifying evidencebased interventions and practices in the research review (http://ies.ed.gov/ncee/ *wwc/*). If it is not possible to use these standards, other rigorous standards must be used. This work must be completed during the first year of the project and result in a comprehensive description of any evidence on the application of tiered approaches in high schools and writing instruction for high school students;
- (b) Implement a model at the high school ninth grade level that:
- (1) Includes evidence-based components such as universal screening, progress monitoring, and writing instruction and interventions at varving intensity levels; and

(2) May be adapted to address unique characteristics of the school that may affect writing proficiency, such as the cultural and linguistic diversity of the

(c) Adopt a staggered implementation design with longitudinal data collection in at least two high schools (high school A and high school B) using the following approach:

(1) Implement the model in one department in high school A in the fall

of year two.

(2) Implement the model in high schools A and B in the fall of year three.

(3) Implement the model in high schools A and B in the fall of year four.

- (4) Collect data on the writing proficiency of all students who participated in the model as they move through high school even though the projects will only implement the writing intervention in the ninth grade.
- (d) Provide initial and ongoing professional development at the model demonstration sites to regular educators, special educators, related services

providers, and administrators who are charged with implementing the model. Ensure that there is a process for providing feedback to these personnel on their implementation of the critical components of the model;

(e) Implement an evaluation plan that includes a detailed description of the model and the critical components of the model, a description of the school and district variables required to implement and sustain the model, and the processes for collecting and analyzing specific project and crossproject data related to the:

(1) Effectiveness of the model to improve student writing proficiency.

(2) Fidelity of the implementation of the model and acceptable variations based on the unique characteristics of schools that may affect writing proficiency, such as the cultural and linguistic diversity of students.

(3) Effectiveness of the professional development provided to personnel implementing the model. Common cross-site data to be collected must be determined in consultation with the OSEP Project Officer following the first cross-project meeting.
(4) Effectiveness of the model to

inform the special education referral

process.

(f) Identify methods for effectively supporting ongoing communication and collaboration among families, students, school staff, and project staff to support the implementation and evaluation of the model:

(g) Document the effects of the model on additional variables identified by the Project such as changes in student engagement, challenging behaviors, and

instructional decisionmaking;

(h) Coordinate with the other Projects funded under this competition and the Model Demonstration Coordination Center (MDCC) to determine a crossproject plan for evaluating the impact of the models. The MDCC is a separate center funded by OSEP that is responsible for coordinating implementation and analyzing data to determine the effectiveness of the models. MDCC will develop a data coordination plan, cross-site data collection instruments, and common evaluation questions. MDCC will also synthesize and analyze data, monitor implementation fidelity, ensure data reliability, and foster information dissemination. As part of cross-site coordination, Projects must collect data across common measures as determined by MDCC that may or may not be the same as those proposed by the applicant. Common measures may include observations or data describing the context of schools, classrooms, or

students participating in the project, as well as schools, classrooms, or students who did not participate in the project. The purpose of the data is to provide information on the contexts in which models are implemented and the effectiveness of the models; **Note:** The following Web site provides more information on the project resource commitments necessary for MDCC collaboration, see section entitled, "Project Resource Commitments" at: http://mdcc.sri.com/

projectResourceCommitments.aspx;
(i) Communicate and collaborate on an ongoing basis with OSEP-funded projects, including the National Center on Response to Intervention (http://www.rti4success.org/) and the Center on

Instruction (http://

www.centeroninstruction.org) to share information on successful strategies and implementation challenges regarding tiered approaches in high schools;

(j) Develop a high-quality dissemination plan that reaches broad audiences including regular educators, special educators, related services providers, administrators, families, policymakers, and researchers.

The plan must specify how the grantee will collaborate with MDCC and with OSEP's Technical Assistance and

Dissemination Network;

(k) Submit to the OSEP Project Officer and the Proposed Product Advisory Board at OSEP's Technical Assistance Coordinating Center (TACC), for approval, a proposal describing the content and purpose of any new product prior to development; and

(l) Maintain ongoing communication with the OSEP Project Officer and the MDCC through monthly phone conversations and e-mail

communication.

Waiver of Proposed Rulemaking: Under the Administrative Procedure Act (APA) (5 U.S.C. 553), the Department generally offers interested parties the opportunity to comment on proposed priorities and requirements. Section 681(d) of IDEA, however, makes the public comment requirements of the APA inapplicable to the priority in this notice.

Program Authority: 20 U.S.C. 1463 and 1481.

Applicable Regulations: The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 84, 85, 86, 97, 98, and 99.

Note: The regulations in 34 CFR part 79 apply to all applicants except Federally recognized Indian Tribes.

Note: The regulations in 34 CFR part 86 apply to institutions of higher education only.

II. Award Information

Type of Award: Cooperative agreements.

Estimated Available Funds: \$1.200.000.

Contingent upon the availability of funds and the quality of applications for the competitions announced in this notice, we may make additional awards in FY 2010 from the lists of unfunded applicants from the groups funded in this competition (See section V.2. Review and Selection Process for more information).

Estimated Average Size of Awards: \$400,000.

Maximum Award: We will reject any application that proposes a budget exceeding \$400,000 for a single budget period of 12 months. The Assistant Secretary for Special Education and Rehabilitative Services may change the maximum amount through a notice published in the Federal Register.

Estimated Number of Awards: 3.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 48 months.

III. Eligibility Information

- 1. Eligible Applicants: State educational agencies; local educational agencies (LEAs), including public charter schools that are considered LEAs under State law; institutions of higher education; other public agencies; private nonprofit organizations; outlying areas; freely associated States; Indian Tribes or Tribal organizations; and forprofit organizations.
- 2. Cost Sharing or Matching: This competition does not require cost sharing or matching.
- 3. Other: General Requirements—(a) The projects funded under this competition must make positive efforts to employ and advance in employment

qualified individuals with disabilities (see section 606 of IDEA).

(b) Applicants and grant recipients funded under this competition must involve individuals with disabilities or parents of individuals with disabilities ages birth through 26 in planning, implementing, and evaluating the projects (see section 682(a)(1)(A) of IDEA).

IV. Application and Submission Information

1. Address to Request Application Package: Education Publications Center (ED Pubs), P.O. Box 1398, Jessup, MD 20794–1398. Telephone, toll free: 1–877–433–7827. FAX: (301) 470–1244. If you use a telecommunications device for the deaf (TDD), call, toll free: 1–877–576–7734.

You can contact ED Pubs at its Web site, also: http://www.ed.gov/pubs/edpubs.html or at its e-mail address: edpubs@inet.ed.gov.

If you request an application package from ED Pubs, be sure to identify this program or competition as follows: CFDA number 84.326M.

Individuals with disabilities can obtain a copy of the application package in an accessible format (e.g., braille, large print, audiotape, or computer diskette) by contacting the person or team listed under Accessible Format in section VIII of this notice.

- 2. Content and Form of Application Submission: Requirements concerning the content of an application, together with the forms you must submit, are in the application package for this competition. Page Limit: The application narrative (Part III of the application) is where you, the applicant, address the selection criteria that reviewers use to evaluate your application. You must limit the application narrative to the equivalent of no more than 70 pages, using the following standards:
- A "page" is 8.5" x 11", on one side only, with 1" margins at the top, bottom, and both sides.
- Double space (no more than three lines per vertical inch) all text in the application narrative, including titles, headings, footnotes, quotations, references, and captions, as well as all text in charts, tables, figures, and graphs.
- Use a font that is either 12 point or larger or no smaller than 10 pitch (characters per inch).

The page limit does not apply to Part I, the cover sheet; Part II, the budget section, including the narrative budget justification; Part IV, the assurances and certifications; or the one-page abstract, the resumes, the bibliography, the

references, or the letters of support. However, the page limit does apply to all of the application narrative section (Part III).

We will reject your application if you exceed the page limit or if you apply other standards and exceed the equivalent of the page limit.

3. Submission Dates and Times: Applications Available: July 13, 2009. Deadline for Transmittal of Applications: August 12, 2009.

Applications for grants under this competition may be submitted electronically using the Electronic Grant Application System (e-Application) accessible through the Department's e-Grants site, or in paper format by mail or hand delivery. For information (including dates and times) about how to submit your application electronically, or in paper format by mail or hand delivery, please refer to section IV. 6. Other Submission Requirements of this notice.

We do not consider an application that does not comply with the deadline requirements.

Individuals with disabilities who need an accommodation or auxiliary aid in connection with the application process should contact the person listed under FOR FURTHER INFORMATION CONTACT in section VII of this notice. If the Department provides an accommodation or auxiliary aid to an individual with a disability in connection with the application process, the individual's application remains subject to all other requirements and limitations in this notice.

Deadline for Intergovernmental Review: August 24, 2009.

- 4. Intergovernmental Review: This competition is subject to Executive Order 12372 and the regulations in 34 CFR part 79. Information about Intergovernmental Review of Federal Programs under Executive Order 12372 is in the application package for this competition.
- 5. Funding Restrictions: We reference regulations outlining funding restrictions in the Applicable Regulations section of this notice.
- 6. Other Submission Requirements: Applications for grants under this program may be submitted electronically or in paper format by mail or hand delivery.
- a. Electronic Submission of Applications.

If you choose to submit your application to us electronically, you must use e-Application, accessible through the Department's e-Grants Web site page at: http://e-grants.ed.gov.

While completing your electronic application, you will be entering data online that will be saved into a database. You may not e-mail an electronic copy of a grant application to us.

Please note the following:

- Your participation in e-Application is voluntary.
- You must complete the electronic submission of your grant application by 4:30:00 p.m., Washington, DC time, on the application deadline date. E-Application will not accept an application for this competition after 4:30:00 p.m., Washington, DC time, on the application deadline date. Therefore, we strongly recommend that you do not wait until the application deadline date to begin the application process.
- The hours of operation of the e-Grants Web site are 6:00 a.m. Monday until 7:00 p.m. Wednesday; and 6:00 a.m. Thursday until 8:00 p.m. Sunday, Washington, DC time. Please note that, because of maintenance, the system is unavailable between 8:00 p.m. on Sundays and 6:00 a.m. on Mondays, and between 7:00 p.m. on Wednesdays and 6:00 a.m. on Thursdays, Washington, DC time. Any modifications to these hours are posted on the e-Grants Web site.
- You will not receive additional point value because you submit your application in electronic format, nor will we penalize you if you submit your application in paper format.
- You must submit all documents electronically, including all information you typically provide on the following forms: The Application for Federal Assistance (SF 424), the Department of **Education Supplemental Information for** SF 424, Budget Information—Non-Construction Programs (ED 524), and all necessary assurances and certifications. You must attach any narrative sections of your application as files in a .DOC (document), RTF (rich text), or .PDF (Portable Document) format. If you upload a file type other than the three file types specified in this paragraph or submit a password protected file, we will not review that material.
- Your electronic application must comply with any page limit requirements described in this notice.
- Prior to submitting your electronic application, you may wish to print a copy of it for your records.
- After you electronically submit your application, you will receive an automatic acknowledgment that will include a PR/Award number (an identifying number unique to your application).

- Within three working days after submitting your electronic application, fax a signed copy of the SF 424 to the Application Control Center after following these steps:
 - (1) Print SF 424 from e-Application.
- (2) The applicant's Authorizing Representative must sign this form.
- (3) Place the PR/Award number in the upper right hand corner of the hard-copy signature page of the SF 424.
- (4) Fax the signed SF 424 to the Application Control Center at (202) 245–6272.
- We may request that you provide us original signatures on other forms at a later date

Application Deadline Date Extension in Case of System Unavailability: If you are prevented from electronically submitting your application on the application deadline date because e-Application is unavailable, we will grant you an extension of one business day to enable you to transmit your application electronically, by mail, or by hand delivery. We will grant this extension if—

- (1) You are a registered user of e-Application and you have initiated an electronic application for this competition; and
- (2)(a) E-Application is unavailable for 60 minutes or more between the hours of 8:30 a.m. and 3:30 p.m., Washington, DC time, on the application deadline date; or
- (b) E-Application is unavailable for any period of time between 3:30 p.m. and 4:30:00 p.m., Washington, DC time, on the application deadline date.

We must acknowledge and confirm these periods of unavailability before granting you an extension. To request this extension or to confirm our acknowledgment of any system unavailability, you may contact either (1) the person listed elsewhere in this notice under **FOR FURTHER INFORMATION CONTACT** (see VII. Agency Contact) or (2) the e-Grants help desk at 1-888-336-8930. If e-Application is unavailable due to technical problems with the system and, therefore, the application deadline is extended, an e-mail will be sent to all registered users who have initiated an e-Application.

Extensions referred to in this section apply only to the unavailability of E-Application. If e-Application is available, and, for any reason, you are unable to submit your application electronically or you do not receive an automatic acknowledgment of your submission, you may submit your application in paper format by mail or hand delivery in accordance with the instructions in this notice.

b. Submission of Paper Applications by Mail.

If you submit your application in paper format by mail (through the U.S. Postal Service or a commercial carrier), you must mail the original and two copies of your application, on or before the application deadline date, to the Department at the following address: U.S. Department of Education, Application Control Center, Attention: (CFDA Number 84.326M), LBJ Basement Level 1, 400 Maryland Avenue, SW., Washington, DC 20202–4260.

You must show proof of mailing consisting of one of the following:

- (1) A legibly dated U.S. Postal Service postmark.
- (2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.
- (3) A dated shipping label, invoice, or receipt from a commercial carrier.
- (4) Any other proof of mailing acceptable to the Secretary of the U.S. Department of Education.

If you mail your application through the U.S. Postal Service, we do not accept either of the following as proof of mailing:

- (1) A private metered postmark.
- (2) A mail receipt that is not dated by the U.S. Postal Service.

If your application is postmarked after the application deadline date, we will not consider your application.

Note: The U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, you should check with your local post office.

c. Submission of Paper Applications by Hand Delivery.

If you submit your application in paper format by hand delivery, you (or a courier service) must deliver the original and two copies of your application by hand, on or before the application deadline date, to the Department at the following address: U.S. Department of Education, Application Control Center, Attention: (CFDA Number 84.326M), 550 12th Street, SW., Room 7041, Potomac Center Plaza, Washington, DC 20202–4260.

The Application Control Center accepts hand deliveries daily between 8:00 a.m. and 4:30:00 p.m., Washington, DC time, except Saturdays, Sundays, and Federal holidays.

Note for Mail or Hand Delivery of Paper

Applications:

If you mail or hand deliver your application to the Department—

(1) You must indicate on the envelope and—if not provided by the Department—in Item 11 of the SF 424

- the CFDA number, including suffix letter, if any, of the competition under which you are submitting your application; and
- (2) The Application Control Center will mail to you a notification of receipt of your grant application. If you do not receive this notification within 15 business days from the application deadline date, you should call the U.S. Department of Education Application Control Center at (202) 245–6288.

V. Application Review Information

- 1. Selection Criteria: The selection criteria for this competition are from 34 CFR 75.210 and are listed in the application package.
- 2. Review and Selection Process: In the past, the Department has had difficulty finding peer reviewers for certain competitions because so many individuals who are eligible to serve as peer reviewers have conflicts of interest. The Standing Panel requirements under IDEA also have placed additional constraints on the availability of reviewers. Therefore, the Department has determined that, for some discretionary grant competitions, applications may be separated into two or more groups and ranked and selected for funding within the specific groups. This procedure will make it easier for the Department to find peer reviewers by ensuring that greater numbers of individuals who are eligible to serve as reviewers for any particular group of applicants will not have conflicts of interest. It also will increase the quality, independence, and fairness of the review process while permitting panel members to review applications under discretionary grant competitions for which they also have submitted applications. However, if the Department decides to select an equal number of applications in each group for funding, this may result in different cut-off points for fundable applications in each group.

VI. Award Administration Information

1. Award Notices: If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN). We may notify you informally, also.

If your application is not evaluated or not selected for funding, we notify you.

2. Administrative and National Policy Requirements: We identify administrative and national policy requirements in the application package and reference these and other requirements in the Applicable Regulations section of this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. Reporting: At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary. If you receive a multi-year award, you must submit an annual performance report that provides the most current performance and financial expenditure information as directed by the Secretary under 34 CFR 75.118. The Secretary may also require more frequent performance reports under 34 CFR 75.720(c). For specific requirements on reporting, please go to http://www.ed.gov/fund/grant/apply/ appforms/appforms.html.

4. Performance Measures: Under the Government Performance and Results Act of 1993 (GPRA), the Department has established a set of performance measures, including long-term measures, that are designed to yield information on various aspects of the effectiveness and quality of the Technical Assistance and Dissemination to Improve Services and Results for Children With Disabilities program. These measures focus on the extent to which projects provide high quality products and services, the relevance of project products and services to educational and early intervention policy and practice, and the use of products and services to improve educational and early intervention policy and practice.

Grantees will be required to provide information related to these measures in annual reports to the Department.

Grantees also will be required to report information on their project's performance in annual reports to the Department (34 CFR 75.590).

VII. Agency Contact

FOR FURTHER INFORMATION CONTACT:

Corinne Weidenthal, U.S. Department of Education, 400 Maryland Avenue, SW., room 4120, Potomac Center Plaza (PCP), Washington, DC 20202–2550. Telephone: (202) 245–6529.

If you use a TDD, call the Federal Relay Service (FRS), toll free, at 1–800–877–8339.

VIII. Other Information

Accessible Format: Individuals with disabilities can obtain this document and a copy of the application package in an accessible format (e.g., braille, large print, audiotape, or computer diskette)

by contacting the Grants and Contracts Services Team, U.S. Department of Education, 400 Maryland Avenue, SW., room 5075, PCP, Washington, DC 20202–2550. Telephone: (202) 245– 7363. If you use a TDD, call the FRS, toll free, at 1–800–877–8339.

Electronic Access to This Document: You can view this document, as well as all other documents of this Department published in the Federal Register, in text or Adobe Portable Document Format (PDF) on the Internet at the following site: http://www.ed.gov/news/fedregister.

To use PDF you must have Adobe Acrobat Reader, which is available free at this site. If you have questions about using PDF, call the U.S. Government Printing Office (GPO), toll free, at 1–888–293–6498; or in the Washington, DC area at (202) 512–1530.

Note: The official version of this document is the document published in the Federal Register. Free Internet access to the official edition of the Federal Register and the Code of Federal Regulations is available on GPO Access at: http://www.gpoaccess.gov/nara/index.html.

Delegation of Authority: The Secretary of Education has delegated authority to Andrew J. Pepin, Executive Administrator for Special Education and Rehabilitative Services to perform the functions of the Assistant Secretary for Special Education and Rehabilitative Services.

Dated: July 8, 2009.

Andrew J. Pepin,

Executive Administrator for Special Education and Rehabilitative Services.
[FR Doc. E9–16549 Filed 7–10–09; 8:45 am]
BILLING CODE 4000–01–P

ELECTION ASSISTANCE COMMISSION

Sunshine Act Notice

AGENCY: U.S. Election Assistance Commission.

ACTION: Notice of Public Meeting and Hearing Agenda (Amended).

DATE AND TIME: Tuesday, July 14, 2009, 1 p.m.–4 p.m. EDT (Meeting and Hearing).

PLACE: U.S. Election Assistance Commission, 1225 New York Ave, NW., Suite 150, Washington, DC 20005 (Metro Stop: Metro Center).

AGENDA: Please note the extended deadlines for oral and written testimony. The Commission will hold a public meeting to consider administrative matters. The Commission will consider re-accreditation of two voting system test laboratories. The

Commission will receive a briefing on the Accessible Voting Technology Initiative, with a representative from NIST available to help answer questions. The Commission will hear from members of the public regarding technological solutions for voting systems to ensure that voters with disabilities can vote in a private and independent manner.

Members of the public who wish to speak at the meeting, regarding technological solutions for voting systems that ensure that voters with disabilities can vote in a private and independent manner, may send a request to participate to the EAC by 10 a.m. EDT on Monday, July 13, 2009. Due to time constraints, the EAC can select no more than 6 participants amongst the volunteers who request to participate. The selected volunteers will be allotted 5 minutes each to share their viewpoint. Participants will be selected on a firstcome, first-served basis. However, to maximize diversity of input, only one participant per organization or entity will be chosen if necessary. Participants will receive confirmation by 12 p.m. EDT on Monday, July 13, 2009. Those who are not selected to speak may provide written comments. Requests to speak may be sent to the EAC via e-mail at testimony@eac.gov, via mail addressed to the U.S. Election Assistance Commission, 1225 New York Avenue, NW., Suite 1100, Washington, DC 20005, or by fax at 202–566–1389. All requests must include a description of what will be said, contact information which will be used to notify the requestor with status of request (phone number on which a message may be left or e-mail), and include the subject/ attention line (or on the envelope if by mail): Technology and Disability Access. Please note that these comments will be made available to the public at http://www.eac.gov.

Written comments from members of the public, regarding technological solutions for voting systems that ensure that voters with disabilities can vote in a private and independent manner, will also be accepted. This testimony will be included as part of the written record of the hearing, and available on our Web site. Written testimony must be received by 3 p.m. EDT on Monday, July 13, 2009, and should be submitted via email at testimony@eac.gov, via mail addressed to the U.S. Election Assistance Commission, 1225 New York Avenue, NW., Suite 1100, Washington, DC 20005, or by fax at 202-566-1389. All correspondence that contains written testimony must have in the subject/attention line (or on the envelope if by mail): Written

Submission for Technology and Disability Access.

Members of the public may observe but not participate in EAC meetings unless this notice provides otherwise. Members of the public may use small electronic audio recording devices to record the proceedings. The use of other recording equipment and cameras requires advance notice to and coordination with the Commission's Communications Office.¹

This meeting will be open to the public.

PERSON TO CONTACT FOR INFORMATION: Bryan Whitener, Telephone: (202) 566–3100.

Gineen Beach.

[Project No. 13452-000]

McGinnis, Inc.; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

July 2, 2009.

On April 29, 2009, McGinnis, Inc. filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act, proposing to study the feasibility of the Cannelton Hydrokinetic Project, located on the Ohio River, in Hancock County, Kentucky, and Perry County, Indiana. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of: (1) A 100 to 300-foot-long by 20 to 52-foot-wide barge spudded down to the riverbed; (2) 10 6–8-foot-long by 6–8-foot-diameter turbine-generators mounted in line along the side of the barge; (3) one armored, high-voltage cable transmitting the generated power to the existing transmission line located adjacent to the proposed project area; and (4) appurtenant facilities. The proposed project would generate about 1,533 megawatt-hours.

Applicant Contact: Bruce D. McGinnis, Sr., McGinnis, Inc., P. O. Box 534, 502 Second St., Ext., South Point, OH 45680, phone: (740) 377–4391.

FERC Contact: Sergiu Serban, 202–502–6211.

Deadline for filing comments, motions to intervene, competing applications (without notices of intent), or notices of intent to file competing applications: 60 days from the issuance of this notice. Comments, motions to intervene, notices of intent, and competing applications may be filed electronically via the Internet. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link. If unable to be filed electronically, documents may be paperfiled. To paper-file, an original and eight copies should be mailed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. For more information on how to submit these types of filings please go to the Commission's Web site located at http://www.ferc.gov/filingcomments.asp.

More information about this project, including a copy of the application, can be viewed or printed on the "eLibrary" link of Commission's Web site at http://www.ferc.gov/docs-filing/elibrary.asp. Enter the docket number (P–13452) in the docket number field to access the document. For assistance, call toll-free 1–866–208–3372.

Federal Energy Regulatory Commission

[Project No. 2232-566]

Duke Energy Carolinas, LLC; Notice of Application for Amendment of License and Soliciting Comments, Motions To Intervene, and Protests

July 2, 2009.

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

- a. Application Type: Non-Project Use of Public Lands and Waters.
 - b. Project No.: 2232-566.
 - c. Date Filed: April 22, 2009.
- d. *Applicant:* Duke Energy Carolinas, LLC.
- e. Name of Project: Catawba-Wateree Project.

- f. Location: The Catawba-Wateree Project is located in Alexander, Burke, Caldwell, Catawba, Gaston, Iredell, Lincoln, McDowell and Mecklenburg Counties, North Carolina and Chester, Fairfield, Kershaw, Lancaster, and York Counties, South Carolina. This project does not occupy any Federal lands.
- g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791a–825r.
- h. Applicant Contact: Mr. Joe Hall, Lake Management Representative, Duke Energy Carolinas, LLC, P.O. Box 1006, Charlotte, North Carolina 28201–1006, (704) 382–8576.
- i. FERC Contact: Joy Jones, Telephone 202–502–6760, and e-mail: joy.jones@ferc.gov.
- j. Deadline for filing comments, motions to intervene, and protest: August 02, 2009. All documents (original and eight copies) should be filed with: Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

The Commission's Rules of Practice and Procedure require all interveners filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervener files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular

application. k. *Description of Request:* Duke Energy Carolinas, LLC requests Commission approval of an agreement that would allow Duke to authorize the Town of Mooresville, North Carolina to construct and operate expanded water intake facilities on, and to withdraw water from, Lake Norman. The existing water intake structure would be expanded by connecting a water line to the existing water intake structure and the existing pumping plant. Approximately 125 feet of water line would be within the project boundary. Additionally, new screens with screen openings that do not exceed 0.25 inch would be installed on the existing intake structure. Intake velocities at the intake structure would not exceed 0.5 feet per second. Under the agreement, the expanded facility would have a gross maximum annual average rate of 18 million gallons per day (MGD), a 6 MGD increase from the current approved withdrawal rate. The water intake and pump facility is located in Iredell County, North Carolina.

¹ View EAC Regulations Implementing Government in the Sunshine Act.

- l. Locations of the Application: A copy of the application is available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street, NE., Room 2A, Washington, DC 20426, or by calling (202) 502-8371. This filing may also be viewed on the Commission's Web site at http://www.ferc.gov using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online at http://www.ferc.gov/docs-filing/ esubscription.asp to be notified via e-mail of new filings and issuances related to this or other pending projects. For assistance, call 1-866-208-3676 or e-mail FERCOnlineSupport@ferc.gov, for TTY, call (202) 502-8659. A copy is also available for inspection and reproduction at the address in item (h) above.
- m. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.
- n. Comments, Protests, or Motions to Intervene: Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.
- o. Any filings must bear in all capital letters the title "COMMENTS", "PROTEST", or "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers.
- p. Agency Comments: Federal, State, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.
- q. Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web

site at http://www.ferc.gov under the "e-Filing" link.

- j. On January 15, 2009, Free Flow Power filed a Notice of Intent (NOI) to file license applications for original licenses and a Pre-Application Document (PAD) for the 55 hydrokinetic projects proposed for locations in the Mississippi River from St. Louis, Missouri, to New Orleans, Louisiana. They also requested the use of the Traditional Licensing Process (TLP) for 51 of the 55 proposed sites, later changed to $\overline{48}$ of 55 sites. FERC Project Nos. 12924, 12922, and 12919 were part of the January 15, 2009 TLP request, but the newspapers published in the counties in which the projects would be located did not publish the notices. By letter filed on June 1, 2009, Free Flow Power added Project No. 12935 to the list of proposed sites for which the TLP was requested. On May 21, 2009, Free Flow Power filed records of notices published in local newspapers near the four sites between April 1, 2009, and April 8, 2009. No comments were filed in response to the notices.
- k. With this notice, we are initiating informal consultation with: (a) The U.S. Fish and Wildlife Service under section 7 of the Endangered Species Act and the joint agency regulations thereunder at 50 CFR, Part 402; (b) NOAA Fisheries under section 305(b) of the Magnuson-Stevens Fishery Conservation and Management Act and implementing regulations at 50 CFR 600.920; and (c) the State Historic Preservation Officers of Illinois, Louisiana, Mississippi, and Missouri, as required by section 106, National Historical Preservation Act, and the implementing regulations of the Advisory Council on Historic Preservation at 36 CFR 800.2.
- l. With this notice, we are designating Free Flow Power Corporation as the Commission's non-federal representative for carrying out informal consultation, pursuant to section 106 of the National Historic Preservation Act.

m. Free Flow Power Corporation filed a PAD, including a proposed process plan and schedule, with the Commission, pursuant to 18 CFR 5.6 of the Commission's regulations.

n. A copy of the PAD is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site (http://www.ferc.gov), using the "eLibrary" link. Enter the docket number, excluding the last three digits in the docket number field to access the document. For assistance, contact FERC Online Support at FERCONlineSupport@ferc.gov or toll free at 1–866–208–3676, of for TTY, (202) 502–8659. A copy is also available for inspection and reproduction at the address in paragraph h.

Register online at http://ferc.gov/ esubscribenow.htm to be notified via email of new filing and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

Eagle Crest Energy Company; Notice of Application Tendered for Filing With the Commission and Soliciting Additional Study Requests

July 7, 2009.

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

- a. Type of Application: Major License.
- b. Project No.: P-13123-002.
- c. *Date filed:* June 23, 2009.
- d. *Applicant:* Eagle Crest Energy Company.
- e. *Name of Project:* Eagle Mountain Pumped Storage Project.
- f. Location: The Project would be located in two depleted mining pits in the Eagle Mountain Mine in Riverside County, California, near the Town of Desert Center, California, and would occupy Federal lands administered by the U.S. Bureau of Land Management and private lands owned by Kaiser Eagle Mountain, LLC.
- g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791(a)–825(r).
- h. *Applicant Contact:* Stephen Lowe, One El Paseo West Building, Suite 204, 74–199 El Paseo Drive, Palm Desert, CA 92260.

i. FERC Contact: Kim A. Nguyen, 888 First Street, NE., Room 61–01, Washington, DC 20426, 202–502–6105, Kim.nguyen@ferc.gov.

j. Cooperating agencies: Federal, State, local, and tribal agencies with jurisdiction and/or special expertise with respect to environmental issues that wish to cooperate in the preparation of the environmental document should follow the instructions for filing such requests described in item l below. Cooperating agencies should note the Commission's policy that agencies that cooperate in the preparation of the environmental document cannot also intervene. See, 94 FERC ¶61,076 (2001).

k. Pursuant to § 4.32(b)(7) of 18 CFR of the Commission's regulations, if any resource agency, Indian Tribe, or person believes that an additional scientific study should be conducted in order to form an adequate factual basis for a complete analysis of the application on its merit, the resource agency, Indian Tribe, or person must file a request for a study with the Commission not later than 60 days from the date of filing of the application, and serve a copy of the request on the applicant.

1. Deadline for filing additional study requests and requests for cooperating agency status: August 21, 2009. The deadline for the applicant's response to any such request is 30 days after the filing of the request.

All documents (original and eight copies) should be filed with: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

Additional study requests and requests for cooperating agency status may be filed electronically via the Internet in lieu of paper. The Commission strongly encourages electronic filings. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site (http://www.ferc.gov/docs-filing/ferconline.asp) under the "e-filing" link. For a simpler method of submitting text only comments, click on "Quick Comment."

m. The application has not been accepted for filing and is not ready for environmental analysis at this time.

n. The project would consist of: (1) An 191-acre upper reservoir impounded by two diversion dams with a total storage capacity of 20,000 acre-feet; (2) an 163-acre lower reservoir with a total storage capacity of 21,900 acre-feet; (3) a 29-foot-diameter by 4,000-foot-long low pressure upper tunnel; (4) a surge tank with a 33-foot-diameter by 1,348-footlong tunnel shaft; (5) a 29-foot-diameter by 1,560-foot-long high pressure lower tunnel; (6) a 33-foot-diameter by 6,835-

foot-long tailrace tunnel; (7) a 72-footwide, 130-foot-high, and 360-foot-long underground powerhouse; (8) four reversible pump-turbine units at 325 megawatts each, for a total installed capacity of 1,300 megawatts; (9) a 28foot-wide, 28-foot-high, by 6,625-footlong access tunnel to the underground powerhouse; (10) a water supply pipeline ranging from 12-to 24-inchdiameter totaling 15.3 miles; (11) a 13.5mile-long, 500-kilovolt transmission line connecting to a new Interconnection Collector Substation; and (12) appurtenant facilities. The average annual generation is estimated to be 22.2 gigawatt-hours.

o. A copy of the application is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at http://www.ferc.gov using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC Online Support at FERCOnlineSupport@ferc.gov or toll-free at 1–866–208–3676, or for TTY, (202) 502–8659. [Project No. 13449-000]

McGinnis, Inc.; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

July 6, 2009.

On April 29, 2009, McGinnis, Inc. filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act, proposing to study the feasibility of the Markland Hydrokinetic Project, located on the Ohio River, in Gallatin County, Kentucky, and Switzerland County, Indiana. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of: (1) A 100 to 300-foot-long by 20 to 52-foot-wide barge spudded down to the riverbed; (2) 10 6–8-foot-long by 6–8-foot-diameter turbine-generators mounted in line along the side of the

barge; (3) one armored, high-voltage cable transmitting the generated power to the existing transmission line located adjacent to the proposed project area; and (4) appurtenant facilities. The proposed project would generate about 1,533 megawatt-hours.

Cooperating agencies should note the Commission's policy that agencies that cooperate in the preparation of the environmental document cannot also intervene. See, 94 FERC ¶ 61,076 (2001).

k. With this notice, we are initiating informal consultation with: (a) The U.S. Fish and Wildlife Service and/or NOAA Fisheries under section 7 of the Endangered Species Act and the joint agency regulations thereunder at 50 CFR, Part 402, and (b) the Alabama and Georgia State Historic Preservation Officers, as required by section 106, National Historical Preservation Act, and the implementing regulations of the Advisory Council on Historic Preservation at 36 CFR 800.2.

l. With this notice, we are designating Georgia Power Company as the Commission's non-federal representative for carrying out informal consultation, pursuant to section 7 of the Endangered Species Act and section 106 of the National Historic Preservation Act.

m. Georgia Power Company filed a Pre-Application Document (PAD; including a proposed process plan and schedule) with the Commission, pursuant to 18 CFR 5.6 of the Commission's regulations.

n. A copy of the PAD is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's website (http://www.ferc.gov), using the "eLibrary" link. Enter the docket number, excluding the last three digits in the docket number field to access the document. For assistance, contact FERC Online Support at

FERCONlineSupport@ferc.gov, or toll free at 1–866–208–3676, or for TTY, (202) 502–8659. A copy is also available for inspection and reproduction at the address in paragraph h.

Register online at http:// www.ferc.gov/docs-filing/ esubscription.asp to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

o. With this notice, we are soliciting comments on the PAD and Scoping Document 1 (SD1), as well as study requests. All comments on the PAD and SD1, and study requests should be sent to the address above in paragraph h. In addition, all comments on the PAD and SD1, study requests, requests for cooperating agency status, and all communications to and from Commission staff related to the merits of the potential application (original and eight copies) must be filed with the Commission at the following address: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. All filings with the Commission must include on the first page the project name (Bartletts Ferry Hydroelectric Project) and the project number (P-485-063), and bear the heading "Comments on Pre-Application Document," "Study Requests," "Comments on Scoping Document 1," "Request for Cooperating Agency Status," or "Communications to and from Commission Staff." Any individual or entity interested in submitting study requests, commenting on the PAD or SD1, and any agency requesting cooperating status must do so by September 4, 2009.

Comments on the PAD and SD1, study requests, requests for cooperating agency status, and other permissible forms of communications with the Commission may be filed electronically via the Internet in lieu of paper. The Commission strongly encourages electronic filings. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site (http://www.ferc.gov/docs-filing/ferconline.asp) under the "e-filing" link. For a simpler method of submitting text only comments, click on "Quick Comment."

p. Although our current intent is to prepare an environmental assessment (EA), there is the possibility that an Environmental Impact Statement (EIS) will be required. Nevertheless, this meeting will satisfy the NEPA scoping requirements, irrespective of whether an EA or EIS is issued by the Commission.

Scoping Meetings

Commission staff will hold scoping meetings in the vicinity of the project at the times and places noted below. The daytime meetings will focus on resource agency, Indian tribes, and nongovernmental organization concerns, while the evening meetings are primarily for receiving input from the public. We invite all interested

individuals, organizations, and agencies to attend any of the meetings, and to assist staff in identifying particular study needs, as well as the scope of environmental issues to be addressed in the environmental document. The times and locations of these meetings are as follows:

August 4, 2009, Daytime Scoping Meeting

Date: Tuesday, August 4, 2009. Time: 1 p.m. EST.

Location: City of Valley, Alabama's Community Center, 130 Sportsplex Drive, Valley, Alabama 36854.

August 4, 2009, Evening Scoping Meeting

Date: Tuesday, August 4, 2009. Time: 6 p.m. EST.

Location: City of Valley, Alabama's Community Center, 130 Sportsplex Drive, Valley, Alabama 36854.

August 6, 2009, Daytime Scoping Meeting

Date: Thursday, August 6, 2009. Time: 1 p.m. EST.

Location: Old Mountain Hill Schoolhouse, 47 Mountain Hill Road, Fortson, Georgia 31808.

August 6, 2009, Evening Scoping Meeting

Date: Thursday, August 6, 2009. *Time:* 6 p.m. EST.

Location: Old Mountain Hill Schoolhouse, 47 Mountain Hill Road, Fortson, Georgia 31808.

Scoping Document 1 (SD1), which outlines the subject areas to be addressed in the environmental document, was mailed to the individuals and entities on the Commission's mailing list. Copies of SD1 will be available at the scoping meetings, or may be viewed on the Web at http://www.ferc.gov, using the "eLibrary" link. Follow the directions for accessing information in paragraph n. Based on all oral and written comments, a Scoping Document 2 (SD2) may be issued. SD2 may include a revised process plan and schedule, as well as a list of issues, identified through the scoping process.

Site Visit

Georgia Power Company and Commission staff will conduct a site visit of the project facilities on Wednesday, August 5, 2009, starting at 10:30 a.m. EST. The site visit will entail touring the project dam and powerhouse. At 1 p.m. EST, a tour of Lake Harding will start from the project's powerhouse. Anyone interested in visiting the project

facilities and/or touring Lake Harding must send an e-mail to Bartletts Ferry Relicensing, at bfrelice@southerco.com, by July 24, 2009. Please indicate if you want to visit the project facilities, tour Lake Harding, or both. Participants of the tours must provide identification, sign a liability waiver, and wear appropriate clothing and closed toed shoes. If any participant attending any part of the sites visit is disabled or has special needs, please e-mail Bartletts Ferry Relicensing, at bfrelice@southerco.com.

Meeting Objectives

At the scoping meetings, staff will: (1) Initiate scoping of the issues; (2) review and discuss existing conditions and resource management objectives; (3) review and discuss existing information and identify preliminary information and study needs; (4) review and discuss the process plan and schedule for prefiling activity that incorporates the time frames provided for in Part 5 of the Commission's regulations and, to the extent possible, maximizes coordination of federal, state, and tribal permitting and certification processes; and (5) discuss the appropriateness of any federal or state agency or Indian tribe acting as a cooperating agency for development of an environmental document.

Meeting participants should come prepared to discuss their issues and/or concerns. Please review the PAD in preparation for the scoping meetings. Directions on how to obtain a copy of the PAD and SD1 are included in item n. of this notice.

Meeting Procedures

The meetings will be recorded by a stenographer and will become part of the formal record of the Commission proceeding on the project.

Kimberly D. Bose,

Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2165-029]

Alabama Power Company; Notice of Application for Amendment of License and Soliciting Comments, Motions To Intervene, and Protests

July 2, 2009.

a. *Type of Application:* Non-project use of project lands and waters.

- b. Project Number: 2165–029.
- c. Date Filed: June 5, 2009.
- d. *Applicant:* Alabama Power Company.

e. *Name of Project:* Warrior River Hydroelectric Project.

- f. Location: The project is located on Sipsley Fork and the Black Warrior River in Cullman, Tuscaloosa, Walker, and Winston Counties, Alabama. The proposed action would occur at the Lewis Smith Development in Cullman County.
- g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a), 825(r) and 799 and 801.
- h. Applicant Contact: Mr. Jason Powers, Alabama Power Company, 600 18th Street North, Birmingham, Alabama 35203, telephone: (205) 257– 4070.
- i. FERC Contact: Any questions on this notice should be addressed to Christopher Yeakel at (202) 502–8132, or e-mail address:

christopher.yeakel@ferc.gov.

j. Deadline for filing comments and or

motions: August 3, 2009.

k. Description of Request: Alabama Power Company proposes to permit Mr. Lynn Layton to replace one existing, covered, 10-slip boat dock with three covered boat docks, each with 10 slips at Cushman's Marina, located on the Warrior River Project. Each dock would consist of: (1) A 50-foot-long ramp; (2) an equalizing platform; (3) a 78-footlong central walkway; and (4) ten 12foot-wide by 28-foot-long slips. Navigational lighting would be installed on each dock. No fuel-dispensing or sewage-pumping facilities are proposed. The docks would be available for rental by the general public. The licensee also proposes to allow the removal of an existing building at the site, and the construction of a new patio within the project boundary

l. Locations of the Application: A copy of the application is available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street, NE., Room 2A, Washington, DC 20426, or by calling (202) 502-8371. This filing may also be viewed on the Commission's Web site at http://www.ferc.gov using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field (p-2165) to access the document. You may also register online at http://www.ferc.gov/ docs-filing/esubscription.asp to be notified via e-mail of new filings and issuances related to this or other pending projects. For assistance, call 1-866-208-3372 or e-mail FERCOnlineSupport@ferc.gov, for TTY,

call (202) 502-8659. A copy is also

available for inspection and reproduction at the address in item (h) above.

m. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

- n. Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.
- Documents—Any filings must bear in all capital letters the title "COMMENTS", "RECOMMENDATIONS FOR TERMS AND CONDITIONS", "PROTEST", OR "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers (P–2165–029). All

o. Filing and Service of Responsive

documents (original and eight copies) should be filed with: The Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

p. Agency Comments—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

q. Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site at http://www.ferc.gov under the "e-Filing" link.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 13450-000]

McGinnis, Inc.; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

July 2, 2009.

On April 29, 2009, McGinnis, Inc. filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act, proposing to study the feasibility of the John T. Myers Hydrokinetic Project, located on the Ohio River, in Union County, Kentucky, and Posey County, Indiana. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of: (1) A 100 to 300-foot-long by 20 to 52-foot-wide barge spudded down to the riverbed; (2) 10 6-8-foot-long by 6-8foot-diameter turbine-generators mounted in line along the side of the barge; (3) one armored, high-voltage cable transmitting the generated power to the existing transmission line located adjacent to the proposed project area; and (4) appurtenant facilities. The proposed project would generate about 1,533 megawatt-hours.

Applicant Contact: Bruce D. McGinnis, Sr., McGinnis, Inc., P.O. Box 534, 502 Second St. Ext., South Point, OH 45680, phone: (740) 377-4391. FERC Contact: Sergiu Serban, 202-

502-6211.

Deadline for filing comments, motions to intervene, competing applications (without notices of intent), or notices of intent to file competing applications: 60 days from the issuance of this notice. Comments, motions to intervene, notices of intent, and competing applications may be filed electronically via the Internet. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link. If unable to be filed electronically, documents may be paperfiled. To paper-file, an original and eight copies should be mailed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. For more information on how to submit these types of filings please go to the Commission's Web site located at

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. OR09-16-000]

Tesoro Refining and Marketing Company Complainant v. SFPP L.P., **Respondent; Notice of Complaint**

July 2, 2009.

Take notice that on June 30, 2009, Tesoro Refining and Marketing Company (Tesoro) filed a formal complaint against SFPP L.P. (SFPP) pursuant to Rule 206 of the Rules of Practice and Procedure of the Federal Energy Regulatory Commission, 18 CFR 385.206; the Procedural Rules Applicable to Oil Pipeline Proceedings, 18 CFR 343.2; sections 1(5), 8, 9, 13, 15 and 16 of the Interstate Commerce Act (ICA), 49 U.S.C. App. §§ 1(5), 8, 9, 13, 15 and 16 (1984) and section 1803 of the Energy Policy Act of 1992 (EPAct).

Tesoro alleges that SFPP has overstated its cost of service in the 2007 and 2008 Form 6 filed with the Commission. Tesoro requests that the Commission determine that the cost of service methodology employed by SFPP L.P. in the 2007 and 2008 From 6s improperly characterize SFPP's cost of service, resulting in unjust and unreasonable rates, thereby violating sections 1(4) and 1(5) of the ICA and section 343.2(c)(1) of the Commission's regulations.

Tesoro certifies the copies of the complaint were served on the contacts for SFPP as listed on the Commission's list of Corporate Officials.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to

the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. The Respondent's answer and all interventions or protests must be filed on or before the comment date. The Respondent's answer, motions to intervene, and protests must be served on the Complainants.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the "eFiling" link at http://www.ferc.gov. Persons unable to file electronically should submit an original and 14 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

This filing is accessible on-line at http://www.ferc.gov, using the "eLibrary" link and is available for review in the Commission's Public Reference Room in Washington, DC. There is an "eSubscription" link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please e-mail FERCOnlineSupport@ferc.gov, or call (866) 208-3676 (toll free). For TTY, call (202) 502-8659.

Comment Date: 5 p.m. Eastern Time on July 20, 2009.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. OR09-18-000]

Tesoro Refining and Marketing Company, Complainant v. SFPP L.P., **Respondent: Notice of Complaint**

July 2, 2009.

Take notice that on July 1, 2009, Tesoro Refining and Marketing Company (Tesoro) filed a formal complaint against SFPP L.P. (SFPP) pursuant to Rule 206 of the Rules of Practice and Procedure of the Federal Energy Regulatory Commission, 18 CFR 385.206; the Procedural Rules Applicable to Oil Pipeline Proceedings, 18 CFR 343.2; sections 1(5), 8, 9, 13, 15 and 16 of the Interstate Commerce Act (ICA), 49 U.S.C. App. §§ 1(5), 8, 9, 13, 15 and 16 (1984) and section 1803 of the Energy Policy Act of 1992 (EPAct).

Tesoro alleges that SFPP was overrecovering its cost of service in 2007

and 2008 and, therefore, was not entitled to increase its rates using the indexation methodology in 2008 and is not entitled to do so in 2009. Among other things, Tesoro requests that the Commission determine that the rates established by SFPP are unjust and unreasonable.

Tesoro certifies that copies of the complaint were served on the contacts for SFPP as listed on the Commission's list of Corporate Officials.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. The Respondent's answer and all interventions, or protests must be filed on or before the comment date. The Respondent's answer, motions to intervene, and protests must be served on the Complainants.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the "eFiling" link at http://www.ferc.gov. Persons unable to file electronically should submit an original and 14 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

Federal Energy Regulatory Commission

[Docket No. EL09-62-000]

Calpine Corporation, Citigroup Energy Inc., Dynegy Power Marketing, Inc., J.P. Morgan Ventures Energy Corporation, BE CA LLC, Mirant Energy Trading, LLC, NRG Energy, Inc., Powerex Corporation, and RRI Energy, Inc., Complainants v. California Independent System Operator Corporation, Respondent.; Notice of Complaint

July 2, 2009.

Take notice that on June 30, 2009, Calpine Corporation, Citigroup Energy Inc., Dynegy Power Marketing, Inc., J.P. Morgan Ventures Energy Corporation, BE CA, LLC, Mirant Energy Trading, LLC, NRG Energy, Inc., Powerex Corporation, and RRI Energy, Inc., (Complainants) filed a formal complaint against the California Independent **System Operator Corporation** (Respondent) pursuant to section 206 of the Federal Power Act, alleging that section 11.29.17.1 of Respondent's Market Redesign and Technology Upgrade Tariff is unjust and unreasonable and unduly discriminatory.

The Complainants certify that copies of the complaint were served on the contacts for Respondent as listed on the Commission's list of Corporate Officials.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. The Respondent's answer and all interventions, or protests must be filed on or before the comment date. The Respondent's answer, motions to intervene, and protests must be served on the Complainants.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the "eFiling" link at http://www.ferc.gov. Persons unable to file electronically should submit an original and 14 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

This filing is accessible on-line at http://www.ferc.gov, using the

"eLibrary" link and is available for review in the Commission's Public Reference Room in Washington, DC. There is an "eSubscription" link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please e-mail FERCOnlineSupport@ferc.gov, or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Comment Date: 5 p.m. Eastern Time on July 20, 2009.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. OR09-14-000]

Tesoro Refining and Marketing Company, Complainant v. Calnev Pipe Line, LLC, Respondent; Notice of Complaint

July 2, 2009.

Take notice that on June 30, 2009, Tesoro Refining and Marketing Company (Tesoro) filed a formal complaint against Calnev Pipe Line, LLC (Calnev) pursuant to Rule 206 of the Rules of Practice and Procedure of the Federal Energy Regulatory Commission, 18 CFR 385.206; the Procedural Rules Applicable to Oil Pipeline Proceedings, 18 CFR 343.2, sections 1(5), 8, 9, 13, 15, and 16 of the Interstate Commerce Act (ICA), 49 U.S.C. App. §§ 1(5), 8, 9, 13, 15 and 16 (1984); and section 1803 of the Energy Policy Act of 1992 (EPAct).

Tesoro alleges that Calnev has overstated its cost of service in the 2007 and 2008 Form 6 filed with the Commission. Tesoro requests that the Commission determine that the cost of service methodology employed by Calnev in the 2007 and 2008 Form 6s improperly characterized Calnev's cost of service, resulting in unjust and unreasonable rates, thereby violating sections 1(4) and 1(5) of the ICA and section 343.2(c)(1) of the Commission's regulations.

Tesoro certifies that copies of the complaint were served on the contacts for Calnev as listed on the Commission's list of Corporate Officials.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. The Respondent's answer and all interventions, or protests must be filed on or before the comment date. The Respondent's answer, motions to intervene, and protests must be served on the Complainants.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the "eFiling" link at http://www.ferc.gov. Persons unable to file electronically should submit an original and 14 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

This filing is accessible on-line at http://www.ferc.gov, using the "eLibrary" link, and is available for review in the Commission's Public Reference Room in Washington, DC. There is an "eSubscription" link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please e-mail FERCOnlineSupport@ferc.gov, or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Comment Date: 5 p.m. Eastern Time on July 20, 2009.

[Docket No. ER09-1351-000]

EPLP Energy Services, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

July 6, 2009.

This is a supplemental notice in the above-referenced proceeding of EPLP Energy Services, LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR Part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC, 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR Part 34, of future issuances of securities and assumptions of liability, is July 27, 2009.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at http://www.ferc.gov. To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 14 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First St. NE., Washington, DC, 20426.

The filings in the above-referenced proceeding are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list.

They are also available for review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed dockets(s). For assistance with any FERC Online service, please e-mail FERCOnlineSupport@ferc.gov. or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

[Docket No. CP09-437-000]

Columbia Gas Transmission, LLC; Notice of Request Under Blanket Authorization

July 2, 2009.

Take notice that on June 19, 2009, Columbia Gas Transmission, LLC (Columbia), 5151 San Felipe, Suite 2500, Houston, Texas 77056, filed in Docket No. CP09-437-000, an application pursuant to sections 157.205, 157.208(b) and 157.216(b) of the Commission's Regulations under the Natural Gas Act (NGA) as amended, to construct, replace, relocate, and abandon certain natural gas facilities at the Cobb compressor station system near Clendenin, Kanawha County, West Virginia, under Columbia's blanket certificate issued in Docket No. CP83-76-000,1 all as more fully set forth in the application which is on file with the Commission and open to the public for

Columbia proposes to construct and operate one 4,500 horsepower compressor unit at Columbia's Cobb compressor station. Columbia states that it would construct and operate approximately 0.7 miles of 16-inch diameter pipeline and appurtenances which would replace approximately 0.68 miles of 10-inch and 16-inch diameter pipeline in three segments on Columbia's Lines N and S, both in Kanawha County, Columbia also states that it would make minor modifications to its existing receipt point from Caraline Energy and construct an additional new receipt point for Caraline Energy. Columbia further states that the proposed new facilities and modifications would cost an estimated \$16,100,000 to construct.

Any questions concerning this application may be directed to Fredric J. George, Senior Counsel, Columbia Gas Transmission, LLC, P.O. Box 1273,

Charleston, West Virginia 25325–1273 or via telephone at (304) 357–2359 or by facsimile (304) 357–3206.

This filing is available for review at the Commission or may be viewed on the Commission's Web site at http://www.ferc.gov, using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number filed to access the document. For assistance, please contact FERC Online Support at FERC

OnlineSupport@ferc.gov or call toll-free at (866) 206–3676, or, for TTY, contact (202) 502–8659. Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link. The Commission strongly encourages intervenors to file electronically.

Any person or the Commission's staff may, within 60 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to section 157.205 of the regulations under the NGA (18 CFR 157.205), a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the allowed time for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the NGA.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-8929-5; EPA-HQ-OEI-2008-0062]

Type of Action: New; Establishment of a New System of Records for the Science Advisory Board (SAB) Database of Scientific and Technical Experts

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Pursuant to the provisions of the Privacy Act of 1974 (5 U.S.C. 552a), the Office of the Administrator, SAB Staff Office is giving notice that it proposes to create a new system of

¹ 22 FERC ¶ 62,029 (1983).

records for the SAB Database of Scientific and Technical Experts.

DATES: Persons wishing to comment on this system of records notice must do so by August 24, 2009.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-HQ-2008-0062, by one of the following methods:

- http://www.regulations.gov: Follow the online instructions for submitting comments.
 - E-mail: oei.docket@epa.gov.
 - Fax: 202-566-1752.
- Mail: OEI Docket, Environmental Protection Agency, Mailcode: 2822T, 1200 Pennsylvania Ave., NW., Washington, DC 20460.
- Hand Delivery: OEI Docket, EPA/DC, EPA West Building, Room 3334, 1301 Constitution Ave., NW., Washington, DC. Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID No. EPA-HQ-OEI-2008-0062. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at http:// www.regulations.gov, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information for which disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through http:// www.regulations.gov. The http:// www.regulations.gov Web site is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through http:// www.regulations.gov your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA's public docket visit the EPA

Docket Center homepage at http://www.epa.gov/epahome/dockets.htm.

Docket: All documents in the docket are listed in the http:// www.regulations.gov index. Although listed in the index, some information is not publicly available, e.g., CBI or other information for which disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in http:// www.regulations.gov or in hard copy at the OEI Docket, EPA/DC, EPA West Building, Room 3334, 1301 Constitution Ave., NW., Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday excluding legal holidays. The telephone number for the Public Reading Room is (202) 566-1744, and the telephone number for the OEI Docket is (202) 566-1745.

FOR FURTHER INFORMATION CONTACT: $\mathrm{Dr.}$

Angela Nugent, Special Assistant to the Director, SAB Staff Office, U.S. Environmental Protection Agency, Mail Code 1400F, 1200 Pennsylvania Avenue, NW., Washington, DC 20460; telephone number (202) 343–9981; e-mail address: nugent.angela@epa.gov. SUPPLEMENTARY INFORMATION:

- - 1- - - -

I. General Information

The U.S. Environmental Protection Agency plans to create a Privacy Act system of records to centralize, standardize and safeguard the information submitted by experts who support three scientific and technical advisory committees (i.e., the Science Advisory Board, the Clean Air Scientific Advisory Committee, and the Advisory Council on Clean Air Compliance Analysis) that report to EPA's Administrator. The SAB Staff Office: (1) Requests nominations from the public for qualified individuals to serve as experts on committees and panels that advise the Administrator; (2) identifies experts to become Special Government Employees (SGEs) to serve on the advisory committees and panels; (3) manages the SGEs' personnel paperwork and ensures that SGEs comply with ethics training and financial disclosure requirements of the Ethics in Government Act, 5 U.S.C. App. 4; and (4) coordinates experts' participation in approximately fifty advisory projects per year and approximately eighty meetings per year. The SAB Staff Office conducts these activities to provide the Administrator with scientific advice from balanced committees of qualified experts on high priority science issues.

To manage the above activities in an efficient manner that protects the privacy of the scientific experts, the SAB Staff Office has integrated personal information provided by the experts in a central SAB Database. Consolidating information about individual experts in a central location allows for consistent procedures to be followed for protecting privacy-related information necessary to manage and support the advisory committees for which the SAB Staff Office is responsible.

Records in the SAB Database of Scientific and Technical Experts are safeguarded from unauthorized use. Only SAB Staff Office personnel and a very limited number of database support contractors have access to consolidated personal information in the passwordprotected SAB databases. Some generally available information such as experts' institutional affiliation and biographical sketches are accessible via the EPA SAB Web site (http:// www.epa.gov/sab). Security procedures have been approved through the **Application Development Process** administered by EPA's Office of Environmental Information.

The system is maintained at the U.S. EPA, 1025 F Street, NW., Suite 3600, Mail Code 1400F, Washington, DC 20004.

Dated: June 22, 2009.

Linda A. Travers,

Acting Assistant Administrator and Chief Information Officer.

EPA-58

SYSTEM NAME:

EPA Science Advisory Board (SAB) Database of Scientific and Technical Experts.

SYSTEM LOCATION:

U.S. EPA, 1025 F Street, NW., Suite 3600, Mail Code 1400F, Washington, DC 20004.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Scientific and technical experts currently serving on committees and panels administered by the SAB Staff Office; scientific and technical experts who have served on such committees and panels since 2002; and scientific and technical experts nominated to serve on planned SAB Staff Office-supported committees and panels.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, home contact information (address and telephone number); professional contact information (e.g., professional title, institutional affiliation, and work contact information); terms of appointment to

advisory committees and panels; expertise information (e.g., curricula vitae and professional biographical sketches); and administrative history information (e.g., history of personnel actions, confidential financial disclosure forms, and annual ethics training).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM (INCLUDES ANY REVISIONS OR AMENDMENTS):

The authority for the establishment or appointment of these advisory committees is as follows: For the SAB, the Environmental Research, Development, and Demonstration Authorization Act, 42 U.S.C. 4365; for the Clean Air Scientific Advisory Committee, section 109(d)(2) of the Clean Air Act, 42 U.S.C. 7409(d)(2); and for the Advisory Council on Clean Air Compliance Analysis, section 312(f) of the Clean Air Act, 42 U.S.C. 7612(f).

PURPOSE(S):

This system of records is being created to assist EPA with providing management and technical support to three scientific and technical advisory committees (the SAB, the Clean Air Scientific Advisory Committee, and the Advisory Council on Clean Air Compliance Analysis) that report to the EPA Administrator. The SAB Staff Office requests nominations of experts from the public wishing to nominate themselves or others for committees and panels providing advice; identifies experts to become Special Government Employees (SGEs) serving on advisory committees and panels; manages their personnel paperwork; ensures that SGEs comply with ethics training and financial disclosure requirements of the Ethics in Government Act; and coordinates experts' participation in approximately fifty advisory projects per year and approximately eighty meetings per year. The SAB Staff Office conducts these activities to provide the EPA Administrator with scientific advice from balanced committees of qualified experts on high priority science issues. The SAB Database of Scientific and Technical Experts assists the SAB Staff Office to achieve this goal in an efficient manner that protects the privacy of scientific experts.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS, AND THE PURPOSES OF SUCH USES:

General routine uses A, B, C, E, F, G, H, I, J, K and L apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE

Records will be maintained in electronic form and stored in the password-protected SAB database on EPA's client server in Research Triangle Park.

RETRIEVABILITY:

Personally-identifiable information is retrieved by expert's name or by committee or panel name.

SAFEGUARDS:

Only SAB Staff Office personnel and a very limited set of database support contractors have access to consolidated personal information in the password-protected SAB database. Security procedures have been approved through the Application Development Process administered by EPA's Office of Environmental Information. Personnel have taken security awareness training.

RETENTION AND DISPOSAL:

File is cumulative and is maintained indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Dr. Anthony Maciorowski, Deputy Director, SAB Staff Office, U.S. Environmental Protection Agency, Mail Code 1400F, 1200 Pennsylvania Avenue, NW., Washington, DC 20460.

NOTIFICATION PROCEDURES:

Any individual who wants to know whether this system of records contains a record about him or her, who wants access to his or her record, or who wants to contest the contents of a record, should make a written request to the Freedom of Information Office, Attention: Privacy Act Officer. Complete EPA Privacy Act procedures are set out at 40 CFR part 16.

RECORD ACCESS PROCEDURES:

Requesters will be required to provide adequate identification, such as a driver's license, employee identification card, or other identifying document.

CONTESTING RECORDS PROCEDURES:

Requests for correction or amendment must identify the record to be changed and the corrective action sought. Complete EPA Privacy Act procedures are set out at 40 CFR part 16.

RECORD SOURCE CATEGORIES:

Individuals who are scientific and/or technical experts.

SYSTEM EXEMPTED FROM CERTAIN PROVISIONS OF THE PRIVACY ACT:

None

| South following the shore to the extent of navigation of Rockland Harbor and the mouth of the Unnamed stream in Rockland. | 69°4′23.79″ W | 44°11′11.35″ N | 69°6′11.65″ W | 44°4′41.42″ N |
| East following the shore to "Owls Head" in the town of Owls Head | 69°6′11.65″ W | 44°4′41.42″ N | 69°2'36.46" W | 44°5′30.58″ N |
| East in a straight line across the water to USGC navigational green can "7". | 69°2′36.46″ W | 44°5′30.58″ N | 69°2′30.06″ W | 44°5′24.95″ N |
| North in a straight line across the water to USCG navigational aid red and white bell "CH". | 69°2′30.06″ W | 44°5′24.95″ N | 69°2′16.1″ W | 44°12′40.98″ N |

The boundaries were chosen based on easy line-of-sight locations and generally represent all navigational waters. The area includes the municipal waters of Camden, Rockport, Rockland and portions of Owls Head.

There are marinas, yacht clubs and public landings/piers in the proposed area with a combination of mooring fields and dock space for the recreational and commercial vessels. Maine has certified that there are six pumpout facilities within the proposed area available to the boating public and the facilities are connected to the municipal sewage system. A list of the

facilities, locations, contact information, hours of operation, and water depth is provided at the end of this petition.

Maine has provided documentation indicating that the total vessel population is estimated to be 1151 in the proposed area. It is estimated that 813 of the total vessel population may have a Marine Sanitation Device (MSD) of some type.

The proposed area is identified as a High Value Wildlife Habitat by the U. S. Fish and Wildlife Service. The area constitutes almost 17 square miles of marine habitat, 450 acres of wetlands, and essential habitat for bald eagles. The area is adjacent to and bordered by several State parks including the Clam Cove Scenic Area, and the Owls Head Regional Recreation Area. There is one large marina, a yacht club and public boating facilities in Camden, and a boatyard and a large City owned park and dock in Rockland, and three large marinas, two boat repair facilities, working fishing wharfs and a city waterfront operation, together serving roughly 1151 boats. This area is a popular destination for boaters due to its natural environmental diversity and would benefit from a No Discharge Area.

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Submitted to the Office of Management and Budget for Review and Approval, Comments Requested

July 6, 2009.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act (PRA) of 1995, 44 U.S.C. 3501-3520. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the . Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Written Paperwork Reduction Act (PRA) comments should be submitted on or before August 12, 2009. If you anticipate that you will be submitting PRA comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the FCC contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicholas A. Fraser, Office of Management and Budget, via fax at 202–395–5167 or via Internet at Nicholas_A._Fraser@omb.eop.gov and to Judith-B.Herman@fcc.gov, Federal Communications Commission, or an email to PRA@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information, contact Judith B. Herman at 202–418–0214 or via the Internet at *Judith-B.Herman@fcc.gov*.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0168. Title: Section 43.43, Report of Proposed Changes in Depreciation Rates.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other forprofit.

Number of Respondents: 24 respondents; 24 responses.

Estimated Time per Response: 250 hours.

Frequency of Response: On occasion reporting requirement and recordkeeping requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 151, 152, 154, 161, 201–205, and 218–220.

Total Annual Burden: 6,000 hours. Total Annual Cost: \$784,320. Privacy Act Impact Assessment: N/A.

Nature and Extent of Confidentiality: There is no need for confidentiality and respondents are not being asked to submit confidential information to the Commission. However, if the Commission requests respondents to submit information which they believe is confidential, respondents may request confidential treatment of such information under 47 CFR 0.459 of the Commission's rules.

Needs and Uses: The Commission will submit this information collection to the Office of Management and Budget (OMB) after this 60 day comment period in order to obtain the full three year clearance from them. The Commission is requesting an extension (no change in the reporting and/or recordkeeping requirements) of this information collection. The Commission is reporting a significant decrease in the estimated number of respondents/responses since

this was last submitted to OMB in 2006. In 2006, the Commission reported 10 respondents/responses with 6,000 total annual burden hours. For this submission to the OMB, the number of respondents/responses increased to 24 with an estimated annual burden of 6,000 total annual burden hours and an increase in annual costs. The annual costs are now estimated to be \$785,320 (no costs were estimated in 2006). The reasons for the change in burden are thus:

- (1) The estimated time per response was changed from 6,000 hours to 250 hours;
- (2) A re-estimate of the number of respondents/responses from 10 to 24 respondents; and
- (3) The annual costs have been added to include a \$32,680 filing fee per 47 CFR 1.1105.

43.43 establishes the reporting requirements for depreciation prescription purposes. Communication common carriers with annual operating revenues of \$138 million or more that the Commission has found to be dominant must file information specified in Section 43.43 before making any change in the depreciation rates applicable to their operating plant. Section 220 also allows the Commission, in its discretion, to prescribe the form of any and all accounts, records, and memoranda to be kept by carriers subject to the Act, including the accounts, records and memoranda of the movement of traffic, as well as receipts and expenditures of moneys. Carriers are required to file four summary exhibits along with the underlying data used to generate them, and must provide the depreciation factors (i.e., life, salvage, curve shape, depreciation reserve) required to verify the calculation of the carrier's depreciation expenses and rates. Midsized carriers are no longer required to file theoretical reserve studies. Certain price cap incumbent LECs in certain instances may request a waiver of the depreciation prescription process.

Marlene H. Dortch,

Secretary,

Federal Communications Commission. [FR Doc. E9–16483 Filed 7–10–09; 8:45 am] BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission, Comments Requested

June 30, 2009.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act (PRA) of 1995, 44 U.S.C. 3501-3520. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Written Paperwork Reduction Act (PRA) comments should be submitted on or before September 11, 2009. If you anticipate that you will be submitting PRA comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the FCC contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicholas A. Fraser, Office of Management and Budget, via fax at 202–395–5167 or via Internet at Nicholas_A. Fraser@omb.eop.gov and to Judith-B.Herman@fcc.gov, Federal Communications Commission, or an e-mail to PRA@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information, contact Judith B. Herman at 202–418–0214 or via the Internet at *Judith-B.Herman@fcc.gov*.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–1031. Title: Commission's Initiative to Implement Enhanced 911 (E911) Emergency Services.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other forprofit; not-for-profit institutions; Federal Government; and State, local or tribal government.

Number of Respondents: 858 respondents; 1,992 responses.

Estimated Time per Response: 2–4 hours per requirement.

Frequency of Response: On occasion and one time reporting requirement, recordkeeping requirement and third party disclosure requirement.

Obligation to Respond: Voluntary. Statutory authority for this information collection is contained in 47 U.S.C. 154, 160, 201, 251–254, 303 and 332 unless otherwise noted.

Total Annual Burden: 10,168 hours. Total Annual Cost: N/A.

Privacy Act Impact Assessment: N/A. Needs and Uses: The Commission will submit this information collection to the Office of Management and Budget (OMB) after this 60-day comment period in order to obtain the full three-year clearance from them. The Commission is requesting an extension (no change in the reporting, recordkeeping and/or third party certification and notification requirements) of this information collection. There is a change in the estimated respondents/responses and the annual burden hours. The Commission is reporting 834 more responses. Therefore, the total annual burden hour estimate has increased by 3,592 hours. These adjusted increases reflect more accurate estimates.

Pursuant to the Commission's E911 rules, a wireless carrier must provide E911 service to a particular Public Safety Answering Point (PSAP) within six months if that PSAP makes a request for the service and is capable of receiving and utilizing the information provided. In the City of Richardson Order, the Commission adopted rules clarifying what constitutes a valid PSAP request so as to trigger a wireless carrier's obligation to provide service to a PSAP within six months.

In November 2002, the Commission released the City of Richardson Order on Reconsideration, modifying its E911 rules to provide additional clarification on the issue of PSAP readiness. The Commission's actions were intended to facilitate the E911 implementation process by encouraging parties to communicate with each other early in the implementation process, and to maintain a constructive, on-going dialog throughout the implementation process.

The Order contained three information collection requirements subject to the Paperwork Reduction Act for which the Commission seeks continued OMB approval:

(a) The Commission established a procedure whereby wireless carriers that have completed all necessary steps toward E911 implementation that are not dependent on PSAP readiness may have their compliance obligation temporarily tolled, if the PSAP is not ready to receive the information at the end of the six-month period, and the carrier files a certification to that effect with the Commission.

(b) As part of the certification and notification process (third party disclosure requirements), a carrier must notify the PSAP of its intent to file a certification with the Commission that the PSAP is not ready to receive and use the information. The PSAP is permitted to send a response to the carriers' notification to affirm that it is not ready to receive E911 information or to challenge the carrier's characterization of its state of readiness. Carriers are required to include any response they receive from the PSAP to their certification filing to the Commission.

(c) The Commission clarified that nothing in its rules prevented wireless carriers and PSAPs from mutually agreeing to an E911 deployment schedule at variance with the schedule contained in the Commission's rules. Carriers and PSAPs may choose to participate in the certification and private negotiation process. The Commission does not require participation.

The Commission will use the certification filings from wireless carriers to determine each carrier's compliance with its E911 obligations. The Commission will review carrier certifications to ensure that carriers have sufficiently explained the basis for their conclusion that a particular PSAP will not be ready and have identified all of the specific steps the PSAP has taken to provide the requested service. The Commission retains the discretion to investigate a carrier's certification and take enforcement action if appropriate.

The requirement that carriers notify affected PSAPs in writing, of their challenge, including a copy of the certification, will afford PSAPs an opportunity to review proposed certifications and present their respective views about their readiness to receive and use E911 information to the carrier and the Commission. The Commission will review the PSAP responses to determine whether there are any PSAP objections to particular certification filings. The clarification regarding mutually agreed upon alternative implementation schedules necessarily entails a third-party contact

information burden. However, the affected entities will receive the benefit of being able to adopt an E911 implementation schedule best suited to the specific circumstances.

Federal Communications Commission.

Marlene H. Dortch,

Secretary.

FEDERAL COMMUNICATIONS COMMISSION

[DA 09-1487]

Commencement of Digital Licensing for Low Power Television and TV Translators Beginning August 25, 2009 for Rural Areas and January 25, 2010 Nationwide

AGENCY: Federal Communications

Commission. **ACTION:** Notice.

SUMMARY: In this document, the Video Division of the Media Bureau announces that it will permit the filing of applications for new digital-only LPTV and TV translator stations, for major changes to existing analog and digital LPTV and TV translator facilities in those areas, and, in the case of incumbent analog stations, for digital companion channels on August 25, 2009 in rural areas and January 25, 2010 nationwide. No applications for new analog facilities will be accepted.

DATES: Applications will begin to be

accepted August 25, 2009, subject to a geographic restriction, and without geographic restriction on January 25, 2010.

FOR FURTHER INFORMATION CONTACT:

Shaun Maher (legal) or Hossein Hashemzadeh (technical) of the Video Division, Media Bureau, at (202) 418– 1600.

SUPPLEMENTARY INFORMATION: Beginning August 25, 2009, all interested parties including incumbent LPTV and TV translator stations, may begin filing applications for new digital-only LPTV and TV translator stations, for major changes to existing analog and digital facilities and, in the case of incumbent analog stations, for digital companion channels, where such applications specify transmitting antenna site coordinates (geographic latitude and longitude) located more than 121 kilometers (75 miles) from the reference coordinates of the cities listed in 47 CFR 76.53 of the Commission's Rules. These applications will be filed on a firstcome, first-served basis and will be "cut-off" daily.

Beginning January 25, 2010, all interested parties, including incumbent LPTV and TV translator stations, may begin filing applications for new digital-only LPTV and TV translator stations, for major changes to existing analog and digital LPTV and TV translator stations, and, in the case of incumbent analog stations, for digital companion channels without geographic restriction. Such applications will be filed on a first-come, first-served basis and will be "cut-off" daily.

All applications for new digital-only LPTV and TV translator stations or for major changes to existing digital or analog LPTV and TV translator stations are subject to a \$705.00 filing fee. There is no application filing fee for the submission of flash-cut or digital companion channel applications or for applications for replacement digital translator stations as these applications are for minor changes. Applicants must file their applications electronically using FCC Form 346. Paper-filed applications will not be accepted. Instructions for use of the electronic filing system are available in the CDBS User's Guide, which can be accessed from the electronic filing Web site at: http://www.fcc.gov/mb/cdbs.html. For assistance with electronic filing, call the Media Bureau Help Desk at (202) 418-26MB (418–2662). Additional important reminders concerning the filing of applications were included in the Public Notice.

Paperwork Reduction Act Approval: The FCC Form 346 was assigned control number 3060–0016 and was approved by the Office of Management and Budget (OMB) on March 27, 2008.

Federal Communications Commission.

Chief, Video Division, Media Bureau. [FR Doc. E9–16485 Filed 7–10–09; 8:45 am] BILLING CODE 6712–01–P

FEDERAL RETIREMENT THRIFT INVESTMENT BOARD

Sunshine Act; Notice of Meeting

TIME AND DATE: 9 a.m. (Eastern Time) July 20, 2009.

PLACE: 4th Floor Conference Room, 1250 H Street, NW., Washington, DC 20005.

STATUS: Parts will be open to the public and parts closed to the public.

MATTERS TO BE CONSIDERED:

Parts Open to the Public

1. Approval of the minutes of the June 16, 2009 Board member meeting.

- 2. Thrift Savings Plan activity report by the Executive Director.
 - a. Participant Activity Report.
- b. Quarterly Investment Performance and Policy Review.
 - c. Legislative Report.
- 3. Discussion of Pending BGI/BlackRock Merger.
- 4. Quarterly Vendor Financial Reports.
 - 5. IT Modernization Plan Update.

Parts Closed to the Public

- 6. Procurement.
- 7. Proprietary Information.

FOR FURTHER INFORMATION CONTACT:

Thomas J. Trabucco, Director, Office of External Affairs, (202) 942–1640.

Dated: July 9, 2009.

BILLING CODE 6760-01-P

FEDERAL MARITIME COMMISSION

[Docket No. 09-03]

Naveena Exports, Ltd. v. Go-Trans, Inc.; Notice of Complaint and Assignment

Notice is given that a complaint has been filed with the Federal Maritime Commission ("Commission") by Naveena Exports, Ltd., hereinafter "Complainant." Complainant asserts that it is a foreign limited partnership organized under the laws of the State of Pakistan that manufactures and imports apparel goods to the United States. Complainant alleges that Respondent Go-Trans, Inc., is an Ocean Transportation Intermediary organized under the laws of the State of New York. Complainant states that between April 2008 and July 2008, Complainant used Respondent to ship apparel goods from Karachi, Pakistan to the United States for delivery to Ambition Apparel, Inc., hereinafter "Buyer." Complainant further states that Respondent released four containers of apparel to Buyer without being presented an original house bill of lading and without Complainant's consent. Complainant asserts that no payment has been received from Buyer for the shipped goods and control of the goods has been lost. Complainant contends that Respondent's actions violated the Shipping Act of 1984, as amended, by failing to establish, observe, and enforce just and reasonable regulations and practices relating to or connected with receiving, handling, storing, or delivering property. 46 U.S.C. 41102(c).

Respondent states that Complainant has agreed not to contest this Complaint in order to allow Complainant to secure the release of FMC Bond No. 18084F, in partial payment of the total damages incurred by Complainant. Complainant requests that the Commission issue an order for reparations in favor of Complainant and against Respondent, in the amount of \$342,070.80, and that the Commission grant such other, proper, and further relief, in accordance with its delegated powers, as it may deem just, proper, and equitable in the circumstances.

This proceeding has been assigned to the Office of the Administrative Law Judges. Pursuant to the Commission's Rules of Practice and Procedure, 46 CFR 502.181 (Subpart K-Shortened Procedure) Complainant has requested that its complaint be handled on an expedited basis. Under this procedure, with the consent of the parties and with the approval of the presiding officer, this proceeding may be conducted under shortened procedure without oral hearing, except that a hearing may be ordered by the presiding officer at the request of either party to the proceeding or at the presiding officer's discretion. Within 25 days of the date of service of the complaint, Respondent shall, if they consent to the shortened procedure, file with the Commission and serve on the Complainant, its answering memorandum of facts and arguments relied upon. Within 15 days after the date of service of Respondent's answering memorandum, Complainant may file with the Commission and serve on the Respondent, their reply. This will close the record for decision unless the presiding officer orders the submission of additional evidentiary material. If Respondent does not consent to this shortened procedure, the matter will be governed by 46 CFR 502.61 (Subpart E-Proceedings, Pleadings, Motions, Replies). Pursuant to the further terms of 46 CFR 502.61, the initial decision of the presiding officer in this proceeding shall be issued by July 7, 2010, and the final decision of the Commission shall be issued by November 4, 2010.

Karen V. Gregory,

Secretary.

[FR Doc. E9–16428 Filed 7–10–09; 8:45 am] BILLING CODE P

FEDERAL TRADE COMMISSION

Agency Information Collection Activities; Proposed Collection; Comment Request

AGENCY: Federal Trade Commission (FTC or Commission).

ACTION: Notice.

SUMMARY: The FTC seeks public comments on proposed information requests to depository institutions lacking federal deposit insurance. The FTC plans to use this information to help ensure that such institutions are complying with the disclosure requirements of the Federal Deposit Insurance Corporation Improvement Act (FDICIA). The FTC will consider comments before it submits a request for Office of Management and Budget (OMB) review under the Paperwork Reduction Act (PRA).

DATES: Comments must be received on or before September 14, 2009.

ADDRESSES: Interested parties are invited to submit written comments electronically or in paper form. Comments should refer to "FDICIA Compliance Monitoring: Paperwork Comment; FTC File No. P094205" to facilitate the organization of comments. Please note that your comment—including your name and your state—will be placed on the public record of this proceeding, including on the publicly accessible FTC Website, at (http://www.ftc.gov/os/publiccomments.shtm).

Because comments will be made public, they should not include any sensitive personal information, such as an individual's Social Security Number; date of birth; driver's license number or other state identification number, or foreign country equivalent; passport number; financial account number; or credit or debit card number. Comments also should not include any sensitive health information, such as medical records or other individually identifiable health information. In addition, comments should not include any "[t]rade secret or any commercial or financial information which is obtained from any person and which is privileged or confidential...," as provided in Section 6(f) of the Federal Trade Commission Act (FTC Act), 15 U.S.C. 46(f), and FTC Rule 4.10(a)(2), 16 CFR 4.10(a)(2). Comments containing material for which confidential treatment is requested must be filed in paper form, must be clearly labeled

"Confidential," and must comply with FTC Rule 4.9(c), 16 CFR 4.9(c).

Because paper mail addressed to the FTC is subject to delay due to heightened security screening, please consider submitting your comments in electronic form. Comments filed in electronic form should be submitted by using the following weblink: (https:// secure.commentworks.com/ftcfdiciacompliance) (and following the instructions on the web-based form). To ensure that the Commission considers an electronic comment, you must file it on the web-based form at the weblink (https://secure.commentworks.com/ftcfdiciacompliance). If this Notice appears at (http://www.regulations.gov/search/ index.jsp), you may also file an electronic comment through that website. The Commission will consider all comments that regulations.gov forwards to it. You may also visit the FTC Website at http://www.ftc.gov to read the Notice and the news release describing it.

A comment filed in paper form should include the "FDICIA Compliance Monitoring: Paperwork Comment; FTC File No. P094205' reference both in the text and on the envelope, and should be mailed or delivered to the following address: Federal Trade Commission, Office of the Secretary, Room H-135 (Annex J), 600 Pennsylvania Avenue, NW, Washington, DC 20580. The FTC is requesting that any comment filed in paper form be sent by courier or overnight service, if possible, because U.S. postal mail in the Washington area and at the Commission is subject to delay due to heightened security precautions.

The FTC Act and other laws the Commission administers permit the collection of public comments to consider and use in this proceeding as appropriate. The Commission will consider all timely and responsive public comments that it receives, whether filed in paper or electronic form. Comments received will be available to the public on the FTC Website, to the extent practicable, at (http://www.ftc.gov/os/ publiccomments.shtm). As a matter of discretion, the Commission makes every effort to remove home contact information for individuals from the public comments it receives before

¹ The comment must be accompanied by an explicit request for confidential treatment, including the factual and legal basis for the request, and must identify the specific portions of the comment to be withheld from the public record. The request will be granted or denied by the Commission's General Counsel, consistent with applicable law and the public interest. See FTC Rule 4.9(c), 16 CFR 4.9(c).

placing those comments on the FTC Website. More information, including routine uses permitted by the Privacy Act, may be found in the FTC's privacy policy, at (http://www.ftc.gov/ftc/privacy.shtm).

FOR FURTHER INFORMATION CONTACT:

Hampton Newsome, Attorney, 202-326-2889, Division of Enforcement, Bureau of Consumer Protection, Federal Trade Commission.

SUPPLEMENTARY INFORMATION: In 1991, Congress enacted section 43 of FDICIA (12 U.S.C. 1831t) in response to incidents affecting the safety of deposits in certain financial institutions.2 The law imposes several requirements on non-federally insured institutions. Among other things, the law (12 U.S.C. 1831t(b)) mandates that depository institutions lacking federal deposit insurance disclose to consumers, in periodic statements and advertising, that the institution does not have federal deposit insurance and that, if the institution fails, the federal government does not guarantee that depositors will get their money back. Pursuant to 12 U.S.C. 1831t(f), the Commission has authority to enforce the disclosure requirements under the FTC Act (15 U.S.C. 41 et seq.).

Until 2003, the Commission's appropriations authority prohibited the use of FTC resources to enforce those requirements.3 In 2005, the Commission sought public comment on proposed rules implementing the statutory disclosure requirements.4 In 2006, before the Commission issued a final rule, Congress passed substantial amendments to the existing requirements as part of the Financial Services Regulatory Relief Act of 2006 (FSRRA) (Pub. L. 109-351). The Commission, therefore, is currently seeking comment on proposed regulations that are consistent with the FSRRA amendments.⁵ Nevertheless, institutions lacking federal deposit insurance must comply with these statutory disclosure provisions regardless of the status of the FTC's regulations in this area.

Under existing law, all federally chartered and most state chartered depository institutions have federal deposit insurance. Federal deposit insurance provides a government

guarantee of up to \$250,000 per depositor in most cases. Pursuant to Federal Deposit Insurance Corporation and National Credit Union Administration requirements, federally insured banks and credit unions must display signs that depositors are federally insured. 6 Although most depository institutions have federal deposit insurance, there are some exceptions. For instance, there are more than a hundred and fifty state-chartered credit unions in nine states that do not have federal deposit insurance.7 The credit unions in these states generally obtain private deposit insurance in lieu of federal insurance to protect members'

Proposed Information Collection Activities

The FTC has the authority to compel production of data and information from depository institutions lacking federal deposit insurance under Section 6(b) of the FTC Act, 15 U.S.C. 46(b). The Commission intends to send information requests to depository institutions that lack federal deposit insurance. The responses will help the Commission determine whether covered entities are complying with the disclosures required by 12 U.S.C. 1831t(b). Because the number of entities affected by the Commission's requests will exceed nine, the Commission plans to seek OMB clearance under the PRA, 44 U.S.C. Ch. 35.

Under the PRA, federal agencies must obtain approval from OMB for each collection of information they conduct or sponsor. "Collection of information" means agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. 44 U.S.C. 3502(3), 5 CFR 1320.3(c). As required by section 3506(c)(2)(A) of the PRA, the FTC is providing this opportunity for public comment before requesting that OMB grant the clearance for the proposed information collection.

The FTC invites comments on: (1) whether the proposed collections of information are necessary for the proper performance of the functions of the FTC,

including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (e.g., permitting electronic submission of responses). All comments should be filed as prescribed in the ADDRESSES section above, and must be received on or before September 14,

A. Description of the Collection of Information and Proposed Use

The FTC proposes to send information requests to up to two hundred (200) depository institutions lacking federal deposit insurance in the United States ("industry members"). State-chartered credit unions lacking federal deposit insurance will likely be the recipients.8

The information requests⁹ will seek, among other things:

- A brief explanation of the steps the institution takes to comply with the requirements of 12 U.S.C. 1831t(b).
- Samples of each non-identical periodic statement of account, signature card, passbook, certificate of deposit, and share certificate that must contain the notice required by 12 U.S.C. 1831t(b)(1). None of the samples should include any individual consumer

² See Pub. L. No. 102-242, 105 Stat. 2236.

³ Making Appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies, for the Fiscal Year Ending September 30, 2004, and for Other Purposes, H.R. Conf. Rep. No. 108-401, 108th Cong., 1st Sess., at 88 (2003).

⁴ See 70 FR 12823 (Mar. 16, 2005).

⁵ See 74 FR 18043 (Mar. 13, 2009).

⁶ See 12 CFR Parts 328 and 740.

⁷ According to the U.S. Government Accountability Office, in 2003, eight states had credit unions that purchase private deposit insurance instead of federal insurance. Since that time, at least one additional state has allowed credit unions to use private deposit insurance. Other states either require federal insurance or allow private insurance but do not have any privately insured credit unions. "Federal Deposit Insurance Act: FTC Best Among Candidates to Enforce Consumer Protection Provisions," GAO-03-971 (Aug. 2003), at 7. Puerto Rican credit unions operate under a Puerto Rican government-backed deposit insurance system.

⁸ The FTC does not plan to send requests to institutions covered by the Puerto Rican government deposit insurance system.

⁹ Section 6(f) of the FTC Act, 15 U.S.C. 46(f), bars the Commission from publicly disclosing trade secrets or confidential commercial or financial information it receives from persons pursuant to, among other methods, special orders authorized by Section 6(b) of the FTC Act. Such information also would be exempt from disclosure under the Freedom of Information Act. 5 U.S.C. 552(b)(4) Moreover, under Section 21(c) of the FTC Act, 15 U.S.C. 57b-2(c), a submitter who designates a submission as confidential is entitled to 10 days' advance notice of any anticipated public disclosure by the Commission, assuming that the Commission has determined that the information does not, in fact, constitute 6(f) material. Although materials covered under one or more of these various sections are protected by stringent confidentiality constraints, the FTC Act and the Commission's rules authorize disclosure in limited circumstances (e.g., official requests by Congress, requests from other agencies for law enforcement purposes, and administrative or judicial proceedings). Even in those limited contexts, however, the Commission's rules may afford protections to the submitter, such as advance notice to seek a protective order in litigation. See 15 U.S.C. 57b-2; 16 CFR 4.9-4.11.

names, signatures, addresses, account numbers, or any other personally identifying information.

- Information (e.g. photographs) that demonstrates that the institution posts the disclosure required by 12 U.S.C. 1831t(b)(2) at each station or window where it normally receives deposits, the institution's principal place of business, and all the institution's branches where it accepts deposits or opens accounts (excluding automated teller machines and point of sale terminals).
- Ĉopies of all non-identical advertising¹⁰ issued or continued in use within the previous three months.
- Samples of the cards, forms, or other written materials the institution uses to comply with the signed acknowledgment requirements for new depositors pursuant to 12 U.S.C. 1831t(b)(3). The samples should not include any individual consumer names, signatures, addresses, account numbers, or any other personally identifying information.¹¹

The Commission will use the collected information in its efforts to ensure that the institutions are complying with the disclosures required by the 12 U.S.C. 1831t(b).¹²

B. Estimated Hours Burden

Based upon its knowledge of the industry, the staff estimates, on average, that the time required to gather, organize, format, and produce such responses will average 8 hours per information request. Thus, allowing up to 200 recipients of the information requests, total burden would be approximately 1,600 hours.

C. Estimated Cost Burden

It is difficult to calculate with precision the labor costs associated with this data production, as they entail varying compensation levels of management and/or support staff among companies of different sizes.

Managerial, legal, and clerical personnel may be involved in the information

collection process. The FTC staff has assumed, conservatively, that managerial personnel and legal counsel will handle all of the tasks involved in gathering and producing responsive information, and has applied an average hourly wage of managerial time of \$58.12/hour (4 hours per entity) and an average hourly wage of legal staff time of \$40.87/hour (4 hours per entity).13 Thus, cumulatively, estimated labor costs for the information requests will be \$79,192 ((\$58.12 x 800 hours + \$40.87 x 800 hours)). The actual cost may be lower to the extent clerical personnel handle some of the tasks.

FTC staff estimates that the capital or other non-labor costs associated with the information requests are minimal. We expect that industry members maintain most, if not all, of the requested material in the normal course of business because they must disclose the information to customers under existing law.

By direction of the Commission.

Donald S. Clark

BILLING CODE: 6750 -01-S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Toxicology Program (NTP); NTP Interagency Center for the Evaluation of Alternative Toxicological Methods (NICEATM); Independent Scientific Peer Review Panel Report: Evaluation of the Validation Status of Alternative Ocular Safety Testing Methods and Approaches: Notice of Availability and Request for Public Comments

AGENCY: National Institute of Environmental Health Sciences (NIEHS), National Institutes of Health (NIH).

ACTION: Request for comments.

SUMMARY: NICEATM, in collaboration with the Interagency Coordinating Committee on the Validation of Alternative Methods (ICCVAM), convened an independent international scientific peer review panel (hereafter, Panel) on May 19–21, 2009, to evaluate test methods and approaches with the potential to reduce and refine the use of

- animals for ocular safety testing. These evaluations included the following:
- A proposal for the routine use of topical anesthetics, systemic analgesics, and humane endpoints to avoid and minimize pain and distress during in vivo ocular irritation testing.
- The in vivo low volume eye test (LVET).
- The use of the bovine corneal opacity and permeability (BCOP), the Cytosensor Microphysiometer® (CM), the isolated chicken eye (ICE), the isolated rabbit eye (IRE), and the hen's egg test—chorioallantoic membrane (HET—CAM) test methods for identifying moderate and mild ocular irritants and substances not labeled as ocular irritants.
- Nonanimal testing strategies that use the BCOP, CM, and/or EpiOcularTM (EO) test methods to assess the eye irritation potential of antimicrobial cleaning products to determine their appropriate U.S. Environmental Protection Agency ocular hazard classification.

The Panel report from this meeting is now available. The report contains (1) The Panel's evaluation of the validation status of the test methods and testing strategies and (2) the Panel's comments on the draft ICCVAM test method recommendations. NICEATM invites public comment on the Panel report. The report is available on the NICEATM—ICCVAM Web site at http://iccvam.niehs.nih.gov/docs/ocutox_docs/OcularPRPRept2009.pdf or by contacting NICEATM at the address given below.

DATES: Written comments on the Panel report should be received by August 28, 2009.

ADDRESSES: NICEATM prefers that comments be submitted electronically by e-mail to niceatm@niehs.nih.gov.
Comments can also be submitted via the NICEATM—ICCVAM Web site at http://iccvam.niehs.nih.gov/contact/FR_pubcomment.htm. Written comments can be sent by mail or fax to Dr. William S. Stokes, Director, NICEATM, NIEHS, P.O. Box 12233, Mail Stop: K2–16, Research Triangle Park, NC 27709; (fax) 919–541–0947. Courier address: NIEHS, NICEATM, 530 Davis Drive, Room 2035, Durham, NC 27713.

FOR FURTHER INFORMATION CONTACT: Dr. William S. Stokes, (telephone) 919–541–2384, (fax) 919–541–0947 and (e-mail) niceatm@niehs.nih.gov.

SUPPLEMENTARY INFORMATION:

Background

NICEATM announced the convening of an independent scientific peer review

¹⁰ As used in these requests, the term "advertising" means any communication that the institution uses to solicit business including, but not limited to, printed materials, the institution's main internet page, radio advertisements, video advertisements disseminated via television, the Internet or any other means of online communication, and solicitations conducted via telephone.

¹¹ The requested documents should exclude any information for which prior customer authorization is required under the Right to Financial Privacy Act, 12 U.S.C. 3401, *et seq.*

¹² Although the Commission is currently in the process of developing regulations for these requirements, see 74 FR 18043 (Mar. 13, 2009), institutions lacking federal deposit insurance must comply with these statutory provisions regardless of the status of FTC's regulations in this area.

¹³ Hourly wages are averages based on mean hourly wages shown in http://www.bls.gov/oes/ 2008/may/naics4_551100.htm#b11-0000 (May 2008 "National Industry-Specific Occupational Employment and Wage Estimates") for sales and marketing managers and legal occupations (lawyers, paralegals, and other legal support), respectively.

panel to review and comment on the draft background review documents (BRDs) and summary review documents (SRDs) and draft recommendations, as well as the availability of the draft documents for public comment, in March 2009 (74 FR 14556). The Panel met in public session on May 19-21, 2009, at Consumer Product Safety Commission Headquarters in Bethesda, MD. The Panel reviewed the draft ICCVAM documents for completeness, errors, and omissions of any existing relevant data or information. The Panel then evaluated the information in the draft documents to determine the extent to which each of the applicable criteria for validation and acceptance of toxicological test methods (ICCVAM 2003) had been appropriately addressed. The Panel then considered the ICCVAM draft recommendations and commented on the extent that the recommendations were supported by the information provided in the draft BRDs or SRDs.

ICCVAM organized a 2005 symposium (70 FR 18037) on Minimizing Pain and Distress in Ocular Toxicity Testing where experts recommended that topical anesthetics and systemic analgesics should be routinely administered before in vivo ocular safety testing to avoid or minimize pain and distress that might occur during and after the initial application of test substances. The experts also recommended that systemic analgesics should routinely be administered when there are clinical signs indicative of pain or distress. The experts further recommended that humane endpoints to end a study early should be identified and used routinely. ICCVAM requested data (72 FR 26396), compiled available information on the use of topical anesthetics, systemic analgesics, and humane endpoints during in vivo ocular safety testing, and developed draft recommendations for implementing such practices.

In 2007, ICCVAM published (70 FR 66451) recommendations on the use of four in vitro test methods (BCOP, ICE, IRE, HET-CAM) for identifying ocular corrosives and severe irritants for hazard classification and labeling purposes. The ICCVAM recommendations were submitted to and accepted by ICCVAM member agencies (more information at http:// iccvam.niehs.nih.gov/methods/ocutox/ ivocutox/ocu recommend.htm). One of the ICCVAM recommendations was to consider the validation status of these four in vitro ocular test methods for identifying mild and moderate ocular irritants and substances not classified as ocular irritants. NICEATM and ICCVAM requested data (72 FR 31582), compiled

available information, prepared draft BRDs assessing their current validation status for this purpose, and developed draft recommendations for their use.

In January 2008, a BRD titled, An In Vitro Approach for EPA Labeling of Anti-Microbial Cleaning Products, was submitted to NICEATM for review. This BRD, prepared by the Institute for In Vitro Sciences in collaboration with the Alternative Testing Working Group (comprised of seven consumer product companies [Clorox, Colgate Palmolive, Dial, EcoLabs, Johnson Diversey, Procter and Gamble, and SC Johnson]), proposes a testing strategy that uses the CM® EpiOcularTM, and BCOP test methods to assess the eye irritation potential of antimicrobial cleaning products and to determine appropriate EPA ocular hazard classification categories for such products. NICEATM and ICCVAM reviewed the BRD, requested additional data and information (73 FR 18535), and compiled draft recommendations and a draft ICCVAM SRD. ICCVAM also reviewed the validation status of the LVET, which is proposed as a reference test method to partially substantiate the validity of the in vitro test methods used in the test strategy.

Availability of the Peer Panel Report

The Panel's conclusions and recommendations are detailed in the Independent Scientific Peer Review Panel Report: Evaluation of the Validation Status of Alternative Ocular Safety Testing Methods and Approaches which is available along with the draft documents reviewed by the Panel and the draft ICCVAM test method recommendations at https://iccvam.niehs.nih.gov/methods/ocutox/PeerPanel09.htm.

Request for Public Comments

NICEATM invites the submission of written comments on the Panel report. When submitting written comments, please refer to this **Federal Register** notice and include appropriate contact information (name, affiliation, mailing address, phone, fax, e-mail, and sponsoring organization, if applicable). All comments received will be made publicly available via the NICEATM-ICCVAM Web site at http:// iccvam.niehs.nih.gov/methods/ocutox/ PeerPanel09.htm. ICCVAM will consider the Panel report along with public comments and comments made by the Scientific Advisory Committee on Alternative Toxicological Methods (SACATM) at their June 25-26, 2009 meeting (74 FR 19562) when finalizing test method recommendations. Final ICCVAM recommendations will be published in ICCVAM test method

evaluation reports, which will be forwarded to relevant Federal agencies for their consideration. The evaluation reports will also be available to the public on the NICEATM-ICCVAM Web site at http://iccvam.niehs.nih.gov/methods/ocutox/ocutox.htm and by request from NICEATM (see ADDRESSES above).

Background Information on ICCVAM, NICEATM, and SACATM

ICCVAM is an interagency committee composed of representatives from 15 Federal regulatory and research agencies that use, generate, or disseminate toxicological information. ICCVAM conducts technical evaluations of new, revised, and alternative methods with regulatory applicability, and promotes the scientific validation and regulatory acceptance of toxicological test methods that more accurately assess the safety and hazards of chemicals and products and that refine, reduce, and replace animal use. The ICCVAM Authorization Act of 2000 (42 U.S.C. 285l-3) established ICCVAM as a permanent interagency committee of the NIEHS under NICEATM. NICEATM administers ICCVAM and provides scientific and operational support for ICCVAM-related activities. NICEATM and ICCVAM work collaboratively to evaluate new and improved test methods applicable to the needs of U.S. Federal agencies. Additional information about ICCVAM and NICEATM can be found on their Web site (http://iccvam.niehs.nih.gov).

SACATM was established January 9, 2002, and is composed of scientists from the public and private sectors (67 FR 11358). SACATM provides advice to the Director of the NIEHS, ICCVAM, and NICEATM regarding the statutorily mandated duties of ICCVAM and activities of NICEATM. Additional information about SACATM, including the charter, roster, and records of past meetings, can be found at http://ntp.niehs.nih.gov/see "Advisory Board & Committees" (or directly at http://ntp.niehs.nih.gov/go/167).

BILLING CODE 4140–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Proposed Collection; Comment Request

In compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 concerning opportunity for public comment on proposed collections of information, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the information collection plans, call the SAMHSA Reports Clearance Officer on (240) 276–1243.

Comments are invited on: (a) Whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the

collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Proposed Project: 2009 Survey of Revenues and Expenditures (SRE)— NEW

The Substance Abuse and Mental Health Services Administration's (SAMHSA) Center for Mental Health Services (CMHS) will conduct a 2009 SRE. This national survey represents a survey of mental health and substance abuse treatment facilities. These separate service locations are called facilities, in contrast to mental health and substance abuse organizations, which may include multiple facilities (service locations). This survey will be a sample survey of all known mental health and substance abuse treatment facilities nationwide with a particular focus on revenues and expenditures. The survey will begin with a stratified random sample of 1,500 facilities drawn from other SAMHSA databases. In addition, a control subsample of 100 facilities drawn from the original 1,500 will be drawn and pursued beyond the planned three follow-up attempts with the entire sample. The control sample will provide estimates of non-response bias upon the results of the data analyses.

The 2009 SRE will utilize one questionnaire for all mental health and substance abuse treatment facility types including hospitals, residential treatment centers and outpatient clinics. The information collected will include annual revenue and expenditures, staffing, and active caseload size. All treatment facilities will have the option of completing the survey instrument online via the Internet, by telephone with an interviewer, or using a paper version of the questionnaire.

The resulting database will be used for national estimates of facility types, their revenues and expenditures, and their patient caseloads. These findings will be used to update SAMHSA's national spending on mental health and substance abuse treatment estimates. The survey results will be published by CMHS in Data Highlights, in Mental Health, United States, and in professional journals such as *Psychiatric* Services and the American Journal of Psychiatry. The publication Mental Health, United States is used by the general public, State governments, the U.S. Congress, university researchers, and other health care professionals. The following Table summarizes the estimated response burden for the survey.

| | Number of respondents | Responses
per
respondent | Average hours per response | Total hour burden |
|----------------------|-----------------------|--------------------------------|----------------------------|-------------------|
| Treatment facilities | 1,500 | 1 | 2.5 | 3,750 |

Send comments to Summer King, SAMHSA Reports Clearance Officer, Room 7–1044, One Choke Cherry Road, Rockville, MD 20857. Written comments should be received within 60 days of this notice.

Dated: July 2, 2009.

Director, Office of Program Services. [FR Doc. E9–16459 Filed 7–10–09; 8:45 am] BILLING CODE 4162–20–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (240) 276–1243.

Proposed Project: SAMHSA Fetal Alcohol Spectrum Disorders Center for Excellence Project CHOICES Evaluation—New

Since 2001, SAMHSA's Center for Substance Abuse Prevention has been operating the SAMHSA Fetal Alcohol Spectrum Disorders (FASD) Center for Excellence. The purpose of the FASD Center for Excellence is to prevent and improve the treatment of FASD. Some of the activities of the FASD Center include providing training, technical assistance, and subcontracts to increase the use of effective evidence-based interventions.

The FASD Center will be integrating the Project CHOICES program through service delivery organizations and will be evaluating the results. Six sites will implement Project CHOICES with nonpregnant women 18–44 years who are sexually active and who are participating in alcohol treatment (residential or outpatient) or in drug treatment (if the women also use alcohol). Women in substance abuse treatment will be screened and those women that meet the above description will be provided four Motivational Interviewing (MI) sessions (related to alcohol use), plus one contraceptive counseling session. The goal is to help these women prevent an alcoholexposed pregnancy by abstaining from alcohol and using contraceptive methods of their choice consistently and correctly.

At baseline, an assessment tool will be administered by the counselor to assess drinking, sexual activity, contraceptive use, and demographic information. At the end of the program, women are assessed on their alcohol consumption and contraceptive use in the past 30 days. At 6 months and 12 months after the end of the program, women are assessed on alcohol consumption and contraceptive use using the same core assessment tool used at baseline. All participating sites will maintain personal identification on

their clients for service delivery purposes but no such information will be transmitted to SAMHSA.

The data collection is designed to evaluate the implementation of Project CHOICES by measuring whether abstinence from alcohol is achieved and effective birth control practices are performed. Furthermore, the project will include process measures to assess whether and how the intervention was provided.

ESTIMATED ANNUALIZED BURDEN HOURS

| Screening tool/activity | Number of respondents (6 sites) | Number of responses per respondent | Average
burden per
response | Total burden
hours per
collection |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------|------------------------------------|-----------------------------------|-----------------------------------------|
| Alcohol Use and Contraceptive Methods Assessment (Screening Form/Form Q) | 913 | 1 | 0.25 | 228 |
| Project CHOICES process evaluation assessing whether sessions were delivered and their duration (4 MI sessions and 1 contraception use session—Form B and C—75% of baseline) | 684 | 5 | 0.08 | 274 |
| Alcohol Use and Contraceptive Methods Assessment: End of program, 6-and 12-month followup (Forms D, E, & F—50% of baseline) | 456 | 3 | 0.25 | 342 |
| Total | 2,053 | | | 844 |

Written comments and recommendations concerning the proposed information collection should be sent by August 12, 2009 to: SAMHSA Desk Officer, Human Resources and Housing Branch, Office of Management and Budget, New Executive Office Building, Room 10235, Washington, DC 20503; due to potential delays in OMB's receipt and processing of mail sent through the U.S. Postal Service, respondents are encouraged to submit comments by fax to: 202–395–6974.

Dated: July 2, 2009.

BILLING CODE 4162–20–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Proposed Information Collection Activity; Comment Request

Proposed Projects:

Title: Child Care and Development Fund Financial Report (ACF 696) for States and Territories.

OMB No.: 0970-0163.

Description: States and Territories use the Financial Report Form ACF–696 to report Child Care and Development Fund (CCDF) expenditures. Authority to collect and report this information is found in section 658G of the Child Care and Development Block Grant Act of 1990, as revised. In addition to the Program Reporting Requirements set forth in 45 CFR part 98, Subpart H, the regulations at 45 CFR 98.65(g) and 98.67(c)(1) authorize the Secretary to require financial reports as necessary.

The form provides specific data regarding claims and provides a mechanism for States to request Child Care grant awards and to certify the availability of State matching funds. Failure to collect this data would seriously compromise ACF's ability to monitor Child Care and Development Fund expenditures. This information is also used to estimate outlays and may be used to prepare ACF budget submissions to Congress.

The American Recovery and Reinvestment Act (ARRA) of 2009, (Pub. L. 111–5) provides an additional \$2 billion for the Child Care and Development Fund to help States, Territories, and Tribes provide child care assistance to low income working families. CCDF Program Instruction (CCDF-ACF-PI–2009–03) provided guidance on ARRA spending requirements.

Section 1512 of the ARRA legislation requires recipients to report quarterly spending and performance data on the public Web site, "Recovery.gov." Federal agencies are required to collect ARRA expenditure data and performance data and these data must be clearly distinguishable from the regular CCDF (non-ARRA) funds. To ensure transparency and accountability, the ARRA authorizes Federal agencies and grantees to track and report separately on expenditures from funds made available by the stimulus bill. Office of Management and Budget (OMB) guidance implementing the ARRA legislation indicates that agencies requiring additional information for oversight should rely on existing authorities and reflect these requirements in their award terms and conditions as necessary, following existing procedures. Therefore, to capture ARRA expenditures, the ACF-696 has been modified (by the addition of a column) for reporting ARRA expenditure data. In addition, a new data element will ask States and Territories to estimate the number of child service months funded with ARRA dollars. The collection will not duplicate other information.

Respondents: States and Territories.

ANNUAL BURDEN ESTIMATES

| Instrument | Number of respondents | Number of responses per respondent | Average
burden hours
per response | Total burden hours |
|------------|-----------------------|------------------------------------|-----------------------------------------|--------------------|
| ACF-696 | 56 | 4 | 5 | 1,120. |

Estimated Total Annual Burden Hours: 1,120.

In compliance with the requirements of Section 506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Administration for Children and Families is soliciting public comment on the specific aspects of the information collection described above. Copies of the proposed collection of information can be obtained and comments may be forwarded by writing to the Administration for Children and Families, Office of Administration, Office of Information Services, 370 L'Enfant Promenade, SW., Washington, DC 20447, Attn: ACF Reports Clearance Officer. E-mail address: infocollection@acf.hhs.gov. All requests should be identified by the title of the information collection.

The Department specifically requests comments on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

Dated: July 8, 2009.

Janean Chambers,

Reports Clearance Officer.

BILLING CODE 4184–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Proposed Information Collection Activity; Comment Request

Proposed Projects:

Title: Child Care and Development Fund Annual Financial Report (ACF– 696T) for Tribes.

OMB No.: 0970-0195.

Description: Tribes use the Financial Report Form ACF–696T to report Child Care and Development Fund (CCDF) expenditures. Authority to collect and report this information is found in Section 658G of the Child Care and Development Block Grant Act of 1990, as revised. In addition to the Program Reporting Requirements set forth in 45 CFR part 98, Subpart H, the regulations at 45 CFR 98.65(g) and 98.67(c)(1) authorize the Secretary to require financial reports as necessary.

Tribal grantees submit the ACF-696T report on an annual basis on behalf of the Tribal Lead Agency administering the Child Care and Development Fund

The American Recovery and Reinvestment Act (ARRA) of 2009, (Pub. L. 111–5) provides an additional \$2 billion for the Child Care and Development Fund to help States, Territories, and Tribes provide child care assistance to low income working families. CCDF Program Instruction (CCDF-ACF-PI-2009-03) provided guidance on ARRA spending requirements.

Section 1512 of the ARRA legislation requires recipients to report quarterly spending and performance data on the public Web site, "Recovery.gov." Federal agencies are required to collect ARRA expenditure data and performance data and these data must be clearly distinguishable from the regular CCDF (non-ARRA) funds. To ensure transparency and accountability, the ARRA requires Federal agencies and grantees to track and report separately on expenditures from funds made available by the stimulus bill. Office of Management and Budget (OMB) guidance implementing the ARRA legislation indicates that agencies requiring additional information for oversight should rely on existing authorities and reflect these requirements in their award terms and conditions as necessary, following existing procedures. Therefore, to capture ARRA expenditures, the ACF-696T has been modified (by the addition of two columns) for reporting ARRA data. In addition, a new data element will ask Tribes to estimate the number of child service months funded with ARRA dollars. The collection will not duplicate other information.

Respondents: Tribes and tribal organizations that are CCDF grantees.

ANNUAL BURDEN ESTIMATES

| Instrument | Number of respondents | Number of responses per respondent | Average
burden hours
per response | Total burden
hours |
|---------------------------------------------------|-----------------------|------------------------------------|-----------------------------------------|-----------------------|
| ACF-696T CCDF Financial Reporting Form for Tribes | 232 | 1 | 8 | 1,856 |

Estimated Total Annual Burden Hours: 1,856.

In compliance with the requirements of Section 506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Administration for Children and Families is soliciting public comment on the specific aspects of the information collection described above.

Copies of the proposed collection of information can be obtained and comments may be forwarded by writing to the Administration for Children and Families, Office of Administration, Office of Information Services, 370 L'Enfant Promenade, SW., Washington, DC 20447, Attn: ACF Reports Clearance Officer. E-mail address:

infocollection@acf.hhs.gov. All requests should be identified by the title of the information collection.

The Department specifically requests comments on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have

practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

Dated: July 8, 2009.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

Notice of Hearing: Reconsideration of Disapproval of Washington State Plan Amendment (SPA) 08–019

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS. **ACTION:** Notice of hearing.

SUMMARY: This notice announces an administrative hearing to be held on August 4, 2009 at the CMS Seattle Regional Office, 2201 Sixth Avenue, MS/RX–43, Seattle, Washington 98121, to reconsider CMS' decision to disapprove Washington SPA 08–019.

Closing Date: Requests to participate in the hearing as a party must be received by the presiding officer by July 28, 2009.

FOR FURTHER INFORMATION CONTACT:

Benjamin Cohen, Presiding Officer, CMS, 2520 Lord Baltimore Drive, Suite L, Baltimore, Maryland 21244, Telephone: (410) 786–3169.

SUPPLEMENTARY INFORMATION:

This notice announces an administrative hearing to reconsider CMS' decision to disapprove Washington SPA 08–019 which was received by CMS on September 23, 2008, and disapproved on March 6, 2009. The SPA proposed to increase dispensing fees for pharmacies from \$4.20 to \$4.24 for high-volume pharmacies, \$4.51 to \$4.56 for midvolume pharmacies, \$5.20 to \$5.25 for low-volume pharmacies, and \$5.20 to \$5.25 for unit dose systems.

As submitted, SPA 08–019 has raised concerns regarding compliance with section 1902(a)(30) of the Social Security Act (the Act) and implementing regulatory requirements.

Section 1902(a)(30)(A) of the Act requires that States have methods and procedures in place to assure that payments are consistent with efficiency, economy, and quality of care. Under that authority, the Secretary has issued regulations prescribing State rate-setting procedures and requirements. Longstanding requirements (presently codified at 42 CFR 447.512 and 447.514, and previously codified at 42 CFR 447.331 and 447.332) provide that the State is responsible for demonstrating that the dispensing fees are reasonable. The State has not provided that demonstration. In addition, Federal regulations at 42 CFR 447.205 require that a State provide public notice of any significant proposed change in its methods and standards for setting payment rates for services. In support of this amendment, the State believes that issuing a memorandum to providers online meets the public requirements. We believe that this does not meet the Federal standard. We believe public notice promotes transparency and openness in this process and allows the public to be fully aware of the State's

Based on the above, and after consultation with the Secretary of the Department of Health and Human Services as required under Federal regulations at 42 CFR 430.15(c)(2), Washington SPA 08–019 was disapproved.

The following issues will be considered at the hearing:

- Whether Washington provided adequate public notice for setting payment rates for services as required at 42 CFR 447.205.
- Whether Washington met the longstanding requirement (presently codified at 42 CFR 447.512 and 447.514, and previously codified in 42 CFR 447.331 and 447.332) that the State is responsible for demonstrating that the proposed increased dispensing fees are reasonable.

Section 1116 of the Act and Federal regulations at 42 CFR Part 430, establish Department procedures that provide an administrative hearing for reconsideration of a disapproval of a State plan or plan amendment. CMS is required to publish a copy of the notice to a State Medicaid agency that informs the agency of the time and place of the hearing, and the issues to be considered. If CMS subsequently notifies the agency of additional issues that will be considered at the hearing, we will also publish that notice.

Any individual or group that wants to participate in the hearing as a party must petition the presiding officer within 15 days after publication of this notice, in accordance with the requirements contained at 42 CFR 430.76(b)(2). Any interested person or organization that wants to participate as amicus curiae must petition the presiding officer before the hearing begins in accordance with the requirements contained at 42 CFR 430.76(c). If the hearing is later rescheduled, the presiding officer will notify all participants.

The notice to the State of Washington announcing an administrative hearing to reconsider the disapproval of its SPA reads as follows:

Ms. Susan Dreyfus, Secretary, Department of Social and Health Services, P.O. Box 45010, Olympia, WA 98504–5010.

Dear Ms. Dreyfus: I am responding to your request for reconsideration of the decision to disapprove the Washington State plan amendment (SPA) 08–019, which was received by the Centers for Medicare & Medicaid Services on September 23, 2008, and disapproved on March 6, 2009. The SPA proposed to increase dispensing fees for pharmacies from \$4.20 to \$4.24 for high-volume pharmacies, \$4.51 to \$4.56 for mid-volume pharmacies, \$5.20 to \$5.25 for low-volume pharmacies, and \$5.20 to \$5.25 for unit dose systems.

The following issues will be considered at the hearing:

- Whether Washington provided adequate public notice for setting payment rates for services as required at 42 CFR 447.205.
- Whether Washington met the longstanding requirement (presently codified at 42 CFR 447.512 and 447.514, and previously codified in 42 CFR 447.331 and 447.332) that the State is responsible for demonstrating that the proposed increased dispensing fees are reasonable.

I am scheduling a hearing on your request for reconsideration to be held on August 4, 2009, at the Centers for Medicare & Medicaid Services', Seattle Regional Office, 2201 Sixth Avenue, MS/RX-43, Seattle, Washington 98121, in order to reconsider the decision to disapprove SPA 08-019. If this date is not acceptable, we would be glad to set another date that is mutually agreeable to the parties. The hearing will be governed by the procedures prescribed by Federal regulations at 42 CFR Part 430.

I am designating Mr. Benjamin Cohen as the presiding officer. If these arrangements present any problems, please contact the presiding officer at (410) 786–3169. In order to facilitate any communication which may be necessary among the parties to the hearing, please notify the presiding officer to indicate acceptability of the hearing date that has been scheduled and provide names of the individuals who will represent the State at the hearing.

Sincerely,

Charlene Frizzera, *Acting Administrator.*

Substance Abuse and Mental Health Services Administration

Advisory Committee for Women's Services; Notice of Meeting

Pursuant to Public Law 92–463, notice is hereby given of a Web-based meeting of the Substance Abuse and Mental Health Services Administration (SAMHSA) Advisory Committee for Women's Services on July 29, 2009 from 2 p.m. to 4:30 p.m. The meeting is open to the public and will include an update on current and emerging research on women-specific substance use and mental health issues.

ACWS members and invited presenters will participate in this meeting through remote internet connection. On-site attendance by the public will be limited to space available. The meeting can also be accessed by the public via teleconference. To obtain teleconference call-in numbers and access codes, to make arrangements to attend on-site, or to request special accommodations for persons with disabilities, please communicate with Ms. Nevine Gahed, Designated Federal Official (see contact information below).

Substantive meeting information and a roster of Committee members may be obtained either by accessing the SAMHSA Committees' Web site at https://nac.samhsa.gov/WomenServices/index.aspx, or by contacting Ms. Gahed. The transcript for the meeting will also be available on the SAMHSA Committees' Web site within three weeks after the meeting.

Committee Name: SAMHSA Advisory Committee for Women's Services.

Date/Time/Type: Wednesday, July 29, 2009, from 2 p.m. to 4:30 p.m.: Open.

Place: 1 Choke Cherry Road, Sugarloaf Conference Room, Rockville, Maryland 20857.

Contact: Nevine Gahed, Designated Federal Official, SAMHSA Advisory Committee for Women's Services, 1 Choke Cherry Road, Room 8–1112, Rockville, Maryland 20857, Telephone: (240) 276–2331; FAX: (240) 276–2220 and E-mail:

nevine.gahed@samhsa.hhs.gov.

Dated: July 6, 2009.

Toian Vaughn,

Committee Management Officer, Substance Abuse and Mental Health Services Administration.

Disease, Disability, and Injury
Prevention and Control Special
Emphasis Panel (SEP): Capacity
Building Assistance (CBA) To Improve
the Delivery and Effectiveness of
Human Immunodeficiency Virus (HIV)
Prevention Services for High-Risk and/
or Racial/Ethnicity Minority
Populations, Program Announcement
Number PS09–906, Initial Review

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), the Centers for Disease Control and Prevention (CDC) announces the aforementioned meeting.

Time and Date: 8:30 a.m.–5:30 p.m., July 28, 2009 (Closed).

Place: CDC, Corporate Square Campus, 8 Corporate Boulevard, Atlanta, Georgia 30329. Status: The meeting will be closed to the public in accordance with provisions set forth in Section 552b(c) (4) and (6), Title 5 U.S.C., and the Determination of the Director, Management Analysis and Services Office,

CDC, pursuant to Public Law 92-463. Matters To Be Discussed: The meeting will include an initial review, discussion, and evaluation of applications received in response to "Capacity Building Assistance (CBA) to Improve the Delivery and Effectiveness of Human Immunodeficiency Virus (HIV) Prevention Services for High-Risk and/or Racial/Ethnicity Minority Populations, PS09-906." The meeting was initially held June 15-18, 2009. A reviewer conflict of interest was confirmed after the meeting commenced and a reviewer for another application was unable to participate due to sudden illness; therefore, the panel will be reconvened to review the affected applications.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2009-N-0284]

Food and Drug Administration Regulation and Licensure of Whole Blood and Blood Components, Including Source Plasma; Public Workshop; Request for Comments

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of public workshop; request for comments.

The Food and Drug Administration (FDA) is announcing a public workshop entitled "FDA Regulation and Licensure of Whole Blood and Blood Components, Including Source Plasma." The purpose of the workshop is to educate industry on the licensure requirements and license application procedures for Whole Blood and blood components, including Source Plasma, and request comments on this topic.

Dates and Time: The public workshop will be held on September 15, 2009, from 8 a.m. to 5:30 p.m. and September 16, 2009, from 8 a.m. to 4 p.m.

Location: The public workshop will be held at The Universities at Shady Grove Conference Center, 9630 Gudelsky Dr., Bldg. 1, Rockville, MD 20850.

Contact Person: Rhonda Dawson, Center for Biologics Evaluation and Research (HFM–302), Food and Drug Administration, 1401 Rockville Pike, suite 400N, Rockville, MD 20852–1448, 301–827–6129, FAX: 301–827–2843, email: rhonda.dawson@fda.hhs.gov.

Registration: Mail, fax, or e-mail your registration information (including name, title, firm name, address, telephone, and fax numbers) to the contact person (see Contact Person) by August 17, 2009. There is no registration fee for the public workshop. Early registration is recommended because seating is limited. Registration on the day of the public workshop will be provided on a space available basis beginning at 7:30 a.m.

If you need special accommodations due to a disability, please contact Rhonda Dawson (see *Contact Person*) at least 7 days in advance of the workshop.

Comments: All individuals wishing to submit questions to be addressed at the public workshop should submit written or electronic comments by August 17, 2009, to the Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, rm 1061, Rockville, MD 20852. Submit electronic comments to http:// www.regulations.gov. Submit a single copy of electronic comments or two paper copies of any mailed comments, except that individuals may submit one paper copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

SUPPLEMENTARY INFORMATION: FDA held a licensing workshop for blood establishments in 1995 to advise the blood and plasma industry on how to apply for a U.S. license to distribute Whole Blood and blood components, including Source Plasma, in interstate commerce. This workshop will build upon the 1995 workshop and provide regulatory updates since the last workshop. The workshop will include presentations by FDA on the following topics: (1) Requirements for licensure and applicable regulations and guidance documents for Whole Blood and blood components, including Source Plasma; (2) managed review process; (3) review criteria for various submissions; (4) blood establishment registration and product listing requirements; (5) inspections of blood establishments pending licensure and approval; and (6) requests for exceptions or use of alternative procedures to the regulations. The workshop will include a question and answer session with workshop participants.

Transcripts: Transcripts of the public workshop may be requested in writing from the Freedom of Information Office (HFI–35), Food and Drug Administration, 5600 Fishers Lane, rm. 6–30, Rockville, MD 20857, approximately 15 working days after the public workshop at a cost of 10 cents per page. A transcript of the public workshop will be available on the Internet at http://www.fda.gov/cber/minutes/workshop-min.htm.

Dated: July 7, 2009.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Advisory Committee on Immunization Practices (ACIP)

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), the Centers for Disease Control and Prevention (CDC), announces the following meeting of the aforementioned committee:

Time and Date: 8 a.m.-4 p.m., July 29, 2009.

Place: CDC, Tom Harkin Global Communications Center, 1600 Clifton Road, NE., Building 19, Kent "Oz" Nelson Auditorium, Atlanta, Georgia 30333.

Status: Open to the public, limited only by the space available.

Purpose: The committee is charged with advising the Director, CDC, on the appropriate uses of immunizing agents. In addition, under 42 U.S.C. Section 1396s, the committee is mandated to establish and periodically review and, as appropriate, revise the list of vaccines for administration to vaccine-eligible children through the Vaccines for Children program, along with schedules regarding the appropriate periodicity, dosage, and contraindications applicable to the vaccines.

Matters To Be Discussed: The agenda will include discussions related to recommendations for use of influenza vaccines in the prevention and control of novel (pandemic) influenza A (H1N1); novel H1N1 epidemiology in the United States; novel H1N epidemiology, international settings; modeling novel H1N1 influenza impact and impact of vaccination; implementation planning; vaccine development and formulation; and the Food and Drug Administration/Vaccines and Related Biological Products Advisory Committee update. Agenda items are subject to change as priorities dictate.

Contact Person for More Information: Antonette Hill, Immunization Services Division, National Center for Immunization and Respiratory Diseases, CDC, 1600 Clifton Road, NE., Mailstop E–05, Atlanta, Georgia 30333, Telephone: (404) 639–8836, Fax: (404) 639–8905.

The Director, Management Analysis and Services Office, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities for both the CDC and Agency for Toxic Substances and Disease Registry.

Dated: July 6, 2009.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration [Docket No. FDA-2009-N-0664]

Orthopaedic and Rehabilitation Devices Panel of the Medical Devices Advisory Committee; Notice of Meeting

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

This notice announces a forthcoming meeting of a public advisory committee of the Food and Drug Administration (FDA). The meeting will be open to the public.

Name of Committee: Orthopaedic and Rehabilitation Devices Panel of the Medical Devices Advisory Committee.

General Function of the Committee: To provide advice and recommendations to the agency on FDA's regulatory issues.

Date and Time: The meeting will be held on August 18 and 19, 2009, from 8 a.m. to 5 p.m.

Location: Hilton Washington DC North/Gaithersburg, Salons A, B and C, 620 Perry Pkwy., Gaithersburg, MD.

Contact Person: Ronald P. Jean, Center for Devices and Radiological Health (HFZ-410), Food and Drug Administration, 9200 Corporate Blvd., Rockville, MD, 20850, 240-276-3676, or FDA Advisory Committee Information Line, 1-800-741-8138 (301-443-0572 in the Washington, DC area), code 3014512521. Please call the Information Line for up-to-date information on this meeting. A notice in the Federal Register about last minute modifications that impact a previously announced advisory committee meeting cannot always be published quickly enough to provide timely notice. Therefore, you should always check the agency's Web site and call the appropriate advisory committee hot line/phone line to learn about possible modifications before coming to the meeting.

Agenda: On August 18, 2009, the committee will discuss, make recommendations and vote on a premarket approval application (PMA) for the CoMplete Acetabular Hip System, sponsored by DePuy Orthopaedics. This device system is intended for use as a primary joint replacement prosthesis in total hip arthroplasty, and is indicated for skeletally mature patients suffering severe pain and disability due to structural damage in the hip joint from non-inflammatory degenerative joint disease and its composite diagnoses of osteoarthritis or post-traumatic arthritis. On August 19, 2009, the committee will discuss, make recommendations and vote on a PMA for Durolane, sponsored by Q–Med AB. This device is indicated for the treatment of pain caused by osteoarthritis of the knee in patients who have failed to respond adequately to conservative non-pharmacological therapy and simple analgesics, e.g., acetaminophen.

FDA intends to make background material available to the public no later than 2 business days before the meeting. If FDA is unable to post the background material on its Web site prior to the meeting, the background material will be made publicly available at the location of the advisory committee meeting, and the background material will be posted on FDA's Web site after the meeting. Background material is available at http://www.fda.gov/ AdvisoryCommittees/Calendar/ default.htm, click on the year 2009 and scroll down to the appropriate advisory committee link.

Procedure: Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Written submissions may be made to the contact person on or before August 4, 2009. Oral presentations from the public will be scheduled at approximately 1 p.m., immediately following lunch on both days. Those desiring to make formal oral presentations should notify the contact person and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time requested to make their presentation on or before July 27, 2009. Time allotted for each presentation may be limited. If the number of registrants requesting to speak is greater than can be reasonably accommodated during the scheduled open public hearing session, FDA may conduct a lottery to determine the speakers for the scheduled open public hearing session. The contact person will notify interested persons regarding their request to speak by July 28, 2009.

Persons attending FDA's advisory committee meetings are advised that the agency is not responsible for providing access to electrical outlets.

FDA welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with physical disabilities or special needs. If you require special accommodations due to a disability, please contact Ann Marie Williams, Conference Management Staff, 301–796–5966, at least 7 days in advance of the meeting.

FDA is committed to the orderly conduct of its advisory committee meetings. Please visit our Web site at http://www.fda.gov/AdvisoryCommittee/AboutAdvisoryCommittee/ucm111462.htm for procedures on public conduct during advisory committee meetings.

Notice of this meeting is given under the Federal Advisory Committee Act (5 U.S.C. app. 2).

Dated: July 1, 2009.

Randall W. Lutter,

Deputy Commissioner for Policy.

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

Agency Information Collection Activities: Form I-693, Revision of a **Currently Approved Information Collection; Comment Request**

ACTION: 30–Day Notice of Information Collection Under Review: Form I-693, Report of Medical Examination and Vaccination Record, OMB Control No. 1615-0033.

The Department of Homeland Security, U.S. Citizenship and Immigration Services (USCIS) has submitted the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. The information collection was previously published in the Federal Register on April 24, 2009, at 74 FR 18737, allowing for a 60-day public comment period. USCIS received one comment.

The purpose of this notice is to allow an additional 30 days for public comments. Comments are encouraged and will be accepted until August 12, 2009. This process is conducted in accordance with 5 CFR 1320.10.

Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the Department of Homeland Security (DHS), and to the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), USCIS Desk Officer. Comments may be submitted to: USCIS, Chief, Regulatory Products Division, Clearance Office, 111 Massachusetts Avenue, Washington, DC 20529-2210. Comments may also be submitted to DHS via facsimile to 202-272-8352 or via e-mail at

rfs.regs@dhs.gov, and to the OMB USCIS Desk Officer via facsimile at 202-395-5806 or via e-mail at

oira submission@omb.eop.gov.

When submitting comments by email, please make sure to add OMB Control No. 1615-0033 in the subject box. Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility:

(2) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be

collected: and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of this information collection:

- (1) Type of Information Collection: Revision of a currently approved information collection.
- (2) Title of the Form/Collection: Report of Medical Examination and Vaccination Record.
- (3) Agency form number, if any, and the applicable component of the Department of Homeland Security sponsoring the collection: Form I-693. U.S. Citizenship and Immigration Services.
- (4) Affected public who will be asked or required to respond, as well as brief abstract: Primary: Individuals or households. The information on the application will be used by USCIS in considering the eligibility for adjustment of status under 8 CFR part 209 and 8 CFR 210.5, 245.1, and 245a.3.
- (5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond: 800,000 responses at 2.5 hours per response.
- (6) An estimate of the total public burden (in hours) associated with the collection: 2,000,000 annual burden hours.

If you need a copy of the information collection instrument, please visit the Web site at: http://www.regulations. gov/.

We may also be contacted at: USCIS, Regulatory Products Division, 111 Massachusetts Avenue, NW., Washington, DC 20529-2210, Telephone number 202-272-8377.

Dated: July 8, 2009.

BILLING CODE 9111-97-P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration **Services**

Agency Information Collection Activities: Form I-730; Extension of an **Existing Information Collection; Comment Request**

ACTION: 60-Day Notice of Information Collection Under Review; Form I-730, Refugee/Asylee Relative Petition; OMB Control No. 1615-0037.

The Department Homeland Security, U.S. Citizenship and Immigration Services (USCIS) has submitted the following information collection request for review and clearance in accordance with the Paperwork Reduction Act of 1995. The information collection is published to obtain comments from the public and affected agencies. Comments are encouraged and will be accepted for sixty days until September 11, 2009.

During this 60 day period, USCIS will be evaluating whether to revise the Form I-730. Should USCIS decide to revise Form I-730 we will advise the public when we publish the 30-day notice in the Federal Register in accordance with the Paperwork Reduction Act. The public will then have 30 days to comment on any revisions to the Form I-730.

Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the Department of Homeland Security (DHS), USCIS, Chief, Regulatory Products Division, Clearance Officer, 111 Massachusetts Avenue, NW., Washington, DC 20529–2210. Comments may also be submitted to DHS via facsimile to 202-272-8352 or via e-mail at rfs.regs@dhs.gov. When submitting comments by e-mail, please make sure to add OMB Control No. 1615–0037 in the subject box. Written comments and suggestions from the public and affected agencies concerning the collection of information should

address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of This Information Collection

- (1) Type of Information Collection: Extension of an existing information collection.
- (2) *Title of the Form/Collection:* Refugee/Asylee Relative Petition.
- (3) Agency form number, if any, and the applicable component of the Department of Homeland Security sponsoring the collection: Form I–730; U.S. Citizenship and Immigration Services (USCIS).
- (4) Affected public who will be asked or required to respond, as well as a brief abstract: Primary: Individuals or households. This form will be used by an asylee or refugee to file on behalf of his of her spouse and/or children provided that the relationship to the refugee/asylee existed prior to their admission to the United States. The information collected on this form will be used by USCIS to determine eligibility for the requested immigrant benefit.
- (5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond: 86,400 responses at 35 minutes (.583) per response.

(6) An estimate of the total public burden (in hours) associated with the collection: 50,371 annual burden hours.

If you need a copy of the information collection instrument, please visit the Web site at: http://www.regulations.gov/.

We may also be contacted at: USCIS, Regulatory Products Division, 111 Massachusetts Avenue, NW., Washington, DC 20529–2210, Telephone number 202–272–8377. Dated: July 9, 2009.

Deputy Chief, Regulatory Products Division, U.S. Citizenship and Immigration Services, Department of Homeland Security. [FR Doc. E9–16680 Filed 7–10–09; 8:45 am]

BILLING CODE 9111-97-P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

Agency Information Collection Activities: Form I–602; Extension of an Existing Information Collection; Comment Request

ACTION: 60-Day Notice of Information Collection Under Review; Form I–602, Application by Refugee for Waiver of Grounds of Excludability; OMB Control No. 1615–0069.

The Department Homeland Security, U.S. Citizenship and Immigration Services (USCIS) has submitted the following information collection request for review and clearance in accordance with the Paperwork Reduction Act of 1995. The information collection is published to obtain comments from the public and affected agencies. Comments are encouraged and will be accepted for sixty days until September 11, 2009.

During this 60 day period, USCIS will be evaluating whether to revise the Form I–602. Should USCIS decide to revise Form I–602 we will advise the public when we publish the 30-day notice in the **Federal Register** in accordance with the Paperwork Reduction Act. The public will then have 30 days to comment on any revisions to the Form I–602.

Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the Department of Homeland Security (DHS), USCIS, Chief, Regulatory Products Division, Clearance Officer, 111 Massachusetts Avenue, NW., Washington, DC 20529-2210. Comments may also be submitted to DHS via facsimile to 202-272-8352 or via e-mail at rfs.regs@dhs.gov. When submitting comments by e-mail, please make sure to add OMB Control No. 1615–0069 in the subject box. Written comments and suggestions from the public and affected agencies concerning the collection of information should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary

for the proper performance of the functions of the agency, including whether the information will have practical utility;

- (2) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- (3) Enhance the quality, utility, and clarity of the information to be collected; and
- (4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of this Information Collection

- (1) *Type of Information Collection:* Extension of an existing information collection.
- (2) *Title of the Form/Collection:* Application by Refugee for Waiver of Grounds of Excludability.
- (3) Agency form number, if any, and the applicable component of the Department of Homeland Security sponsoring the collection: Form I–602; U.S. Citizenship and Immigration Services (USCIS).
- (4) Affected public who will be asked or required to respond, as well as a brief abstract: Primary: Individuals or households. Form I–602 is necessary to establish eligibility for waiver of excludability based on humanitarian, family unity, or public interest.
- (5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond: 2,500 responses at 15 minutes (.25) per response.
- (6) An estimate of the total public burden (in hours) associated with the collection: 625 annual burden hours.

If you need a copy of the information collection instrument, please visit the Web site at: http://www.regulations.gov/.

BILLING CODE 9111-97-P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Internal Agency Docket No. FEMA-1849-DR; Docket ID FEMA-2008-0018]

Kansas; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Kansas (FEMA–1849–DR), dated June 25, 2009, and related determinations.

DATES: Effective Date: June 25, 2009.

FOR FURTHER INFORMATION CONTACT:

Peggy Miller, Disaster Assistance Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646–3886.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated June 25, 2009, the President issued a major disaster declaration under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the "Stafford Act"), as follows:

I have determined that the damage in certain areas of the State of Kansas resulting from severe storms, flooding, straight-line winds, and tornadoes during the period of April 25 to May 16, 2009, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 et seq. (the "Stafford Act"). Therefore, I declare that such a major disaster exists in the State of Kansas.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Public Assistance in the designated areas, Hazard Mitigation throughout the State, and any other forms of assistance under the Stafford Act that you deem appropriate. Consistent with the requirement that Federal assistance is supplemental, any Federal funds provided under the Stafford Act for Public Assistance and Hazard Mitigation will be limited to 75 percent of the total eligible costs. If Other Needs Assistance under Section 408 of the Stafford Act is later requested and warranted, Federal funding under that program will also be limited to 75 percent of the total eligible costs.

Further, you are authorized to make changes to this declaration to the extent allowable under the Stafford Act.

The Federal Emergency Management Agency (FEMA) hereby gives notice that pursuant to the authority vested in the Administrator, under Executive Order 12148, as amended, Michael L. Karl, of FEMA is appointed to act as the Federal Coordinating Officer for this major disaster.

The following areas of the State of Kansas have been designated as adversely affected by this major disaster:

Anderson, Barber, Bourbon, Butler, Chase, Cherokee, Coffey, Cowley, Crawford, Elk, Finney, Greenwood, Harper, Harvey, Kingman, Labette, Linn, Lyon, Marion, Marshall, Montgomery, Morris, Neosho, Reno, Rice, Sumner, Wabaunsee, and Wilson Counties for Public Assistance.

All counties within the State of Kansas are eligible to apply for assistance under the Hazard Mitigation Grant Program.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034 Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance— Disaster Housing Operations for Individuals and Households; 97.050, Presidentially Declared Disaster Assistance to Individuals and Households-Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

W. Craig Fugate,

Administrator, Federal Emergency Management Agency.

BILLING CODE 9111-23-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-5287-N-02]

Notice of Proposed Information Collection for Public Comment on the Participation Agreement, Baseline Survey, Tracking Survey and Key Informant Interview Guide for the Homeless Family Interventions Study

AGENCY: Office of Policy Development and Research, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below will be submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). The Department is soliciting public comments on the subject proposal.

DATES: Comments Due Date: September 11, 2009.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Reports Liaison Officer, Office of Policy Development and Research, Department of Housing and Urban Development, 451 7th Street, SW., Room 8234, Washington, DC 20410.

FOR FURTHER INFORMATION CONTACT: Paul B. Dornan at (202) 402–4486 (this is not a toll-free number). Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Dornan.

SUPPLEMENTARY INFORMATION: The Department will submit the proposed information collection to OMB for review, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35, as amended).

This Notice is soliciting comments from members of the public and affected agencies concerning the proposed collection of information to: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (3) Enhance the quality, utility, and clarity of the information to be collected; and (4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated collection techniques or other forms of information technology that will reduce the burden (e.g., permitting electronic submission of responses).

This Notice also lists the following information:

Title of Proposal: Homeless Families Interventions Study.

OMB Control Number: 2528-pending. Description of the need for the information and proposed use: The Participation Agreement, the Baseline and Tracking Survey Instruments and the Key Informant Interview Guide are all of the instruments necessary to put the Homeless Family Interventions Study into place. The Homeless Families Interventions Study is the first randomized experiment designed to test the impact of various combinations of housing and supportive services on the subsequent housing stability and wellbeing of homeless families. The Senate Appropriations Committee directed the Department in FY 2006 to "undertake research to ascertain the impact of various service and housing interventions in ending homelessness

for families." These instruments establish the research foundation on which the Department can meet that direction. They will permit the research team a set of baseline characteristics and conditions for both an experimental and a control group with which later characteristics and conditions for those

same participants can be compared. A subsequent **Federal Register** Notice will include the follow-on survey which will permit the Department to report on the effects of various housing and services interventions on homeless families over time.

Members of affected public: Households.

Estimation of the total number of hours needed to prepare the information collection including number of respondents, frequency of response, and hours of response:

ESTIMATED RESPONDENT BURDEN HOURS AND COSTS

| Form | Respondent sample | Number of respondents | Average time
to complete
(minimum,
maximum) in
minutes | Frequency | Total burden
(hours) |
|--------------------------|-------------------------------------------------------------------------------|------------------------------------------|--------------------------------------------------------------------|-----------------------------------------------------------------------------------------|-------------------------|
| Baseline Survey | All enrolled families (N=3,000). | 3,000 | 40 (35, 50) | 1 | 2,000 |
| Tracking Interview | All enrolled families (N=3,000). | 3,000 | 10 (8, 15) | 2 | 1,000 |
| Tracking Letters | All enrolled families (N=3,000). | 3,000 | 5 (3, 10) | 3 | 750 |
| Key Informant Interviews | Staff from programs
providing services
in the studied
interventions. | 300 (up to 25 respondents in each site). | 60 | 3 responses per re-
spondent to col-
lect all needed
program informa-
tion. | 900 |
| Total Burden Hours | | | | | 4,650 |

Respondent's Obligation: Voluntary. Status of the proposed information collection: Pending OMB approval.

Authority: Title 13 U.S.C. Section 9(a), and Title 12, U.S.C., Section 1701z–1 *et seq*.

Dated: July 2, 2009.

Jean Lin Pao,

General Deputy Assistant Secretary for Policy Development and Research.

[FR Doc. E9–16547 Filed 7–10–09; 8:45 am]

BILLING CODE 4210-67-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-5338-N-01]

Affirmatively Furthering Fair Housing and Fair Housing Plans; Notice of Informal Meeting

AGENCY: Office of the Assistant Secretary for Fair Housing and Equal Opportunity, HUD.

ACTION: Notice.

SUMMARY: This notice advises the public of an informal meeting that HUD intends to hold for the purpose of obtaining individual views and gathering information on specific issues related to HUD's intended development of a proposed rule concerning the obligation to affirmatively further fair housing. The issues for which HUD seeks input are primarily directed to improving HUD's oversight of recipients' implementation of the duty

to affirmatively further fair housing. HUD specifically invites to this meeting representatives of fair housing and civil rights organizations, State and local governments, public housing agencies, private and public housing providers, lending institutions, and other interested members of the public.

Date and Location of Meeting: The meeting will be held on Wednesday, July 22, 2009, from 2 p.m. to 4 p.m. EDT, at HUD Headquarters, in Suite A of the Brooke-Mondale Auditorium, first floor of the Robert Weaver Building (HUD Headquarters), 451 7th Street, SW., Washington, DC 20410.

FOR FURTHER INFORMATION CONTACT:

Bryan Greene, General Deputy Assistant Secretary for Fair Housing and Equal Opportunity, Room 5100, Department of Housing and Urban Development, 451 7th Street, SW., Washington, DC 20410; telephone number 202–708–4252 (this is not a toll-free number). Persons with hearing or speech impairments may access this telephone number via TTY by calling the toll-free Federal Information Relay Service at 800–877–8339

SUPPLEMENTARY INFORMATION: A central part of HUD's mission is to ensure nondiscrimination in its programs and to promote fair and equal opportunities for all individuals. HUD and its program recipients have the statutory responsibility to affirmatively further fair housing opportunities in HUD programs.

If you are interested in participating in the July 22, 2009, meeting, please send an e-mail to: affh@hud.gov. The following information should be included in the e-mail: (a) Your full name; (b) name of your organization; (c) telephone number; (d) e-mail address; and (e) make, model, and serial number of laptop, if you plan on bringing a laptop computer to the meeting.

The purpose of this meeting is to obtain views, opinions, perspectives, and suggestions from meeting participants, rather than try and reach consensus on affirmatively furthering fair housing. Specific issues that HUD will ask meeting participants to address include the following:

- How can the existing process be improved;
- What documentation recipients currently use to demonstrate compliance with affirmatively furthering fair housing requirements and to support their certifications to affirmatively further fair housing;
- What factors should be included in an analysis of impediments for fair housing choice (AI);
- How often should the AIs be updated, while not creating undue burden;
- What are the advantages and disadvantages of creating a regional approach to affirmatively further fair housing; and
- What can communities and public housing agencies do to reduce housing segregation and increase housing

opportunities for protected classes under the Federal housing civil rights laws.

The views, suggestions, and information provided at the July 22, 2009, informal meeting will inform HUD as it considers changes to improve HUD's guidance to grantees and enhance HUD's regulatory oversight.

Dated: July 6, 2009.

John Trasviña,

Assistant Secretary for Fair Housing and Equal Opportunity.

[FR Doc. E9–16542 Filed 7–8–09; 4:15 pm] BILLING CODE 4210-67-P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management [AA-11153-31; AK-965-1410-KC-P]

Alaska Native Claims Selection

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of decision approving lands for conveyance.

SUMMARY: As required by 43 CFR 2650.7(d), notice is hereby given that an appealable decision approving the reserved mineral estate in certain lands for conveyance pursuant to the Alaska Native Claims Settlement Act and Sec. 12(b)(3) of the Act of January 2, 1976, will be issued to Cook Inlet Region, Inc. The lands are in the vicinity of Hicks and Pinochle Creeks, Alaska, and are located in:

Seward Meridian, Alaska

T. 20 N., R. 9 E.,

Secs. 16, 19, and 20;

Secs. 21, 22, and 23; Secs. 25 to 30, inclusive;

Sec. 35.

Containing 2,995.91 acres.

Notice of the decision will also be published four times in the Anchorage Daily News.

DATES: The time limits for filing an appeal are:

1. Any party claiming a property interest which is adversely affected by the decision shall have until August 12, 2009 to file an appeal.

2. Parties receiving service of the decision by certified mail shall have 30 days from the date of receipt to file an appeal.

Parties who do not file an appeal in accordance with the requirements of 43 CFR part 4, subpart E, shall be deemed to have waived their rights.

ADDRESSES: A copy of the decision may be obtained from: Bureau of Land Management, Alaska State Office, 222 West Seventh Avenue, #13, Anchorage, Alaska 99513–7504.

FOR FURTHER INFORMATION CONTACT: The Bureau of Land Management by phone at 907–271–5960, or by e-mail at ak.blm.conveyance@ak.blm.gov. Persons who use a telecommunication device (TTD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8330, 24 hours a day, seven days a week, to contact the Bureau of Land Management.

Christy Favorite,

Land Law Examiner, Land Transfer Adjudication II Branch.

[FR Doc. E9–16413 Filed 7–10–09; 8:45 am] BILLING CODE 4310–JA–P

DEPARTMENT OF THE INTERIOR

Geological Survey

Call for Nominations to the National Geospatial Advisory Committee

AGENCY: U.S. Geological Survey, Interior.

ACTION: Call for Nominations, National Geospatial Advisory Committee.

SUMMARY: The Department of the Interior is seeking nominations to serve on the National Geospatial Advisory Committee (NGAC). The NGAC is a Federal Advisory Committee established under the authority of the Federal Advisory Committee Act (FACA). The Committee provides advice and recommendations to the Federal Geographic Data Committee (FGDC), through the FGDC Chair (the Secretary of the Interior or designee), related to management of Federal geospatial programs, the development of the National Spatial Data Infrastructure (NSDI), and the implementation of Office of Management and Budget (OMB) Circular A-16 and Executive Order 12906. The Committee reviews and comments upon geospatial policy and management issues and provides a forum to convey views representative of non-Federal stakeholders in the geospatial community.

DATES: Nominations to participate on this Committee must be received by August 21, 2009.

ADDRESSES: Send nominations electronically to ngacnominations@fgdc.gov, or by mail to John Mahoney, U.S. Geological Survey, U.S. Department of the Interior, 909 First Avenue, Suite 800, Seattle, WA 98104.

Nominations should include:

1. Contact information for the nominee (name, title, organization,

mailing address, e-mail address, phone number).

- 2. A statement summarizing the nominee's qualifications and interest in Committee membership and describing the nominee's ability to represent a stakeholder group.
- 3. A biographical sketch, resume, or vita.
- 4. One letter of reference and a list of two additional references with contact information.

Additional information and instructions about the nomination process are posted on the NGAC Web page at http://www.fgdc.gov/ngac.

FOR FURTHER INFORMATION CONTACT: John Mahoney, USGS (206–220–4621).

SUPPLEMENTARY INFORMATION: The Committee conducts its operations in accordance with the provisions of the FACA. It reports to the Secretary of the Interior through the Chair of the FGDC Steering Committee and functions solely as an advisory body. The Committee provides recommendations and advice to the Department and the FGDC on policy and management issues related to the effective operation of Federal geospatial programs.

The NGAC includes 25–30 members, selected to generally achieve a balanced representation of the viewpoints of the various partners involved in national geospatial activities. NGAC members are appointed for staggered terms, and approximately one-half of the seats on the committee will be appointed during this round of appointments.

Nominations will be reviewed by the FGDC. Additional information may be requested from nominees. Final selection and appointment of committee members will be made by the Secretary of the Interior.

The Committee meets approximately 3–4 times per year. Committee members will serve without compensation. Travel and per diem costs will be provided for Committee members by USGS. The USGS will provide necessary support services to the Committee. Committee meetings will be open to the public. Notice of committee meetings will be published in the **Federal Register** at least 15 days before the date of the meeting. The public will have an opportunity to provide input at these meetings.

In accordance with FACA, a copy of the Committee's charter will be filed with the Committee Management Secretariat, General Services Administration. The current version of the NGAC charter is available at http://www.fgdc.gov/ngac. Dated: July 5, 2009.

Ivan DeLoatch,

Staff Director, Federal Geographic Data Committee.

Notice of Intent to Prepare an Environmental Impact Statement for the Proposed Solar Millennium, LLC, Amargosa Farm Road Solar Energy Project, Nye County, NV

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Intent.

SUMMARY: The Bureau of Land Management (BLM) Field Office, Southern Nevada District, Pahrump Field Office intends to prepare an environmental impact statement (EIS) for the Amargosa Farm Road Solar Energy Project, located on public lands in Nye County, Nevada and by this notice is announcing the beginning of the scoping process and soliciting input on the identification of issues.

DATES: This notice initiates public scoping. Scoping comments shall be submitted on or before August 12, 2009.

The BLM will announce public scoping meetings to identify relevant issues through local news media, newsletters, and the BLM Web site (http://www.blm.gov/nv/st/en/fo/lvfo.html) at least 15 days prior to each meeting. We will provide additional opportunities for public participation upon publication of the Draft RMP/EIS, including a 90-day public comment period.

ADDRESSES: Comments related to the project may be submitted by any of the following methods:

- E-mail: solar millennium@blm.gov.
- *Fax:* (702) 515–5064 (attention: Gregory Helseth).
- Mail: Bureau of Land Management, Southern Nevada District Office, Pahrump Field Office, Attn: Gregory Helseth, Project Manager, 4701 North Torrey Pines Drive, Las Vegas, NV 89130–2301.

Documents pertinent to this project may be examined at the Pahrump Field Office. Additional opportunities for public participation will be provided on publication of the draft EIS.

FOR FURTHER INFORMATION CONTACT: For further information and/or to have your

name added to the mailing list, call Gregory Helseth, (702) 515–5173, or e-mail: gregory helseth@blm.gov.

SUPPLEMENTARY INFORMATION: Solar Millennium, LLC, has submitted a rightof-way application to BLM to construct two concentrated solar thermal parabolic trough power plant facilities on public lands, approximately 80 miles northwest of Las Vegas, in Nye County. Nevada. The Project site would consist of approximately 4,350 acres of public land located in Amargosa Valley, south of Highway 95. Each facility is expected to operate for approximately 30 years. Each plant would utilize solar thermal parabolic trough technology, consisting of a 242 megawatt (MW) power block equipped with thermal storage tanks capable of producing additional energy for 3.5 hours after sundown, and a solar field composed of parabolic trough

The solar field would be highly modular and would consist of "loops," each containing 4 curved glass mirror collectors. A loop is 22m wide and 400m long (72.18' wide and 1312.33' long). The solar field would consist of approximately 400 loops. The orientation of the collectors would be north-south, and the collectors would track the sun from east to west during the day. The collector would focus the sun's direct beam radiation on a receiver tube. The row of collectors would have a hydraulic drive unit with sensors to track the sun's path throughout the day. The solar energy would heat a transfer fluid which cycles through a series of heat exchangers to generate steam, which drives a steam turbine to ultimately generate electricity. The electric output of the Project would be generated entirely by solar energy. No electricity would be generated by the use of fossil fuel in these facilities.

The proposed Project facilities would include the solar fields, power blocks, buildings, parking area, laydown area, stormwater retention pond, and evaporating ponds. A single overhead 230 kilovolt (kV) transmission line would connect the facilities to the nearby Valley Electric Valley substation, located on Anvil Road. Additional elements of the Project would include access roads and optional water pipeline. The proposed Project may require the rerouting of a road and an existing low voltage distribution power line. The EIS will analyze the sitespecific impacts of the Project on air quality, biological resources, cultural resources, water resources, geological resources, paleontological resources, public health, socioeconomics, soils, traffic and transportation, and visual

resources. It will analyze the geologic hazards, hazardous materials handling, land use and airspace, noise, waste management, worker safety, and fire protection potentially associated with the Project. It will also analyze facility design engineering, efficiency, and reliability; transmission system engineering; and transmission line safety and nuisance. Native American Tribal consultations will be conducted in accordance with policy, and Tribal concerns will be given due consideration. The EIS will include the consideration of any impacts on Indian trust assets.

Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that vour entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. Federal, State, and local agencies, as well as individuals or organizations that may be interested in or affected by the BLM's decision on this project are invited to participate in the scoping process and, if eligible, may requested or be requested by the BLM to participate as a cooperating agency.

(Authority: 43 CFR Part 2800)

Patrick Putnam,

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

Mendota Pool Bypass and Reach 2B Improvements Project Under the San Joaquin River Restoration Program, Fresno and Madera Counties, CA

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of intent to prepare an Environmental Impact Statement/ Environmental Impact Report (EIS/EIR) and Notice of Scoping Meetings.

SUMMARY: The Bureau of Reclamation (Reclamation) and the California Department of Water Resources (DWR) are proposing to prepare a joint EIS/EIR, pursuant to the National Environmental Policy Act (NEPA) and the California Environmental Quality Act (CEQA), to evaluate effects of the proposed Mendota Pool Bypass and Reach 2B Channel Improvements Project (Proposed Action) under the San

Joaquin River Restoration Program (SJRRP or Program). The Proposed Action includes the construction, operation, and maintenance of the Mendota Pool Bypass and improvements, including the operation and maintenance of the San Joaquin River channel to allow Reach 2B to convey at least 4,500 cubic feet per second (cfs). The purpose of the proposed action is to improve Reach 2B conveyance conditions enough to provide a capacity of at least 4,500 cfs with integrated floodplain habitat, and to convey restoration flows of at least 4,500 cfs around Mendota Pool from Reach 2B downstream to Reach 3. The planning and environmental review for the Proposed Action is authorized under section 3406(c)(1) of the Central Valley Project Improvement Act (CVPIA) Title 34, (Pub. L. 102-575) and the San Ioaquin River Restoration Act (SIRRA). included in Public Law 111-11. Construction of the Proposed Action is authorized under the SJRRA (Pub. L. 111-11). The Proposed Action is a component of the San Joaquin River Settlement.

Scoping meetings will be held to solicit input on alternatives, concerns, and issues to be addressed in the EIS/EIR. Written comments may also be sent.

DATES: Two scoping meetings will be held to solicit comments from interested parties to assist in determining the scope of the environmental analysis, including the alternatives to be addressed, and to identify the significant environmental issues related to the Proposed Action. The scoping meeting dates and locations are:

- Tuesday, July 28, 2009, 6 p.m.–8 p.m., Piccadilly Inn–Shaw, 2305 West Shaw Avenue, Fresno, California 93711; and
- Wednesday, July 29, 2009, 6 p.m.— 8 p.m., Firebaugh City Council Chambers, 1659 13th Street, Firebaugh, California 96322.

Written comments on the scope of the EIS/EIR should be sent by August 17, 2009 to Ms. Margaret Gidding, Bureau of Reclamation, 2800 Cottage Way MP—170, Sacramento, CA 95825 or via email at

MendotaPoolBypass@restoresjr.net.

FOR FURTHER INFORMATION CONTACT: Ms. Margaret Gidding at the above address, by telephone at 916–978–5461, TDD 916–978–5608 or via fax at 916–978–5469. Additional information is available online at http://www.restoresjr.net. If special assistance is required at the scoping meetings, please contact Ms. Margaret Gidding at the above phone or fax numbers or via

e-mail at

MendotaPoolBypass@restoresjr.net no less than ten working days prior to the meetings.

SUPPLEMENTARY INFORMATION:

Reclamation and DWR are proposing to prepare a joint EIS/EIR, pursuant to NEPA and CEQA, to evaluate the proposed Mendota Pool Bypass and Reach 2B Channel Improvements Project (Proposed Action) under the SJRRP. The Proposed Action includes the construction, operation, and maintenance of the Mendota Pool Bypass and improvements, including the operation and maintenance of the San Joaquin River channel to allow Reach 2B to convey at least 4,500 cfs. The planning and environmental review for the Proposed Action is authorized under section 3406(c)(1) of the CVPIA and the SJRRA included in Public Law 111-11. Construction of the Proposed Action is authorized under the SJRRA (Pub. L. 111–11). The Proposed Action is a component of San Joaquin River Settlement.

The Proposed Action would include a bypass around the Mendota Pool to convey at least 4,500 cfs around the Mendota Pool and re-connect with the San Joaquin River downstream of Mendota Dam. The Proposed Action would also include constructing a bifurcation structure at the upper end of the bypass to convey at least 4,500 cfs into the Mendota Pool Bypass. The proposed Mendota Bypass Bifurcation Structure would be designed to divert water from the San Joaquin River to the Mendota Pool, consistent with the design channel capacity of Reach 2B which conveys flows to the Mendota Pool. The bifurcation structure would be designed to direct fish into the bypass channel and minimize or avoid fish passage into the Mendota Pool. Specific bypass alignments and facilities locations will be determined through the course of this site-specific study.

Reach 2B of the San Joaquin River extends from the Chowchilla Bypass Bifurcation Structure to the Mendota Dam. Proposed improvements to Reach 2B would include modifications to the San Joaquin River channel from the Chowchilla Bypass Bifurcation Structure to the new Mendota Bypass Bifurcation Structure to provide a capacity of at least 4,500 cfs with integrated floodplain habitat. The project would expand the Reach 2B channel capacity while accounting for new floodplain habitat. Specific channel modification actions would be determined through the course of this site-specific study. These actions would consider fisheries requirements, land

uses, subsurface conditions, topography, and the condition of existing levees.

San Joaquin River Restoration Program

In 1988, a coalition of environmental groups led by the Natural Resources Defense Council (NRDC) filed a lawsuit challenging the renewal of the long-term water service contracts between the United States and the Central Valley Project Friant Division Contractors. After more than 18 years of litigation known as NRDC, et al. v. Kirk Rodgers, et al., the NRDC, Friant Water Users Authority, and the Departments of the Interior and Commerce (Settling Parties) reached agreement on the terms and conditions of the San Joaquin River Settlement (Settlement) which was subsequently approved by the Court on October 23, 2006. The Settlement can be found online at http:// www.restoresjr.net.

The Settlement Is Based on Two Parallel Goals

- The Restoration Goal—To restore and maintain fish populations in "good condition" in the main stem of the San Joaquin River below Friant Dam to the confluence of the Merced River, including naturally reproducing and self-sustaining populations of salmon and other fish; and
- The Water Management Goal—To reduce or avoid adverse water supply impacts to all of the Friant Division long-term Contractors that may result from the Interim Flows and Restoration Flows provided for in the Settlement.

The Settling Parties acknowledge that accomplishing the Goals requires planning, implementation, and funding of certain activities, such as environmental review, design, and construction. With regard to the Restoration Goal, the Settlement calls for a combination of channel and structural improvements along the San Joaquin River below Friant Dam, releases of additional water from Friant Dam to the confluence of the Merced River, and the reintroduction of spring and/or fall-run Chinook salmon.

The Settlement states that the Secretary of the Interior shall implement the terms and conditions of the Settlement. Additionally, the Settling Parties agreed that implementation of the Settlement shall also require participation of the State of California. Therefore, concurrent with the execution of the Settlement, the Settling Parties entered into a Memorandum of Understanding with the State of California, by and through the California Resources Agency, DWR, the Department of Fish and Game (DFG), and the California Environmental

Protection Agency (CalEPA), regarding the State's role in the implementation of the Settlement. The program established to implement the Settlement is the SJRRP, and the "Implementing Agencies" responsible for the management of the SJRRP include Reclamation, the U.S. Fish and Wildlife Service (USFWS), the National Marine Fisheries Service (NMFS), DWR, and DFG. The Federal Implementing agencies (Reclamation, USFWS and NMFS) are authorized to implement the Settlement under the SJRRA included in Public Law 111–11.

A Program Environmental Impact Statement/Environmental Impact Report (PEIS/EIR) is currently being developed for implementation of the SJRRP. If applicable, the EIS/EIR for the Proposed Action will supplement, tier from, incorporate by reference, or adopt relevant NEPA analyses from the PEIS/EIR. The Record of Decision for the PEIS/EIR is anticipated to be signed in 2010.

Public Disclosure

Before including your name, address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Dated: July 2, 2009.

Anastasia T. Leigh,

Acting Regional Environmental Officer, Mid-Pacific Region.

Conference of the Parties to the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES); Fifteenth Regular Meeting: Proposed Resolutions, Decisions, and Agenda Items Being Considered; Taxa Being Considered for Amendments to the CITES Appendices; Observer Information

AGENCY: Fish and Wildlife Service,

Interior.

ACTION: Notice.

summary: The United States, as a Party to the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), may submit proposed resolutions, decisions, and agenda items for consideration at meetings of the Conference of the Parties to CITES. The United States may also propose amendments to the CITES Appendices for consideration at meetings of the Conference of the Parties. The fifteenth regular meeting of the Conference of the Parties to CITES (CoP15) is tentatively scheduled to be held in Doha, Qatar, March 13–25, 2010.

With this notice, we describe proposed resolutions, decisions, and agenda items that the United States is considering submitting for consideration at CoP15; describe proposed amendments to the CITES Appendices (species proposals) that the United States is considering submitting for consideration at CoP15; invite your comments and information on these proposals; and provide information on how nongovernmental organizations based in the United States can attend CoP15 as observers.

DATES: We will consider written information and comments you submit concerning potential species proposals, and proposed resolutions, decisions, and agenda items that the United States is considering submitting for consideration at CoP15, and other items relating to CoP15, if we receive them by September 11, 2009.

ADDRESSES: Comments pertaining to proposed resolutions, decisions, and agenda items should be sent to the Division of Management Authority, U.S. Fish and Wildlife Service, 4401 North Fairfax Drive, Room 212, Arlington, VA 22203, or via e-mail at: CoP15@fws.gov, or via fax at: 703–358–2298. Comments pertaining to species proposals should be sent to the Division of Scientific Authority, U.S. Fish and Wildlife Service, 4401 North Fairfax Drive, Room 110, Arlington, VA 22203, or via e-mail at: scientificauthority@fws.gov, or via fax at: 703–358–2276.

FOR FURTHER INFORMATION CONTACT: For information pertaining to resolutions, decisions, and agenda items contact: Robert R. Gabel, Chief, Division of Management Authority, phone 703–358–2095, fax 703–358–2298, e-mail: CoP15@fws.gov. For information pertaining to species proposals contact: Rosemarie Gnam, Chief, Division of Scientific Authority, phone 703–358–1708, fax 703–358–2276, e-mail: scientificauthority@fws.gov.

SUPPLEMENTARY INFORMATION:

Background

The Convention on International Trade in Endangered Species of Wild Fauna and Flora, hereinafter referred to as CITES or the Convention, is an international treaty designed to control and regulate international trade in certain animal and plant species that are now or potentially may be threatened with extinction. These species are listed in Appendices to CITES, which are available on the CITES Secretariat's website at http://www.cites.org/eng/ app/index.shtml. Currently, 175 countries, including the United States, are Parties to CITES. The Convention calls for biennial meetings of the Conference of the Parties, which reviews its implementation, makes provisions enabling the CITES Secretariat in Switzerland to carry out its functions, considers amendments to the lists of species in Appendices I and II, considers reports presented by the Secretariat, and makes recommendations for the improved effectiveness of CITES. Any country that is a Party to CITES may propose for these meetings amendments to Appendices I and II, and resolutions, decisions, and agenda items for consideration by all the Parties.

Γhis is our second in a series of Federal Register notices that, together with an announced public meeting, provide you with an opportunity to participate in the development of the U.S. negotiating positions for the fifteenth regular meeting of the Conference of the Parties to CITES (CoP15). We published our first CoP15related Federal Register notice on September 29, 2008 (73 FR 56605), in which we requested information and recommendations on species proposals and proposed resolutions, decisions, and agenda items for the United States to consider submitting for consideration at CoP15. You may obtain information on that Federal Register notice from the following sources: for information on proposed resolutions, decisions, and agenda items, contact the Division of Management Authority at the address provided in "ADDRESSES" above; and for information on species proposals, contact the Division of Scientific Authority at the address provided in "ADDRESSES" above. Our regulations governing this public process are found in 50 CFR 23.87.

CoP15 is tentatively scheduled to be held in Doha, Qatar, March 13–25, 2010.

I. Recommendations for Resolutions, Decisions, and Agenda Items for the United States To Consider Submitting for CoP15

In our Federal Register notice published on September 29, 2008 (73 FR 56605), we requested information and recommendations on potential resolutions, decisions, and agenda items for the United States to submit for consideration at CoP15. We received recommendations for resolutions, decisions, and agenda items from the following organizations: the Species Survival Network (SSN); TRAFFIC; the Whale and Dolphin Conservation Society (WDCS); and the World Wide Fund for Nature (WWF). We also received a comment from one individual

We considered all of the recommendations of the above individual and organizations, as well as the factors described in the U.S. approach for CoP15 discussed in our September 29, 2008, Federal Register notice, when compiling a list of resolutions, decisions, and agenda items that the United States is likely to submit for consideration by the Parties at CoP15; and lists of resolutions, decisions, and agenda items for consideration at CoP15 that the United States either is currently undecided about submitting, is not considering submitting at this time, or plans to address in other ways. The United States may consider submitting documents for some of the issues for which it is currently undecided or not considering submitting at this time, depending on the outcome of discussions of these issues in the CITES Animals, Plants, and Standing Committees, or additional consultations with range country governments and subject matter experts.

Please note that, in sections A, B, and C below, we have listed those resolutions, decisions, and agenda items that the United States is likely to submit, currently undecided about submitting, or currently planning not to submit. We have posted an extended version of this notice on our website at http://www.fws.gov/international/ newspubs/fedregnot.html, with text describing in more detail each of these issues and explaining the rationale for the tentative U.S. position on each issue. Copies of the extended version of the notice are also available from the Division of Management Authority at the above address.

We welcome your comments and information regarding the resolutions, decisions, and agenda items that the United States is likely to submit, currently undecided about submitting, or currently planning not to submit.

A. What resolutions, decisions, and agenda items is the United States likely to submit for consideration at CoP15?

- 1. A document that continues to support a strong stance on tiger conservation and efforts to address illegal trade in tiger and other Asian big cat parts and derivatives in both range and consumer countries.
- 2. A discussion document addressing inconsistent implementation of Appendix-III timber listings annotated to include only the national populations of the listing countries, and possibly including a proposal to amend Resolution Conf. 9.25 (Rev. CoP14), by deleting Recommendation a) iv), regarding the inclusion of geographically separate populations of timber species in Appendix III, and adding language to direct the CITES Secretariat to consult with countries who request such listings to ensure that the listings will achieve the level of control and cooperation with other range countries intended.
- 3. A discussion document addressing difficulties encountered associated with the reporting of scientific names for CITES-listed coral specimens, including proposed changes to Resolution Conf. 12.3 (Rev. CoP14) to indicate that taxonomic names of corals on CITES permits and certificates should comply with the list in CITES Notification to the Parties No. 2003/020, and a draft decision directing the Animals Committee to update the list in Notification No. 2003/020.

B. On what resolutions, decisions, and agenda items is the United States still undecided, pending additional information and consultations?

- 1. A discussion document on how CITES might incorporate impacts of climate change in future deliberations, or how Parties could incorporate climate change resilience into their nondetriment findings.
- 2. A discussion document on the conservation issues associated with and management of the snake trade in Asia.
- 3. A discussion document raising possible problems with the current guidelines to register and monitor operations that breed Appendix-I animal species for commercial purposes provided in Resolution Conf. 12.10 (Rev. CoP14), and possibly including a proposal to amend this resolution.

C. What resolutions, decisions, and agenda items is the United States not likely to submit for consideration at CoP15, unless we receive significant additional information?

- 1. A resolution that details the need to accurately and adequately describe on CITES permits and in CITES annual reports both the types of specimens in trade and the quantities of specimens in trade.
- 2. A document expressing disappointment in the lack of progress that has been made to date in the development and implementation of regional management plans for the African grey parrot (*Psittacus erithacus*).
- 3. A document related to the establishment of "zero export quotas" for those species subject to a Standing Committee recommendation to suspend trade.
- 4. A document emphasizing the importance of sound science in the making of CITES non-detriment findings for the import of specimens included in Appendix I, and export of specimens of species included in Appendices I and II.

II. Recommendations for Species Proposals for the United States To Consider Submitting for CoP15

In our Federal Register notice of September 29, 2008 (73 FR 56605), we requested information and recommendations on potential species proposals for the United States to consider submitting for consideration at CoP15. We received recommendations from the following organizations for possible proposals involving 46 taxa (5 families, 7 genera, and 34 individual species) and 5 general animal groups (furbearers, ungulates, freshwater turtles, sharks, and other fish): the Animal Welfare Institute; Defenders of Wildlife; the Humane Society of the United States (HSUS); Humane Society International (HSI); the International Union for Conservation of Nature Species Survival Commission (IUCN/ SSC) Tortoise and Freshwater Turtle Specialist Group; the Mid-Atlantic Turtle and Tortoise Society; the Ocean Conservancy; the Pew Institute for Ocean Conservation Science; Sea Web; SSN; TRAFFIC; WDCS; and WWF. We have undertaken initial assessments of the available trade and biological information on all of these taxa. Based on these assessments, we made provisional determinations of whether to proceed with the development of proposals to list or delist species, or transfer them from one Appendix to another. We made these determinations by considering the quality of biological and trade information available on the

species; the presence, absence, and effectiveness of other mechanisms that may preclude the need for a CITES listing (e.g., range country actions or other international agreements); and availability of resources. Furthermore, our assignment of a taxon to one of these categories, which reflects the likelihood of our submitting a proposal, included consideration of the following factors, which reflect the U.S. approach for CoP15 discussed in our September 29, 2008, **Federal Register** notice:

- (1) Is it a native U.S. species that is or may be significantly affected by trade, or if it is a currently listed U.S. species, does the listing accurately reflect the biological and trade status of the species?
- (2) Is it a native U.S. species that is not at this time significantly impacted by trade within the United States, but is being significantly impacted elsewhere in its range?
- (3) Is it a foreign species, not native to the United States, but which is or may be significantly affected by trade, and the United States is a significant component of the trade (i.e., as an importing country)?
- (4) Is it a species for which the United States is neither a range country nor a country significantly involved in trade, but for which trade is a serious threat to the continued existence of the species, other mechanisms are lacking or ineffective for bringing trade under control, and action is urgently needed?

In sections A, B, and C below, we have listed the current status of each species proposal recommended by the public, as well as species proposals we have been developing on our own. Please note that we have only provided here a list of taxa and the proposed action. We have posted an extended version of this notice on our website at http://www.fws.gov/international/ newspubs/fedregnot.html, with text describing in more detail each proposed action and explaining the rationale for the tentative U.S. position on each possible proposal. Copies of the extended version of the notice are also available from the Division of Management Authority at the above address.

We welcome your comments, especially if you are able to provide any additional biological or trade information on these species. For each species, more detailed information is on file in the Division of Scientific Authority.

A. What species proposals is the United States likely to submit for consideration at CoP15?

The United States is likely to develop and submit proposals for the following taxa. For some of the species below, particularly those not native to the United States, additional consultations with range countries and subject matter experts are proceeding, and final decisions are pending, based on the outcomes of those consultations and any additional information received.

Plants

1. Flasked seedlings – Amendment of the annotation for Appendix-I orchid species to make it consistent with the language in Resolution Conf. 11.11 (Rev. CoP14) pertaining to flasked seedlings

Corals

2. Red and pink coral (*Corallium* spp. and *Paracorallium* spp.) – Inclusion in Appendix II

Mammals

3. Bobcat (*Lynx rufus*) – Removal from Appendix II

B. On what species proposals is the United States still undecided, pending additional information and consultations?

The United States is still undecided on whether to submit proposals for CoP15 for the following taxa. In some cases, we have not completed our consultations with relevant range countries. In other cases, we expect meetings to occur in the immediate future at which participants will generate important recommendations, trade analyses, or biological information on the taxon in question.

Plants

1. Cedars (*Cedrela* spp.) – Inclusion in Appendix II

2. Cliff spurge (*Euphorbia misera*) – Removal from Appendix II

Mollusks

3. Nautilids (*Allonautilus* spp. and *Nautilus* spp.) – Inclusion in Appendix II

Fish

- 4. Tope shark (*Galeorhinus galeus*) Inclusion in Appendix II
- 5. Shortfin mako shark (*Isurus* oxyrhinchus) Inclusion in Appendix II
- 6. Longfin mako shark (*Isurus paucus*) – Inclusion in Appendix II
- 7. Porbeagle shark (*Lamna nasus*) Inclusion in Appendix II
- 8. Freshwater sawfish (*Pristis microdon*) Transfer from Appendix II to Appendix I

- 9. Hammerhead sharks (Sphyrna spp.)
- Inclusion in Appendix II
- 10. Spiny dogfish (*Squalus acanthias*)Inclusion in Appendix II
- 11. Requiem sharks (Carcharinidae) -Inclusion in Appendix II
- 12. Devil and manta rays (Mobulidae)
- Inclusion in Appendix II
- 13. Freshwater stingrays (Potamotrygonidae) – Inclusion in Appendix II
- 14. American eel (*Anguilla rostrata*) Inclusion in Appendix II
- 15. Northern bluefin tuna (*Thunnus* thynnus) Inclusion in Appendix I

Reptiles

- 16. Common snapping turtle (Chelydra serpentina) Inclusion in Appendix III (Note: The IUCN/SSC Tortoise and Freshwater Turtle Specialist Group recommended that the United States propose inclusion of the common snapping turtle in Appendix III at CoP15, although inclusion of a species in Appendix III is a unilateral decision and does not require a proposal to be brought forward to the CoP)
- 17. Spotted turtle (*Clemmys guttata*) Inclusion in Appendix II
- 18. Diamondback terrapin (*Malaclemys terrapin*) – Inclusion in Appendix II
- 19. Florida soft-shell turtle (*Apalone ferox*) Inclusion in Appendix II
- 20. Smooth soft-shell turtle (*Apalone mutica*) Inclusion in Appendix II
- 21. Spiny soft-shell turtle (*Apalone spinifera*) Inclusion in Appendix II
- 22. Giant leaf-tailed gecko (*Uroplatus giganteus*) Transfer from Appendix II to Appendix I

Mammals

- 23. Polar bear (*Ursus maritimus*) Transfer from Appendix II to Appendix I
- 24. Walrus (*Odobenus rosmarus*) Inclusion in Appendix II
- 25. Narwhal (Monodon monoceros) Transfer from Appendix II to Appendix I

C. What species proposals is the United States not likely to submit for consideration at CoP15, unless we receive significant additional information?

The United States does not intend to submit proposals for the following taxa unless we receive significant additional information indicating that a proposal is warranted. Information currently available for each of the taxa listed below does not support a defensible listing proposal. In addition to the taxa listed below, please note that the Animal Welfare Institute provided us with a tentative list of taxonomic groups

of animal species for which it was recommending that the United States consider amendments to the Appendices. These groups of species included "native and non-native species including freshwater turtles, sharks, furbearers, fish, and ungulates." We do not have the resources to evaluate such a broad request in the timeframes necessary for decision making for CoP15. Therefore, the United States does not intend to submit any proposals to the CoP as a result of this recommendation.

Fish

- 1. Gulper sharks (Centrophoridae) Inclusion in Appendix II
- 2. Guitarfishes and shovelnose rays (Rhinobatidae) – Inclusion in Appendix II
- 3. Beluga sturgeon (*Huso huso*) Transfer from Appendix II to Appendix I

Amphibians

- 4. Blue-sided frog (*Agalychnis annae*) – Inclusion in Appendix II
- 5. Morelet's tree frog (*Agalychnis* moreletii) Inclusion in Appendix II
- 6. Rancho Grande harlequin frog (Atelopus cruciger) – Inclusion in Appendix II
- 7. Helmeted water toad (Caudiverbera caudiverbera) Inclusion in Appendix II
- 8. Santa Fe frog (*Leptodactylus laticeps*) Inclusion in Appendix II
- 9. Giant Asian river frog (Limnonectes blythii) Inclusion in Appendix II
- 10. Fanged river frog (*Limnonectes macrodon*) Inclusion in Appendix II
- 11. Giant Philippine frog (*Limnonectes magnus*) – Inclusion in Appendix II
- 12. Albanian water frog (*Rana* shqiperica) Inclusion in Appendix II
- 13. Rain frog (*Scaphiophryne* boribory) Inclusion in Appendix II
- 14. Alto Verapaz salamander (*Bolitoglossa dofleini*) – Inclusion in Appendix II
- 15. Kaiser's spotted newt (*Neurergus kaiseri*) Inclusion in Appendix I or II
- 16. Kurdistan newt (*Neurergus* microspilotus) − Inclusion in Appendix Π

Reptiles

- 17. Alligator snapping turtle (*Macrochelys temminckii*) Inclusion in Appendix II
- 18. Map turtles (*Graptemys* spp.) Inclusion in Appendix II

In addition to the taxa listed above, Defenders of Wildlife and SSN suggested that more research be done on Limnonectes spp. frogs and the Laos wart newt (Paramesotriton laoensis). We need additional biological and trade information for both taxa to determine whether they meet the listing criteria in CITES Resolution Conf. 9.24 (Rev. CoP14).

Request for Information and Comments

We invite any information and comments concerning any of the possible CoP15 species proposals and proposed resolutions, decisions, and agenda items discussed above. You must submit your information and comments to us no later than the date specified in "DATES" above, to ensure that we consider them. Comments and materials received will be available for public inspection, by appointment, from 8 a.m. to 4 p.m., Monday through Friday, at either the Division of Management Authority or the Division of Scientific Authority. Our practice is to make comments, including names and home addresses of respondents, available for public review during regular business hours. Individual respondents may request that we withhold their home addresses from the administrative record, which we will honor to the extent allowable by law. There also may be circumstances in which we would withhold from the administrative record a respondent's identity, as allowable by law. If you wish to withhold your name and/or address, you must state this prominently at the beginning of your comment. We will make all comments and materials submitted by organizations or businesses, and by individuals identifying themselves as representatives or officials of organizations or businesses, available for public inspection in their entirety.

Observers

Article XI, paragraph 7 of CITES states the following:

"Any body or agency technically qualified in protection, conservation or management of wild fauna and flora, in the following categories, which has informed the Secretariat of its desire to be represented at meetings of the Conference by observers, shall be admitted unless at least one-third of the Parties present object:

(a) international agencies or bodies, either governmental or nongovernmental, and national governmental agencies and bodies; and

(b) national non-governmental agencies or bodies which have been approved for this purpose by the State in which they are located.

Once admitted, these observers shall have the right to participate but not to vote."

Persons wishing to be observers representing international nongovernmental organizations (which must have offices in more than one country) at CoP15 may request approval directly from the CITES Secretariat. Persons wishing to be observers representing U.S. national nongovernmental organizations at CoP15 must receive prior approval from our Division of Management Authority. Once we grant our approval, a U.S. national nongovernmental organization is eligible to register with the Secretariat and must do so at least 6 weeks prior to the opening of CoP15 to participate in CoP15 as an observer. Individuals who are not affiliated with an organization may not register as observers. An international nongovernmental organization with at least one office in the United States may register as a U.S. nongovernmental organization if it prefers.

A request submitted to us for approval as an observer should include evidence of technical qualifications in protection, conservation, or management of wild fauna and/or flora, on the part of both the organization and the individual representative(s). The request should also include copies of the organization's charter and/or bylaws, and a list of representatives it intends to send to CoP15. Organizations seeking approval for the first time should detail their experience in the protection, conservation, or management of wild fauna and/or flora, as well as their purposes for wishing to participate in CoP15 as an observer. An organization that we have previously approved as an observer at a meeting of the Conference of the Parties within the past 5 years must submit a request, but does not need to provide as much detailed information concerning its qualifications as an organization seeking approval for the first time. These requests should be sent to the Division of Management Authority (see "ADDRESSES," above).

Once we approve an organization as an observer, we will send the organization instructions for registration with the CITES Secretariat in Switzerland, including a meeting registration form and travel and hotel information. A list of organizations approved for observer status at CoP15 will be available upon request from the Division of Management Authority just prior to the start of CoP15.

Future Actions

We expect the CITES Secretariat to provide us with a provisional agenda for CoP15 within the next several months. Once we receive the provisional agenda, we will publish it in a **Federal Register** notice and provide the Secretariat's website URL. We will also provide the provisional agenda on our website at http://www.fws.gov/international.

The United States will submit any species proposals, and proposed resolutions, decisions, and agenda items for consideration at CoP15 to the CITES Secretariat 150 days prior to the start of the meeting (i.e., tentatively by mid-October, 2009). We will consider all available information and comments, including those received in writing during the comment period, as we decide which species proposals, and proposed resolutions, decisions, and agenda items warrant submission by the United States for consideration by the Parties. Approximately 4 months prior to CoP15, we will post on our website an announcement of the species proposals, and proposed resolutions, decisions, and agenda items submitted by the United States to the CITES Secretariat for consideration at CoP15.

Through an additional notice and website posting in advance of CoP15, we will inform you about preliminary negotiating positions on resolutions, decisions, and amendments to the Appendices proposed by other Parties for consideration at CoP15. We will also publish an announcement of a public meeting tentatively to be held approximately 2 months prior to CoP15, to receive public input on our positions regarding items submitted by other Parties.

Bureau of Land Management

[LLNM920000 L13100000 FI0000; NMNM-119264]

Notice of Proposed Reinstatement of Terminated Oil and Gas Lease NMNM 119264

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Reinstatement of Terminated Oil and Gas Lease.

SUMMARY: Under the Class II provisions of Title IV, Public Law 97–451, the Bureau of Land Management (BLM) received a petition for reinstatement of oil and gas lease NMNM 119264 from the lessee, J Bar Cane Inc., for lands in Chaves County, New Mexico. The petition was filed on time and was accompanied by all the rentals due since the date the lease terminated under the law.

FOR FURTHER INFORMATION CONTACT:

Lourdes B. Ortiz, Bureau of Land Management, New Mexico State Office, P.O. Box 27115, Santa Fe, New Mexico 87502 or at (505) 438–7586.

SUPPLEMENTARY INFORMATION: No valid lease has been issued that affects the lands. The lessee agrees to new lease terms for rentals and royalties of \$10.00 per acre or fraction thereof, per year, and 16²/₃ percent, respectively. The lessee paid the required \$500.00 administrative fee for the reinstatement of the lease and \$166.00 cost for publishing this Notice in the Federal Register. The lessee met all the requirements for reinstatement of the lease as set out in sections 31(d) and (e) of the Mineral Leasing Act of 1920 (30 U.S.C. 188). We are proposing to reinstate lease NMNM 119264, effective the date of termination, December 1, 2008, under the original terms and conditions of the lease and the increased rental and royalty rates cited above.

Lourdes B. Ortiz,

Land Law Examiner, Fluids Adjudication Team

Bureau of Land Management

[LLCON04000-L12200000-PA0000]

Notice of Proposed Supplementary Rules for Public Lands in Colorado: McInnis Canyons National Conservation Area

AGENCY: Bureau of Land Management, Department of the Interior.

ACTION: Proposed supplementary rules.

SUMMARY: The Bureau of Land Management's (BLM) Grand Junction Field Office is proposing supplementary rules to regulate conduct on public lands within the McInnis Canyons National Conservation Area (MCNCA). These supplementary rules are needed to implement decisions found in the McInnis Canyons National Conservation Area Resource Management Plan to protect public health, safety, lands and resources.

DATES: Comments on the proposed supplementary rules must be received or postmarked by September 11, 2009 to be assured consideration. The BLM is not obligated to consider comments postmarked or received after this date.

ADDRESSES: Please mail comments to Katie Stevens, McInnis Canyons
National Conservation Area, 2815 H
Road, Grand Junction, Colorado 81506; or e-mail comments to
gjfo_webmail@blm.gov, Attn: "McInnis Canyons."

FOR FURTHER INFORMATION CONTACT:

Katie Stevens, McInnis Canyons National Conservation Area, (970) 244–3049, e-mail: *Katie_A_Stevens@blm.gov* or Eric Boik, BLM Field Staff Law Enforcement Ranger, (970) 244–3070, e-mail: *Eric_Boik@blm.gov*

SUPPLEMENTARY INFORMATION:

I. Public Comment Procedures

Written comments on the proposed supplementary rules should be specific, be confined to issues pertinent to the proposed supplementary rules, and explain the reason for any recommended change. Where possible, comments should reference the specific section or paragraph of the proposal which the comment is addressing. The BLM is not obligated to consider or include in the Administrative Record for the final supplementary rules comments either postmarked or electronically dated after the deadline or delivered to an address other than the address listed above (See ADDRESSES).

Comments (including names, street addresses, and other contact information of respondents) will be available for public review at 2815 H Road, Grand Junction, Colorado 81506. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

II. Background

These proposed supplementary rules apply to the McInnis Canyons National Conservation Area (MCNCA), approximately 122,300 acres of public lands which include the 75,550 acre Black Ridge Canyons Wilderness. The MCNCA, originally known as the Colorado Canyons National Conservation Area, was established by Public Law 106–353 on October 24, 2000. It was renamed for Representative Scott McInnis by Public Law 108–400 on January 1, 2005.

The MCNCA is located 10 miles west of Grand Junction, Colorado and is bordered by the Colorado National Monument to the east and the Colorado/ Utah state line to the west. A small portion of the Black Ridge Canyons Wilderness (5,200 acres) extends into Grand County, Utah. The proposed supplementary rules will help the BLM achieve management objectives and implement decisions in the MCNCA Resource Management Plan (RMP) approved on October 24, 2004.

III. Discussion of the Proposed Supplementary Rules

In preparing the RMP, the BLM sought public review of four alternatives and then approved adaptive management, its preferred alternative. Adaptive management allows for flexibility in management actions based on the results of resource and visitor monitoring.

The RMP includes specific management actions that restrict certain activities and define allowable uses. The proposed supplementary rules implement these management actions within the MCNCA. Many of the proposed supplementary rules apply to the entire area, but some apply only to specific areas within the NCA. The proposed supplementary rules are written to allow for adaptive management.

IV. Procedural Matters

Executive Order 12866, Regulatory Planning and Review

The supplementary rules do not comprise a significant regulatory action and are not subject to review by the Office of Management and Budget under Executive Order 12866. The supplementary rules will not have an annual effect of \$100 million or more on the economy. They will not adversely affect in a material way the economy, productivity, competition, jobs, the environment, public health or safety, or state, local, or tribal governments or communities. The supplementary rules will not create a serious inconsistency or otherwise interfere with an action taken or planned by another agency. The supplementary rules do not materially alter the budgetary effects of entitlements, grants, user fees, or loan programs or the rights or obligations of their recipients; nor do they raise novel legal or policy issues. The supplementary rules are merely rules of conduct for public use of a limited area of public lands.

Clarity of the Regulations

Executive Order 12866 requires each agency to write regulations that are simple and easy to understand. The BLM invites your comments on how to make the supplementary rules easier to understand, including answers to questions such as the following:

1. Are the requirements in the supplementary rules clearly stated?

2. Do the supplementary rules contain technical language or jargon that interferes with their clarity?

3. Does the format of the supplementary rules (grouping and order of sections, use of headings, paragraphing, etc.) aid or reduce clarity?

4. Is the description of the supplementary rules in the SUPPLEMENTARY INFORMATION section of this preamble helpful in understanding the supplementary rules? How could this description be more helpful in making the supplementary rules easier to understand?

Please send any comments you have on the clarity of the rule to the address specified in the **ADDRESSES** section.

National Environmental Policy Act

In July 2004, the BLM completed an environmental impact statement (EIS) as part of the development of the Proposed Resource Management Plan and Final Environmental Impact Statement for the Colorado Canyons National Conservation Area and Black Ridge Canyons Wilderness (now McInnis Canyons National Conservation Area).

During the National Environmental Policy Act process, many proposed decisions were fully analyzed, including the substance of these supplementary rules. The pertinent analysis can be found in Chapter 2, Alternatives, of the Resource Management Plan (RMP). The Record of Decision for the RMP was signed by the BLM State Director of Colorado in October 2004. These proposed supplementary rules provide for enforcement of decisions in the RMP. The rationale for the decisions made in the plan is fully covered in the EIS. The EIS is available for review in the BLM administrative record at the address specified in the ADDRESSES

Regulatory Flexibility Act

Congress enacted the Regulatory Flexibility Act (RFA) of 1980, as amended (5 U.S.C. 601-612) to ensure that government regulations do not unnecessarily or disproportionately burden small entities. The RFA requires a regulatory flexibility analysis if a rule would have a significant economic impact, either detrimental or beneficial, on a substantial number of small entities. The supplementary rules merely establish rules of conduct for public use of a limited area of public lands. Therefore, the BLM has determined under the RFA that the supplementary rules would not have a significant economic impact on a substantial number of small entities.

Small Business Regulatory Enforcement Fairness Act

The supplementary rules are not considered a major rule as defined under 5 U.S.C. 804(2). The supplementary rules merely establish rules of conduct for public use of a limited area of public lands and do not affect commercial or business activities of any kind.

Unfunded Mandates Reform Act

The supplementary rules do not impose an unfunded mandate on state, local, or tribal governments in the aggregate, or on the private sector of more than \$100 million per year; nor do they have a significant or unique effect on small governments. The supplementary rules have no effect on governmental or tribal entities and would impose no requirements on any of these entities. The supplementary rules merely establish rules of conduct for public use of a limited selection of public lands and do not affect tribal, commercial, or business activities of any kind. Therefore, the BLM is not required to prepare a statement containing the information required by the Unfunded

Mandates Reform Act (2 U.S.C. 1531 et seq.).

Executive Order 12630, Governmental Actions and Interference With Constitutionally Protected Property Rights (Takings)

The supplementary rules do not have significant takings implications, nor are they capable of interfering with Constitutionally-protected property rights. The supplementary rules merely establish rules of conduct for public use of a limited area of public lands and do not affect anyone's property rights. Therefore, the BLM has determined that these rules will not cause a taking of private property or require preparation of a takings assessment under this Executive Order.

Executive Order 13132, Federalism

These supplementary rules will not have a substantial direct effect on the states, the relationship between the national government and the states, nor the distribution of power and responsibilities among the various levels of government. These supplementary rules do not come into conflict with any state law or regulation. Therefore, under Executive Order 13132, the BLM has determined that these supplementary rules do not have sufficient Federalism implications to warrant preparation of a Federalism Assessment.

Executive Order 12988, Civil Justice Reform

Under Executive Order 12988, these supplementary rules will not unduly burden the judicial system and that they meet the requirements of sections 3(a) and 3(b)(2) of the Order.

Executive Order 13175, Consultation and Coordination With Indian Tribal Governments

In accordance with Executive Order 13175, these supplementary rules do not include policies that have tribal implications. The supplementary rules do not affect land held for the benefit, nor impede the rights of Indians or Alaska Natives.

Paperwork Reduction Act

These proposed supplementary rules do not directly provide for any information collection that the Office of Management and Budget must approve under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. Any information collection that may result from Federal criminal investigations or prosecution conducted under these proposed supplementary rules is exempt from the

provisions of the Paperwork Reduction Act of 1995, 44 U.S.C. 3518(c)(1).

Author

The principal author of these proposed supplementary rules is Eric Boik, BLM Field Staff Law Enforcement Ranger, McInnis Canyons National Conservation Area, 2815 H Road Grand Junction, Colorado 81506.

For the reasons stated in the preamble and under the authorities for supplementary rules found under 43 U.S.C. 1740 and 43 CFR 8365.1–6, the Colorado State Director, Bureau of Land Management, proposes supplementary rules for public lands managed by the BLM in Colorado, to read as follows:

Supplementary Rules for McInnis Canyons

- 1. These supplementary rules apply, except as specifically exempted, to activities within the McInnis Canyons National Conservation Area (MCNCA), which is comprised of public lands administered by the Bureau of Land Management near Grand Junction, Colorado.
- 2. These supplementary rules are in effect on a year-round basis and will remain in effect until modified by the authorized officer.
- 3. You must not camp in sites or areas not designated as open to camping by a BLM sign or map.
- 4. You must not start or maintain a fire in sites or areas not designated as open for such use by a BLM sign or map.
- 5. In areas designated as open for starting or maintaining a fire, any fire must be fully contained in a metal fire grate, fire pan, or other metal device to contain ashes. Mechanical stoves and other appliances that are fueled by gas, and equipped with a valve that allows the operator to control the flame, are among the devices that meet this requirement.
- 6. When starting or maintaining a fire outside of a developed recreation site, you must contain and completely remove fire ashes and debris from BLM land.
- 7. You must not cut, collect, or use live, dead, or down wood except in areas designated as open to such use by a BLM sign or map.
- 8. The hours of operation are sunrise to sunset in any area that is for day-use only as indicated by a BLM sign or map. You must not enter or remain in such an area after sunset or before sunrise.
- 9. You must not park in areas not designated for parking by a BLM sign or map.

- 10. Exceeding group size limits, as indicated by a BLM sign or map, is prohibited.
- 11. Exceeding length of stay limits, as indicated by a BLM sign or map, is prohibited.
- 12. Individuals and/or groups must register and possess proof of registration as indicated by a BLM sign or map.
- 13. You must not use roads and/or trails by motorized or mechanized vehicle or equestrian or pedestrian travel except where designated as open to such use by a BLM sign or map.
- 14. You must not discharge a firearm of any kind, including those used for target shooting or paintball. Licensed hunters in legitimate pursuit of game during the proper season with appropriate firearms, as defined by the Colorado Division of Wildlife, are exempt from this rule.
- 15. You must not collect or disturb rocks, minerals, fossils, chipped rocks, arrowheads, or other paleontological, prehistoric or historical artifacts.
- 16. You must not enter an area that is designated as closed by a BLM sign or map.
- 17. You must remove and properly dispose of canine solid waste when and where indicated by a BLM sign or map.
- 18. You must not bring any dog into the MCNCA that is not controlled by visual, audible, or physical means.
- 19. You must not burn material, including wood, that contains nails, glass, or any metal.
- 20. You must dispose of solid human waste as indicated by a BLM sign or map.

Exemptions: The following persons are exempt from these supplementary rules:

- A. Any Federal, state, local and/or military personnel in the scope of their official duties;
- B. Members of any organized rescue or fire-fighting force in performance of their official duties; and
- C. Persons, agencies, municipalities, or companies holding an existing special-use permit inside the MCNCA and operating within the scope of their permit.

Penalties: Any person who violates any of these supplementary rules may be tried before a United States Magistrate and fined no more than \$1,000 or imprisoned for no more than 12 months, or both. 43 U.S.C. 1733(a); 43 CFR 8360.0–7. Such violations may also be subject to the enhanced fines provided for by 18 U.S.C. 3571. In accordance with 43 CFR 8365.1–7, State

or local officials may also impose penalties for violations of Colorado law.

Dave Hunsaker,

Associate State Director. [FR Doc. E9–16416 Filed 7–10–09; 8:45 am] BILLING CODE 4310–JB–P

Notice of Realty Action; Extension of Segregation of Public Lands for Proposed Sale in Lyon County, NV

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action.

SUMMARY: This notice extends the segregation on 998.2 acres of public lands in Lyon County, Nevada for up to 2 additional years.

FOR FURTHER INFORMATION CONTACT: Fred Slagle, (775) 885–6115.

SUPPLEMENTARY INFORMATION: The following described public lands are located southwest (sec. 22) and south (sec. 36) of Fernley, Nevada:

Mount Diablo Meridian

T. 20 N., R. 24 E.,

Sec. 22, 1ots 1 to 6, inclusive, NE¹/₄, E¹/₂NW¹/₄, E¹/₂SW¹/₄, and W¹/₂SE¹/₄; Sec. 36, E¹/₂NE¹/₄NE¹/₄, NW¹/₄NE¹/₄, N¹/₂NW¹/₄NE¹/₄, and W¹/₂.

The areas described aggregate 998.2 acres, more or less, in Lyon County.

Notification of a 2-year segregation of the described lands from appropriation under the public land laws, including the mining laws, except the sale provisions of the Federal Land Policy Management Act, appeared in the Federal Register on August 20, 2007 (72 FR 46509). The Bureau of Land Management (BLM) has completed an environmental analysis and by decision dated August 11, 2008, found the lands suitable for sale. The BLM has encountered unanticipated processing delays, including a pending action to clear an encumbrance on portions of the sale area. In accordance with 43 CFR 2711.1–2(d), the BLM Nevada State Director has determined that extension of this segregation is necessary to provide sufficient time to complete final processing steps required to offer these lands for sale. The segregative effect will terminate on issuance of a patent, publication in the Federal Register of a termination of the segregation, or on August 20, 2011, whichever occurs first.

(Authority: 43 CFR 2711.1-2(d))

Bryant Smith,

Associate District Manager, Carson City District.

Bureau of Indian Affairs

Restoration of Wilton Rancheria

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: This notice is published pursuant to a court order and relates to restoration of the Wilton Miwok Rancheria, its members, and Dorothy Andrews, and the Me-Wuk Indian Community of the Wilton Rancheria. See the **SUPPLEMENTARY INFORMATION** section of this notice for details.

DATES: The restoration is effective as of June 8, 2009.

FOR FURTHER INFORMATION CONTACT: Jane Smith, Office of the Solicitor—Division of Indian Affairs, 1849 C Street, NW., MS–6456, Washington, DC 20240. Telephone: (202) 208–6526.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to the Order issued June 8, 2009, in *Wilton Miwok Rancheria and Dorothy Andrews* v. *Salazar*, Civil No. C–07–02681 (JF) (PVT), and *Me-Wuk Indian Community of the Wilton Rancheria* v. *Salazar*, Civil No. C 07–05706 (JF), United States District Court for the Northern District of California.

Plaintiffs, Wilton Miwok Rancheria, its members, and Dorothy Andrews, and the Me-Wuk Indian Community of the Wilton Rancheria, hereinafter the Wilton Rancheria, are relieved from the application of section 10(b) of the Act of August 18, 1958, 72 Stat. 619, as amended by the Act of August 11, 1964, 78 Stat. 390, and shall be deemed entitled to any of the benefits or services provided or performed by the United States for Indians because of the status as Indian, if otherwise qualified under applicable laws and regulations.

The Wilton Rancheria is an Indian entity with the same status as it possessed prior to distribution of the assets of the Rancheria and shall be deemed entitled to any of the benefits or services provided or performed by the United States for Indian Tribes, bands, communities or groups because of its status as an Indian Tribe.

The Distribution Plan for the Wilton Rancheria is of no further force and effect and shall not be further implemented, provided, however, that this provision shall not affect any vested rights created under the Distribution Plan.

Dated: July 1, 2009.

Paul Tsosie,

Acting Assistant Secretary—Indian Affairs. [FR Doc. E9–16481 Filed 7–10–09; 8:45 am]

Bureau of Land Management

[LLIDC0100000.L12200000.IA0000.241A.0; 4500007249]

Notice of Proposed Supplementary Rules for the Blue Creek Bay Public Lands Managed by the Coeur d'Alene Field Office, Kootenai County, ID

AGENCY: Bureau of Land Management, Interior.

ACTION: Proposed Supplementary Rules.

SUMMARY: The Bureau of Land Management (BLM) is proposing supplementary rules for use of 736 acres of public lands in and around Blue Creek Bay on Lake Coeur d'Alene. The proposed supplementary rules would implement decisions from the Blue Creek Bay Recreation Project Plan, approved January 7, 2009. The rules are necessary to protect public land natural resources and provide for the public's health and safety.

DATES: Comments on the proposed supplementary rules must be received in person or postmarked by August 12, 2009, to be assured consideration. In developing final supplementary rules, the BLM may not consider comments postmarked or received in person or by electronic mail after this date.

ADDRESSES: Mail or hand deliver all comments to the Bureau of Land Management, Coeur d'Alene Field Office, 3815 Schreiber Way, Coeur d'Alene, Idaho 83815 or e-mail comments to brian white@blm.gov.

FOR FURTHER INFORMATION CONTACT: Eric R. Thomson, Field Manager, or Brian White, Outdoor Recreation Planner, Coeur d'Alene Field Office, 3815 Schreiber Way, Coeur d'Alene, Idaho 83815 or call (208) 769–5000.

SUPPLEMENTARY INFORMATION:

I. Public Comment Procedures

This notice and a map of the involved area are available for public review at the BLM Coeur d'Alene Field Office. You may mail or hand deliver comments to the Bureau of Land Management, Coeur d'Alene Field Office, 3815 Schreiber Way, Coeur

d'Alene, Idaho 83815 during regular business hours from 7:45 a.m. to 4:30 p.m., Monday through Friday, except federal holidays; or e-mail comments to brian white@blm.gov. Written comments on the proposed supplementary rules should be specific, confined to issues pertinent to the proposals, and explain the reason for any recommended change. Where possible, your comments should reference the specific section or paragraph of the proposal that you are addressing. The BLM may not necessarily consider or include comments in the administrative record for the final rule that are received after the comment period closes (see DATES) or comments delivered to an address other than that listed above (see ADDRESSES).

Comments, including names, street addresses, and other contact information of respondents, will be available for public review at 3815 Schreiber Way, Coeur d'Alene, Idaho 83815, during regular business hours.

Before including your address, telephone number, e-mail address, or other personal indentifying information in your comment, be advised that your entire comment—including your personal indentifying information—may be made publicly available at any time. While you can ask us in your comment to withhold from public review your personal identifying information, we cannot guarantee that we will be able to do so.

II. Background

Through a series of transactions, the BLM acquired 736 acres of public land surrounding Blue Creek Bay on Lake Coeur d'Alene over a 10-year period. The acquisition generated considerable public interest and required a substantial investment of public funds. The parcels were acquired with the intent of providing public access to the lake while retaining many of the natural elements in close proximity to a rapidly growing urban/suburban area. The key issues are public health and safety and long-term management of a public access site on Lake Coeur d'Alene.

In developing a recreation plan for this area, BLM conducted extensive public outreach in 2007 and 2008 and analyzed alternative levels of development and different management strategies for the area. The plan considered the physical location and characteristics of the area, the natural resource values, recreational opportunities and public input. The Blue Creek Bay Recreation Project Plan, completed in January 2009, identified a modest level of development that

included day-use only waterfront facilities, such as a parking area, docks, vault toilet and picnic sites, an upland trailhead and non-motorized trails; and interpretive displays for environmental education. The recreation plan also identified supplementary rules necessary for the safety of the adjacent landowners, public land users, and other visitors to the area.

III. Discussion of Proposed Supplementary Rules

The proposed supplementary rules would implement decisions from the Blue Creek Bay Recreation Project Plan, approved January 7, 2009. The rules are necessary to protect natural resources on public land and provide for the public's health and safety. These supplementary rules would replace five existing restrictions orders and include one new restriction on overnight boat moorage.

The following proposed supplementary rules would implement related decisions from the Blue Creek Bay Recreation Project Plan. Additional background information and justification are included following each proposed rule.

(1) You must not occupy or use the Blue Creek Bay public lands from one hour after sundown to one hour before sunrise.

The subject public lands, easily accessible from and in close proximity to a growing urban center, have attracted a variety of nuisance activities involving local youths, day laborers and drug users; that are incompatible with legitimate uses of the area. Unauthorized uses have included underage drinking parties and illegal drug use, illegal campfires, littering, and vandalism. Many of these activities occur when BLM personnel are not available for patrols or public contact. Numerous complaints have been received from local residents regarding nighttime activities and disturbances,

particularly at the log landing area.

The emergency overnight occupancy and use restriction, implemented in April 2008, proved effective in reducing these unauthorized uses of the area. The overnight occupancy and use restriction has provided an additional resource protection tool for BLM Law Enforcement Rangers as well as local law enforcement agencies.

(2) You must not moor any boat overnight on any BLM-managed structure or shoreline.

Local residents strongly objected to overnight use of the subject public lands throughout the planning process. The project plan for this area allows for dayuse only, including the proposed boat docks. This rule would clarify that all forms of overnight occupancy and use are prohibited, including moorage at structures in the area. The overnight occupancy and use restriction, in place since April 2008, effectively eliminated overnight moorage and the supplementary rule would continue this restriction.

When the Kootenai County
Waterways Board considered the
placement of overnight mooring buoys
in Blue Creek Bay, the proposal was
rejected due to public objections.
Although BLM does not manage the lake
bottom, rejection of the county's buoy
proposal indicates strong public desire
for no overnight occupancy in the Blue
Creek Bay area.

(3) You must not start or maintain any open campfires, except when the campfire is completely contained within permanently installed steel fire grates or

cooking grills.

This supplementary rule would replace an existing fire restriction order that has been in place for several years in this area. Fires have been a continuous problem as some people have constructed huge bonfires from wooden pallets, freshly (and illegally) collected firewood, beer cans and bottles, and various other forms of toxic and non-toxic refuse. Hundreds of nails and remnants from the burned pallets remained in the parking area and resulted in punctured vehicle tires. This proposed rule is also intended to reduce the risk of wildfire in the area, a concern raised by neighboring private landowners and other members of the public during the planning process.

(4) You must not possess a loaded

firearm, except that:

A. You may possess firearms legally within a motor vehicle in accordance with Idaho State Code.

B. Waterfowl hunters may transport unloaded shotguns by the most direct route from either the Yellowstone Road or the Landing Road to the mud flat area for the purpose of hunting waterfowl below the high water mark of Lake Coeur d'Alene within Blue Creek Bay.

The proximity of the site to neighboring homes and the fact that the property is entirely surrounded by private land makes firearm use an inherently hazardous situation. The public land area, comprising 736 acres, is not large enough to safely support hunting with firearms and the likelihood of bullets straying onto private land is quite high. As recreation facilities are constructed and public use of the area increases, the concerns for human health and safety also increase and there will be a need to protect the public investment from vandalism by

use of firearms. Replacing the existing firearm restriction with this proposed supplementary rule is in the best interest of public safety and protection of future recreation facilities for the public.

The provision for legal waterfowl hunting on lands managed by the Idaho Department of Lands (IDL) is intended to allow this legitimate use to continue on State land accessible only by crossing BLM lands.

(5) You must not use motor vehicles off county roads.

The area's configuration, small size, topography and existing trail conditions make the area impractical for use by off-highway vehicles (OHVs). The area is designated as a limited use area in the 2007 Coeur d'Alene RMP, and the project plan allows no OHV use on trails that will be developed. Because the BLM acquired this area for management and retention of its natural values, OHV use would not be compatible with the trail improvements in this area. The proposed rule will help ensure the public clearly understands the non-motorized nature of the area.

(6) You must not cut or collect firewood.

Firewood cutting restrictions have been in place for several years as the BLM manages the timber and other resources in the area. Due to the area's accessibility and proximity to a large urban/suburban population center, it would be an attractive area for firewood collection by local residents. If firewood cutting and collecting were allowed, areas along the main roads would receive heavy use which would change the character of the forest in those areas. Firewood cutting and collecting is also incompatible with the variety of recreation uses that will be promoted at the site over the next several years.

The supplementary rules are proposed under the authority of the Federal Land Policy and Management Act (FLPMA), 43 U.S.C. 1740 and its implementing regulations at 43 CFR 8365.1–6. This notice, with detailed maps, will be posted at the Coeur d'Alene Field Office. If adopted, all supplementary rules would be clearly posted on the area's kiosks, in addition to perimeter and trail signage typical of recreation sites.

The proposed supplementary rules would implement a recreation plan that has been available for public comment. In these circumstances, a comment period of 30 days provides adequate opportunity for meaningful analysis, and reasonable time within which to formulate comments for submission.

IV. Procedural Matters

Executive Order 12866, Regulatory Planning and Review

These proposed supplementary rules are not a significant regulatory action and are not subject to review by Office of Management and Budget under Executive Order 12866. These proposed supplementary rules will not have an effect of \$100 million or more on the economy. They will not adversely affect in a material way the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities. These proposed supplementary rules will not create a serious inconsistency or otherwise interfere with an action taken or planned by another agency. These proposed supplementary rules do not alter the budgetary effects of entitlements, grants, user fees, or loan programs or the rights or obligations of their recipients; nor do they raise novel legal or policy issues. They merely impose limitations on certain recreational activities on certain public lands to protect natural resources and human health and safety.

Clarity of the Supplementary Rules

Executive Order 12866 requires each agency to write regulations that are simple and easy to understand. The BLM invites your comments on how to make these proposed supplementary rules easier to understand, including answers to questions such as the following:

(1) Are the requirements in the proposed supplementary rules clearly stated?

(2) Do the proposed supplementary rules contain technical language or jargon that interferes with their clarity?

(3) Is the description of the proposed supplementary rules in the "Discussion of Supplementary Rules" section of this preamble helpful to your understanding of the proposed supplementary rules? How could this description be more helpful in making the proposed supplementary rules easier to understand?

Please send any comments you have on the clarity of the supplementary rules to the address specified in the ADDRESSES section.

National Environmental Policy Act

As documented in Environmental Assessment ID–410–2008–EA–60 for Blue Creek Bay Recreation Project Plan and the associated Finding of No Significant Impact and Decision Record, the proposed supplementary rules do not constitute a major Federal action significantly affecting the quality of the human environment under section 102(2)(C) of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4332(2)(C).

Regulatory Flexibility Act

Congress enacted the Regulatory Flexibility Act of 1980 (RFA), as amended, 5 U.S.C. 601-612, to ensure that government regulations do not unnecessarily or disproportionately burden small entities. The RFA requires a regulatory flexibility analysis if a rule would have a significant economic impact, either detrimental or beneficial, on a substantial number of small entities. These proposed supplementary rules should have no effect on business entities of whatever size. They merely would impose reasonable restrictions on certain recreational activities on certain public lands to protect natural resources and public facilities, and human health and safety. Therefore, BLM has determined under the RFA that these proposed supplementary rules would not have a significant economic impact on a substantial number of small entities.

Small Business Regulatory Enforcement Fairness Act

These proposed supplementary rules are not a "major rule" as defined at 5 U.S.C. 804(2). They would not result in an effect on the economy of \$100 million or more, in an increase in costs or prices, or in significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreignbased enterprises in domestic and export markets. They would merely impose reasonable restrictions on certain recreational activities on certain public lands to protect natural resources and the environment, and human health and safety.

Unfunded Mandates Reform Act

These proposed supplementary rules do not impose an unfunded mandate on state, local or tribal governments or the private sector of more than \$100 million per year; nor do these proposed supplementary rules have a significant or unique effect on State, local, or tribal governments or the private sector. They would merely impose reasonable restrictions on certain recreational activities on certain public lands to protect natural resources and public facilities, and human health and safety. Therefore, BLM is not required to prepare a statement containing the information required by the Unfunded

Mandates Reform Act (2 U.S.C. 1531 et seq.)

Executive Order 12630, Governmental Actions and Interference With Constitutionally Protected Property Rights (Takings)

The proposed supplementary rules are not a government action capable of interfering with constitutionally protected property rights. The proposed supplementary rules do not address property rights in any form, and do not cause the impairment of anybody's property rights. Therefore, the BLM has determined that these proposed supplementary rules would not cause a taking of private property or require further discussion of takings implications under this Executive Order.

Executive Order 13132, Federalism

The proposed supplementary rules will not have a substantial direct effect on the states, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Government vehicles are expressly excluded from the effect of the vehicle restrictions. The firearm restrictions in the supplementary rules do not apply to waterfowl hunting with a valid state hunting license on lands below the ordinary high-water mark of Lake Coeur d'Alene; these lands are managed by the Idaho Department of Lands. Therefore, in accordance with Executive Order 13132, BLM has determined that the proposed supplementary rules do not have sufficient federalism implications to warrant preparation of a Federalism Assessment.

Executive Order 12988, Civil Justice Reform

Under Executive Order 12988, the BLM has determined that these proposed supplementary rules would not unduly burden the judicial system and that the requirements of sections 3(a) and 3(b)(2) of the Order are met. The supplementary rules contain rules of conduct for recreational use of certain public lands to protect human health and the environment.

Executive Order 13175, Consultation and Coordination With Indian Tribal Governments

In accordance with Executive Order 13175, the BLM has found that these proposed supplementary rules do not include policies that have tribal implications. The proposed supplementary rules do not affect lands

held for the benefit of Indians, Aleuts, or Eskimos.

Paperwork Reduction Act

These proposed supplementary rules do not directly provide for any information collection that the Office of Management and Budget must approve under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. Any information collection that may result from Federal criminal investigations or prosecutions conducted in enforcing these proposed supplementary rules is exempt from the provisions of the Paperwork Reduction Act of 1995, 44 U.S.C. 3518(c)(1).

Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

These proposed supplementary rules do not comprise a significant energy action. The supplementary rules would not have an adverse effect on energy supplies, production, or consumption. They only address actions within a recreation area on BLM land and have no connection with energy policy. The restrictions on vehicle use should have no substantial effect on fuel consumption, and no other provision in the supplementary rules has any relationship to energy supply, distribution, or use.

Author

The principal author of these supplementary rules is Brian White, Outdoor Recreation Planner, Coeur d'Alene Field Office, Bureau of Land Management.

For the reasons stated previously, and under the authority for supplementary rules at 43 U.S.C. 1740 and 43 CFR 8365.1–6, the Idaho State Director, Bureau of Land Management, proposes to issue these supplementary rules for the public lands in the Blue Creek Bay area managed by the BLM Coeur d'Alene Field Office, to read as follows:

Supplementary Rules for the Blue Creek Bay Public Lands Managed by the Coeur d'Alene Field Office, Kootenai County, ID

Supplementary Rules

These supplementary rules apply, except as specifically exempted, to the following described public land, all of which are contiguous lands in Boise Meridian, Kootenai County, Idaho:

T. 50 N., R. 2 W.,

Sec. 31, lots 5 to 8, inclusive, and $E^{1/2}NE^{1/4}SW^{1/4}$.

T. 50 N., R. 3 W.,

Sec. 26, portion of SW½ lying south and west of Sunnyside Road;

Sec. 35, portions of lots 1, 2, and 7, lots 4, 5, and 6, $W^{1}/_{2}NE^{1}/_{4}$, and $N^{1}/_{2}NW^{1}/_{4}$. *T.* 49 *N.*, *R.* 2 *W.*,

Sec. 6, lot 4. T. 49 N., R. 3 W.,

Sec. 1, portions of lots 1, 2, 5, and 6.

- 1. You must not occupy or use the Blue Creek Bay public lands from one hour after sundown to one hour before sunrise.
- 2. You must not moor any boat overnight on any BLM-managed structure or shoreline.
- 3. You must not start or maintain any open campfires, except when they are completely contained within permanently installed steel fire grates or cooking grills.
- 4. You must not possess a loaded firearm, except that:
- A. You may possess a firearm legally within a motor vehicle in accordance with Idaho State Code.
- B. Waterfowl hunters may transport unloaded shotguns by the most direct route from either the Yellowstone Road or the Landing Road to the mud flat area for the purpose of hunting waterfowl below the high water mark of Lake Coeur d'Alene within Blue Creek Bay.
- 5. You must not use motor vehicles off county roads.
- 6. You must not cut or collect firewood.

Exceptions

These supplementary rules do not apply to emergency, law enforcement, and Federal or other government entities while conducting official or emergency duties. Motor vehicle restrictions likewise do not apply to emergency, law enforcement, and Federal or other government motor vehicles while conducting official or emergency duties. Exemptions to these supplementary rules may be granted on a case-by-case basis as deemed appropriate by the Authorized Officer.

The prohibition of firearm possession in rule 4 has no effect on hunting by licensed hunters in legitimate pursuit of waterfowl on lands managed by Idaho Department of Lands during the proper season with appropriate firearms.

Enforcement

Any person who violates any of these supplementary rules may be tried before a United States Magistrate and fined no more than \$1,000, or imprisoned for no more than 12 months, or both. 43 U.S.C. 1733(a); 43 CFR 8360.0–7; 43 CFR 2932.57(b). Such violations may also be subject to the enhanced fines provided for by 18 U.S.C. 3571. In accordance with 43 CFR 8365.1–7, State or local

officials may also impose penalties for violations of Idaho law.

Peter J. Ditton,

Acting Idaho State Director. [FR Doc. E9–16426 Filed 7–10–09; 8:45 am] BILLING CODE 4310–GG-P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[FBMS Charge Code: LLCAC070000, MU0000]

Notice of Temporary Closure in Mono County, CA

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of Temporary Closure.

SUMMARY: Under the authority of 43 CFR 8364.1, notice is hereby given that a segment of a designated road on public land is temporarily closed to all motorized vehicle use and operation, including off-highway vehicles. The purpose of this temporary closure is to prevent the spread of the invasive Quagga Mussel into Crowley Lake. The Quagga Mussel poses a significant threat to the fisheries of the eastern Sierra as well as to hydrologic infrastructures.

DATES: This closure order will be effective upon publication of this notice in the **Federal Register** through October 31, 2009.

ADDRESSES: BLM Bishop Field Office, 351 Pacu Lane, Bishop, CA 93514 (760) 872–5000.

FOR FURTHER INFORMATION CONTACT:

Anne Halford, Bureau of Land Management, 351 Pacu Lane Ste. 100, Bishop, CA 93514. Phone: (760) 872– 5022.

SUPPLEMENTARY INFORMATION: The temporarily closed road section is 0.47 mile in length from the BLM access point to the Los Angeles Department of Water and Power (LADWP) access point and is described as the designated access point on BLM administered lands in the Long Valley area of Mono County, California in T. 3 S, R. 29 E, NE1/4 of SW1/4 section 27. The access point will be marked with a gate and appropriate signage informing the public about the closure. Closure signs will be posted at the entrance point of closure. Maps of the closure area can be obtained at the BLM Bishop Field Office.

The BLM is implementing this action on a 0.47 mile section of road on public land in Mono County, California. The BLM Bishop Field Office is implementing the closure in coordination with the Los Angeles Department of Water and Power (LADWP) to secure uncontrolled access to Crowley Lake to prevent watercraft that may carry Quagga Mussels from entering the lake.

Discussion of the Order: Under the authority of 43 CFR 8364.1 the BLM will enforce the following rules on public lands within the closed area: No person shall enter the closed area with a motorized vehicle. The following are exempt from this closure: (1) Any Federal, State or local government law enforcement officer or employee engaged in enforcing this closure order or member of an organized rescue or fire fighting force while in the performance of an official duty; and (2) Persons with a permit specifically authorizing the otherwise prohibited act; (3) Any BLM employee, agent, or contractor while in the performance of an official duty, or any person expressly authorized by the BLM.

Penalties: Any person who violates any of these restrictions may be tried before a United States Magistrate and fined no more than \$1,000, imprisoned no more than 12 months, or both, in accordance with 43 U.S.C. 1733(a) and 43 CFR 8360.0–7. Such violations may also be subject to the enhanced penalties provided by 18 U.S.C. 3571 and 3581. In accordance with 43 CFR 8365.1–7, State or local officials may also impose penalties for violations of California law.

F. Kirk Halford,

Acting Bishop Field Office Manager.
[FR Doc. E9–16423 Filed 7–10–09; 8:45 am]
BILLING CODE P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-644]

In the Matter of Certain Composite Wear Components and Products Containing Same; Notice of Commission Determination Not To Review an Initial Determination Finding Respondents AIAE Engineering Ltd. and Vega Industries in Default and Finding a Violation of Section 337

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: The United States International Trade Commission hereby provides notice that it has determined not to review an initial determination ("ID") (Order No. 26) issued by the presiding administrative law judge ("ALJ") finding respondents AIAE Engineering Limited and Vega Industries in default and finding a violation of section 337.

FOR FURTHER INFORMATION CONTACT: Paul M. Bartkowski, Office of the General Counsel, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone (202) 708-5432. Copies of non-confidential documents filed in connection with this investigation are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone (202) 205-2000. General information concerning the Commission may also be obtained by accessing its Internet server at http://www.usitc.gov. The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at http:// edis.usitc.gov. Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205-1810.

SUPPLEMENTARY INFORMATION: This investigation was instituted on April 25, 2008, based on a complaint filed by Magotteaux International S/A and Magotteaux, Inc. (collectively, "Magotteaux"). The complaint, as supplemented, alleged violations of section 337 of the Tariff Act of 1930 (19 U.S.C. **1337) in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain composite wear components and products containing the same that infringe all of the claims of U.S. Patent No. RE 39,998 ("the '998 patent"). The complaint named Fonderie Acciaierie Rioale S.P.A. ("FAR"), AIA Engineering Ltd. ("AIAE"), and Vega Industries ("Vega") as respondents. FAR was subsequently terminated from the investigation on the basis of a settlement agreement, leaving AIAE and Vega (hereinafter referred to collectively as 'AIAE") as the remaining respondents.

On May 8, 2009, the ALJ issued the subject ID, granting a motion filed by the Commission investigative attorney ("IA") for issuance of an initial determination finding AIAE in default and granting in part a motion filed by Magotteaux for issuance of an initial determination finding respondents in default and requesting adverse inferences on importation, infringement, and domestic industry. AIAE filed a petition for review of the ID, which was opposed by the Magotteaux and the IA.

The Commission has determined not to review the subject ID finding AIAE in default pursuant to Rule 210.16(a)(2)

and presumes the facts alleged in the complaint to be true with respect to AIAE, in addition to the ALJ's finding of violation pursuant to Rule 210.17. The Commission also determines to waive Commission Rule 210.42(a)(ii), which, unless the Commission orders otherwise, requires that the ALJ issue a recommended determination in conjunction with any initial determination concerning violation of section 337.

In connection with the final disposition of this investigation, the Commission may (1) issue an order that could result in the exclusion of the subject articles from entry into the United States, and/or (2) issue one or more cease-and-desist orders that could result in the respondent being required to cease and desist from engaging in unfair acts in the importation and sale of such articles. Accordingly, the Commission is interested in receiving written submissions that address the form of remedy, if any, that should be ordered. If a party seeks exclusion of an article from entry into the United States for purposes other than entry for consumption, the party should so indicate and provide information establishing that activities involving other types of entry either are adversely affecting it or likely to do so. For background, see In the Matter of Certain Devices for Connecting Computers via Telephone Lines, Inv. No. 337-TA-360, USITC Pub. No. 2843 (December 1994) (Commission Opinion).

If the Commission contemplates some form of remedy, it must consider the effects of that remedy upon the public interest. The factors the Commission will consider include the effect that an exclusion order and/or cease-and-desist orders would have on (1) the public health and welfare, (2) competitive conditions in the U.S. economy, (3) U.S. production of articles that are like or directly competitive with those that are subject to investigation, and (4) U.S. consumers. The Commission is therefore interested in receiving written submissions that address the aforementioned public interest factors in the context of this investigation.

If the Commission orders some form of remedy, the U.S. Trade Representative, as delegated by the President, has 60 days to approve or disapprove the Commission's action. See Presidential Memorandum of July 21, 2005, 70 FR 43251 (July 26, 2005). During this period, the subject articles would be entitled to enter the United States under bond, in an amount determined by the Commission and prescribed by the Secretary of the Treasury. The Commission is therefore

interested in receiving submissions concerning the amount of the bond that should be imposed if a remedy is ordered.

Written Submissions: The parties to the investigation, interested government agencies, and any other interested parties are encouraged to file written submissions on the issues of remedy, the public interest, and bonding. Complainants and the IA are also requested to submit proposed remedial orders for the Commission's consideration. Complainants are also requested to state the dates that the patents expire and the HTSUS numbers under which the accused products are imported. The written submissions and proposed remedial orders must be filed no later than close of business on July 22, 2009. Reply submissions, if any, must be filed no later than the close of business on July 30, 2009. No further submissions on these issues will be permitted unless otherwise ordered by the Commission.

Persons filing written submissions must file the original document and 12 true copies thereof on or before the deadlines stated above with the Office of the Secretary. Any person desiring to submit a document to the Commission in confidence must request confidential treatment unless the information has already been granted such treatment during the proceedings. All such requests should be directed to the Secretary of the Commission and must include a full statement of the reasons why the Commission should grant such treatment. See 19 CFR 201.6. Documents for which confidential treatment by the Commission is sought will be treated accordingly. All nonconfidential written submissions will be available for public inspection at the Office of the Secretary.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in section 210.42 of the Commission's Rules of Practice and Procedure (19 CFR 210.42).

Issued: July 7, 2009.

By order of the Commission.

Marilyn R. Abbott,

Secretary to the Commission.

William R. Bishop,

Acting Secretary to the Commission.

INTERNATIONAL TRADE COMMISSION

[USITC SE-09-019]

Government in the Sunshine Act Meeting Notice

AGENCY HOLDING THE MEETING: United States International Trade Commission.

TIME AND DATE: July 10, 2009 at 11 a.m. PLACE: Room 101, 500 E Street, SW., Washington, DC 20436. Telephone:

(202) 205–2000.

STATUS: Open to the public.

Matters To Be Considered

- 1. Agenda for future meetings: none.
- 2. Minutes.
- 3. Ratification List.
- 4. Inv. Nos. 701–TA–464 and 731–TA–1160 (Preliminary) (Prestressed Concrete Steel Wire Strand from China)—briefing and vote. (The Commission is currently scheduled to transmit its determinations to the Secretary of Commerce on or before July 13, 2009; Commissioners' opinions are currently scheduled to be transmitted to the Secretary of Commerce on or before July 20, 2009.)
- 5. Inv. Nos. 701–TA–465 and 731–TA–1161 (Preliminary) (Certain Steel Grating from China)—briefing and vote. (The Commission is currently scheduled to transmit its determinations to the Secretary of Commerce on or before July 13, 2009; Commissioners' opinions are currently scheduled to be transmitted to the Secretary of Commerce on or before July 20, 2009.)
- 6. Outstanding action jackets: None. In accordance with Commission policy, subject matter listed above, not disposed of at the scheduled meeting, may be carried over to the agenda of the following meeting.

Issued: July 1, 2009. By order of the Commission.

William R. Bishop,

Hearings and Meetings Coordinator. [FR Doc. E9–16609 Filed 7–9–09; 4:15 pm] BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Judgment Pursuant to Resource Conservation and Recovery Act

Notice is hereby given that on July 6, 2009, a proposed Consent Judgment in *United States* v. *Citygas Gasoline Corporation, et al.*, Civil Action No. CV–03–6374, was lodged with the United States District Court for the Eastern District of New York.

The proposed Consent Judgment will resolve the United States' claims under Section 9006 of the Resource Recovery and Conservation Act, as amended, 42 U.S.C. 6991e, on behalf of the U.S. Environmental Protection Agency, against the following entities: Citygas Gasoline Corp.; Foster Realty Corp.; 9702-9706 Foster Avenue LLC; Foster Operating Corp.; 10 B. Street Realty Corp.; 10-12 Bond Street, LLC; 4090 Boston Road Corp.; 4090 Boston Road LLC; Connor Gas (N.Y.) Inc.; 4090 N.Y. Corp.; 117-01 Springfield Blvd, LLC; Springfield Operating Corp.; 117-01 N.Y. Corp.; 1081 N.Y. Corp.; Quincy Gas (N.Y.) Inc.: Fulton Gas (N.Y.) Inc.: Flushing 168 Corp.; 1981 N.Y. Corp.; 110-18 Atlantic Avenue, LLC; 73-12 Cooper Avenue, LLC; 168-70 Flushing Avenue, LLC; 100-07 Rockaway Boulevard, LLC; 145-15 Rockaway Boulevard, LLC; 20 Sheridan Boulevard. LLC; 303-309 Tenth Avenue, LLC; 2509 Victory Boulevard, LLC; and Route 295 NJ, LLC (collectively "Citygas Defendants"). The United States alleges that the Citygas Defendants violated the regulations governing underground storage tanks ("USTs"), set forth at 40 CFR Part 280, at the following twentyone facilities, which were automobile fueling stations with USTs that defendants have owned and/or operated: (1) 9702 Foster Avenue, Brooklyn, New York; (2) 3715 14th Avenue, Brooklyn, New York; (3) 10 Bond Street, New York, New York; (4) 4090 Boston Road, Bronx, New York; (5) 117-01 Springfield Boulevard, Cambria Heights, New York; (6) 1081 Leggett Avenue, Bronx, New York; (7) 83-10 Astoria Boulevard, Jackson Heights, New York; (8) 1508 Bushwick Avenue, Brooklyn, New York; (9) 2800 Bruckner Boulevard, Bronx, New York; (10) 141-50 Union Turnpike, Flushing, New York; (11) 2642-66 Fulton Street, Brooklyn, New York, (12) 1981 Ocean Avenue, Brooklyn, New York; (13) 94-02 111th Street, Richmond Hill, New York; (14) 65-20 Cooper Avenue, Glendale, New York; (15) 168 Flushing Avenue, Brooklyn, New York; (16) 100-07 Rockaway Boulevard, Ozone Park, New York; (17) 145-15 Rockaway Boulevard, Ozone Park, New York; (18) 20 Sheridan Boulevard, Inwood, New York; (19) 303 10th Avenue, New York, New York; (20) 2509 Victory Boulevard, Staten Island, New York; (21) 185 Straughns Mill Road, Pedrickstown, New Jersey. 3023 Route 23, LLC, which is the owner and/or operator of four USTs at 3023 Route 23, West Milford, New Jersey, is also a signatory to the Consent Judgment.

The Consent Judgment requires the Citygas Defendants to pay a civil penalty of \$1,400,000. The Consent Judgment also provides for injunctive relief to be implemented over the next five years at the Citygas Defendants' facilities, consisting of maintenance of ongoing compliance with the UST regulations, and submission of reports demonstrating such compliance.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the Consent Judgment. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and either e-mailed to pubcomment-ees.enrd@usdoj.gov or mailed to P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044–7611, and should refer to United States v. Citygas Gasoline Corporation, et al., Civil Action No. CV–03–6374, D.J. Ref. No. 90–7–1–07464.

The proposed Consent Judgment may be examined at the Office of the United States Attorney, Eastern District of New York, 271 Cadman Plaza East, 7th Fl., Brooklyn, New York 11201, and at the United States Environmental Protection Agency, Region II, 290 Broadway, New York, New York 10007-1866. During the public comment period, the proposed Consent Judgment may also be examined on the following Department of Justice Web site, http:// www.usdoj.gov/enrd/ Consent Decrees.html. A copy of the proposed Consent Judgment may be obtained by mail from the Consent Decree Library, P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044-7611 or by faxing or e-mailing a request to Tonia Fleetwood (tonia.fleetwood@usdoj.gov), fax no. (202) 514-0097, phone confirmation number (202) 514-1547. In requesting a copy from the Consent Decree Library, please enclose a check in the amount of \$33.75 (25 cents per page reproduction cost) payable to the U.S. Treasury or, if by email or fax, forward a check in that amount to the Consent Decree Library at the stated address.

Maureen Katz,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division. [FR Doc. E9–16566 Filed 7–10–09; 8:45 am]

BILLING CODE 4410-15-P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Clean Air Act

Notice is hereby given that on June 25, 2009, a proposed Consent Decree ("Decree") in *United States* v. *Holcim (US) Inc.*, Civil Action No. 2:09–cv–12526–LPZ–DAS, was lodged with the United States District Court for the Eastern District of Michigan.

In this action the United States seeks to address violations of the Clean Air Act at a Portland cement manufacturing facility owned and operated by the Defendant, Holcim (US) Inc., in Dundee, Michigan. The violations, which occurred numerous times for several years, involved emissions from the main stack for two kilns which exceeded 15% opacity and the baghouse inlet temperatures for each kiln exceeding its limitation.

During the course of settlement negotiations with the Department of Justice, the Defendant on November 11, 2008 announced that it must reduce production capacity in its cement operations in response to the extensive downturn in the demand for cement products and stated it would permanently close the Dundee facility. The Defendant permanently shut down its two kilns at the Dundee facility, one kiln on November 30, 2008 and the other kiln on March 14, 2009.

The proposed Decree resolves the Defendant's violations by implementing injunctive relief which will ensure, if operating the kilns at the Dundee facility, the Defendant will not exceed the opacity limitation at the main stack and will not exceed the applicable baghouse inlet temperature for the kilns. Additionally, the Defendant has reporting, notification and approval requirements under the Decree to the U.S. Environmental Protection Agency ("EPA") and the Michigan Department of Environmental Quality ("MDEQ"), which includes seeking permission and receiving approval from EPA and MDEQ to re-start a permanently closed kiln. The proposed Decree also requires payment of a civil penalty in the amount of \$159,607.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed Decree.

Comments should be addressed to the Assistant Attorney General,
Environment and Natural Resources Division, and either e-mailed to pubcomment-ees.enrd@usdoj.gov or mailed to P.O. Box 7611, U.S.

Department of Justice, Washington, DC

20044–7611, and should refer to *United States* v. *Holcim (US) Inc.*, D.J. Ref. No. 90–5–2–1–09594.

The proposed Decree may be examined at the Office of the United States Attorney, 211 W. Fort Street, Suite 2001, Detroit, Michigan 48226, and at U.S. EPA Region 5, 77 W. Jackson Blvd., 16th Floor (EPA Library), Chicago, Illinois 60604. During the public comment period, the proposed Decree may also be examined on the following Department of Justice Web site http://www.usdoj.gov/enrd/ Consent Decrees.html. A copy of the proposed Decree may also be obtained by mail from the Consent Decree Library, P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044-7611 or by faxing or e-mailing a request to Tonia Fleetwood (tonia.fleetwood@usdoj.gov), fax no. (202) 514–0097, phone confirmation number (202) 514-1547. In requesting a copy from the Consent Decree Library, please enclose a check in the amount of \$11.00 (25 cents per page reproduction cost) payable to the U.S. Treasury or, if by e-mail or fax, forward a check in that amount to the Consent Decree Library at the stated address.

Maureen Katz,

Assistant Chief Environmental Enforcement Section, Environment and Natural Resources Division.

DEPARTMENT OF JUSTICE

Bureau of Alcohol, Tobacco, Firearms and Explosives

[Docket No. ATF 32N; ATF O 1120.8]

Delegation Order—Authority To Facilitate Implementation of the NICS Improvement Amendments Act of 2007

1. Purpose. This order delegates the authority to exercise the authorities and responsibilities committed to the Director of the Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF) under the NICS Improvement Amendments Act of 2007, Public Law 110-180 (NIAA). This authority is to establish and enforce the criteria that applicable Federal departments and agencies and states use to create qualifying relief from firearms disabilities programs, to make decisions as to whether applicable Federal departments and agencies and states have properly implemented and certified relief from firearms disabilities programs under the NIAA, and to make any related determinations under the

NIAA regarding such relief from firearms disabilities programs.

2. Delegations. Under the authority vested in the Director, Bureau of Alcohol, Tobacco, Firearms and Explosives, by Title 28 U.S.C. 599A, 28 CFR 0.130-0.133, and Attorney General Order Number 3072–2009, Delegation of Authority to the Director of the Bureau of Alcohol, Tobacco, Firearms, and **Explosives to Facilitate Implementation** of the NICS Improvement Amendments of 2007, I hereby delegate to the Assistant Director, Enforcement Programs and Services, the authority to exercise the authorities and responsibilities committed to the Director of ATF under the NIAA. This authority is to establish and enforce the criteria that applicable Federal departments and agencies and states use to create qualifying relief from firearms disabilities programs, to make decisions as to whether applicable Federal departments and agencies and states have properly implemented and certified relief from firearms disabilities programs under the NIAA, and to make any related determinations under the NIAA regarding such relief from firearms disabilities programs.

3. Redelegation. The authority in this order may be redelegated to a position not lower than the Chief, Firearms Programs Division.

4. *Questions*. Questions regarding this order should be addressed to the Chief, Firearms Programs Division at (202) 648–7090.

Signed: June 22, 2009.

Kenneth Melson,

Acting Director.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Importer of Controlled Substances; Notice of Application

Pursuant to 21 U.S.C. 958(i), the Attorney General shall, prior to issuing a registration under this Section to a bulk manufacturer of a controlled substance in schedule I or II, and prior to issuing a regulation under 21 U.S.C. 952(a)(2) authorizing the importation of such a substance, provide manufacturers holding registrations for the bulk manufacture of the substance an opportunity for a hearing.

Therefore, in accordance with Title 21, Code of Federal Regulations (CFR), 1301.34(a), this is notice that on June 16, 2009, Noramco, Inc., Division of Ortho-McNeil, Inc., 500 Swedes

Landing Road, Wilmington, Delaware 19801, made application by letter to the Drug Enforcement Administration (DEA) to be registered as an importer of Thebaine (9333), a basic class of controlled substance listed in schedule II.

The company plans to import a Thebaine derivative for the bulk manufacture of controlled substances for their customers. The company will also import analytical reference standards for distribution to their customers for research purposes.

Any bulk manufacturer who is presently, or is applying to be, registered with DEA to manufacture such basic class of controlled substance may file comments or objections to the issuance of the proposed registration and may, at the same time, file a written request for a hearing on such application pursuant to 21 CFR 1301.43 and in such form as prescribed by 21 CFR 1316.47.

Any such comments or objections being should be addressed, in quintuplicate, to the Drug Enforcement Administration, Office of Diversion Control, Federal Register Representative (ODL), 8701 Morrissette Drive, Springfield, VA 22152; and must be filed no later than August 12, 2009.

This procedure is to be conducted simultaneously with, and independent of, the procedures described in 21 CFR 1301.34(b), (c), (d), (e), and (f). As noted in a previous notice published in the Federal Register on September 23, 1975, 40 FR 43745-46), all applicants for registration to import a basic class of any controlled substances in schedule I or II are, and will continue to be, required to demonstrate to the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration, that the requirements for such registration pursuant to 21 U.S.C. 958(a); 21 U.S.C. 823(a); and 21 CFR 1301.34(b), (c), (d), (e), and (f) are satisfied.

Dated: July 1, 2009.

Joseph T. Rannazzisi,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

BILLING CODE 4410-09-P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Manufacturer of Controlled Substances; Notice of Application

Pursuant to $\S 1301.33(a)$ of Title 21 of the Code of Federal Regulations (CFR),

this is notice that on May 20, 2009, Organix Inc., 240 Salem Street, Woburn, Massachusetts 01801, made application by letter to the Drug Enforcement Administration (DEA) to be registered as a bulk manufacturer of Marihuana (7360), a basic class of controlled substance listed in schedule I.

The company plans to manufacture a synthetic cannabinol in bulk for sale to its customers for research purposes. No other activity for this drug code is authorized for this registration.

Any other such applicant, and any person who is presently registered with DEA to manufacture such substances, may file comments or objections to the issuance of the proposed registration pursuant to 21 CFR 1301.33(a).

Any such written comments or objections should be addressed, in quintuplicate, to the Drug Enforcement Administration, Office of Diversion Control, Federal Register Representative (ODL), 8701 Morrissette Drive, Springfield, Virginia 22152; and must be filed no later than September 11, 2009.

Dated: July 1, 2009.

Joseph T. Rannazzisi,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

[Notice (09-066)]

Review of U.S. Human Space Flight Plans Committee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, the National Aeronautics and Space Administration announces a meeting of the Review of U.S. Human Space Flight Plans Committee. The agenda topics for the meeting include:

- Kennedy Space Center Perspective.
- Constellation projects.
- Committee subgroup report.
- Public comment.

DATES: Thursday, July 30, 2009, 8 a.m.–4 p.m. **Note:** All times listed are local times.

ADDRESSES: Hilton Cocoa Beach Oceanfront, Grand Ballroom, 1550 North Atlantic Avenue, Cocoa Beach, Florida 32931, 321–799–0003.

FOR FURTHER INFORMATION CONTACT: Mr. Philip R. McAlister, Office of Program

Analysis and Evaluation, National Aeronautics and Space Administration, Washington, DC 20546. Phone 202–358– 0712.

SUPPLEMENTARY INFORMATION: The meeting will be open to the public up to the seating capacity of the room. It is imperative that the meeting be held on this date to accommodate the scheduling priorities of the key participants.

BILLING CODE 7555–01–P

NUCLEAR REGULATORY COMMISSION

[NRC-2009-0308]

Draft Regulatory Guide: issuance, availability

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of issuance and availability of Draft Regulatory Guide, DG–1215.

FOR FURTHER INFORMATION CONTACT: Paul Prescott, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, telephone: (301) 415–3026, e-mail: Paul.Prescott@nrc.gov or, R.A. Jervey, telephone (301) 251–7404, e-mail: raj@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment a draft guide in the agency's "Regulatory Guide" series. This series was developed to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The draft regulatory guide (DG), titled, "Quality Assurance Program

Requirements (Design and Construction)," is temporarily identified by its task number, DG–1215, which should be mentioned in all related correspondence. DG–1215 is proposed Revision 4 of Regulatory Guide 1.28.

DG-1215 describes methods that the NRC staff considers acceptable for complying with the provisions of Appendix B, "Quality Assurance Criteria for Nuclear Power Plants and Fuel Reprocessing Plants," to Title 10, part 50, "Domestic Licensing of Production and Utilization Facilities," of the Code of Federal Regulations (10 CFR part 50) for establishing and implementing a quality assurance (QA) program for the design and construction of nuclear power plants, fuel fabrication plants and fuel reprocessing plants.

The methods described in this revision are similar to the methods described in Regulatory Guide (RG) 1.28, "Quality Assurance Program Requirements (Design and Construction)," Revision 3, which is the previously published version of this regulatory guide. RG 1.33, "Quality Assurance Program Requirements (Operation)" addresses additional guidance for the establishment and execution of QA programs for nuclear power plants during the operations phase, which is unaffected by the revision to RG 1.28. DG-1215 endorses methods defined in American Society of Mechanical Engineers (ASME) NQA-1, "Quality Assurance Requirements for Nuclear Facility Applications." The NRC is aware that the ASME standards committee has proposed minor changes to NQA-1 in a draft of ASME NQA-1a-2009, Addenda to ASME NOA-1-2008. If these addenda are issued in a timely manner, they will be considered for endorsement in RG 1.28, revision 4.

II. Further Information

The NRC staff is soliciting comments on DG–1215. Comments may be accompanied by relevant information or supporting data and should mention DG–1215 in the subject line. Comments submitted in writing or in electronic form will be made available to the public in their entirety through the NRC's Agencywide Documents Access and Management System (ADAMS).

Personal information will not be removed from your comments. You may submit comments by any of the following methods:

1. Mail comments to: Rulemaking and Directives Branch, Office of Administration, MS TWB-05-B01M, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

2. Federal e-Rulemaking Portal: Go to http://www.regulations.gov and search

for documents filed under Docket ID [NRC–2009–0308]. Address questions about NRC dockets to Carol Gallagher, 301–492–3668; e-mail Carol.Gallagher@nrc.gov.

3. Fax comments to: Rulemaking and Directives Branch, Office of Administration, U.S. Nuclear Regulatory Commission at (301) 492–3446.

Requests for technical information about DG-1215 may be directed to the NRC contact, Paul Prescott at (301) 415– 3026 or e-mail to Paul.Prescott@nrc.gov.

Comments would be most helpful if received by September 8, 2009.
Comments received after that date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date.
Although a time limit is given, comments and suggestions in connection with items for inclusion in guides currently being developed or improvements in all published guides are encouraged at any time.

Electronic copies of DG–1215 are available through the NRC's public Web site under Draft Regulatory Guides in the "Regulatory Guides" collection of the NRC's Electronic Reading Room at http://www.nrc.gov/reading-rm/doc-collections/. Electronic copies are also available in ADAMS (http://www.nrc.gov/reading-rm/adams.html), under Accession No. ML090150402.

In addition, regulatory guides are available for inspection at the NRC's Public Document Room (PDR), which is located at 11555 Rockville Pike, Rockville, Maryland. The PDR's mailing address is USNRC PDR, Washington, DC 20555–0001. The PDR can also be reached by telephone at (301) 415–4737 or (800) 397–4205, by fax at (301) 415–3548, and by e-mail to pdr.resource@nrc.gov.

Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

Dated at Rockville, Maryland, this 6th day of July 2009.

For the Nuclear Regulatory Commission. **Mark P. Orr**,

Acting Chief, Regulatory Guide Development Branch, Division of Engineering, Office of Nuclear Regulatory Research.

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Notice of withdrawal.

SUMMARY: The NRC is withdrawing its proposed License Renewal Interim Staff Guidance (LR-ISG) LR-ISG-2008-01, "Staff Guidance Regarding the Station Blackout Rule (10 CFR 50.63) Associated with License Renewal Applications." The NRC staff issued the proposed guidance to clarify the acceptance criteria for the scoping of systems, structures, and components in accordance with section 54.4(a)(3) of Title 10 of the Code of Federal Regulations (10 CFR 54.4(a)(3)). However, after evaluating comments received on the proposed guidance, the NRC staff has determined that the current acceptance criteria, as provided in section 2.5.2.1.1 of NUREG-1800, Revision 1. "Standard Review Plan for Review of License Renewal Applications for Nuclear Power Plants" (SRP-LR), are adequate for the NRC staff's review of license renewal applications. As such, the NRC staff is withdrawing the proposed LR-ISG-2008-01.

On March 12, 2008, the NRC requested public comments on the proposed LR–ISG in the Federal Register (73 FR 13258). The proposed LR–ISG and accompanying figures are available in the NRC's Agencywide Documents Access and Management System (ADAMS) under Accession Nos. ML080520619 and ML080520620, respectively.

The NRC staff drafted the proposed LR–ISG–2008–01 after finding that some license renewal applications did not include within the scope of license renewal all structures and components required by 10 CFR 54.4(a)(3) for demonstrating compliance with 10 CFR 50.63 (Station Blackout Rule). The proposed LR–ISG was intended to clarify the NRC staff's acceptance criteria in SRP–LR section 2.5.2.1.1, "Components Within the Scope of SBO (10 CFR 50.63)."

By letters dated May 9, 2008 (ML081400346), and May 12, 2008 (ML081350619), the NRC received comments on the proposed LR–ISG from the Strategic Teaming and Resource Sharing alliance and the Nuclear Energy Institute (NEI), respectively. On July 18, 2008, the NRC staff discussed these comments during a public meeting with NEI and industry representatives, as documented in "Summary of the License Renewal Meeting Held between the U.S. Nuclear Regulatory Commission Staff and the Nuclear Energy Institute," dated October 3, 2008 (ML082480547). Overall, the comments indicated that the NRC staff's proposed guidance is too prescriptive and does not acknowledge the unique design aspects of each plant, as reflected in the plant's current licensing basis.

The NRC staff evaluated both the comments submitted in writing, and those provided during the July 18, 2008, meeting and subsequent public license renewal meetings, and determined that the proposed clarification in LR-ISG-2008-01 is unnecessary because the NRC staff's review of license renewal applications is based on the plantspecific current licensing bases, regulatory requirements, and offsite power design configurations. As such, the NRC staff will continue to review license renewal applications against the acceptance criteria in SRP-LR section 2.5.2.1.1 to ensure applicants include within the scope of license renewal the systems, structures, and components that perform functions to demonstrate compliance with the Station Blackout Rule, as required by 10 CFR 54.4(a)(3).

Therefore, by this action, the NRC is withdrawing LR–ISG–2008–01.

ADDRESSES: Documents created or received after November 1, 1999, are available electronically at the NRC's Public Electronic Reading Room on the Internet at http://www.nrc.gov/reading-rm/adams.html. From this site, the public can gain entry into ADAMS. If you do not have access to the Internet or if there are any problems in accessing the documents located in ADAMS, contact the NRC Public Document Room reference staff at 1–800–397–4209, 301–415–4737, or by e-mail at PDR.Resource@nrc.gov.

Matthew Homiack, Division of License Renewal, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555– 0001; telephone 301–415–1683; or

e-mail Matthew.Homiack@nrc.gov.

FOR FURTHER INFORMATION CONTACT: Mr.

SUPPLEMENTARY INFORMATION: The NRC issues LR—ISGs to communicate insights and lessons learned, and to address emergent issues not addressed in certain license renewal guidance documents. The NRC staff and stakeholders can use approved LR—ISGs until their guidance is incorporated into a formal license

renewal guidance document revision. The NRC posts its issued LR–ISGs on the NRC Public Web page at http://www.nrc.gov/reading-rm/doc-collections/isg.

Dated at Rockville, Maryland, this 7th day of July 2009.

NUCLEAR REGULATORY COMMISSION

[NRC-2009-0117]

Notice of Revised Regulatory Guide

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of Revised Regulatory Guide (RG) 1.200, Revision 2, "An Approach for Determining the Technical Adequacy of Probabilistic Risk Assessment Results for Risk-Informed Activities."

FOR FURTHER INFORMATION CONTACT:

Mary Drouin, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, telephone (301) 251– 7574 or e-mail to Mary.Drouin@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The Nuclear Regulatory Commission (NRC) issued Revision 2 of RG 1.200 on March 17, 2009, which was published in the Federal Register, 74 FR 11381. RG 1.200, Revision 2 is a guide in the agency's "Regulatory Guide" series. This series was developed to describe and make available to the public information such as methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

A sentence was inadvertently omitted from the draft version that was issued for public comment and the final version that was published in March 2009. The current version of Regulatory Guide 1.200 on the NRC Web site includes the omitted sentence at the end of the first paragraph in Regulatory Position C.1.2.5.

II. Further Information

Electronic copies of Regulatory Guide 1.200, Revision 2 are available through

the NRC's public Web site under "Regulatory Guides" at http://www.nrc.gov/reading-rm/doc-collections/. In addition, regulatory guides are available for inspection at the NRC's Public Document Room (PDR) located at Room O–1F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852–2738. The PDR's mailing address is USNRC PDR, Washington, DC 20555–0001. The PDR can also be reached by telephone at (301) 415–4737 or (800) 397–4209, by fax at (301) 415–3548, and by e-mail to pdr.resource@nrc.gov.

Regulatory guides are not copyrighted, and NRC approval is not required to reproduce them.

Dated at Rockville, Maryland, this 2nd day of July 2009.

For the Nuclear Regulatory Commission.

Mark P. Orr,

Acting Chief, Regulatory Guide Development Branch, Division of Engineering, Office of Nuclear Regulatory Research.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–254 and 50–265; NRC–2009–0309]

Exelon Generation Company, LLC; Notice of Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory
Commission (the Commission) has
granted the request of Exelon
Generation Company, LLC (the licensee)
to withdraw its December 21, 2007,
application for proposed amendment to
Renewed Facility Operating License
Nos. DPR–29 and DPR–30 for the Quad
Cities Nuclear Power Station, Units 1
and 2, located in Rock Island County,
Illinois.

The proposed amendment would have revised the Technical Specifications Surveillance Requirements to establish an acceptance criterion to verify that total battery connector resistances for the 125 and 250 volt direct current batteries are within pre-established limits that ensure the batteries can perform their design function.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on February 26, 2008 (73 FR 10298) and December 30, 2008 (73 FR 79932). However, by letter dated June 25, 2009, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated December 21, 2007, and the licensee's letter dated June 25, 2009, which withdrew the application for license amendment. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management System (ADAMS) Public Electronic Reading Room on the Internet at the NRC Web site, http:// www.nrc.gov/reading-rm/adams.html. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS should contact the NRC PDR Reference staff by telephone at 1–800– 397–4209, or 301–415–4737 or by e-mail to pdr.resource@nrc.gov.

Dated at Rockville, Maryland, this 7th day of July 2009.

For the Nuclear Regulatory Commission. **Christopher Gratton**,

Senior Project Manager, Plant Licensing Branch III–2, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.

POSTAL REGULATORY COMMISSION

[Docket Nos. MC2009-33 and CP2009-44; Order No. 241]

New Competitive Postal Product

AGENCY: Postal Regulatory Commission. **ACTION:** Notice.

SUMMARY: The Commission is noticing a recently-filed Postal Service request to add Express Mail & Priority Mail Contract 8 to the Competitive Product List. The Postal Service has also filed a related contract. This notice addresses procedural steps associated with these filings.

DATES: Comments are due July 15, 2009. **ADDRESSES:** Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov*.

FOR FURTHER INFORMATION CONTACT: Stephen L. Sharfman, General Counsel, 202–789–6820 and stephen.sharfman@prc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

On July 2, 2009, the Postal Service filed a formal request pursuant to 39

U.S.C. 3642 and 39 CFR 3020.30 et seq. to add Express Mail & Priority Mail Contract 8 to the Competitive Product List.¹ On July 6, 2009, the Postal Service filed a revised version of its filing which includes attachments inadvertently omitted from the July 2, 2009 request.² The Postal Service asserts that the Express Mail & Priority Mail Contract 8 product is a competitive product "not of general applicability" within the meaning of 39 U.S.C. 3632(b)(3). *Id.* at 1. The Request has been assigned Docket No. MC2009–33.

The Postal Service contemporaneously filed a contract related to the proposed new product pursuant to 39 U.S.C. 3632(b)(3) and 39 CFR 3015.5. *Id.* at 2. The contract has been assigned Docket No. CP2009–44.

Request. The Request incorporates (1) A redacted version of the Governors' Decision authorizing the new product; (2) a redacted version of the contract; (3) requested changes to the Mail Classification Schedule product list; (4) a Statement of Supporting Justification as required by 39 CFR 3020.32; and (5) certification of compliance with 39 U.S.C. 3633(a).³ Substantively, the Request seeks to add Express Mail & Priority Mail Contract 8 to the Competitive Product List. Request at 1–2.

In the Statement of Supporting Justification, Mary Prince Anderson, Manager, Sales and Communications, Expedited Shipping, asserts that the service to be provided under the contract will cover its attributable costs, make a positive contribution to institutional costs, and increase contribution toward the requisite 5.5 percent of the Postal Service's total institutional costs. *Id.*, Attachment D. Thus, Ms. Anderson contends there will be no issue of subsidization of

competitive products by market dominant products as a result of this contract. *Id*.

Related contract. A redacted version of the specific Express Mail & Priority Mail Contract 8 is included with the Request. The contract has an initial term of 3 years and is to be effective 1 day after the Commission provides all necessary regulatory approvals. The Postal Service represents that the contract is consistent with 39 U.S.C. 3633(a) and 39 CFR 3015.7(c). See id., Attachment A and Attachment E. It notes that actual performance under this contract could vary from estimates, but concludes that the risks are manageable. Id., Attachment A.

The Postal Service filed much of the supporting materials, including the Governors' Decision and the specific Express Mail & Priority Mail Contract 8, under seal. In its Request, the Postal Service maintains that the contract and related financial information, including the customer's name and the accompanying analyses that provide prices, terms, conditions, and financial projections should remain under seal. *Id.* at 2–3.

II. Notice of Filings

The Commission establishes Docket Nos. MC2009–33 and CP2009–44 for consideration of the Request pertaining to the proposed Express Mail & Priority Mail Contract 8 product and the related contract, respectively. In keeping with practice, these dockets are addressed on a consolidated basis for purposes of this Order; however, future filings should be made in the specific docket in which issues being addressed pertain.

Interested persons may submit comments on whether the Postal Service's filings in the captioned dockets are consistent with the policies of 39 U.S.C. 3632, 3633, or 3642 and 39 CFR part 3015 and 39 CFR part 3020 subpart B. Comments are due no later than July 15, 2009. The public portions of these filings can be accessed via the Commission's Web site (http://www.prc.gov).

The Commission appoints Paul L. Harrington to serve as Public Representative in these dockets.

III. Ordering Paragraphs

It is ordered:

- 1. The Commission establishes Docket Nos. MC2009–33 and CP2009–44 for consideration of the matters raised in each docket.
- 2. Pursuant to 39 U.S.C. 505, Paul L. Harrington is appointed to serve as officer of the Commission (Public Representative) to represent the

¹Request of the United States Postal Service to Add Express Mail & Priority Mail Contract 8 to Competitive Product List and Notice of Establishment of Rates and Class Not of General Applicability, July 2, 2009.

²Errata to Request of the United States Postal Service to Add Express Mail & Priority Mail Contract 8 to Competitive Product List and Notice of Establishment of Rates and Class Not of General Applicability, July 6, 2009 (Request).

Attachment A to the Request consists of the redacted Decision of the Governors of the United States Postal Service on Establishment of Rate and Class Not of General Applicability for Express Mail and Priority Mail Services (Governors' Decision No. 09-11). The Governors' Decision includes an attachment which provides an analysis of the proposed Express Mail and Priority Mail Contract 8 and certification of the Governors' vote. Attachment B is the redacted version of the contract. Attachment C shows the requested changes to the Mail Classification Schedule product list. Attachment D provides a Statement of Supporting Justification for the Request. Attachment E provides the certification of compliance with 39 U.S.C. 3633(a).

interests of the general public in these proceedings.

- 3. Comments by interested persons in these proceedings are due no later than July 15, 2009.
- 4. The Secretary shall arrange for publication of this order in the **Federal Register**.

Dated: July 7, 2009. By the Commission.

Judith M. Grady,

Acting Secretary.

SUPPLEMENTARY INFORMATION:

I. Introduction

On July 2, 2009, the Postal Service filed a formal request pursuant to 39 U.S.C. 3642 and 39 CFR 3020.30 et seq. to add Express Mail & Priority Mail Contract 6 to the Competitive Product List.¹ On July 6, 2009, the Postal Service filed a revised version of its filing which includes attachments inadvertently omitted from the July 2, 2009 request.² The Postal Service asserts that the Express Mail & Priority Mail Contract 6 product is a competitive product "not of general applicability" within the

meaning of 39 U.S.C. 3632(b)(3). *Id.* at 1. The Request has been assigned Docket No. MC2009–31.

The Postal Service contemporaneously filed a contract related to the proposed new product pursuant to 39 U.S.C. 3632(b)(3) and 39 CFR 3015.5. *Id.* at 2. The contract has been assigned Docket No. CP2009–42.

Request. The Request incorporates (1) A redacted version of the Governors' Decision authorizing the new product; (2) a redacted version of the contract; (3) requested changes to the Mail Classification Schedule product list; (4) a statement of supporting justification as required by 39 CFR 3020.32; and (5) certification of compliance with 39 U.S.C. 3633(a).3 Substantively, the Request seeks to add Express Mail & Priority Mail Contract 6 to the Competitive Product List. Request at 1–2.

In the Statement of Supporting Justification, Mary Prince Anderson, Manager, Sales and Communications, Expedited Shipping, asserts that the service to be provided under the contract will cover its attributable costs, make a positive contribution to institutional costs, and increase contribution toward the requisite 5.5 percent of the Postal Service's total institutional costs. Id., Attachment D. Thus, Ms. Anderson contends there will be no issue of subsidization of competitive products by market dominant products as a result of this contract. Id.

Related contract. A redacted version of the specific Express Mail & Priority Mail Contract 6 is included with the Request. The contract has an initial term of 3 years and is to be effective 1 day after the Commission provides all necessary regulatory approvals. The Postal Service represents that the contract is consistent with 39 U.S.C. 3633(a) and 39 CFR 3015.7(c). See id., Attachment A and Attachment E. It notes that actual performance under this contract could vary from estimates, but concludes that the risks are manageable. Id., Attachment A.

The Postal Service filed much of the supporting materials, including the Governors' Decision and the specific Express Mail & Priority Mail Contract 6, under seal. In its Request, the Postal Service maintains that the contract and related financial information, including the customer's name and the accompanying analyses that provide prices, terms, conditions, and financial projections should remain under seal. *Id.* at 2–3.

II. Notice of Filings

The Commission establishes Docket Nos. MC2009–31 and CP2009–42 for consideration of the Request pertaining to the proposed Express Mail & Priority Mail Contract 6 product and the related contract, respectively. In keeping with practice, these dockets are addressed on a consolidated basis for purposes of this Order; however, future filings should be made in the specific docket in which issues being addressed pertain.

Interested persons may submit comments on whether the Postal Service's filings in the captioned dockets are consistent with the policies of 39 U.S.C. 3632, 3633, or 3642 and 39 CFR part 3015 and 39 CFR part 3020 subpart B. Comments are due no later than July 15, 2009. The public portions of these filings can be accessed via the Commission's Web site (http://www.prc.gov).

The Commission appoints Paul L. Harrington to serve as Public Representative in these dockets.

III. Ordering Paragraphs

It is ordered:

- 1. The Commission establishes Docket Nos. MC2009–31 and CP2009–42 for consideration of the matters raised in each docket.
- 2. Pursuant to 39 U.S.C. 505, Paul L. Harrington is appointed to serve as officer of the Commission (Public Representative) to represent the interests of the general public in these proceedings.

SUPPLEMENTARY INFORMATION:

I. Introduction

On June 29, 2009, the Postal Service filed a formal request pursuant to 39 U.S.C. 3642 and 39 CFR 3020.30 et seq. to add Priority Mail Contract 14 to the Competitive Product List.¹ The Postal Service asserts that Priority Mail Contract 14 is a competitive product "not of general applicability" within the meaning of 39 U.S.C. 3632(b)(3). Id. at 1. The Request has been assigned Docket No. MC2009–30.

The Postal Service contemporaneously filed a contract related to the proposed new product pursuant to 39 U.S.C. 3632(b)(3) and 39 CFR 3015.5. The contract has been assigned Docket No. CP2009–40.

Request. The Request includes (1) A redacted version of the Governors' Decision authorizing the new product; (2) a redacted version of the contract; (3) requested changes in the Mail Classification Schedule product list; (4) a statement of supporting justification as required by 39 CFR 3020.32; and (5) certification of compliance with 39 U.S.C. 3633(a).² Substantively, the

Request seeks to add Priority Mail Contract 14 to the Competitive Product List. *Id.* at 1–2.

In the statement of supporting justification, Mary Prince Anderson, Acting Manager, Sales and Communications, Expedited Shipping, asserts that the service to be provided under the contract will cover its attributable costs, make a positive contribution to institutional costs, and increase contribution toward the requisite 5.5 percent of the Postal Service's total institutional costs. Id.. Attachment C. Thus, Ms. Anderson contends there will be no issue of subsidization of competitive products by market dominant products as a result of this contract. Id.

Related contract. A redacted version of the specific Priority Mail Contract 14 is included with the Request. The contract is for 3 years and is to be effective 1 day after the Commission provides all necessary regulatory approvals. The Postal Service represents that the contract is consistent with 39 U.S.C. 3633(a) and 39 CFR 3015.7(c). See id., Attachment D.

The Postal Service filed much of the supporting materials, including the specific Priority Mail Contract 14, under seal. In its Request, the Postal Service maintains that the contract and related financial information, including the customer's name and the accompanying analyses that provide prices, terms, conditions, and financial projections should remain under seal. *Id.* at 2–3.

II. Notice of Filings

Id., Attachment D. Thus, Ms. Anderson contends there will be no issue of subsidization of competitive products by market dominant products as a result of this contract. *Id*.

Related contract. A redacted version of the specific Express Mail & Priority

Competitive Product List and Notice of Establishment of Rates and Class Not of General Applicability, July 2, 2009. Mail Contract 7 is included with the Request. The contract has an initial term of 3 years and is to be effective 1 day after the Commission provides all necessary regulatory approvals. The Postal Service represents that the contract is consistent with 39 U.S.C. 3633(a) and 39 CFR 3015.7(c). See id., Attachment A and Attachment E. It notes that actual performance under this contract could vary from estimates, but concludes that the risks are manageable. Id., Attachment A.

The Postal Service filed much of the supporting materials, including the Governors' Decision and the specific Express Mail & Priority Mail Contract 7, under seal. In its Request, the Postal Service maintains that the contract and related financial information, including the customer's name and the accompanying analyses that provide prices, terms, conditions, and financial projections should remain under seal. *Id.* at 2–3.

II. Notice of Filings

The Commission establishes Docket Nos. MC2009–32 and CP2009–43 for consideration of the Request pertaining to the proposed Express Mail & Priority Mail Contract 7 product and the related contract, respectively. In keeping with practice, these dockets are addressed on a consolidated basis for purposes of this Order; however, future filings should be made in the specific docket in which issues being addressed pertain.

Interested persons may submit comments on whether the Postal Service's filings in the captioned dockets are consistent with the policies of 39 U.S.C. 3632, 3633, or 3642 and 39 CFR part 3015 and 39 CFR 3020 subpart B. Comments are due no later than July 15, 2009. The public portions of these filings can be accessed via the Commission's Web site (http://www.prc.gov).

The Commission appoints Paul L. Harrington to serve as Public Representative in these dockets.

III. Ordering Paragraphs

It is ordered:

- 1. The Commission establishes Docket Nos. MC2009–32 and CP2009–43 for consideration of the matters raised in each docket.
- 2. Pursuant to 39 U.S.C. 505, Paul L. Harrington is appointed to serve as officer of the Commission (Public Representative) to represent the interests of the general public in these proceedings.
- 3. Comments by interested persons in these proceedings are due no later than July 15, 2009.

4. The Secretary shall arrange for publication of this Order in the **Federal Register**.

Dated: July 7, 2009. By the Commission.

Judith M. Grady,

Acting Secretary.

POSTAL REGULATORY COMMISSION

[Docket Nos. MC2009-34 and CP2009-45; Order No. 242]

New Competitive Postal Product

AGENCY: Postal Regulatory Commission. **ACTION:** Notice.

SUMMARY: The Commission is noticing a recently-filed Postal Service request to add Express Mail Contract 4 to the Competitive Product List. The Postal Service has also filed a related contract. This notice addresses procedural steps associated with these filings.

DATES: Comments are due July 15, 2009. **ADDRESSES:** Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov.*

FOR FURTHER INFORMATION CONTACT: Stephen L. Sharfman, General Counsel, 202–789–6820 and

stephen.sharfman@prc.gov.
SUPPLEMENTARY INFORMATION:

I. Introduction

On July 6, 2009, the Postal Service filed a formal request pursuant to 39 U.S.C. 3642 and 39 CFR 3020.30 et seq. to add Express Mail Contract 4 to the Competitive Product List.¹ The Postal Service asserts that the Express Mail Contract 4 product is a competitive product "not of general applicability" within the meaning of 39 U.S.C. 3632(b)(3). *Id.* at 1. The Request has been assigned Docket No. MC2009–34.

The Postal Service contemporaneously filed a contract related to the proposed new product pursuant to 39 U.S.C. 3632(b)(3) and 39 CFR 3015.5. *Id.* at 2. The contract is assigned Docket No. CP2009–45.

Request. The Request incorporates (1) A redacted version of the Governors' Decision authorizing the new product; (2) a redacted version of the contract; (3) requested changes in the Mail Classification Schedule product list; (4)

² Errata to Request of the United States Postal Service to Add Express Mail & Priority Mail Contract 7 to Competitive Product List and Notice of Establishment of Rates and Class Not of General Applicability, July 6, 2009. (Request).

³ Attachment A to the Request consists of the redacted Decision of the Governors of the United States Postal Service on Establishment of Rate and Class Not of General Applicability for Express Mail and Priority Mail Services (Governors' Decision No. 09-10). The Governors' Decision includes an attachment which provides an analysis of the proposed Express Mail and Priority Mail Contract and certification of the Governors' vote Attachment B is the redacted version of the contract. Attachment C shows the requested changes to the Mail Classification Schedule product list. Attachment D provides a Statement of Supporting Justification for the Request. Attachment E provides the certification of compliance with 39 U.S.C. 3633(a).

¹Request of the United States Postal Service to Add Express Mail Contract 4 to Competitive Product List and Notice of Establishment of Rates and Class Not of General Applicability, July 6, 2009 (Request).

a Statement of Supporting Justification as required by 39 CFR 3020.32; and (5) certification of compliance with 39 U.S.C. 3633(a).² Substantively, the Request asks the Commission to add the Express Mail Contract 4 product to the Competitive Product List. *Id.* at 1–2.

In the Statement of Supporting Justification, Mary Prince Anderson, Manager, Sales and Communications, Expedited Shipping, asserts that the service to be provided under the contract will cover its attributable costs, make a positive contribution to institutional costs, and increase contribution toward the requisite 5.5 percent of the Postal Service's total institutional costs. Id., Attachment D. Thus, Ms. Anderson contends there will be no issue of subsidization of competitive products by market dominant products as a result of this contract. Id.

Related contract. A redacted version of the specific Express Mail Contract 4 is included with the Request. The contract is for 3 years and is to be effective the day following the date on which the Commission provides all necessary regulatory approvals. The Postal Service represents that the contract is consistent with 39 U.S.C. 3633(a) and 39 CFR 3015.7(c). See id., Attachment to Governors' Decision and Attachment E. It notes that performance under this contract could vary from estimates, but concludes that the risks are manageable, and overall the contract is expected to generate significant contribution. Id., Attachment to Governors' Decision.

The Postal Service filed much of the supporting materials, including the Governors' Decision and the specific Express Mail Contract 4, under seal. In its Request, the Postal Service maintains that the contract and related financial information, including the customer's name and the accompanying analyses that provide prices, terms, conditions, and financial projections should remain under seal. *Id.* at 2–3.

II. Notice of Filings

The Commission establishes Docket Nos. MC2009–34 and CP2009–45 for consideration of the Request pertaining to the proposed Express Mail Contract 4 product and the related contract, respectively. In keeping with practice, these dockets are addressed on a consolidated basis for purposes of this order; however, future filings should be made in the specific docket in which issues being addressed pertain.

Interested persons may submit comments on whether the Postal Service's filings in the captioned dockets are consistent with the policies of 39 U.S.C. 3632, 3633, or 3642 and 39 CFR part 3015 and 39 CFR part 3020 subpart B. Comments are due no later than July 15, 2009. The public portions of these filings can be accessed via the Commission's Web site (http://www.prc.gov).

The Commission appoints Cassandra Hicks to serve as Public Representative in these dockets.

III. Ordering Paragraphs

It is ordered:

- 1. The Commission establishes Docket Nos. MC2009–34 and CP2009–45 for consideration of the matters raised in each respective docket.
- 2. Pursuant to 39 U.S.C. 505, Cassandra Hicks is appointed to serve as officer of the Commission (Public Representative) to represent the interests of the general public in these proceedings.
- 3. Comments by interested persons in these proceedings are due no later than July 15, 2009.
- 4. The Secretary shall arrange for publication of this order in the **Federal Register**.

Dated: July 7, 2009.

By the Commission.

Judith M. Grady,

Acting Secretary.

POSTAL REGULATORY COMMISSION

[Docket No. A2009-1; Order No. 238]

Post Office Closing

AGENCY: Postal Regulatory Commission. **ACTION:** Notice.

SUMMARY: This document informs the public that an appeal of the closing of the Hacker Valley, WV post office has been filed. It identifies preliminary steps and provides a procedural schedule. Publication of this document will allow the Postal Service, petitioner, and others to take appropriate action.

ADDRESSES: Submit comments electronically via the Commission's

Filing Online system at http://www.prc.gov.

FOR FURTHER INFORMATION CONTACT:

Stephen L. Sharfman, General Counsel, 202–789–6820 and stephen.sharfman@prc.gov.

SUPPLEMENTARY INFORMATION:

Notice is hereby given that pursuant to 39 U.S.C. 404(d), the Commission has received an appeal of the closing of the Hacker Valley Post Office, Hacker Valley, West Virginia 26222. The appeal, which was received by the Commission June 30, 2009, was postmarked June 20, 2009 and, therefore, is deemed constructively filed on that date.1 The appeal was filed as a Participant Statement on PRC Form 61. Petitioner will have the option of filing supplemental information or facts by August 4, 2009. The Commission hereby institutes a proceeding under 39 U.S.C. 404(d)(5) and designates the case as Docket No. A2009-1 to consider the petitioner's appeal.

Categories of issues raised. The categories of issues that appear to be raised include:

- 1. Effect on the community (39 U.S.C. 404(d)(2)(A)(i)); and
- 2. Effect on employees (39 U.S.C. 404(d)(2)(A)(ii)).

After the Postal Service files the administrative record and the Commission reviews it, the Commission may find that there are more legal issues than those set forth above or that the Postal Service's determination disposes of one or more of those issues. The deadline for the Postal Service to file the administrative record with the Commission is July 15, 2009. 39 CFR 3001.113.

Availability; Web site posting. The Commission has posted the appeal and supporting material on its Web site at http://www.prc.gov. Additional filings in this case and participants' submissions also will be posted on the Web site, if provided in electronic format or amenable to conversion, and not subject to a valid protective order. Information on how to use the Commission's Web site is available online or by contacting the Commission's webmaster via telephone at 202–789–6873 or electronic mail at PRC-WEBMASTER@prc.gov.

The appeal and all related documents are also available for public inspection in the Commission's docket section.

Docket section hours are 8 a.m. to 4:30

² Attachment A to the Request consists of the redacted Decision of the Governors of the United States Postal Service on Establishment of Rate and Class Not of General Applicability for Express Mail Service (Governors' Decision No. 09–8). The Governors' Decision includes an attachment which provides an analysis of the proposed Express Mail Contract 4 and certification of the Governors' vote. Attachment B is the redacted version of the contract. Attachment C shows the requested changes to the Mail Classification Schedule product list. Attachment D provides a statement of supporting justification for this Request. Attachment E provides the certification of compliance with 39 U.S.C. 3633(a).

¹The Postal Accountability and Enhancement Act section 1006 amends 39 U.S.C. 404(d) to provide that an appeal sent through the mails is deemed received by the Commission on the date of the postmark on the envelope in which the appeal is mailed.

p.m., Monday through Friday, except on Federal government holidays. Docket section personnel may be contacted via electronic mail at *prc-docket@prc.gov* or via telephone at 202–789–6846.

Filing of documents. All filing of documents in this case shall be made using the Internet (Filing Online) pursuant to Commission rules 9(a) and 10(a) at the Commission's Web site, http://www.prc.gov, unless a waiver is obtained. 39 CFR 3001.9(a) and 10(a). Instructions for obtaining an account to file documents online may be found on the Commission's Web site, http:// www.prc.gov, or by contacting the Commission's docket section at prcdocket@prc.gov or via telephone at 202-789-6846. The Commission waives the Filing Online requirement for the petitioner.

Intervention. Those, other than the petitioner and respondent, wishing to be heard in this matter are directed to file

a notice of intervention on or before July 31, 2009 in accordance with 39 CFR 3001.111(b). The notice of intervention shall be filed using the Internet (Filing Online) at the Commission's Web site, http://www.prc.gov, or by waiver obtained for hardcopy filing. See 39 CFR 3001.9(a) and 10(a).

Public Representative. Richard A. Oliver is designated as the Public Representative to represent the interests of the general public.

Further procedures. By statute the Commission is required to issue its decision within 120 days from the date this appeal was filed. See 39 U.S.C. 404(d)(5). A procedural schedule has been developed to accommodate this statutory deadline.² In the interest of expedition and in light of the 120-day decision schedule, the Commission may request the Postal Service or other participants to provide more information or to submit memoranda of

law on any appropriate issue. As required by the Commission rules, if any motions are filed, responses are due 7 days after any such motion is filed. See 39 CFR 3001.21.

It is ordered:

- 1. The Postal Service shall file the administrative record in this appeal or otherwise file a responsive pleading to the appeal by July 15, 2009.
- 2. The procedural schedule to this order is listed below and hereby adopted.
- 3. The petitioner is granted a waiver from Online Filing.
- 4. Pursuant to 39 U.S.C. 505, Richard A. Oliver is designated officer of the Commission (Public Representative) to represent the interests of the general public.
- 5. The Secretary shall arrange for publication of this notice and order and procedural schedule in the **Federal Register**.

SECURITIES AND EXCHANGE COMMISSION

Submission for OMB Review; **Comment Request**

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of Investor Education and Advocacy, Washington, DC 20549-0213.

Extension:

Rule 27f-1 and Form N-27F-1, SEC File No. 270-487, OMB Control No. 3235-0546.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.), the Securities and Exchange Commission (the "Commission") has submitted to the Office of Management and Budget a request for extension of the previously approved collection of information discussed below.

Section 27(f) of the Investment Company Act of 1940 ("Act") (15 U.S.C. 80a-27(f)) provides that "[w]ith respect to any periodic payment plan (other than a plan under which the amount of sales load deducted from any payment thereon does not exceed 9 per centum of such payment), the custodian bank for such plan shall mail to each certificate holder, within sixty days after the issuance of the certificate, a statement of charges to be deducted from the projected payments on the certificate and a notice of his right of withdrawal as specified in this section." 1 The certificate holder then has forty-five days from the mailing of the notice to surrender his or her certificate and receive "in payment thereof, in cash, the sum of (1) the value of his account, and (2) an amount, from the underwriter or depositor, equal to the difference between the gross payments made and the net amount invested.'

Section 27(f) authorizes the Securities and Exchange Commission

("Commission") to "make rules specifying the method, form, and contents of the notice required by this subsection." Rule 27f-1 (17 CFR) 270.27f-1) under the Act, entitled "Notice of Right of Withdrawal Required to be Mailed to Periodic Payment Plan Certificate Holders and Exemption from Section 27(f) for Certain Periodic Payment Plan Certificates," provides instructions for the delivery of the notice required by section 27(f).

Rule 27f-1(d) prescribes Form N-27F-1 (17 CFR 274.127f-1), which sets forth the language that custodian banks for periodic payment plans must use in informing certificate holders of their withdrawal right pursuant to section 27(f). The instructions to the form provide that the notice must be on the sender's letterhead. The Commission does not receive a copy of the Form N-27F-1 notice.

The Form N-27F-1 notice informs certificate holders of their rights in connection with the certificates they hold. Specifically, it is intended to encourage new purchasers of plan certificates to reassess the costs and benefits of their investment and to provide them with an opportunity to recover their initial investment without penalty. The disclosure assists certificate holders in making careful and fully informed decisions about whether to invest in periodic payment plan certificates.

Complying with the collection of information requirements of rule 27f-1 is mandatory for custodian banks of periodic payment plans for which the sales load deducted from any payment exceeds 9 percent of the payment.2 The information provided pursuant to rule 27f-1 will be provided to third parties and, therefore, will not be kept confidential. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

Effective October 27, 2006, the Military Personnel Financial Services Protection Act banned the issuance or sale of new periodic payment plans. Accordingly, the staff estimates that there is no information collection burden associated with rule 27f-1 and Form N-27F-1. For administrative purposes, however, we are requesting approval for an information collection

burden of one hour per year. This estimate of burden hours is not derived from a comprehensive or necessarily even representative study of the cost of the Commission's rules and forms.

Please direct general comments regarding the above information to the following persons: (i) Desk Officer for the Securities and Exchange Commission, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, DC 20503 or send an e-mail to Shagufta Ahmed at Shagufta Ahmed@omb.eop.gov; and (ii) Charles Boucher, Director/CIO, Securities and Exchange Commission, C/O Shirley Martinson, 6432 General Green Way, Alexandria, VA 22312; or send an e-mail to:

PRA Mailbox@sec.gov. Comments must be submitted to OMB within 30 days of this notice.

Dated: July 6, 2009.

Elizabeth M. Murphy,

Secretary.

Extension:

Rules 8b-1 to 8b-33; SEC File No. 270-135; OMB Control No. 3235-0176.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.), the Securities and Exchange Commission (the "Commission") is soliciting comments on the collection of information summarized below. The Commission plans to submit this existing collection of information to the Office of Management and Budget for extension and approval.

Rules 8b-1 to 8b-33 (17 CFR 270.8b-1 to 8b-33) under the Investment Company Act of 1940 (15 U.S.C. 80a-1 et seq.) (the "Act") are the procedural rules an investment company must follow when preparing and filing a registration statement. These rules were adopted to standardize the mechanics of registration under the Act and to provide more specific guidance for persons registering under the Act than the information contained in the statute. For the most part, these procedural rules do not require the disclosure of

¹ As discussed below, the Military Personnel Financial Services Protection Act banned the issuance or sale of new periodic payment plans, effective October 2006.

² The rule also permits the issuer, its principal underwriter, its depositor, or its recordkeeping agent to mail the notice if the custodian bank has delegated the mailing of the notice to any of them or if the issuer has been permitted to operate without a custodian bank by Commission order. See 17 CFR 270.27f-1.

information. Two of the rules, however, require limited disclosure of information. The information required by the rules is necessary to ensure that investors have clear and complete information upon which to base an investment decision. The Commission uses the information that investment companies provide on registration statements in its regulatory, disclosure review, inspection and policy-making roles. The respondents to the collection of information are investment companies filing registration statements under the Act.

The Commission does not estimate separately the total annual reporting and recordkeeping burden associated with rules 8b-1 to 8b-33 because the burden associated with these rules is included in the burden estimates the Commission submits for the investment company registration statement forms (e.g., Form N-1A (17 CFR 239.15A and 274.11A), Form N-2 (17 CFR 239.14 and 274.11a-1), Form N-3 (17 CFR 239.17a and 274.11b), Form N-4 (17 CFR 239.17b and 274.11c), and Form N-6 (17 CFR 239.17c and 274.11d)). For example, a mutual fund that prepares a registration statement on Form N-1A must comply with the rules under section 8(b), including rules on riders, amendments, the form of the registration statement, and the number of copies to be submitted. Because the fund only incurs a burden from the section 8(b) rules when preparing a registration statement, it would be impractical to measure the compliance burden of these rules separately. The Commission believes that including the burden of the section 8(b) rules with the burden estimates for the investment company registration statement forms provides a more accurate and complete estimate of the total burdens associated with the registration process. For administrative purposes, however, we are requesting approval for an information collection burden of one hour per year. This estimate of burden hours is not derived from a comprehensive or necessarily even representative study of the cost of the Commission's rules and forms.

Written comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the

information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.

Please direct your written comments to Charles Boucher, Director/CIO, Securities and Exchange Commission, C/O Shirley Martinson, 6432 General Green Way, Alexandria, VA 22312; or send an e-mail to: PRA Mailbox@sec.gov.

Dated: July 8, 2009.

Elizabeth M. Murphy,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release Nos. 33–9049; 34–60260; File No. 265–25]

Investor Advisory Committee; Meeting

AGENCY: Securities and Exchange Commission.

ACTION: Notice of Meeting of SEC Investor Advisory Committee.

SUMMARY: The Securities and Exchange Commission Investor Advisory Committee is providing notice that it will hold a public meeting on Monday, July 27, 2009, in the Auditorium, Room L-002, at the Commission's main offices, 100 F Street, NE., Washington, DC. The meeting will begin at 10 a.m. (EST) and will be open to the public. The meeting will be webcast on the Commission's Web site at http:// www.sec.gov. Persons needing special accommodations to take part because of a disability should notify a contact person listed below. The public is invited to submit written statements to the Committee.

The agenda for the meeting includes opening remarks, introduction of Committee members, discussion of Committee agenda and organization, and discussion of investor views of possible refinements to the disclosure regime.

DATES: Written statements should be received on or before July 19, 2009.

ADDRESSES: Written statements may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet submission form (http://www.sec.gov/rules/other.shtml); or
- Send an e-mail message to *rule-comments@sec.gov*. Please include File Number 265–25 on the subject line.

Paper Comments

• Send paper statements in triplicate to Elizabeth M. Murphy, Federal Advisory Committee Management Officer, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File No. 265-25. This file number should be included on the subject line if e-mail is used. To help us process and review your statements more efficiently, please use only one method. The Commission staff will post all statements on the Advisory Committee's Web site (http:// www.sec.gov/spotlight/ investoradvisorycommittee.htm). Statements also will be available for public inspection and copying in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. All statements received will be posted without change; we do not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly.

FOR FURTHER INFORMATION CONTACT:

Kayla J. Gillan, Deputy Chief of Staff, at (202) 551–2100; David Fredrickson, Assistant General Counsel, Office of the General Counsel, at (202) 551–5144; or Owen Donley, Chief Counsel, Office of Investor Education and Advocacy, at (202) 551–6322, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–6561.

SUPPLEMENTARY INFORMATION: In accordance with Section 10(a) of the Federal Advisory Committee Act, 5 U.S.C. App. 1, section 10(a), Kayla J. Gillan, Designated Federal Officer of the Committee, has approved publication of this notice.

Dated: July 8, 2009.

Elizabeth M. Murphy,

Committee Management Officer.

BILLING CODE 8010–01–P

¹Rule 8b–3 (17 CFR 270.8b–3) provides that whenever a registration form requires the title of securities to be stated, the registrant must indicate the type and general character of the securities to be issued. Rule 8b–22 (17 CFR 270.8b–22) provides that if the existence of control is open to reasonable doubt, the registrant may disclaim the existence of control, but it must state the material facts pertinent to the possible existence of control.

SECURITIES AND EXCHANGE COMMISSION

Sunshine Act Meeting

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Public Law 94–409, that the Securities and Exchange Commission will hold a Closed Meeting on Thursday, July 16, 2009 at 2 p.m.

Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the Closed Meeting. Certain staff members who have an interest in the matters also may be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(5), (7), 9(B) and (10) and 17 CFR 200.402(a)(5), (7), 9(ii) and (10), permit consideration of the scheduled matters at the Closed Meeting.

Commissioner Walter, as duty officer, voted to consider the items listed for the Closed Meeting in a closed session.

The subject matter of the Closed Meeting scheduled for Thursday, July 16, 2009 will be:

Institution and settlement of injunctive actions; institution and settlement of administrative proceedings; other matters relating to enforcement proceedings; and opinions.

At times, changes in Commission priorities require alterations in the scheduling of meeting items.

For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact:

The Office of the Secretary at (202) 551–5400.

Dated: July 9, 2009.

Elizabeth M. Murphy,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

Sunshine Act Meeting

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Public Law 94–409, that the Securities and Exchange Commission will hold an Open Meeting on Wednesday, July 15, 2009 at 10 a.m., in the Auditorium, Room L–002.

The subject matter of the Open Meeting will be:

The Commission will consider a recommendation regarding amendments to Rule 15c2–12 ("Rule") under the

Securities Exchange Act of 1934 ("Act"), concerning the responsibilities of a broker, dealer, or municipal securities dealer acting as an underwriter in a primary offering of municipal securities and interpretive guidance intended to assist municipal securities issuers, brokers, dealers and municipal securities dealers in meeting their obligations under the antifraud provisions of the Act.

At times, changes in Commission priorities require alterations in the scheduling of meeting items.

For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact:

The Office of the Secretary at (202) 551–5400.

Dated: July 8, 2009.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-60256; File No. SR-NYSEArca-2009-56]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Add Two New Order Types to NYSE Arca Equities Rule 7.31

July 7, 2009.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act") ¹ and Rule 19b–4 thereunder, ² notice is hereby given that, on June 23, 2009, NYSE Arca, Inc. ("NYSE Arca" or the "Exchange") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to add two new order types to NYSE Arca Equities Rule 7.31. A copy of this filing is available on the Exchange's Web site at http://www.nyse.com, at the Exchange's principal office and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to add two new order types to NYSE Arca Equities Rule 7.31. The new order types will allow NYSE Arca Users 3 to participate at the primary listing exchange during the first 15 minutes and last 15 minutes of the trading day. For the remainder of the trading session the orders will remain in the NYSE Arca Book ("Arca Book"). The two new order types behave like a combination of currently existing order types and are discussed more thoroughly below.

Primary Until 9:45 Order

The Exchange proposes to add a new order type called the Primary Until 9:45 Order. The Primary Until 9:45 Order will permit NYSE Arca Users to submit an order that will be routed directly to the primary listing market until 9:45 a.m. (Eastern Time).⁴ If the order is not executed on the primary market by 9:45 a.m. (Eastern Time), the order will be cancelled from the primary market and a new order will be entered on the Arca Book for execution during the remainder of the Exchange's Core Trading Session.⁵ The Primary Until 9:45 Order may be marked with a Time in Force of Day, Good Till Cancelled ("GTC"), or Good Till Date ("GTD"). Orders that return to NYSE Arca after routing to the primary market will retain their original order attributes. Orders that return to the Arca Book at 9:45 will

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

 $^{^3\,}See$ NYSE Arca Rule 1.1(yy) for the definition of "User."

⁴ The PO+ order was recently approved as Rule 7.31(x)(3). See Securities and Exchange Act Release No. 58681 (September 29, 2008); 73 FR 58285 (October 6, 2008) (order approving SR–NYSEArca–2008–90).

 $^{^5\,}See$ NYSE Arca Rule 7.34(a)(2) for the definition of "Core Trading Session."

be treated as a new order and receive a

new time priority.

Currently, NYSE Arca Users can only accomplish this proposed functionality through the submission of two separate order types. First, the User would direct an order to the primary market without first sweeping the NYSE Arca Book by submitting a Primary Only (PO) or Primary Only Plus (PO+) Order. 67 Then at 9:45 the User would cancel the PO or PO+ Order and submit an order to the Exchange. The Primary Until 9:45 Order will operate in a manner similar to a combination of a PO+ Order and an order that is executable on the Exchange. The Primary Until 9:45 Order simplifies this functionality into one new order type.

Primary After 3:45 Order

Similarly, the Exchange proposes to add a new order type called the Primary After 3:45 Order. The Primary After 3:45 Order will permit Exchange Users to submit an order that will remain on the Arca Book until 3:45 p.m. (Eastern Time). If the order is not executed by 3:45 p.m. (Eastern Time) the order will be cancelled from the Arca Book and entered for execution on the primary market for the remainder of the trading session. The Primary After 3:45 Order may only be marked with a Time in Force of Day, and may not be marked as GTC or GTD. Orders that route to the primary market at 3:45 will retain their original order attributes.

Currently, NYSE Arca Users can only accomplish this proposed functionality through the submission of two separate order types. First a User would submit an order for execution on the Exchange. Then, at 3:45 the User would cancel the order resting in the Arca Book and submit a PO or PO+ Order for execution on the primary market. The Primary After 3:45 Order type will operate in a manner similar to a combination of two

existing order types, but simplifies this compound functionality into one new order type.

The proposed order types provide Users the ability to participate on the primary listing market during the two most active periods of the trading day, the fifteen minutes following the open and prior to the close. For the remainder of the trading day, the two new order types offer Users access to the Exchange's liquidity.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b) 8 of the Securities Exchange Act of 1934 (the "Exchange Act"), in general, and furthers the objectives of Section 6(b)(5) 9 in particular in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. The Exchange believes that the proposed rule changes are designed to accomplish these ends by providing Users the ability to participate on the primary listing market during the most active periods of the trading day.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the **Proposed Rule Change and Timing for Commission Action**

Because the foregoing proposed rule change: (i) Does not significantly affect the protection of investors or the public interest; (ii) does not impose any significant burden on competition; and (iii) by its terms, does not become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, it has become effective pursuant to Section

19(b)(3)(A) of the Act 10 and Rule 19b-4(f)(6) thereunder.11

A proposed rule change filed under Rule 19b-4(f)(6) normally may not become operative prior to 30 days after the date of filing. 12 However, Rule 19b-4(f)(6)(iii) 13 permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay to allow market participants on NYSE Arca increased flexibility to participate on the primary listing exchange during the 15 minutes following the open and prior to the close. In addition, the waiver of the operative delay would allow the proposal to become operative on the date of approval of SR-NYSE-2009-58. The Commission believes such waiver is consistent with the protection of investors and the public interest.14 Accordingly, the Commission designates the proposed rule change operative on July 7, 2009.15

At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (http://www.sec.gov/ rules/sro.shtml); or
- Send an e-mail to rulecomments@sec.gov. Please include File

⁶ A PO Order will only participate in the primary market opening or re-opening. A PO+ Order will participate at any time other than the primary market opening or re-opening.

⁷ PO+ Orders are routed to the primary market via the Exchange's outbound routing facility, Archipelago Securities, LLC ("Arca Securities"), a registered broker dealer. Arca Securities is an affiliated member of the NYSE, NYSE Arca, and NYSE Amex, LLC. As a result, each of these three exchanges have established certain mechanisms designed to address potential conflicts of interest regarding affiliated members generally, and Arca Securities in particular. See Securities and Exchange Act Release No. 58680 (September 29, 2008), 73 FR 58283 (October 6, 2008) (order approving SR-NYSE-2008-76); see also, Securities Exchange Act Release No. 58681 (September 29, 2008), 73 FR 58285 (October 6, 2008) (order approving NYSEArca-2008-90); see also, Securities Exchange Act Release No. 58705 (October 1, 2008), 73 FR 58995 (October 8, 2008) (order approving SR-AMEX-2008-62).

^{8 15} U.S.C. 78f(b).

^{9 15} U.S.C. 78f(b)(5).

Paper Comments

• Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR-NYSEArca-2009-56. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (http://www.sec.gov/ rules/sro.shtml). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-NYSEArca-2009-56 and should be submitted on or before August 3, 2009.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority. 16

Elizabeth M. Murphy,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-60254; File No. SR-CBOE-2009-042]

Self-Regulatory Organizations; Chicago Board Options Exchange, Incorporated; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to Temporary Membership Status and Interim Trading Permit Access Fees

July 7, 2009.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ notice is hereby given that on June 30, 2009, the Chicago Board Options Exchange, Incorporated ("CBOE" or the "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the CBOE. The Commission is publishing this notice to solicit comments on the proposed rule change from interested parties.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

CBOE proposes to adjust (i) the monthly access fee for persons granted temporary CBOE membership status ("Temporary Members") pursuant to Interpretation and Policy .02 under CBOE Rule 3.19 ("Rule 3.19.02") and (ii) the monthly access fee for Interim Trading Permit ("ITP") holders under CBOE Rule 3.27. The text of the proposed rule change is available on the Exchange's Web site (http://www.cboe.org/Legal/), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, CBOE included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The CBOE has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

1. Purpose

The current access fee for Temporary Members under Rule 3.19.02 ² and the current access fee for ITP holders under Rule 3.27 ³ are both \$10,171 per month. Both access fees are currently set at the indicative lease rate (as defined below) for June 2009. The Exchange proposes to adjust both access fees effective at the beginning of July 2009 to be equal to the indicative lease rate for July 2009 (which is \$11,552). Specifically, the Exchange proposes to revise both the Temporary Member access fee and the ITP access fee to be \$11,552 per month commencing on July 1, 2009.

The indicative lease rate is defined under Rule 3.27(b) as the highest clearing firm floating monthly rate ⁴ of the CBOE Clearing Members that assist in facilitating at least 10% of the CBOE transferable membership leases.⁵ The Exchange determined the indicative lease rate for July 2009 by polling each of these Clearing Members and obtaining the clearing firm floating monthly rate designated by each of these Clearing Members for that month.

The Exchange used the same process to set the proposed Temporary Member and ITP access fees that it used to set the current Temporary Member and ITP access fees. The only difference is that the Exchange used clearing firm floating monthly rate information for the month of July 2009 to set the proposed access fees (instead of clearing firm floating monthly rate information for the month of June 2009 as was used to set the current access fees) in order to take into account changes in clearing firm floating monthly rates for the month of July 2009.

The Exchange believes that the process used to set the proposed Temporary Member access fee and the

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

² See Securities Exchange Act Release No. 56458 (September 18, 2007), 72 FR 54309 (September 24, 2007) (SR-CBOE-2007-107) for a description of the Temporary Membership status under Rule 3.19.02.

³ See Securities Exchange Act Release No. 58178 (July 17, 2008), 73 FR 42634 (July 22, 2008) (SR–CBOE–2008–40) for a description of the Interim Trading Permits under Rule 3.27.

⁴Rule 3.27(b) defines the clearing firm floating monthly rate as the floating monthly rate that a Clearing Member designates, in connection with transferable membership leases that the Clearing Member assisted in facilitating, for leases that utilize that monthly rate.

⁵ The concepts of an indicative lease rate and of a clearing firm floating month rate were previously utilized in the CBOE rule filings that set and adjusted the Temporary Member access fee. Both concepts are also codified in Rule 3.27(b) in relation to TPPs.

^{16 17} CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

proposed Temporary Member access fee itself are appropriate for the same reasons set forth in CBOE rule filing SR–CBOE–2008–12 with respect to the original Temporary Member access fee. Similarly, the Exchange believes that the process used to set the proposed ITP access fee and the proposed ITP access fee itself are appropriate for the same reasons set forth in CBOE rule filing SR–CBOE–2008–77 with respect to the original ITP access fee. 7

Each of the proposed access fees will remain in effect until such time either that the Exchange submits a further rule filing pursuant to Section 19(b)(3)(A)(ii) of the Act ⁸ to modify the applicable access fee or the applicable status (*i.e.*, the Temporary Membership status or the ITP status) is terminated. Accordingly, the Exchange may, and likely will, further adjust the proposed access fees in the future if the Exchange determines that it would be appropriate to do so taking into consideration lease rates for transferable CBOE memberships prevailing at that time.

The procedural provisions of the CBOE Fee Schedule related to the assessment of each proposed access fee are not proposed to be changed and will remain the same as the current procedural provisions relating to the assessment of that access fee.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,⁹ in general, and furthers the objectives of Section 6(b)(4) of the Act,¹⁰ in particular, in that it is designed to provide for the equitable allocation of reasonable dues, fees, and other charges among persons using its facilities.

B. Self-Regulatory Organization's Statement on Burden on Competition

CBOE does not believe that the proposed rule change will impose any burden on competition that is not

necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing rule change establishes or changes a due, fee, or other charge imposed by the Exchange, it has become effective pursuant to Section 19(b)(3)(A) of the Act ¹¹ and subparagraph (f)(2) of Rule 19b–4 ¹² thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (http://www.sec.gov/rules/sro.shtml); or
- Send an e-mail to *rule-comments@sec.gov*. Please include File Number SR-CBOE-2009-042 on the subject line.

Paper Comments

• Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington DC 20549–1090.

All submissions should refer to File Number SR–CBOE–2009–042. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (http://www.sec.gov/rules/sro.shtml). Copies of the submission, all subsequent amendments, all written statements

with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File No. SR-CBOE-2009-042 and should be submitted on or before August 3, 2009.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority. 13

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-60239; File No. SR-FINRA-2009-045]

Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Notice of Filing of Proposed Rule Change Relating to Transaction-Related Charges for Trade Reporting to the OTC Reporting Facility

July 2, 2009.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 19b—4 thereunder, notice is hereby given that on July 1, 2009, Financial Industry Regulatory Authority, Inc. ("FINRA") (f/k/a National Association of Securities Dealers, Inc. ("NASD")) filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II, and III below. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

⁶ See Securities Exchange Act Release No. 57293 (February 8, 2008), 73 FR 8729 (February 14, 2008) (SR-CBOE-2008-12), which established the original Temporary Member access fee, for detail regarding the rationale in support of the original Temporary Member access fee and the process used to set that fee, which is also applicable to this proposed change to the Temporary Member access fee as well.

⁷ See Securities Exchange Act Release No. 58200 (July 21, 2008), 73 FR 43805 (July 28, 2008) (SR—CBOE–2008–77), which established the original ITP access fee, for detail regarding the rationale in support of the original ITP access fee and the process used to set that fee, which is also applicable to this proposed change to the ITP access fee as well.

^{2 17} CFR 240.19b-4.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

FINRA is proposing to clarify the application of transaction-related charges for trade reporting to the OTC Reporting Facility ("ORF") pursuant to FINRA Rule 7710.

The text of the proposed rule change is available on FINRA's Web site at http://www.finra.org, at the principal office of FINRA and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, FINRA included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. FINRA has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The FINRA Rule 7700 Series, among other things, sets forth the pricing schedule for the ORF, the OTC Bulletin Board, and the Trade Reporting and Compliance Engine Services. On March 1, 2007, FINRA filed a proposed rule change (SR-NASD-2007-018) for immediate effectiveness that deleted certain fee provisions from the FINRA Rule 7700 Series 3 and amended certain other provisions.4 In that filing, NASD Rule 7010(g) was renumbered as NASD Rule 7010, renamed, and amended to apply only to the ORF.5 The amendments became operative on March 5, 2007.6 As FINRA stated in the

filing, the amendments made to the rule language were not intended to modify any of the charges relating to the ORF.

Although there was no intent to modify any charges in connection with reporting transactions to the ORF, the rule language, as amended by SR-NASD-2007-018, omitted some securities from the rule because of the definition of "OTC Equity Security" in FINRA Rule 6420. The previous rule, NASD Rule 7010(g), included a catch-all provision that applied a charge of \$0.029/side to the "reporting of all other transactions not subject to comparison." This language included, for example, PORTAL equity securities, which are reported to the ORF pursuant to the PORTAL rules in the FINRA Rule 6630 Series. The term "OTC Equity Security," however, specifically excludes PORTAL securities and restricted securities from the definition.⁷ Thus, by using the defined term "OTC Equity Security" from March 5, 2007, until June 17, 2009, PORTAL equity securities were inadvertently omitted from the scope of the rule language.8

The proposed rule change deletes the prior reference to "OTC Equity Security" in FINRA Rule 7710 to clarify that, from March 5, 2007, until June 17, 2009, the transaction reporting charges imposed pursuant to the rule applied to the reporting of transactions in any security, not just OTC Equity Securities, to the ORF that were not subject to comparison through the ORF.

FINRA is proposing that the operative date of the proposed rule change be retroactive from March 5, 2007, to June 17, 2009.

2. Statutory Basis

FINRA believes that the proposed rule change is consistent with the provisions of Section 15A(b)(5) of the Act,9 which requires, among other things, that FINRA rules provide for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility or system that FINRA operates or controls. FINRA believes that the proposed rule change clarifies the charges that were assessed with respect to transactions that were reported to the ORF from March 5, 2007, until June 17, 2009, and correctly reflects FINRA's intent when it amended the rule in SR-NASD-2007-018.

B. Self-Regulatory Organization's Statement on Burden on Competition

FINRA does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (http://www.sec.gov/rules/sro.shtml); or
- Send an e-mail to *rule-comments@sec.gov*. Please include File Number SR–FINRA–2009–045 on the subject line.

Paper Comments

• Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–FINRA–2009–045. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (http://www.sec.gov/rules/sro.shtml). Copies of the submission, all subsequent

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-60243; File No. SR-CHX-2009-09]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change by the Chicago Stock Exchange, Inc. Adding the Post Only and Post Only ISO Order Types

July 6, 2009.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") 1, and Rule 19b—4 2 thereunder, notice is hereby given that on June 29, 2009, the Chicago Stock Exchange, Inc. ("CHX" or the "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I and II, below, which Items have been prepared by CHX. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

CHX proposes to amend its rules to add the Post Only and Post Only ISO order types. The text of this proposed rule change is available on the Exchange's Web site at (http://www.chx.com), at the principal office of the Exchange, and in the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the CHX included statements concerning the purpose of and basis for the proposed rule changes and discussed any comments it received regarding the proposal. The text of these statements may be examined at the places specified in Item IV below. The CHX has prepared summaries, set forth in sections A, B and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend CHX Article 20, Rule 4 to add the Post Only and Post Only ISO order types.

A Post Only Order is an order designed to encourage displayed liquidity on the Exchange. By its terms, a Post Only Order is posted on the Exchange and does not route away to another trading center. A Post Only Order will be immediately cancelled if it is marketable against a contra-side order in the Matching System when entered, or if it is at a price that would lock or cross a manual or protected quotation.

A Post Only ISO Order is a type of ISO order that will be immediately cancelled without execution if it is marketable against a contra-side order in the Matching System when entered. If a Post Only ISO is not immediately cancelled, it will be posted on the Exchange at the entered limit price. By entering a Post Only ISO, a Participant represents that such Participant has simultaneously routed one or more additional limit orders marked "ISO," as necessary, to away markets to executed against the full displayed size of any protected quotation for the security with a price that is superior or equal to the limit price of the Post Only ISO entered in the Matching System. Consequently, a Post Only ISO order will be displayed by the Exchange

regardless of whether it will lock or cross another market center's quote.

Orders marked Post Only and Post Only ISO will always be considered "liquidity providing" by the Exchange for purposes of application of the Exchange's fees and rebate programs. By making a Post Only or Post Only ISO designation, Participants are able to avoid the risk that their orders will be considered "liquidity taking" for purposes of application of the Exchange's fees and rebate programs. CHX notes that order types similar to the proposed Post Only and Post Only ISO order types are already in use by other market centers.³

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act in general,4 and furthers the objectives of Section 6(b)(5) in particular,5 in that it is designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transaction in securities, to remove impediments and perfect the mechanisms of a free and open market, and, in general, to protect investors and the public interest by allowing CHX to amend its rules to add the Post Only and Post Only ISO order types based on similar rules already in effect at other exchanges. The addition of these order types will benefit Exchange customers and promote competition among market centers.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days after the date of

^{10 17} CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ See Rule 11.11(c)(5) and (c)(8)(ii) of the National Stock Exchange, Rule 11.9(c)(6) of the BATS Exchange and Rule 7.31(w) of NYSE Arca.

^{4 15} U.S.C. 78f(b).

⁵ 15 U.S.C. 78f(b)(5).

the filing, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act 6 and Rule 19b-

4(f)(6)⁷ thereunder.

The Exchange has asked the Commission to waive the operative delay to permit the proposed rule change to become operative prior to the 30th day after filing. The Commission has determined that waiving the 30-day operative delay of the Exchange's proposal is consistent with the protection of investors and the public interest.8 The Commission believes that the proposed rule change is substantially similar to rules adopted by other exchanges and does not raise any new regulatory issues.9 Therefore, the Commission designates the proposal operative upon filing.

At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the

purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (http://www.sec.gov/ rules/sro.shtml); or
- Send an e-mail to rulecomments@sec.gov. Please include File Number SR-CHX-2009-09 on the subject line.

Paper Comments

 Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-CHX-2009-09. This file

number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (http://www.sec.gov/ rules/sro.shtml). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-CHX-2009-09 and should be submitted on or before August 3, 2009.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.10

Elizabeth M. Murphy,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-60247; File No. SR-BX-2009-021]

Self-Regulatory Organizations; NASDAQ OMX BX, Inc.; Order **Approving Proposed Rule Change to** Amend the Restated Certificate of Incorporation and By-Laws of NASDAQ OMX BX, Inc.

July 6, 2009.

On April 29, 2009, NASDAO OMX BX, Inc. ("BX" or "Exchange") filed with the Securities and Exchange Commission ("Commission") pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),1 and

Rule 19b-4 thereunder,² a proposed rule change to amend its Restated Certificate of Incorporation ("Certificate") and by-laws ("By-Laws"). The proposed rule change was published for comment in the Federal Register on May 19, 2009.3 The Commission received no comments regarding the proposal. This order approves the proposed rule change.

I. Description of the Proposed Rule

On August 29, 2008, The NASDAQ OMX Group, Inc. ("NASDAQ OMX") acquired BX. Since then, the boards of BX and its parent company, NASDAQ OMX, have maintained their own audit committee and management compensation committee. As more fully discussed in the Notice, the Exchange states that it has found the work of these committees to overlap substantially.⁴ As a result, BX proposes to revise its By-Laws to allow for the elimination of its audit and management compensation committees. In addition, BX proposes to amend its Certificate and By-Laws to reflect the name change of The Nasdaq Stock Market, Inc. to The NASDAQ OMX Group, Inc. II.

Discussion and Commission Findings

After careful review, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange.⁵ In particular, the Commission finds that the proposed rule change is consistent with Section 6(b)(1) of the Act,6 which requires a national securities exchange to be so organized and have the capacity to carry out the purposes of the Act and to comply, and to enforce compliance by its members and persons associated with its members, with the provisions of the Act. The Commission also finds that the proposed rule change is consistent with Section 6(b)(5) of the Act,7 in that it is designed, among other things, to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. The Commission

⁶ 15 U.S.C. 78s(b)(3)(A).

⁷¹⁷ CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. CHX has satisfied this requirement.

⁸ For purposes only of waiving the 30-day operative delay, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

⁹ See supra note 3.

^{10 17} CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ See Securities Exchange Act Release No. 59908 (May 12, 2009), 74 FR 23459 ("Notice")

⁴ See Notice, supra note 3, 74 FR at 23460.

⁵ In approving this proposed rule change, the Commission notes that it has considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

^{6 15} U.S.C. 78(b)(1).

^{7 15} U.S.C. 78f(b)(5).

previously approved a structure in which certain committees of the board of directors of NYSE Euronext, including the audit and compensation committees, were authorized to perform functions for various subsidiaries, including the New York Stock Exchange, LLC ("NYSE").8

The BX Audit Committee. Currently, the BX audit committee is primarily charged with: (1) Overseeing BX's financial reporting process; (2) overseeing the systems of internal controls established by management and the BX board, as well as the legal and compliance process; (3) selection and evaluation of independent auditors; and (4) direction and oversight of the internal audit function. BX states that the NASDAQ OMX audit committee 9 will assume the duties currently performed by the BX audit committee once that committee is eliminated. The Exchange states that the responsibilities of BX's audit committee are fully duplicated by the responsibilities of the NASDAQ OMX audit committee. 10 In addition, BX states that its regulatory oversight committee has broad authority to oversee the adequacy and effectiveness of BX's regulatory and selfregulatory organization responsibilities, and therefore is able to maintain oversight over internal controls in tandem with the NASDAQ OMX audit committee. Further, BX states that the practice of NASDAQ OMX's Internal Audit Department ("Department"),11

which performs internal audit functions for all NASDAQ OMX subsidiaries, is to report to the BX regulatory oversight committee on all internal audit matters relating to BX, which will be formally reflected in the Department's written procedures. BX also represents that, to ensure that the BX board retains authority to direct the Department's activities with respect to BX, the Department's written procedures will be amended to stipulate that the BX regulatory oversight committee may, at any time, direct the Department to conduct an audit of a matter of concern to it and report the results of the audit both to the BX regulatory oversight committee and the NASDAQ OMX audit committee.12

BX Management Compensation Committee. BX also proposes to eliminate its compensation committee, and to prescribe that the functions of that committee be performed by the NASDAQ OMX compensation committee or the full BX board, when required. The NASDAQ OMX By-Laws provide that its compensation committee considers and recommends compensation policies, programs, and practices for employees of NASDAO OMX. According to BX, many employees performing work for BX are also employees of NASDAQ OMX, and certain senior officers of BX are also officers of NASDAQ OMX and other NASDAQ OMX subsidiaries because their responsibilities relate to multiple entities within the NASDAQ OMX corporate structure. 13 As a result, NASDAQ OMX establishes compensation and compensation policy for these employees.

To the extent that policies, programs, and practices must be established for any BX officers or employees who are not also NASDAQ OMX officers or employees, BX states that the BX Board will perform such actions without the use of a compensation committee, subject to recusal by Staff Directors, 14 unless the persons in question are also

employees of Boston Options Exchange Regulation LLC ("BOXR").¹⁵

The Commission notes that the proposed elimination of the BX audit and management compensation committees is comparable to a structure for the NYSE that the Commission previously considered and approved. The Commission finds that the proposed elimination of the BX's audit and management compensation committees is consistent with the Exchange Act.

II. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,¹⁷ that the proposed rule change (SR–BX–2009–021) be, and it hereby is, approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority. 18

Elizabeth M. Murphy,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-60196; File No. SR-DTC-2006-16]

Self-Regulatory Organizations; The Depository Trust Company; Order Granting Approval of a Proposed Rule Change as Amended Relating to FAST and DRS Limited Participant Requirements for Transfer Agents

June 30, 2009.

I. Introduction

On October 12, 2006, The Depository Trust Company ("DTC") filed with the Securities and Exchange Commission ("Commission") proposed rule change SR-DTC-2006-16 pursuant to Section 19(b)(1) of the Securities Exchange Act

^{*} Securities Exchange Act Release No. 55293 (February 14, 2007), 72 FR 8033 (February 22, 2007) (SR-NYSE-2006-120).

⁹ The NASDAQ OMX audit committee is composed of four or five directors, all of whom must be independent under the standards established by Section 10A(m) of the Act and the listing rules of The NASDAQ Stock Market LLC. All committee members must be able to read and understand financial statements, and at least one member must have past employment experience in finance or accounting, requisite professional certification in accounting, or any other comparable experience or background that results in the individual's financial sophistication.

¹⁰ Specifically, BX states that: the NASDAQ OMX audit committee has broad authority to review the financial information that will be provided to shareholders and others, systems of internal controls, and audit, financial reporting and legal and compliance processes and, because NASDAQ OMX's financial statements are prepared on a consolidated basis that includes the financial results of NASDAQ OMX's subsidiaries, including BX, the NASDAQ OMX audit committee's purview necessarily includes these subsidiaries. In addition, BX states that the NASDAQ OMX audit committee currently is charged with providing oversight over financial reporting and independent auditor selection for NASDAQ OMX and all of its subsidiaries, including BX, and the NASDAQ OMX audit committee has general responsibility for oversight over internal controls and direction and oversight over the internal audit function for NASDAQ OMX and all of its subsidiaries. See Notice, 74 FR at 23460.

¹¹ See Notice, 74 FR at 23460–61.

¹² See Notice, 74 FR at 23461.

¹³ Id.

¹⁴ See BX By-Laws Article I(t). Staff Directors are directors of BX that are also serving as officers. Because the BX board would not be responsible for setting the compensation of any Staff Directors who are also officers of NASDAQ OMX, these directors would be permitted to participate in discussions concerning compensation of BX employees, but BX states that they must recuse themselves from a vote on the subject to allow the determination to be made by directors that are not officers or employees of BX. BX also states that, if a Staff Director is not also an employee of NASDAQ OMX, that Staff Director must also absent himself or herself from any deliberations regarding his or her compensation.

 $^{^{\}rm 15}\,\rm BOXR$ is the subsidiary of BX that has been delegated responsibility to regulate the market operated by Boston Options Exchange Group LLC ("BOX"), an options exchange that is a facility of BX but in which neither BX nor any of its affiliates has a financial interest. Section 17 of the By-Laws of BOXR (which are part of its Limited Liability Company Agreement) provides that the compensation of BOXR's officers shall be determined by the BOXR Board. Because of BOXR's special status as a regulatory subsidiary, this provision will remain operative following the implementation of the rule change proposed by this filing. The Commission notes that, under the By-Laws, BX's regulatory oversight committee must be informed about the compensation and promotion or termination of the BX chief regulatory officer and the reasons therefor, to allow it to provide oversight over decisions affecting this key officer. See BX By-Laws Section 4.13(e).

¹⁶ See supra note 8.

^{17 15} U.S.C. 78s(b)(2).

¹⁸ 17 CFR 200.30–3(a)(12).

of 1934 ("Act").1 On March 29, 2007, and May 3, 2007, DTC filed amendments to the proposed rule change. On May 25, 2007, the Commission published notice of the proposed rule change as amended by Amendment 1 and Amendment 2.2 On December 31, 2007, DTC again filed an amendment. Notice of the amended proposal was published in the Federal Register on February 20, 2007.3 On June 23, 2008, DTC again filed an amendment. Notice of the amended proposed rule change was published in the Federal Register on June 19, 2008.4 The Commission received 47 comment letters in total to the proposed rule change. 5 For the reasons discussed below, the Commission is granting approval of the proposed rule change, as amended.

II. Description

Prior to the establishment of DTC's Fast Automated Securities Transfer program ("FAST"), transfers of securities to or from DTC on behalf of its participants occurred by sending securities certificates back and forth between DTC and transfer agents. In the case of securities being deposited with DTC, DTC sent the certificates received by its participants to the transfer agent for registration into the name of DTC's nominee, Cede & Co., and the transfer agent returned the reregistered certificates to DTC. In the case of securities being withdrawn from DTC, DTC sent the certificates registered in the name of Cede & Co. to the transfer agent for reregistration into the name designated by the withdrawing participant, and the transfer agent returned a reregistered security certificate to DTC for delivery to the withdrawing participant or delivered the reregistered security certificate to another entity as directed and sent a security certificate to DTC representing the remainder of DTC's position. The process of physically transporting securities certificates between DTC and transfer agents exposed DTC, its participants, and the transfer agents to the risk of loss during transit and resulted in significant expenses.

DTC's FAST program was designed to eliminate some of the risks and costs

related to this production and transportation of securities certificates. Under the FAST program, transfer agents hold FAST eligible securities in the name of Cede & Co. for the benefit of DTC.6 As additional securities are deposited or withdrawn from DTC, transfer agents adjust the size of DTC's position as appropriate and electronically confirm theses changes with DTC. Transfer agents acting as "FAST agents" are holding in custody for DTC those securities that would otherwise be held at DTC. As such, the FAST program reduces the movement of certificates between DTC and the transfer agents and therefore reduces the costs and risks associated with the creation, movement, and storing of certificates for issuers, transfer agents, broker-dealers, and DTC.

The FAST program has grown substantially since first being introduced in 1975.7 Recently all the major securities exchanges have made changes to the listing requirements to require companies to make their securities eligible to participate in the Direct Registration System ("DRS").8 Because FAST eligibility is a prerequisite to an issue being eligible for DRS, DTC expects that the number of FAST eligible securities will continue to expand.9 Furthermore, because being a FAST agent is a criterion for a transfer agent's eligibility for participation in

DRS, DTC anticipates significant growth in the number of FAST agents. 10

As a result of discussions with industry representatives, including transfer agents, broker-dealers, issuers, insurance companies, and various industry associations, DTC amended its filing four times in order to address concerns with the various proposals. The provisions contained in DTC's proposed rule change, as amended by the four amendments, are the provisions discussed in this order.

(1) Amendments to DTC's FAST Requirements

Despite the FAST program's robust past growth and expected future growth, the transfer agent eligibility requirements for FAST have not substantially changed since the implementation of FAST in 1975 and do not: (i) Take into account the increased volume and value of securities processed by the transfer agents, (ii) reflect improved technology and currently available safeguards that could enhance the safekeeping of securities held by the transfer agents on behalf of DTC, and (iii) require the use of standardized audit reports addressing transfer agents' processes and controls.

In light of the FAST program's growth, DTC re-examined the transfer agent eligibility requirements of the FAST program with a view toward ensuring that DTC's assets in the custody of transfer agents, which ultimately belong to DTC's participants and their customers, are adequately protected. As more fully described below, DTC has identified aspects of these FAST eligibility requirements that need revising or additional components. The revisions and additional requirements include: (i) Insurance requirements that take into account the level of transaction volumes of securities processed by transfer agents, (ii) safekeeping requirements to clarify and to enhance security and fire protection standards and to take into consideration technological advances that allow for economical security improvements, and (iii) bookkeeping requirements to ensure compliance with applicable laws and regulations and

⁴ Securities Exchange Act Release No. 57959 (June 12, 2008), 73 FR 57959 (June 19, 2008).

⁵ Infra note 22. The comment letters can be found at http://www.sec.gov/comments/sr-dtc-2006-16/dtc200616shtml.

⁶For a description of DTC's current rules relating to FAST, refer to Securities Exchange Act Release Nos. 13342 (March 8, 1977) [File No. SR–DTC–76–3]; 14997 (July 26, 1978) [File No. SR–DTC–78–11]; 21401 (October 16, 1984) [File No. SR–DTC–84–8]; 31941 (March 3, 1993) [SR–DTC–92–15]; and 46956 (December 6, 2002) [File No. SR–DTC–2002–15].

⁷DTC introduced the FAST program in 1975 with 400 issues and 10 agents. Currently, there are over 930,000 issues and approximately 90 agents in FAST.

⁸ DRS provides an investor with the ability to register her securities in her own name on the issuer's records and to efficiently transfer by bookentry movements her securities positions to her broker-dealer rather than holding a physical certificate or holding indirectly through a financial intermediary (e.g., a broker-dealer) in "street name." DRS also allows for the transfer of a DRS position from the books of the issuer to the account of a DTC broker-dealer participant and vice versa through the facilities of DTC using FAST.

standardized audit reports addressing transfer agents' processes and controls.

DTC is therefore amending and restating the minimum requirements for transfer agents' participation in the FAST program in order to improve the safekeeping of securities that transfer agents hold for DTC and to provide improved safekeeping requirements as more transfer agents participate in the immobilization and dematerialization of securities. DTC's revised minimum requirements are as follows.

1. The transfer agent must be registered with the Commission or its appropriate regulatory authority, except where the transfer agent's participation in the FAST program is limited to acting solely for municipal issues or unlisted corporate debt issues (transfer agents must provide DTC with evidence of such limited use), and must follow all applicable rules under the Exchange Act and all other applicable Federal and State laws, rules, and regulations applicable to transfer agents, including OFAC regulations.

2. The transfer agent must execute and fulfill the requirements of the appropriate form of "Balance Certificate Agreement" ¹¹ with DTC. ¹²

- 3. The transfer agent must sign and fulfill requirements of the "Operational Criteria for the FAST Transfer Agent Processing" ¹³ and must comply with all applicable provisions of DTC's "Operational Arrangements" ("OA"), ¹⁴ as amended from time to time. ¹⁵
- 4. In order to provide for the operational proficiency and efficiency of the program, the transfer agent must complete DTC's training on FAST functionality on being accepted as a FAST transfer agent.

5. In order to protect against the risk of loss, the transfer agent must carry and

provide evidence to DTC of a minimum of the following standard form Financial Institution Bond or a commercial crime policy providing similar coverage in proportion to transaction volume the agent processes, as follows:

a. \$10 million for a transfer agent with 25,000 or fewer transfer transactions per year as reported to the Commission;

b. \$25 million for a transfer agent with over 25,000 transfer transactions per year as reported to the Commission; and

c. In addition, the transfer agent must carry and provide evidence to DTC of a minimum of \$1 million in Errors and Omissions insurance.

In the event that a transfer agent can demonstrate to DTC that its existing coverage and/or capitalization would provide similar protections to DTC as the requirements set forth above, it may apply to DTC for a waiver. DTC shall have sole discretion as to whether or not to grant any such waiver.

6. In order to facilitate consistent protection against losses relating to securities in the transfer agent's control, the transfer agent must notify DTC as soon as practicable of notice of any actual lapse in insurance coverage or change in business practices, such as increasing volumes or other business changes, that would result in the transfer agent requiring additional insurance coverage as outlined above. Such notice shall be delivered to:

DTC, Inventory Management—1SL, 55 Water Street, New York, New York 10041.

A copy of such notice shall also be delivered to:

DTC, General Counsel's Office, 55 Water Street—22nd Floor, New York, New York 10041.

- 7. The transfer agent must provide proof to DTC of any new or substitute policy with respect to any required insurance within five (5) days after the entry into force of such new or substitute policy.
- 8. The transfer agent must establish and maintain electronic communications with DTC that enable FAST positions to be balanced on a daily schedule.
- 9. The transfer agent must provide to DTC on an annual basis within ten (10) business days of filing with the Commission, a copy of the Annual Study of Evaluation of Internal Accounting Control filed with the Commission pursuant to Exchange Act Rule 17Ad–13. If a transfer agent obtains a SAS–70 audit report, the transfer agent shall provide DTC with a copy of the report within ten (10) business days of the transfer agent's receipt of the report.

10. FAST agents must safeguard all the securities assets as required by Exchange Act Rule 17Ad–12 and with at a minimum the following additional DTC requirements:

a. Maintenance of a theft and fire central monitoring alarm system protecting the entire premises and

- b. Maintenance of all certificates in a vault, safe, or other secure location, which is accessible only by authorized personnel.
- 11. Personnel with access to the vault, safe, or other secure location and the codes for the centralized monitoring system must comply with Exchange Act Rule 17f–2, which includes but is not limited to rules for fingerprinting staff that physically handle certificates.
- 12. Unless prohibited by applicable law, the transfer agent when applying to be a FAST agent must provide DTC with a copy of the two most recent compliance or deficiency correspondences from the Commission as well as any follow-up correspondences. In addition, unless prohibited by applicable law, the transfer agent on an ongoing basis must provide DTC with notice of any alleged material deficiencies documented by the Commission that may affect the activities of the transfer agent as a FAST Agent within five (5) business days of the transfer agent being notified of such deficiencies.16
- 13. Unless prohibited by applicable law, during regular business hours and upon advance notice, DTC reserves the right to visit and inspect, to the extent such visits and inspections pertain to DTC's securities position, the transfer agent's facilities, books, and records. DTC, however, is not obligated to conduct such visits or inspections.
- 14. Existing FAST agents shall have a period of six (6) months from the date of the Commission's approval of this rule filing to comply with these requirements, including the submission to DTC of a signed Balance Certificate Agreement, signed Operational Criteria, and all supporting documentation referenced herein. If an agent is not compliant with these requirements upon the expiration of such period, DTC

¹¹ DTC currently maintains three forms of the Balance Certificate Agreement: One for transfer agents, one for issuers acting as their own agent, and one for parties using a processing agent. DTC is consolidating these forms into a single form, as attached as Exhibit 2 to its initial filing.

¹² DTC notes that these minimum requirements incorporate by reference the Balance Certificate Agreement between the transfer agent and DTC.

¹³ The "Operational Criteria for the FAST Transfer Agent Processing" is attached as Exhibit 2(b) to DTC's initial filing.

¹⁴ For more information relating to DTC's OA, refer to Securities Exchange Act Release Nos. 45994 (May 29, 2002), 67 FR 39452 [File No. SR-DTC-2002-02]; 24818 (August 19, 1987), 52 FR 31833 [File No. DTC-87-10]; 25948 (July 27, 1988), 53 FR 29294 [File No. DTC-88-13]; 30625 (April 23, 1992), 57 FR 18534 [File No. DTC-92-06]; 35649 (April 26, 1995), 60 FR 21576 [File No. DTC-94-19]; and 39894 (April 21, 1998), 63 FR 23310 [File No. DTC-97-23].

¹⁵ DTC notes that these minimum requirements incorporate by reference the "Operational Criteria for FAST Transfer Agent Processing" and all applicable terms in DTC's "Operational Arrangements."

¹⁶ DTC agrees to establish and maintain any and all such safeguards as are necessary and appropriate to protect the confidentiality of any notices, correspondences, or reports from the Commission to the transfer agent, and any follow-up correspondences, that the transfer agent provides to DTC. DTC also agrees that any information obtained from these notices, correspondences, or reports will not be used for any reason other than the intended purposes as authorized by this order and will not be shared with any person or entity outside of DTC. DTC will also notify the Commission if these documents are required to be remitted by DTC to any other federal or state authority.

shall have the right, using its sole discretion, to terminate or to continue the transfer agent's status as a FAST agent.

15. An agent acting on behalf of a transfer agent shall have the same rights and responsibilities under these requirements as if it were the transfer agent.

(2) Amended and Restated Eligibility Requirements for DRS Limited Participants

DTC is revising the eligibility requirements for DRS Limited Participants ¹⁷ and the eligibility requirements for DRS issues to promote consistency with the FAST program requirements as well as to further ensure the soundness of the DRS system.

In order to be eligible to be a DRS Limited Participant, a transfer agent must:

- 1. Participate in the FAST program and abide by DTC's requirements governing participation in the FAST program;
- 2. Execute a DTC Limited Participant Account agreement;
- 3. Deliver transaction advices directly to investors relating to DRS Withdrawal-by-Transfer requests and provide DTC with a file containing the information required by DTC (which must include, among other things, the transaction delivery date) in a format and using the functionality as specified by DTC from time to time;
- 4. Complete DTC's training program on DRS and Profile Modification System ("Profile") functionality;
- 5. Participate in the Profile surety or insurance program; 18
- 6. Implement program changes related to DTC internal systems modifications within a reasonable time upon receiving notification from DTC of such modifications; and
- 7. Implement program changes to support and expand DRS processing capabilities as agreed to by the DRS Ad Hoc Committee.

Existing DRS Limited Participants shall have a period of six (6) months from the date of the Commission's approval of this rule filing within which they must comply with these requirements. If an agent is not compliant with these requirements upon the expiration of such period, DTC shall have the right using its sole discretion to terminate or to continue the agent's status as a DRS Limited Participant.

(3) Eligibility Requirements for DRS

In order for an issue to be eligible as a DRS issue, the issue must:

- 1. Have a transfer agent accepted as a DTC DRS Limited Participant and
- 2. Be included in the FAST program.¹⁹

(4) DTC's Proposed Standard of Care Obligations With Respect to FAST

DTC is also clarifying the responsibilities and liabilities of FAST agents with respect to their participation in the FAST program. DTC believes that historically the Commission has left to user-governed clearing agencies the question of how to allocate losses associated with, among other things, clearing agency functions.²⁰ In conjunction with its approval of DTC's rule filing whereby DTC adopted a uniform standard of responsibility with respect to certain of its services, the Commission noted that while it had "called on registered clearing agencies to undertake, by rule, to deliver all fully paid securities in their control to, or as directed by, the participant for whom the securities are held," in light of the fact that registered clearing agencies had demonstrated a high level of responsibility in safeguarding securities and funds, the Commission did not find that a standard of care based on a strict standard of liability was required either with respect to failures of the clearing agency or a sub-custodian.21

DTC notes that securities in the FAST program are held by a transfer agent and are not within the immediate custody and control of DTC. As such, DTC is adding a clarifying provision to DTC's

Rule 6, a rule pertaining to DTC's standard of care as it applies to DTC participants, to make clear that DTC will not be liable to participants for the acts or omissions of FAST Agents or other third parties (including, but not limited to, any depository, custodian, subcustodian, clearing or settlement system, transfer agent, registrar, data communication service or delivery service) unless a loss is caused directly by DTC's gross negligence, willful misconduct, or violation of federal securities laws for which there is a private right of action. In addition, DTC is making it clear that under no circumstance shall DTC be liable for the selection or acceptance of any third party as an agent of DTC, including a transfer agent participating in the FAST Program.

III. Comment Letters 22

The Commission received a total of 47 comment letters on DTC's initial proposal and the subsequent four amendments (published in three notices for comment).²³ Specifically, the

Continued

¹⁷ DRS Limited Participants are transfer agents that participate in DRS through DTC. They are bound to certain provisions of the DTC rules. Securities Exchange Act Release No. 37931 (November 7, 1996) [File No. SR–DTC–96–15].

¹⁸ In DRS, instructions to transfer shares are sent by a broker-dealer that is a DTC participant or by a transfer agent that is a DRS Limited Participant through Profile. Profile provides screen based indemnification against false instructions from the party submitting the instructions through DRS. The indemnity is supported by either a surety bond or an insurance policy.

¹⁹ An issue may not become a DRS issue if an "out of balance" position exists. An "out of balance" position occurs when DTC's records indicating Cede & Co.'s ownership position do not match the transfer agent's records indicating Cede & Co.'s ownership position.

²⁰ Securities Exchange Act Release Nos. 20221 (September 23, 1983) and 22940 (February 24, 1986). In this regard, DTC adopted a uniform standard with respect to certain of its procedures, or Service Guides, such that DTC is not liable for any loss incurred by a participant other than one caused directly by gross negligence or willful misconduct on the part of DTC. See Securities Exchange Act Release No. 44719 (August 17, 2001) [File No. SR-DTC-2001-01].

²¹ Securities Exchange Act Release No. 22940 (February 24, 1986), 51 FR 7169 (order approving a rule change to establish a comprehensive standard of care and limitation of liability to its members).

Commission received twenty-seven comment letters on DTC's original proposed rule change, as amended by Amendments 1 and 2.²⁴ Twenty-three of

Nazare, Managing Director, Transfer Agency Services, The Bank of New York (June 29, 2007); and Charles

the commenters opposed some or all of the provisions in the proposed rule change while three commenters supported the proposed rule change. DTC also submitted a comment letter addressing the concerns and issues raised by the opposing commenters.

In response to commenters' concerns raised by the first two amendments to DTC's proposed rule change, DTC amended its filing for a third time. The Commission received ten comment letters to the third amendment, with eight commenters continuing to oppose the filing 25 and one commenter requesting clarification as to the application of one of the requirements of the proposed rule change to issuer transfer agents.²⁶ In response to the concerns raised by these nine commenters, DTC submitted a comment letter.²⁷ The comments set forth by those opposing the proposed rule change were for the most part the same concerns as were expressed in the comment letters submitted in response to the first notice of the first proposed rule change as amended by Amendments 1 and 2.

After approximately one and a half years of negotiations between DTC and the transfer agent community, DTC amended the proposed rule change for a fourth and final time. The Commission received ten comment letters in response to the proposed rule change as modified by Amendment 4, with nine commenters opposing some or all of the proposed rule and DTC again submitting a comment letter addressing the commenter concerns.²⁸ Seven of the

Douglas Bethill, Thacher, Proffitt & Wood LLP (December 28, 2007).

²⁶ Letter from Ray Dunn, Director of Shareholder Services, The Southern Company (March 20, 2008).

²⁸ Letters from Martin J. McHale, President, U.S. Equity Services, Computershare (July 2, 2008); Loren Hanson, Assistant Secretary, Otter Tail Corporation (July 7, 2008); Charles V. Rossi, President, The Securities Transfer Association, Inc. (July 9, 2008); Kevin Kopaunik, Fidelity Transfer Company (July 10, 2008); Dorothy Miller, Vice President & Trust Officer, Hancock Bank (July 10, 2008); Stephen G. Nelson, President and Chairman of the Board, Continental Stock Transfer & Trust

nine commenters opposing the proposed rule change expressed their concerns in response to one or both of the prior published notices. None of the commenters opposing the proposed rule change, as amended by the fourth amendment, raised any issues that had not been raised in their prior comment letters.

The majority of the nine commenters that opposed DTC's proposed rule change, which were issuers, transfer agents, or industry associations representing issuers or transfer agents, an insurance company, an association representing insurance companies, the American Banking Association ("ABA"), the Office of Advocacy of the **Small Business Administration** ("SBA"), and one individual, opposed the proposed rule change for various reasons. Most of the commenters raised a number of general policy concerns such as: (1) DTC lacks the authority to impose rules on transfer agents, and the imposition of such rules is inappropriate given the commercial relationship between transfer agents and DTC; (2) the specific requirements are unduly burdensome, unnecessary, costly (particularly with respect to small transfer agents), and without sufficient justification; (3) the proposed rule change appears based on the premise that transfer agents act as custodian for DTC's securities as recorded on the records of the issuer—a premise that the transfer agents and banks reject as erroneous; and (4) many of the provisions proposed by DTC are inconsistent with the movement to a book-entry form of securities ownership.

The remaining commenters, which were predominantly industry associations representing broker-dealers, supported the proposed rule change because of their belief that DTC's proposed requirements are necessary to facilitate the continuing increase in the use of DRS, which they contend is necessary in order to achieve the industry's objective of decreasing or eliminating the use of securities certificates in the U.S. market, and to reduce the risks associated with the continuing increase in volume and value of DRS transactions.

The following describes commenters' concerns with the specific provisions remaining in DTC's proposed rule

²⁵ Letters from Charles V. Rossi, President, Securities Transfer Association, Inc. (March 17, 2008); William Speirs, President, Securities Transfer Association of Canada (March 18, 2008); Steven G. Nelson, Chairman of the Board and President, Continental Stock Transfer & Trust Company (March 19, 2008); Martin J. McHale Jr., President, US Equity Services, Computershare (March 20, 2008); Loren Hanson, Assistant Secretary, Otter Tail Corporation (March 20, 2008); Kevin B. Pittman, Thelen Reid Brown Raysman & Steiner LLP (July 15, 2008); John Petrofsky, Associate Counsel, DTC (July 30, 2008).

change in its final form after all amendments.

Jurisdiction. Many of the commenters who are transfer agents or organizations representing transfer agents oppose the proposed rule change because they contend that the Commission and banking regulators are statutorily charged with the responsibility of regulating transfer agents, and DTC is not. They further argue that even though the transfer agents are "limited participants" of DTC with respect to their participation in DRS, transfer agents do not have the full procedural safeguards that statutorily exist for DTC participants pursuant to Section 17A of the Exchange Act.²⁹ The transfer agents are also concerned that the rule change gives DTC "unfettered" discretion to decide which transfer agents are eligible to participate in DRS, to impose significant requirements to change transfer agent systems and operations, and to terminate transfer agents as FAST agents and limited participants at DTC's discretion.

Insurance Requirements. Almost all of those opposed to DTC's rule filing objected to some or all of DTC's proposed insurance requirements as being too costly and too onerous, particularly the "excessively" high minimum coverage levels, "excessively" low deductibles, and opposed the requirement of notifying DTC of changes in their insurance policies. The STA and several other commenters stated that they believe DTC and other registered holders have sustained virtually no economic losses as a result of under-insured transfer agent activity, thereby making the proposed insurance requirements unnecessary, overly broad, and without justification.

Many of the commenters that oppose the rule change contend that for some smaller transfer agents, the amounts of proposed minimum insurance coverage would exceed the value of DTC's securities held by the transfer agent and therefore are not reasonable. One commenter representing a large number of commercial bank and non-bank transfer agents noted that it believes that none of its members currently meet the insurance and deductible requirements.³⁰ In addition, this commenter along with the ABA and several other transfer agents opposed the requirement for transfer agents to (1) notify DTC at least 30 days prior to any expiration or change in insurance limits as unrealistic due to the manner in which policies are renewed, and (2)

notify DTC within five days of any notice of threatened or actual lapse in coverage as an unreasonable burden on insurance carriers.

Safekeeping Requirements. Most transfer agents that opposed the amended proposed rule change took issue with DTC dictating specific physical security standards with respect to transfer agents' safeguarding obligations. Many of these commenters suggested that the Commission's safekeeping rule, Rule 17Ad–12, is sufficient to govern transfer agent safeguarding obligations.

DTC maintains that specific physical security standards are justified in light of transfer agents holding blank securities certificates, which can and have been fraudulently issued or endorsed.

Audit Requirements. Almost all the commenters opposing the proposed rule change objected to some or all of DTC's proposed audit requirements. Most of the transfer agents and industry associations representing issuers and agents argued that requiring submission to DTC of a SAS 70 or SSAE-19 report certifying compliance with DTC requirements and Commission rules and requiring attesting to the soundness of the transfer agent's controls is superfluous, unwarranted, and costly, especially in light of the requirement that an audit report be filed with the Commission by registered transfer agents pursuant to Exchange Act Rule 17Ad-13. The transfer agents contended that the existing Commission regulations should be sufficient to satisfy DTC's concerns.

One issuer acting as its own transfer agent stated its belief that DTC rules have been developed to address large commercial transfer agent operations without taking into consideration other types of transfer agents. This commenter noted that pursuant to an exemption provided to small transfer agents under Commission Rule 17Ad-4, it is exempted from the Commission's audit requirements. This commenter stated that small transfer agents pose significantly less risk to the public than large commercial transfer agents, thereby providing the basis for the Commission's exemption. This comment also argued that as a publicly traded company, it has audit requirements, including internal controls that are audited internally and externally pursuant to federal regulation. Compliance with DTC's rules, this transfer agent estimated, would cost in excess of \$10,000 per year for the audit when it conducts less than 1,000 transfers per year.

Shareholder Statements. Many transfer agents objected to DTC requiring that for DRS withdrawal-by-transfers, DRS Limited Participants send a transaction advice to shareholders by mail and to DTC by electronic file. While the concept of sending such statements was not objectionable to most of the transfer agents opposing this requirement, the STA maintains that DTC has no authority to mandate notifications to shareholders holding positions in DRS.

Notice of Regulatory Action and Onsite Inspection by DTC. The STA and a number of transfer agents opposed the requirement to provide DTC with copies of Commission examination reports within five business days of "any alleged material deficiencies." The transfer agents contend they do not provide this information to any other registered securityholder, DTC has failed to demonstrate a need for such information, and DTC is not entitled to this confidential information under applicable law or regulation. They also objected to the requirement that transfer agents allow DTC access to their premises for on-site inspections.

System Modifications and Enhanced DRS Processing Capabilities. The STA and a number of transfer agents objected to DTC requiring transfer agents to implement program changes and system modifications to support and expand DRS processing capabilities. The transfer agents contend that such a requirement fails to address the reasonableness and necessity of any changes and fails to address the costs that may be incurred by transfer agents. Transfer agents objected to DTC unilaterally determining what changes to make to FAST and DRS without agreement from the transfer agents. They also objected to the use of the DRS Ad Hoc Committee as the ultimate arbiter of disputes because they believe the Committee is dominated by DTC and its participants and because the Committee has no governing by-laws or rules.

Compensation. The STA objected as commercially unreasonable that transfer agents provide DRS and FAST services to DTC without compensation. It argued that transfer agents should be entitled to refuse to provide DTC services if DTC refuses to pay for services rendered without the threat that DTC could throw them out of FAST and DRS.

Standard of Care. Transfer agents opposed DTC's standard of care provision because they believe that it would permit DTC to avoid responsibility for its own errors and would force transfer agents to be responsible if a third party (i.e., broker-

²⁹ 15 U.S.C 78q–1(a)(3).

³⁰ Letter from the Securities Transfer Association ("STA").

dealer or registered shareholder) were to suffer a loss caused by an error at DTC with regard to transactions or transfers involving transfer agents. They contend that the exculpatory language would force injured parties to seek recovery from the transfer agent even in the event the transfer agent were not at fault instead of each party bearing responsibility for its own processing errors. The transfer agents state that a unilateral waiver would not be in accordance with standard industry practice or public policy.

Regulatory Flexibility Act of 1980. The transfer agents contend that no evidence of any assessment has been done by DTC to examine the economic impact on small transfer agents or small issuers to ensure compliance with the requirements of the Regulatory Flexibility Act of 1980.³¹

IV. Discussion

Section 17A(b)(3)(F) of the Act requires that the rules of a clearing agency be designed to promote the prompt and accurate clearance and settlement of securities transactions, to assure the safeguarding of securities and funds which are in the custody or control of the clearing agency or for which it is responsible, to foster cooperation and coordination with persons engaged in the clearance and settlement of securities transactions, and to remove impediments to and perfect the mechanism of a national system for the prompt and accurate clearance and settlement of securities transactions, and in general, to protect investors and the public interest.32 For the reasons described below, the Commission finds that the rule change as amended is consistent with these provisions of Section 17A.

In Section 17A of the Act, Congress set forth its finding that the prompt and accurate clearance and settlement of securities transactions, including the transfer of record ownership and safeguarding of securities and funds related to clearance and settlement activities, is necessary for the protection of investors and those acting on behalf of investors.33 Inefficient clearance and settlement procedures, Congress found, impose unnecessary costs on investors and those acting on their behalf.³⁴ The Commission's approval of DTC's registration as a clearing agency constituted an important step in its

efforts to facilitate the development of a national clearance and settlement system and a significant step in achieving the goals established by Congress.³⁵

Consistent with this directive, the Commission has encouraged the immobilization and the dematerialization of securities holdings by supporting the use of alternatives to holding securities in certificated form in an effort to improve efficiencies and decrease risks associated with processing securities certificates.36 Among other things, the Commission has approved the rule filings of selfregulatory organizations that require their members to use the facilities of a securities depository for the book-entry settlement of all transactions in depository-eligible securities 37 and require that before any security can be listed for trading, it must have been made depository eligible if possible.38 The Commission has also approved a number of rule filings relating to DTC's FAST program, which has facilitated significantly more efficient processing of transfers by eliminating the physical delivery of securities certificates between transfer agents and DTC.³⁹ More recently the Commission has approved the implementation and expansion of DRS by approving DTC's rules relating to the administration of

DRS facilities used by transfer agents and broker-dealers. 40

DTC's FAST program authorizes transfer agents to hold securities on behalf of DTC in order to avoid having multiple physical certificates sent between transfer agents and DTC because of DTC's ever-changing ownership positions. Eliminating the need to transfer a physical certificate every time DTC's ownership position changes reduces risk and costs of processing transfers, which is a benefit to not only DTC, transfer agents, and issuers but also to the millions of beneficial owners of the securities holding in street name at DTC.

Because of the critical role the FAST and DRS programs play in the clearance and settlement of transactions in securities, which are legally owned by DTC and beneficially owned by DTC participants and their customers, the Commission believes that DTC has a legitimate interest in making sure that FAST agents and DRS Limited Participants comply with reasonable and appropriate requirements for participation in these programs in order that DTC can fulfill its statutory obligation to safeguard securities and funds that are in its custody or control or for which it is responsible. In response to the comments submitted in response to the proposed rule changes, DTC amended its proposal four times in an effort to reduce the cost and operational burden on transfer agents while still maintaining the appropriate level of safeguards necessary for DTC to comply with its statutory obligations. The Commission believes that the requirements, as amended, are fair and reasonable in light of the vital function the FAST and DRS programs play in the national clearance and settlement system and should help further improvements in the interactions between transfer agents and DTC, which is an essential component of improving the industry's dematerialization efforts.

In adopting these new rules, the Commission does not believe that DTC is attempting to "regulate" transfer agents as some commenters contended. Rather, the Commission believes that DTC is imposing reasonable obligations necessary for it to comply with its statutory obligations and only on those transfer agents that choose to participate in its FAST and DRS programs. Further, as a self-regulatory organization, DTC is required to file rule changes affecting the FAST or DRS program, and by extension, those transfer agents participating in these programs, with the Commission pursuant to Section

³¹The Commission notes that the Regulatory Flexibility Act of 1980 is not applicable to proposed rule changes filed by self-regulatory organizations pursuant to Section 19(b) of the Exchange Act.

³⁶ The use of certificates often results in significant delays and expenses in processing securities transactions and raises safety concerns associated with lost, stolen, and counterfeit certificates. The concerns associated with lost certificates were dramatically demonstrated during the September 11, 2001, tragedy when tens of thousand of certificates maintained in brokerdealers' vaults either were destroyed or were unavailable for transfer. See Securities Exchange Act Release No. 49405 (March 11, 2004), 69 FR 12922 (March 18, 2004) [File No. S7–13–04] (Securities Transaction Settlement Concept Release).

³⁷ Securities Exchange Act Release No. 32455 (June 11, 1993), 58 FR 33679 (June 18, 1993) (order approving rules requiring members, member organizations, and affiliated members of the New York Stock Exchange, National Association of Securities Dealers, American Stock Exchange, Midwest Stock Exchange, Boston Stock Exchange, Pacific Stock Exchange, and Philadelphia Stock Exchange to use the facilities of a securities depository for the book-entry settlement of all transactions in depository-eligible securities with another financial intermediary).

³⁸ Securities Exchange Act Release No. 35798 (June 1, 1995), 60 FR 30909 (June 12, 1995) (order approving rules setting forth depository eligibility requirements for issuers seeking to have their shares listed on the exchange).

³⁹ Securities Exchange Act Release Nos. 13342 (March 8, 1977) [File No. SR–DTC–76–3]; 14997 (July 26, 1978) [File No. SR–DTC–78–11]; 21401 (October 16, 1984) [File No. SR–DTC–8+3]; 31941 (March 3, 1993) [SR–DTC–92–15]; and 46956 (December 6, 2002) [File No. SR–DTC–2002–15].

⁴⁰ See supra note 10.

19(b) of the Exchange Act. Most of these filings have been and will continue to be filed with the Commission, published for public comment, and subject to the review and approval by the Commission. This process should provide transfer agents, as well as others affected by DTC's rules, adequate procedural safeguards.

Some commenters contend that by allowing DTC the authority to determine which transfer agents may become a FAST transfer agent or DRS Limited Participant, DTC is also granted by extension the authority to determine which transfer agents may continue to operate a transfer agent business. The Commission does not agree. Many transfer agents act as transfer agent for publicly traded securities and are not FAST agents or DRS Limited Participants. But if a transfer agent chooses to act as transfer agent for an issuer of securities that requires it to become a FAST agent or DRS Limited Participant, then DTC has an interest and statutory responsibility to ensure that the securities held on its behalf at the transfer agent are safeguarded and that the settlement of transactions in those securities, which includes safe and efficient transfers in ownership, occurs in a prompt and accurate manner.

With regards to specific operational requirements required by DTC's rule, such as insurance requirements, physical security standards, audit requirements, and system modifications to support or enhance DRS functionality, the Commission believes that the amended rule contains standards that are appropriate and reasonably designed to achieve DTC's goal of protecting the securities held by transfer agents on DTC's behalf and on behalf of DTC's participants and the participants' customers. The Commission does not find it compelling to contend that just because DTC and other registered holders have not sustained economic losses, DTC's insurance requirements are overly broad or unjustified. The point of the rule's insurance requirement is to protect against losses before losses occur. Furthermore, if a transfer agent can demonstrate that its existing coverage or capitalization provide similar protections as the insurance required DTC, DTC has the discretion to grant a waiver from any or all of the requirement. This flexibility should provide DTC the ability to properly address situations where the required coverage is too onerous or ineffective for the type, amount, or dollar value of DTC's securities held by the transfer agent.

The Commission also finds little merit in the contention that the audit reports required by the rule are unwarranted or unnecessarily costly. The Commission believes that requiring transfer agents to provide to DTC the Annual Study of **Evaluation of Internal Accounting** Controls, conducted pursuant to Rule 17Ad-13, and a SAS-70 audit report, if the agent has already obtained such a report for other purposes, are reasonable in light of DTC's statutory obligations to ensure the safeguarding of its securities. These audit reports provide DTC with additional information about the adequacy of the transfer agent's operational capabilities and internal controls for the transfer of record ownership and the safeguarding of related securities and funds. This is not only relevant but material information to DTC. In addition, because DTC's rule requires that transfer agents provide DTC with documents that have already been produced by the transfer agent for other purposes and should be in the transfer agent's possession, the Commission believes that there should be little or no additional expense and relatively little extra burden on transfer agents in providing these documents to

Similarly, commenters' concerns about requiring transfer agents to provide DTC with a copy of the two most recent compliance or deficiency correspondences from the Commission and all notices of alleged material deficiencies documented by the Commission appear to be misplaced. While the Commission appreciates the sensitive nature of transfer agent examination reports and the need to ensure the confidentiality of all information contained in those reports, the Commission believes nonetheless that DTC's request for these documents is reasonable. Information contained in those reports should allow DTC to better manage any potential risks associated with the transfer agent's ability to transfer securities, maintain ownership records, or operate its business in a safe

Even though some commenters objected to DTC's provision requiring transfer agents to send DTC a file indicating a transaction advice has been sent to investors for each DRS withdrawal-by-transfers, the Commission believes DTC has a valid interest in requiring notice that investors have obtained a transaction advice from transfer agents. The file required to be sent to DTC will provide confirmation that the transaction advice has been sent to the investor so that DTC can close out its pending transfer position or file (sometimes referred to as

an open transfer record). If that position is not closed, then DTC's records will show that the transfer remains open and it will become an outstanding aged transfer. To avoid this, DTC is requiring transfer agents to send a notice that the transfer has been completed by sending the investor a transaction advice. This process is similar to that of the current process when a transfer agent notifies DTC that a certificate has been mailed to the investor.

Finally, the Commission believes that commenters' concerns regarding the rule's clarification of DTC's standard of care provision are unfounded. The purpose of the rule change is to clarify that DTC shall not be liable to participants for acts or omissions of any third party (including without limitation any depository, custodian, sub-custodian, clearing or settlement system, transfer agent, registrar, data communication service or delivery service). DTC's Rule 6 applies to DTC's relationship with its participants, not FAST agents. Therefore, this particular provision does not have any impact on FAST Agents that are not also participants. The provision does not shift liability from DTC to FAST Agents or absolve DTC from liability to FAST Agents.

V. Conclusion

On the basis of the foregoing, the Commission finds that the proposed rule change, as amended, is consistent with the requirements of the Act and in particular with the requirements of Section 6(b)(5) of the Act and the rules and regulations thereunder. It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change, as amended, (File No. SR–DTC–2006–16) be and hereby is approved. 41

For the Commission by the Division of Trading and Markets, pursuant to delegated authority. 42

Elizabeth M. Murphy,

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-60248; File No. SR-NASDAQ-2009-063]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change by The NASDAQ Stock Market LLC Relating to Permanent Approval of the Exchange's Quarterly Option Series Pilot Program

July 6, 2009.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") 1, and Rule 19b-4 2 thereunder, notice is hereby given that on June 26, 2009, The NASDAQ Stock Market LLC ("Nasdaq") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by Nasdaq. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Nasdaq proposes for NOM to modify Chapter IV, Section 6 (Series of Options Contracts Open for Trading) and Chapter XIV Sec. 11 (Terms of Index Options Contracts), to make permanent the Exchange's Quarterly Option Series Pilot Program ("QOS Program"), and expand and conform the QOS Program to similar programs of other exchange.

The text of the proposed rule change is available from Nasdaq's Web site at http://nasdaq.cchwallstreet.com, at Nasdaq's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, Nasdaq included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. Nasdaq has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to make the QOS Program permanent, and expand and conform the QOS Program to make it similar to programs of other exchanges.

On July 22, 2008, NASDAQ filed SR-NASDAQ-2009-064 with the Commission to establish the QOS Program.³ The QOS Program allows the Exchange to list and trade options that expire at the close of business on the last business day or a calendar quarter ("Quarterly Option Series" or "QOS"). Under the QOS Program, the Exchange may select up to five (5) currently listed options classes that are exchange traded fund ("ETF") options on which Quarterly Option Series may be opened. In addition, the Exchange may also list Quarterly Option Series on any options classes that are selected by other securities exchanges that employ a similar program under their respective rules.4

The Exchange may list series that expire at the end of the next consecutive four (4) calendar quarters, as well as the fourth quarter of the next calendar year. All Quarterly Option Series are P.M. settled.

If an option is selected for participation in the QOS Program, the strike price of each Quarterly Option Series is fixed at a price per share, with at least two strike prices above and two strike prices below the approximate value of the underlying security at about the time the Quarterly Options Series is opened for trading on the Exchange. The Exchange will list strikes prices for a Quarterly Option series that are within \$5 from the closing price of the underlying on the preceding day.

The Exchange may open for trading additional Quarterly Options Series of the same class when the Exchange deems it necessary to maintain an orderly market, to meet customer demand or when the market price of the

underlying security moves substantially from the initial exercise price or prices. To the extent that any additional strike prices are listed by the Exchange, such additional strike prices shall be within thirty percent (30%) above or below the closing price of the underlying ETF on the preceding day. The Exchange may also open additional strike prices of Quarterly Option Series in ETF options that are more than 30% above or below the current price of the underlying ETF provided that demonstrated customer interest exists for such series, as expressed by institutional, corporate or individual customers or their brokers. Market-Makers trading for their own account shall not be considered when determining customer interest under this provision. The opening of the new Quarterly Options Series shall not affect the series of options of the same class previously opened. In addition to the initial listed series, the Exchange may list up to sixty (60) additional series per expiration month for each Quarterly Options Series in ETF options.5

The interval between strike prices on Quarterly Options Series shall be the same as the interval for strike prices for series in that same options class that expire in accordance with the normal monthly expiration cycle. By definition, Quarterly Option Series on an option class can never expire in the same week in which monthly option series on the same class expires. And, the Exchange will not list a Short Term Option Series on an options class the expiration of which coincides with that of a Quarterly Options Series on the same options class.

The Exchange has adopted a delisting policy with respect to QOS in ETF options.⁶ On a monthly basis, the Exchange reviews series that are outside a range of five (5) strikes above and five (5) strikes below the current price of the underlying ETF, and delists series with no open interest in both the put and the call series having a: (i) Strike higher than the highest strike price with open interest in the put and/or call series for a given expiration month; and (ii) strike lower than the lowest strike price with open interest in the put and/or call series for a given expiration month.

² 17 CFR 240.19b–4.

³ See Securities Exchange Act Release No. 58209 (July 22, 2008), 73 FR 43966 (July 29, 2008) (SR-NASDAQ-2008-064) (notice of filing and immediate effectiveness establishing QOS Program as pilot through July 10, 2009).

⁴Proposed Chapter XIV, Section 11(g), which is similar to NASDAQ OMX PHLX, Inc. ("Phlx") Rule 1101A(a)(v), extends the Exchange's QOS Program to Index Options (the "Index QOS Program"). The Exchange is also proposing changes in its Chapter IV, Section 6, Supplementary Material .04 regarding P.M. settlement and eligibility of Index Options for the QOS Program, to conform the Exchange's QOS Program rules to those of other exchanges, such as, for example, Commentary .08 to Phlx Rule 1012 and CBOE Rules 5.5(e) and 24.9(a).

⁵ See Securities Exchange Act Release No. 58209 (July 22, 2008), 73 FR 43966 (July 29, 2008) (SR-NASDAO-2008-064).

⁶ *Id*

⁴Proposed Chapter XIV, Section 11(g), which is similar to NASDAQ OMX PHLX, Inc. ("Phlx") Rule 1101A(a)(v), extends the Exchange's QOS Program to Index Options (the "Index QOS Program"). The Exchange is also proposing changes in its Chapter IV, Section 6, Supplementary Material .04 regarding P.M. settlement and eligibility of Index Options for the QOS Program, to conform the Exchange's QOS Program rules to those of other exchanges, such as, for example, Commentary .08 to Phlx Rule 1012 and CBOE Rules 5.5(e) and 24.9(a).

⁵ See Securities Exchange Act Release No. 58209

Notwithstanding the delisting policy, customer requests to add strikes and/or maintain strikes in QOS in ETF options in series eligible for delisting shall be granted.

Further, in connection with the delisting policy, if the Exchange identifies series for delisting, the Exchange shall notify other options exchanges with similar delisting policies regarding eligible series for listing, and shall work with such other exchanges to develop a uniform list of series to be delisted, so as to ensure uniform series delisting of multiply listed options classes.

The Exchange has selected the following five ETF option classes to participate in the QOS Program:
DIAMONDS Trust (DIA) options,
Standard and Poor's Depositary
Receipts/SPDRs (SPY) options, iShares
Russell 2000 Index Fund (IWM) options,
PowerShares QQQ Trust (QQQQ)
options and Energy Select SPDR (XLE)
options. The Exchange believes the QOS
Program has been successful and well
received by its members and the
investing public for the approximately
twelve months that it has been in
operation as a pilot.⁷

In support of approving the QOS Program on a permanent basis, the Exchange has submitted to the Commission a Quarterly Option Program Report ("Report") detailing the Exchange's experience with the QOS Program.⁸ Specifically, the Report contains data and written analysis regarding the five (5) ETF option classes included in the QOS Program. The Report was submitted under separate

cover and seeks confidential treatment under the Freedom of Information Act.

The Exchange believes there is sufficient investor interest and demand in the QOS Program to warrant its permanent approval. The Exchange believes that, for the approximately twelve months that the QOS Program has been in operation, it has provided investors with additional means of managing their risk exposures and carrying out their investment objectives. Furthermore, the Exchange has not experienced any capacity-related problems with respect to Quarterly Option Series. The Exchange also represents that it has the necessary system capacity to continue to support the option series listed under the QOS Program.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act ⁹ in general, and furthers the objectives of Section 6(b)(5) of the Act ¹⁰ in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest by making permanent the Exchange's Quarterly Option Series Pilot Program.

B. Self-Regulatory Organization's Statement on Burden on Competition

Nasdaq does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days after the date of the filing, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, it has become effective pursuant to 19(b)(3)(A)

of the Act 11 and Rule 19b–4(f)(6) thereunder. 12

The Exchange has asked the Commission to waive the operative delay to permit the proposed rule change to become operative prior to the 30th day after filing so that the Exchange may immediately implement and permanently establish a Quarterly Options Series Program that is consistent with those of other options exchanges. 13 The Commission has determined that waiving the 30-day operative delay of the Exchange's proposal is consistent with the protection of investors and the public interest because such waiver will enable the Exchange to expand and conform the QOS Program to make it similar to programs of other exchanges and continue the current QOS program without disruption.¹⁴ Therefore, the Commission designates the proposal operative upon filing.

At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (http://www.sec.gov/rules/sro.shtml); or
- Send an e-mail to rulecomments@sec.gov. Please include File Number SR-NASDAQ-2009-063 on the subject line.

Paper Comments

• Send paper comments in triplicate to Elizabeth M. Murphy, Secretary,

⁷ The Index QOS Program found in Chapter XIV, Section 11(g) is similar to the QOS Program in Chapter IV, Section 6, Supplementary Material .04, but has several differences. Principal among them are, first, that the strike price of each QOS will be fixed with at least two, but not more than five, strike prices above and two, but not more than five, strike prices below the value of the underlying security at about the time that a QOS is opened for trading on the Exchange. Second, that the exercise price of each QOS opened for trading on the Exchange shall be reasonably related to the current index value of the underlying index to which such series relates at or about the time such series of options is first opened for trading on the Exchange (the term "reasonably related to the current index value of the underlying index" means that the exercise price is within thirty percent (30%) of the current index value). Third, that the Exchange may open additional strike prices of QOS that are below the value of the underlying index provided that the total number of strike prices below the value of the underlying index is no more than five. And fourth, there is no delisting policy in the Index QOS Program.

⁸ The requirements for the Report were recently set forth in Securities Exchange Act Release No. 58209 (July 22, 2008), 73 FR 43966 (July 29, 2008) (SR-NASDAQ-2008-064).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-60249; File No. SR-Phlx-2009-50]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change by NASDAQ OMX PHLX, Inc. Relating to Permanent Approval of the Exchange's Quarterly Option Series Pilot Program

July 6, 2009.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹, and Rule 19b–4² thereunder, notice is hereby given that on June 26, 2009, NASDAQ OMX PHLX, Inc. ("Phlx" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by Phlx. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Phlx rules to amend its Rules 1012 (Series of Options Open for Trading) and 1101A (Terms of Option Contracts), to make permanent the Exchange's Quarterly Option Series Pilot Program ("QOS Program").

The text of the proposed rule change is available on the Exchange's Web site at http://

nasdaqomxphlx.cchwallstreet.com/ NASDAQOMXPHLX/Filings/, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, Phlx included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. Phlx has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to make the QOS Program permanent.

On July 9, 2007, the Exchange filed SR–Phlx-2007–08 with the Commission to establish the QOS Program.³ The

QOS Program allows Phlx to list and trade options that expire at the close of business on the last business day of a calendar quarter ("Quarterly Option Series" or "QOS"). Under the QOS Program, Phlx may select up to five (5) currently listed option classes that are either Index Options and exchange traded fund ("ETF") options on which Quarterly Option Series may be opened. In addition, Phlx may also list Quarterly Option Series on any options classes that are selected by other securities exchanges that employ a similar program under their respective rules.⁴

The Exchange may list series that expire at the end of the next consecutive four (4) calendar quarters, as well as the fourth quarter of the next calendar year. All Quarterly Option Series are P.M. settled.⁵

If an option is selected for participation in the QOS Program, the strike price of each Quarterly Option Series is fixed at a price per share, with at least two strike prices above and two strike prices below the approximate value of the underlying security at about the time the Quarterly Options Series is opened for trading on the Exchange. Phlx will list strikes prices for a Quarterly Option series that are within \$5 from the closing price of the underlying on the preceding day.

The Exchange may open for trading additional Quarterly Options Series of the same class when the Exchange deems it necessary to maintain an orderly market, to meet customer demand or when the market price of the underlying security moves substantially from the initial exercise price or prices. To the extent that any additional strike prices are listed by the Exchange, such additional strike prices shall be within thirty percent (30%) above or below the closing price of the underlying ETF on the preceding day. The Exchange may also open additional strike prices of Quarterly Option Series in ETF options that are more than 30% above or below the current price of the underlying ETF provided that demonstrated customer interest exists for such series, as expressed by institutional, corporate or individual customers or their brokers. Market-Makers trading for their own account shall not be considered when determining customer interest under this provision. The opening of the new

^{15 17} CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

^{2 17} CFR 240.19b-4.

³ See Securities Exchange Act Release No. 55301 (February 15, 2007), 72 FR 8238 (February 23, 2007) (SR-Phlx-2007-08) (notice of filing and immediate effectiveness). The QOS Program has since been extended and is currently scheduled to expire on July 10, 2009. See Securities Exchange Act Release No. 58039 (June 26, 2008), 73 FR 38284 (July 3, 2008) (SR-Phlx-2009-44) (notice of filing and immediate effectiveness).

 $^{^4}$ Rule 1101A(b)(v) extends the QOS Program to Index Options (the "Index QOS Program").

⁵ The Exchange is making minor changes to Commentary .08 to Phlx Rule 1012 and Rule 1101A(b)(v) to conform the Exchange's rules to those of other exchanges such as, for example, CBOE Rules 5.5(e)(2) and 24.9(a)(2), regarding P.M. settlement and listing series in the fourth quarter of the next calendar year.

Quarterly Options Series shall not affect the series of options of the same class previously opened. In addition to the initial listed series, the Exchange may list up to sixty (60) additional series per expiration month for each Quarterly Options Series in ETF options.⁶

The interval between strike prices on Quarterly Options Series shall be the same as the interval for strike prices for series in that same options class that expire in accordance with the normal monthly expiration cycle. By definition, Quarterly Option Series on an option class can never expire in the same week in which monthly option series on the same class expires. And, the Exchange will not list a Short Term Option Series on an options class the expiration of which coincides with that of a Quarterly Options Series on the same options class.

The Exchange has adopted a delisting policy with respect to QOS in ETF options. On a monthly basis, the Exchange reviews series that are outside a range of five (5) strikes above and five (5) strikes below the current price of the underlying ETF, and delists series with no open interest in both the put and the call series having a: (i) Strike higher than the highest strike price with open interest in the put and/or call series for a given expiration month; and (ii) strike lower than the lowest strike price with open interest in the put and/or call series for a given expiration month.

Notwithstanding the delisting policy, customer requests to add strikes and/or maintain strikes in QOS in ETF options in series eligible for delisting shall be granted.

Further, in connection with the delisting policy, if the Exchange identifies series for delisting, the Exchange shall notify other options exchanges with similar delisting policies regarding eligible series for listing, and shall work with such other exchanges to develop a uniform list of series to be delisted, so as to ensure uniform series delisting of multiply listed options classes.

During the last quarter of 2008 (and for the new expiration month added after December Quarterly Option Series expiration), the Exchange was permitted to list up to one hundred (100) additional series per expiration month for each Quarterly Options Series in ETF options.⁸

The Exchange has selected the following five ETF option classes to participate in the QOS Program:
DIAMONDS Trust (DIA) options,
Standard and Poor's Depositary
Receipts/SPDRs (SPY) options, iShares
Russell 2000 Index Fund (IWM) options,
PowerShares QQQ Trust (QQQQ)
options and Energy Select SPDR (XLE)
options. Phlx believes the QOS Program
has been successful and well received
by its members and the investing public
for the nearly three years that it has
been in operation as a pilot.

In support of approving the QOS Program on a permanent basis, the Exchange has submitted to the Commission a Quarterly Option Program Report ("Report") detailing the Exchange's experience with the QOS Program. 10 Specifically, the Report contains data and written analysis regarding the five (5) ETF option classes included in the QOS Program. The Report was submitted under separate cover and seeks confidential treatment under the Freedom of Information Act.

The Exchange believes there is sufficient investor interest and demand in the QOS Program to warrant its permanent approval. The Exchange believes that, for the nearly three years that the QOS Program has been in operation, it has provided investors with additional means of managing their risk exposures and carrying out their investment objectives. Furthermore, the Exchange has not experienced any capacity-related problems with respect to Quarterly Option Series. The Exchange also represents that it has the necessary system capacity to continue to support the option series listed under the QOS Program.

2008) (SR-Phlx-2008-78) (notice of filing and immediate effectiveness).

⁹ The Index QOS Program found in Rule 1101A(v) is similar to the QOS Program in Rule 1012, but has several differences. Principal among them are, first, that the strike price of each QOS will be fixed with at least two, but not more than five, strike prices above and two, but not more than five, strike prices below the value of the underlying security at about the time that a QOS is opened for trading on the Exchange. Second, that the exercise price of each QOS opened for trading on the Exchange shall be reasonably related to the current index value of the underlying index to which such series relates at or about the time such series of options is first opened for trading on the Exchange (the term "reasonably related to the current index value of the underlying index" means that the exercise price is within thirty percent (30%) of the current index value). Third, that the Exchange may open additional strike prices of QOS that are below the value of the underlying index provided that the total number of strike prices below the value of the underlying index is no more than five. And fourth, there is no delisting policy in the Index QOS Program.

¹⁰The requirements for the Report were recently set forth in Securities Exchange Act Release No. 57583 (March 31, 2008), 73 FR 18589 (April 4, 2008) (SR–Phlx–2008–23).

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act ¹¹ in general, and furthers the objectives of Section 6(b)(5) of the Act ¹² in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest, by making permanent the Exchange's Quarterly Option Series Pilot Program.

B. Self-Regulatory Organization's Statement on Burden on Competition

Phlx does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days after the date of the filing, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, it has become effective pursuant to 19(b)(3)(A) of the Act ¹³ and Rule 19b–4(f)(6) thereunder. ¹⁴

The Exchange requests that the Commission waive the 30-day operative delay so that the Exchange can permanently establish a Quarterly Options Series Program that is consistent with those of other options exchanges. ¹⁵ In addition, the Commission notes that the Exchange's QOS Program currently is scheduled to expire on July 10, 2009. The

⁶ See Securities Exchange Act Release No. 57583 (March 31, 2008), 73 FR 18589 (April 4, 2008) (SR–Phlx–2008–23)(notice of filing and immediate effectiveness).

⁷ Id.

 $^{^8\,}See$ Securities Exchange Act Release No. 58943 (November 13, 2008), 73 FR 70398 (November 20,

^{11 15} U.S.C. 78f(b).

^{12 15} U.S.C. 78f(b)(5).

^{13 15} U.S.C. 78s(b)(3)(A).

¹⁴ 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. Phlx has satisfied this requirement.

¹⁵ See Securities Exchange Act Release No. 60164 (June 23, 2009), 74 FR 31333 (June 30, 2009) (SR–CBOE–2009–029) (approving the quarterly options series program on a permanent basis).

Commission therefore has determined that waiving the 30-day operative delay of the Exchange's proposal is consistent with the protection of investors and the public interest because such waiver will enable the Exchange to permanently establish the QOS program without disruption. ¹⁶ Therefore, the Commission designates the proposal operative upon filing.

At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (http://www.sec.gov/rules/sro.shtml); or
- Send an e-mail to *rule-comments@sec.gov*. Please include File Number SR–Phlx-2009–50 on the subject line.

Paper Comments

• Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR-Phlx-2009-50. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (http://www.sec.gov/ rules/sro.shtml). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the

provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-Phlx-2009-50 and should be submitted on or before August 3,

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority. 17

BILLING CODE 8010–01–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

Reports, Forms and Record Keeping Requirements; Agency Information Collection Activity Under OMB Review

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collections and their expected burden. The Federal Register Notice with a 60-day comment period was published on February 19, 2009 [FR Doc. 2009–0037, Vol. 74, No. 32, Pages 7737–7738].

DATES: Comments must be submitted on or before August 12, 2009.

FOR FURTHER INFORMATION CONTACT:

Charlene Doyle, Contracting Officer's Technical Representative, Office of Regulatory Analysis and Evaluation, National Highway Traffic Safety Administration, 1200 New Jersey Ave., SE., NVS–431, Washington, DC 20590. Ms. Doyle's phone number is 202–366–1276 and her e-mail address is charlene.doyle@dot.gov.

SUPPLEMENTARY INFORMATION:

National Highway Traffic Safety Administration

Title: An In-Depth Examination of Pedestrian Involved Hit and Run Traffic Crashes.

OMB Number: 2127-New.

Type of Request: Request for public comment on proposed collection of information.

Abstract: The National Highway Traffic Safety Administration (NHTSA) was established to reduce the mounting number of deaths, injuries and economic losses resulting from motor vehicle crashes on the Nation's highways. As part of this statutory mandate, NHTSA is authorized to conduct research as a foundation for the development of motor vehicle standards and traffic safety programs. Between 1998 and 2007, of the more than 48,000 pedestrian deaths recorded within the United States, over 9,000 (19 percent) were caused by hit-and-run drivers. The data collected in this survey of drivers, along with police crash and court data from 10 counties, will be used to identify areas for targeting improvements, identify scenarios in which hit-and-run collisions are more likely to occur, and assist in the selection of cost-effective countermeasures to reduce the incidence of pedestrian hit-and-run crashes.

Affected Public: Individuals.

Estimated Total Annual Burden: 855 hours.

ADDRESSES: Send comments, within 30 days, to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725–17th Street, NW., Washington, DC 20503, Attention NHTSA Desk Officer.

Comments are invited on: Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department's estimate of the burden of the proposed information collection; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology. A comment to OMB is most effective if OMB receives it within 30 days of publication.

¹⁶ For purposes only of waiving the 30-day operative delay, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

Federal Transit Administration

[FTA Docket No. FTA-2009-0032]

Agency Information Collection Activity Under OMB Review

AGENCY: Federal Transit Administration, DOT.

ACTION: Notice of request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for approval. The Federal Register Notice with a 60-day comment period soliciting comments was published on April 27, 2008. No comments were received in response to that notice.

DATES: Comments must be submitted before August 12, 2009. A comment to OMB is most effective if OMB receives it within 30 days of publication.

FOR FURTHER INFORMATION CONTACT:

LaStar Matthews, Office of Administration, Office of Management Planning, (202) 366–2295 or e-mail: LaStar.Matthews@dot.gov.

SUPPLEMENTARY INFORMATION:

Title: Transit Investments in Greenhouse Gas and Energy Reduction Program (OMB Number: 2132–0566).

Abstract: The American Recovery and Reinvestment Act of 2009 (ARRA) established the Transit Investments in Greenhouse Gas and Energy Reduction (TIGGER) Program. This program is a new \$100,000,000 discretionary grant program to support public transit agencies in making capital investments that will assist in reducing the energy consumption or greenhouse gas emissions of their public transportation systems.

The information collected is submitted as part of the application for grants used to determine eligibility of applicants and project selection. Collection of project management information also provides documentation that the applicants and recipients are meeting program objectives and are complying with FTA Circular 5010.1D Grant Management

Requirements and other federal requirements.

To meet the requirements of the American Recovery and Reinvestment Act, FTA requested an emergency approval from OMB for the Transit Investments in Greenhouse Gas and Energy Reduction Program. OMB approved FTA's emergency request for approval on March 10, 2009. The OMB Control Number is 2132–0566. FTA published a **Federal Register** Notice for Solicitation of Comments and Notice of Availability of Fiscal Year 2009 Funding for Transit Investments in Greenhouse Gas and Energy Reduction Grants on March 24, 2009.

Estimated Total Annual Burden: 32,080 hours.

ADDRESSES: All written comments must refer to the docket number that appears at the top of this document and be submitted to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725—17th Street, NW., Washington, DC 20503, Attention: FTA Desk Officer.

Comments Are Invited On: Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department's estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Issued: July 7, 2007.

Associate Administrator for Administration. [FR Doc. E9–16509 Filed 7–10–09; 8:45 am] BILLING CODE 4910–57–P

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[USCG-2006-28532]

Port Dolphin Energy LLC, Port Dolphin Energy Liquefied Natural Gas Deepwater Port License Application; Final Application Public Hearing and Final Environmental Impact Statement

AGENCY: Maritime Administration, DOT. **ACTION:** Notice of availability; notice of public hearing; request for comments.

SUMMARY: The Maritime Administration and the U.S. Coast Guard (USCG) announce the availability of the Final Environmental Impact Statement (FEIS)

for Port Dolphin Energy LLC, Port Dolphin Energy Liquefied Natural Gas Deepwater Port license application. The application describes a project that would be located approximately 28 miles off the western coast of Florida, and approximately 42 miles from Port Manatee, Manatee County, Florida. The Maritime Administration and Coast Guard request public comments on the FEIS and application. Publication of this notice begins a 45-day comment period and provides information on how to participate in the process.

DATES: A public hearing will be held in Palmetto, Florida on July 28, 2009. The public hearing will be held from 5 p.m. to 7 p.m. and will be preceded by an informational open house from 3 p.m. to 4:30 p.m. The public hearing may end later than the stated time, depending on the number of persons wishing to speak.

Material submitted in response to the request for comments on the FEIS and application must reach the Docket Management Facility by August 23, 2009.

Federal and State agencies must also submit comments, recommended conditions for licensing, or letters of no objection by September 11, 2009. Also by September 11, 2009, the Governor of Florida (the adjacent coastal state) may approve, disapprove, or notify the Maritime Administration of inconsistencies with State programs relating to environmental protection, land and water use, and coastal zone management for which the Maritime Administration may condition the license to make consistent.

The Maritime Administration must issue a record of decision (ROD) to approve, approve with conditions, or deny the DWP license application by October 26, 2009.

ADDRESSES: The public hearing in Palmetto will be held at the Manatee Convention Center, 1 Haben Blvd., Palmetto, Florida, 34221; *telephone*: (941) 722–3244.

The FEIS, the application, comments and associated documentation are available for viewing at the Federal Docket Management System Web site: http://www.regulations.gov under docket number USCG—2006—28532. The FEIS is also available at the following public libraries:

Central Library—Bradenton, FL 34205 Braden River Library—Bradenton, FL 34203

South Manatee Branch—Bradenton, FL 34207

Palmetto Branch Library—Palmetto, FL 34221

Rocky Bluff Library—Ellenton, FL 34222

Island Branch Library—Holmes Beach, FL 34217

Docket submissions for USCG–2006–28532 should be addressed to:
Department of Transportation, Docket
Management Facility, West Building,
Ground Floor, Room W12–140, 1200
New Jersey Avenue, SE., Washington,
DC 20590–0001.

The Federal Docket Management Facility accepts hand-delivered submissions, and makes docket contents available for public inspection and copying at this address between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The Facility telephone number is 202–366–9329, the fax number is 202–493–2251, and the Web site for electronic submissions or for electronic access to docket contents is http://www.regulations.gov.

FOR FURTHER INFORMATION CONTACT: Ray Martin, U.S. Coast Guard, telephone: 202–372–1449, e-mail: Raymond.W.Martin@uscg.mil or Chris Hanan, U.S. Maritime Administration, telephone: 202–366–1900, e-mail: Christopher.Hanan@dot.gov. If you have questions on viewing the docket, call Renee V. Wright, Program Manager, Docket Operations, telephone 202–493–

SUPPLEMENTARY INFORMATION:

Request for Comments

We request public comments or other information on the FEIS and application. The public hearing is not the only opportunity you have to comment. In addition to or in place of attending a hearing, you can submit comments to the Docket Management Facility during the public comment period (see DATES). The Coast Guard and the Maritime Administration will consider all comments and material received during the comment period.

Submissions should include:

- Docket number USCG-2006-28532.
- · Your name and address.

Submit comments or material using only one of the following methods:

- Electronic submission to FDMS, http://www.regulations.gov.
- Fax, mail, or hand delivery to the Docket Management Facility (see ADDRESSES). Faxed or hand delivered submissions must be unbound, no larger than 8½ by 11 inches, and suitable for copying and electronic scanning. If you mail your submission and want to know when it reaches the Facility, include a stamped, self-addressed postcard or envelope.

Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the FDMS Web site (http:// www.regulations.gov), and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to read the Privacy and Use Notice that is available on the FDMS Web site, and the Department of Transportation Privacy Act Notice that appeared in the Federal Register on April 11, 2000 (65 FR 19477), see PRIVACY ACT.

Background

Information about deepwater ports, the statutes, and regulations governing their licensing, and the receipt of the current application for a liquefied natural gas (LNG) deepwater port was published in the Federal Register in Volume 72 FR 34741, on June 25, 2007. The Notice of Intent to Prepare an EIS for the proposed action was published in the Federal Register in Volume 72 FR 38116, on July 12, 2007 and the Notice of Availability of the Draft EIS was published in Volume 73 FR 21012, on April 17, 2008. The FEIS, application materials and associated comments are available on the docket. Information from the "Summary of the Application" from previous **Federal Register** notices is included below for your convenience.

Proposed Action and Alternatives

The proposed action requiring environmental review is the Federal licensing of the proposed deepwater port described in "Summary of the Application" below. The alternatives to licensing the proposed port are: (1) Licensing with conditions (including conditions designed to mitigate environmental impact), and (2) denying the application, which for purposes of environmental review is the "no-action" alternative. These alternatives are more fully discussed in the FEIS. The Coast Guard and the Maritime Administration are the lead Federal agencies for the preparation of the EIS. You can address any questions about the proposed action or the FEIS to the Coast Guard project manager identified in FOR FURTHER INFORMATION CONTACT.

Summary of the Application

Port Dolphin Energy LLC, proposes to own, construct, and operate a deepwater port, named Port Dolphin, in the Federal waters of the Outer Continental Shelf in the St. Petersburg (PB) blocks: PB545 and PB589, approximately 28 miles off the west coast of Florida to the southwest of Tampa Bay, in a water depth of approximately 100 feet. Port Dolphin would consist of a permanently moored unloading buoy system with two submersible buoys separated by a distance of approximately three miles. Each unloading buoy would be

permanently secured to eight mooring lines, consisting of wire rope, chain, and buoyancy elements, each attached to anchor points on the seabed. Anchor points would consist most likely of driven piles.

The buoys would be designed to moor specialized type of LNG vessels called Shuttle and Regasification Vessels (SRVs) of 145,000 and 217,000 cubic meter capacities. SRVs are equipped to vaporize cryogenic LNG cargo to natural gas through an onboard closed loop vaporization system, and meter gas for send-out by means of the unloading buoy to conventional subsea pipelines. The SRVs would moor to the unloading buoys which connect through the hull of the vessels to specially designed turrets that would enable the vessels to weathervane or rotate in response to prevailing wind, wave, and current directions. When the vessels are not present, the buoys would be submerged on a special landing pad on the seabed, 60–70 feet below the sea surface.

Each unloading buoy would connect through a 16-inch flexible riser and a 36-inch flowline to a Y intersection and then a 36-inch pipeline approximately 42 miles in length that would connect onshore in Port Manatee, Manatee County, Florida. The pipeline would connect with the Gulfstream Natural Gas System, LLC and Tampa Electric Company (TECO).

The 36-inch gas transmission line will make landfall on Port Manatee property. From there, the transmission pipeline will proceed in a generally easterly direction to the first interconnection point with the Gulfstream system at 4 miles. The Gulfstream/TECO Interconnection Station will occupy an approximately 3.4-acre site. Up to approximately 70 percent of the natural gas is expected to be delivered to the Gulfstream pipeline and 30 percent to the TECO pipeline.

Only shuttle and regasification vessels (SRVs) will call on Port Dolphin.
Offloading should require between 4–8 days and when empty the SRV would disconnect from the buoy and leave the port. Port Dolphin would have an average throughput capacity of 800 MMscfd with a peak capacity of 1200 MMscfd. The two separate buoys would allow natural gas to be delivered in a continuous flow, without interruption, by having a brief overlap between arriving and departing SRVs.

Port Dolphin Energy LLC is seeking Federal Energy Regulatory Commission (FERC) approval for the onshore pipelines concurrent with this deepwater port application. As required by FERC regulations, FERC will also maintain a docket for the FERC portion of the project. The docket numbers are CP07–191–000 and CP07–192–000. The filing may also be viewed on the web at http://www.ferc.gov using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, call (866) 208–3767 or TYY, (202) 502–8659.

In addition, pipelines and structures such as the moorings may require permits under Section 404 of the Clean Water Act and Section 10 of the Rivers and Harbors Act which are administered by the Army Corps of Engineers (USACE).

Port Dolphin will also require permits from the Environmental Protection Agency (EPA) pursuant to the provisions of the Clean Air Act, as amended, and the Clean Water Act, as amended.

Construction of the deepwater port would be expected to take approximately 11 months with startup of commercial operations following construction, should a license be issued. The deepwater port would be designed, constructed and operated in accordance with applicable codes and standards.

Privacy Act

The electronic form of all comments received into the Federal Docket Management System can be searched by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). The DOT Privacy Act Statement can be viewed in the **Federal Register** published on April 11, 2000 (Volume 65, Number 70, pages 19477–78) or you may visit http://www.regulations.gov.

Dated: July 2, 2009.

By Order of the Maritime Administrator. **Christine Gurland**,

Acting Secretary, Maritime Administration. [FR Doc. E9–16502 Filed 7–10–09; 8:45 am] BILLING CODE P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Petition for Waiver of Compliance

In accordance with Part 211 of Title 49 Code of Federal Regulations (CFR), notice is hereby given that the Federal Railroad Administration (FRA) received a request for a waiver of compliance with certain requirements of its safety standards. The individual petition is described below; including the party seeking relief, the regulatory provisions involved, the nature of the relief being

requested, and the petitioner's arguments in favor of relief.

Kenwood U.S.A. Corporation

[(Waiver Petition Docket Number FRA-2009-0059]

Kenwood U.S.A. Corporation (Kenwood) seeks a waiver of compliance from certain provisions of 49 CFR part 232, Brake System Safety Standards for Freight and Other Non-Passenger Trains and Equipment. Specifically, § 232.409(d)—Inspection and Testing of end-of-train devices, which requires the telemetry equipment to be tested for accuracy and calibrated if necessary at least every 368 days. It also requires that the date and location of the last calibration or test, as well as the name of the person performing the calibration or test, be legibly displayed on a weather-resistant sticker or other marking device affixed to the outside of both the front and the rear unit.

This waiver will cover all Kenwood model NX–800–K UHF digital transceivers manufactured on or after August 24, 2007. This transceiver is competitive with a digitally synthesized radio produced by Wabtec, for which a similar waiver was granted (see Docket Number FRA–2004–18895); and Kenwood requests that its product be treated in a similar fashion.

Kenwood states that its NX-800-K device is inherently stable, reflecting the state of the art in digital synthesized transceivers. Test results submitted by Kenwood as part of its Federal Communications Commission (FCC) authorization process confirm the extreme frequency stability of this digital synthesized device. This compliance meets the (FCC) TIA-603 standard and current FCC Part 90 service rule specifications for railroad applications. Kenwood states that, as such, annual re-certification is unnecessary and administratively burdensome. Kenwood further states that the annual re-certification requirement was developed at the time when such radios were crystal controlled and stability was an issue, and that the rule has no application to digitally synthesized modern transceivers. Kenwood believes that the spirit of the rule is not violated by the requested waiver inasmuch as the radio design obviates the need for the annual certification and measurements.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires

an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number (e.g., Waiver Petition Docket Number FRA–2009–0059) and may be submitted by any of the following methods:

- Web site: http:// www.regulations.gov. Follow the online instructions for submitting comments.
 - Fax: 202-493-2251.
- *Mail:* Docket Operations Facility, U.S. Department of Transportation, 1200 New Jersey Avenue, SE., W12–140, Washington, DC 20590.
- Hand Delivery: 1200 New Jersey Avenue, SE., Room W12–140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.

Communications received within 30 days of the date of this notice will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hours (9 a.m.—5 p.m.) at the above facility. All documents in the public docket are also available for inspection and copying on the Internet at the docket facility's Web site at http://www.regulations.gov.

Anyone is able to search the electronic form of any written communications and comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the Federal Register published on April 11, 2000 (Volume 65, Number 70; Pages 19477–78).

Issued in Washington, DC, on July 7, 2009. **Grady C. Cothen, Jr.,**

Deputy Associate Administrator for Safety Standards and Program Development.

BILLING CODE 4910–06–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Revenue Procedure 2003– 38

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning Revenue Procedure 2003–38, Commercial Revitalization Deduction.

DATES: Written comments should be received on or before September 11, 2009 to be assured of consideration.

ADDRESSES: Direct all written comments to R. Joseph Durbala, Internal Revenue Service, room 6129, 1111 Constitution Avenue, NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of the revenue procedure should be directed to Dawn Bidne at Internal Revenue Service, Room 6129, 1111 Constitution Avenue, NW., Washington, DC 20224, or at (202) 622–3933, or through the Internet at Dawn.E.Bidne@irs.gov.

SUPPLEMENTARY INFORMATION:

Title: Commercial Revitalization Deduction.

OMB Number: 1545–1818. *Revenue Procedure Number:* Revenue Procedure 2003–38.

Abstract: Pursuant to section 1400I of the Internal Revenue Code, Revenue Procedure 2003–38 provides the time and manner for states to make allocations of commercial revitalization expenditures to a new or substantially rehabilitated building that is placed in service in a renewal community.

Current Actions: There are no changes being made to the revenue procedure at this time.

Type of Review: Extension of a currently approved collection.

Affected Public: State, local and tribal governments, and business or other forprofit organizations.

Estimated Number of Respondents: 80.

Estimated Average Time per Respondent: 2 hours, 30 minutes.

Estimated Total Annual Burden Hour: 200.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: June 29, 2009.

Allan Hopkins,

IRS Reports Clearance Officer. [FR Doc. E9–16525 Filed 7–10–09; 8:45 am] BILLING CODE 4830–01–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Notice 2006–26

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning Notice 2006–26, Credit for Nonbusiness Energy Property.

DATES: Written comments should be received on or before September 11, 2009 to be assured of consideration.

ADDRESSES: Direct all written comments to R. Joseph Durbala, Internal Revenue Service, Room 6129, 1111 Constitution Avenue, NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of notice should be directed to Allan Hopkins, at (202) 622–6665, or at Internal Revenue Service, Room 6129, 1111 Constitution Avenue, NW., Washington, DC 20224, or through the Internet, at *Allan.M.Hopkins@irs.gov*.

SUPPLEMENTARY INFORMATION:

 $\label{eq:Title:Credit} \emph{Title:} \ \textit{Credit for Nonbusiness Energy} \\ \textit{Property.}$

OMB Number: 1545–1989.

Notice Number: Notice 2006–26.

Abstract: This notice of interim guidance relates to the procedures by which a manufacturer can certify that building envelope components or energy property qualify for the section 25C credit. This notice is intended to provide (1) guidance concerning the methods by which manufacturers can provide such certifications to taxpayers, and (2) guidance concerning the methods by which taxpayers can claim such credits.

Current Actions: There are no changes being made to the notice at this time.

Type of Review: Extension of a currently approved collection.

Affected Public: Individuals or Households.

Estimated Number of Respondents: 140.

Estimated Average Time Per Respondent: 2.5 hrs.

Estimated Total Annual Burden Hours: 350.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. SUPPLEMENTARY INFORMATION:

Title: Return for Credit Payments to Issuers of Qualified Bonds.

OMB Number: 1545–2142. Form Number: Form 8038–CP.

Abstract: Form 8038–CP, Return for Credit Payments to Issuers of Qualified Bonds, was developed to carry out the provisions of the American Recovery and Reinvestment Act of 2009. It provides State and local governments with the option of issuing a tax credit bond instead of a tax-exempt governmental obligation bond. The bill gives State and local governments the option to receive a direct payment from the Federal government equal to a subsidy that would have been received through the Federal tax credit for bonds.

Current Actions: There is no change in the paperwork burden previously approved by OMB. This form is being submitted for renewal purposes only.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses and other for-profit organizations, farms.

Estimated Number of Respondents: 500.

Estimated Time per Respondent: 8 hours 4 minutes.

Estimated Total Annual Burden Hours: 4,030.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. SUPPLEMENTARY INFORMATION:

Title: Permitted Elimination of Preretirement Optional Forms of Benefit.

OMB Number: 1545–2140. Form Number: Form 8935 and Form 8935–T.

Abstract: Form 8935 will provide to the employee, current or former, the amount of the payment that was received from the airline that is eligible for rollover treatment into a Roth IRA. Form 8935–T (Transmittal form) will provide the Secretary the names, years, and amounts of such payments.

Current Actions: There is no change to this existing regulation.

Type of Review: Extension of a currently approved collection.

Affected Public: Business or other forprofit organizations and not-for-profit institutions.

Estimated Number of Respondents: 5. Estimated Average Time per Respondent: 6 hours and 24 minutes. Estimated Total Annual Burden Hours: 32.

BILLING CODE 4830–01–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Revenue Procedure 2003– 39

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning Revenue Procedure 2003–39, section 1031 LKE (Like-Kind Exchanges) Auto Leasing Programs.

DATES: Written comments should be received on or before September 11, 2009 to be assured of consideration.

ADDRESSES: Direct all written comments to R. Joseph Durbala, Internal Revenue Service, Room 6129, 1111 Constitution Avenue, NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of the revenue procedure should be directed to Dawn Bidne at Internal Revenue Service, Room 6129, 1111 Constitution Avenue, NW., Washington, DC 20224, or at (202) 622–3933, or through the Internet at Dawn.E.Bidne@irs.gov.

SUPPLEMENTARY INFORMATION:

Title: Section 1031 LKE (Like-Kind Exchanges) Auto Leasing Programs.

OMB Number: 1545–1834.

Revenue Procedure Number: Revenue Procedure 2003–39.

Abstract: Revenue Procedure 2003–39 provides safe harbors for certain aspects of the qualification under section 1031 of certain exchanges of property pursuant to LKE Programs for Federal income tax purposes.

Current Actions: There are no changes being made to the revenue procedure at this time.

Type of Review: Extension of a currently approved collection.

Affected Public: Business or other forprofit organizations.

Estimated Number of Respondents: 8,600.

Estimated Average Time Per Respondent: 1 hour.

Estimated Total Annual Burden Hours: 8,600.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: June 29, 2009.

Allan Hopkins,

IRS Reports Clearance Officer.

BILLING CODE 4830–01–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Notice 2009–26

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning Notice 2009–26, Build America Bonds and Direct Payment Subsidy Implementation.

DATES: Written comments should be received on or before September 11, 2009 to be assured of consideration.

ADDRESSES: Direct all written comments to R. Joseph Durbala, Internal Revenue Service, room 6129, 1111 Constitution Avenue, NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of this regulation should be directed to Dawn Bidne, (202) 622–3933, Internal Revenue Service, room 6129, 1111 Constitution Avenue, NW., Washington, DC 20224, or through the Internet at *Dawn.E.Bidne@irs.gov*.

SUPPLEMENTARY INFORMATION:

Title: Build America Bonds and Direct Payment Subsidy Implementation. OMB Number: 1545–2143. Notice Number: Notice 2009–26. Abstract: This Notice provides

guidance on the new tax incentives for Build America Bonds under section 54AA of the Internal Revenue Code ("Code") and the implementation plans for the refundable credit payment procedures for these bonds. This Notice includes guidance on the modified Build America Bond program for Recovery Zone Economic Development Bonds under section 1400U-2 of the Code. This Notice provides guidance on the initial refundable credit payment procedures, required elections, and information reporting. This Notice solicits public comments on the refundable credit payment procedures for these bonds. This Notice is intended to facilitate prompt implementation of the Build America Bond program and to enable state and local governments to begin issuing these bonds for authorized purposes to promote economic recovery and job creation.

Current Actions: There is no change to this existing regulation.

Type of Review: Extension of a currently approved collection.

Affected Public: Business or other forprofit organizations and not-for-profit institutions. Estimated Number of Respondents: 1,000.

Estimated Average Time per Respondent: 15 hours.

Estimated Total Annual Burden Hours: 15,000.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Notice 2000–28

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this

opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning Notice 2000–28, Coal Exports.

DATES: Written comments should be received on or before September 11, 2009 to be assured of consideration.

ADDRESSES: Direct all written comments to R. Joseph Durbala, Internal Revenue Service, Room 6129, 1111 Constitution Avenue, NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of the regulations should be directed to Bob Kennedy at Internal Revenue Service, Room 6129, 1111 Constitution Avenue, NW., Washington, DC 20224, or at (202) 622–3403, or through the Internet at (Robert.J.Kennedy@irs.gov).

SUPPLEMENTARY INFORMATION:

Title: Coal Exports.

Notice Number: 1545–1690.

Abstract: Notice 2000–28 provides guidance relating to the coal excise tax imposed by section 4121 of the Internal Revenue Code. The notice provides rules under the Code for making a nontaxable sale of coal for export or for obtaining a credit or refund when tax has been paid with respect to a nontaxable sale of coal for export.

Current Actions: There are no changes being made to the notice at this time.

Type of Review: Extension of currently approved collection.

Affected Public: Business or other-for-profit organizations.

Estimated Number of Respondents: 400.

Estimated Time Per Respondent: 1 hour.

Estimated Total Annual Burden Hours: 400.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Part II

Department of Health and Human Services

Centers for Medicare & Medicaid Services

42 CFR Parts 410, 411, 414, et al. Medicare Program; Payment Policies Under the Physician Fee Schedule and Other Revisions to Part B for CY 2010; Proposed Rule

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

42 CFR Parts 410, 411, 414, 415, and 485

[CMS-1413-P]

RIN 0938-AP40

Medicare Program; Payment Policies Under the Physician Fee Schedule and Other Revisions to Part B for CY 2010

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Proposed rule.

SUMMARY: This proposed rule would address proposed changes to Medicare Part B payment policy. We are proposing these changes to ensure that our payment systems are updated to reflect changes in medical practice and the relative value of services. This proposed rule discusses: Refinements to resource-based work, practice expense and malpractice relative value units (RVUs); geographic practice cost indices (GPCIs); telehealth services; several coding issues; physician fee schedule update for CY 2010; payment for covered part B outpatient drugs and biologicals; the competitive acquisition program (CAP); payment for renal dialysis services; the chiropractic services demonstration; comprehensive outpatient rehabilitation facilities; physician self-referral; the ambulance fee schedule; the clinical laboratory fee schedule; durable medical equipment, prosthetics, orthotics, and supplies (DMEPOS); and certain provisions of the Medicare Improvements for Patients and Providers Act of 2008. (See the Table of contents for a listing of the specific issues.)

DATES: To be assured consideration, comments must be received at one of the addresses provided below, no later than 5 p.m. on Monday, August 31, 2009

ADDRESSES: In commenting, please refer to file code CMS-1413-P. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission.

You may submit comments in one of four ways (please choose only one of the ways listed):

- 1. Electronically. You may submit electronic comments on this regulation to http://www.regulations.gov. Follow the instructions under the "More Search Options" tab.
- 2. By regular mail. You may mail written comments to the following

address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS-1413-P, P.O. Box 8013, Baltimore, MD 21244-8013.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

- 3. By express or overnight mail. You may send written comments to the following address only: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS-1413-P, Mail Stop C4-26-05, 7500 Security Boulevard, Baltimore, MD 21244-1850.
- 4. By hand or courier. If you prefer, you may deliver (by hand or courier) your written comments before the close of the comment period to either of the following addresses:
- a. For delivery in Washington, DC—Centers for Medicare & Medicaid Services, Department of Health and Human Services, Room 445–G, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201.

(Because access to the interior of the Hubert H. Humphrey Building is not readily available to persons without Federal government identification, commenters are encouraged to leave their comments in the CMS drop slots located in the main lobby of the building. A stamp-in clock is available for persons wishing to retain a proof of filing by stamping in and retaining an extra copy of the comments being filed.)

b. For delivery in Baltimore, MD— Centers for Medicare & Medicaid Services, Department of Health and Human Services, 7500 Security Boulevard, Baltimore, MD 21244–1850.

If you intend to deliver your comments to the Baltimore address, please call telephone number (410) 786–9994 in advance to schedule your arrival with one of our staff members.

Comments mailed to the addresses indicated as appropriate for hand or courier delivery may be delayed and received after the comment period.

FOR FURTHER INFORMATION CONTACT:

- Rick Ensor, (410) 786–5617, for issues related to practice expense methodology.
- Craig Dobyski, (410) 786–4584, for issues related to geographic practice cost indices.
- Esther Markowitz, (410) 786–4595, for issues related to telehealth services.
- Ken Marsalek, (410) 786–4502, for issues related to the physician practice information survey and the multiple procedure payment reduction.

- Cathleen Scally, (410) 786–5714, for issues related to the initial preventive physical examination or consultation services.
- Regina Walker-Wren, (410) 786–9160, for issues related to the phasing out of the outpatient mental health treatment limitation.
- Diane Stern, (410) 786–1133, for issues related to the physician quality reporting initiative and incentives for e-prescribing.

Lisa Grabert, (410) 786–6827, for issues related to the Physician Resource Use Feedback Program.

Colleen Bruce, (410) 786–5529, for issues related to value-based purchasing.

Sandra Bastinelli, (410) 786–3630, for issues related to the implementation of accreditation standards.

Jim Menas, (410) 786–4507, for issues related to teaching anesthesia services.

Sarah McClain, (410) 786–2994, for issues related to the coverage of cardiac rehabilitation services.

Dorothy Shannon, (410) 786–3396, for issues related to payment for cardiac rehabilitation services.

Roya Lofti, (410) 786–4072, for issues related to the coverage of pulmonary rehabilitation.

Jamie Hermansen, (410) 786–2064, for issues related to kidney disease patient education programs.

Terri Harris, (410) 786–6830 for issues related to payment for kidney disease patient education.

Henry Richter, (410) 786–4562, or Lisa Hubbard, (410) 786–5472, for issues related to renal dialysis provisions and payments for end-stage renal disease facilities.

Cheryl Gilbreath, (410) 786–5919, for issues related to payment for covered outpatient drugs and biologicals.

- Edmund Kasaitis, (410) 786–0477, or Bonny Dahm, (410) 786–4006, for issues related to the Competitive Acquisition Program (CAP) for Part B drugs.
- Pauline Lapin, (410) 786–6883, for issues related to the chiropractic services demonstration budget neutrality issue.

Monique Howard, (410) 786–3869, for issues related to CORF conditions of coverage.

Roechel Kujawa, (410) 786–9111, for issues related to ambulance services.

Anne Tayloe Hauswald, (410) 786–4546, for clinical laboratory issues.

Troy Barsky, (410) 786–8873, or Roy Albert, (410) 786–1872, for issues related to physician self-referral.

Michelle Peterman, (410) 786–2591, or Iffat Fatima, (410) 786–6709 for issues related to the grandfathering provisions of the durable medical equipment, prosthetics, orthotics, and supplies (DMEPOS) Competitive Acquisition Program.

Ralph Goldberg, (410) 786-4870, or Heidi Edmunds, (410) 786-1781, for issues related to the damages process caused by the termination of contracts awarded in 2008 under the DMEPOS

Competitive Bidding program. Diane Milstead, (410) 786–3355, or Gaysha Brooks, (410) 786-9649, for all other issues.

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following Web site as soon as possible after they have been received: http://

www.regulations.gov. Follow the search instructions on that Web site to view public comments.

Comments received timely will also be available for public inspection as they are received, generally beginning approximately 3 weeks after publication of a document, at the headquarters of the Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Baltimore, Maryland 21244, Monday through Friday of each week from 8:30 a.m. to 4 p.m. To schedule an appointment to view public comments, phone 1-800-743-3951.

Table of Contents

To assist readers in referencing sections contained in this preamble, we are providing a table of contents. Some of the issues discussed in this preamble affect the payment policies, but do not require changes to the regulations in the Code of Federal Regulations (CFR). Information on the regulation's impact appears throughout the preamble, and therefore, is not exclusively in section V. of this proposed rule.

- I. Background
 - A. Development of the Relative Value System
 - 1. Work RVUs
 - 2. Practice Expense Relative Value Units (PE RVUs)
 - 3. Resource-Based Malpractice RVUs
 - 4. Refinements to the RVUs
 - 5. Adjustments to RVUs Are Budget Neutral
 - B. Components of the Fee Schedule Payment Amounts
- C. Most Recent Changes to Fee Schedule II. Provisions of the Proposed Regulation
- A. Resource-Based Practice Expense (PE) Relative Value Units (RVUs)
- 1. Current Methodology

- a. Data Sources for Calculating Practice Expense
- b. Allocation of PE to Services
- c. Facility and Nonfacility Costs
- d. Services With Technical Components (TCs) and Professional Components

I. Background

Since January 1, 1992, Medicare has paid for physicians' services under section 1848 of the Social Security Act (the Act), "Payment for Physicians" Services." The Act requires that payments under the physician fee schedule (PFS) be based on national uniform relative value units (RVUs) based on the relative resources used in furnishing a service. Section 1848(c) of the Act requires that national RVUs be established for physician work, practice expense (PE), and malpractice expense. Before the establishment of the resource-based relative value system, Medicare payment for physicians' services was based on reasonable charges.

A. Development of the Relative Value System

1. Work RVUs

The concepts and methodology underlying the PFS were enacted as part of the Omnibus Budget Reconciliation Act (OBRA) of 1989 (Pub. L. 101–239), and OBRA 1990, (Pub. L. 101–508). The final rule, published on November 25, 1991 (56 FR 59502), set forth the fee schedule for payment for physicians' services beginning January 1, 1992. Initially, only the physician work RVUs were resource-based, and the PE and malpractice RVUs were based on average allowable charges.

The physician work RVUs established for the implementation of the fee schedule in January 1992 were developed with extensive input from the physician community. A research team at the Harvard School of Public Health developed the original physician work RVUs for most codes in a cooperative agreement with the Department of Health and Human Services (DHHS). In constructing the code-specific vignettes for the original physician work RVUs, Harvard worked with panels of experts, both inside and outside the Federal government, and obtained input from numerous physician specialty groups.

Section 1848(b)(2)(B) of the Act specifies that the RVUs for anesthesia services are based on RVUs from a uniform relative value guide, with appropriate adjustment of the conversion factor (CF), in a manner to assure that fee schedule amounts for anesthesia services are consistent with those for other services of comparable value. We established a separate CF for anesthesia services, and we continue to utilize time units as a factor in determining payment for these services. As a result, there is a separate payment methodology for anesthesia services.

We establish physician work RVUs for new and revised codes based on our review of recommendations received from the American Medical Association's (AMA) Specialty Society Relative Value Update Committee (RUC).

2. Practice Expense Relative Value Units (PE RVUs)

Section 121 of the Social Security Act Amendments of 1994 (Pub. L. 103–432), enacted on October 31, 1994, amended section 1848(c)(2)(C)(ii) of the Act and required us to develop resource-based PE RVUs for each physician's service beginning in 1998. We were to consider general categories of expenses (such as office rent and wages of personnel, but excluding malpractice expenses) comprising PEs.

Section 4505(a) of the Balanced Budget Act of 1997 (BBA) (Pub. L. 105–33), amended section 1848(c)(2)(C)(ii) of the Act to delay implementation of the resource-based PE RVU system until January 1, 1999. In addition, section 4505(b) of the BBA provided for a 4-year transition period from charge-based PE RVUs to resource-based RVUs.

We established the resource-based PE RVUs for each physicians' service in a final rule, published November 2, 1998 (63 FR 58814), effective for services furnished in 1999. Based on the requirement to transition to a resource-based system for PE over a 4-year period, resource-based PE RVUs did not become fully effective until 2002.

This resource-based system was based on two significant sources of actual PE data: The Clinical Practice Expert Panel (CPEP) data; and the AMA's Socioeconomic Monitoring System (SMS) data. The CPEP data were collected from panels of physicians, practice administrators, and nonphysicians (for example, registered nurses (RNs)) nominated by physician specialty societies and other groups. The CPEP panels identified the direct inputs required for each physician's service in both the office setting and out-of-office setting. We have since refined and revised these inputs based on recommendations from the RUC. The AMA's SMS data provided aggregate

specialty-specific information on hours worked and PEs.

Separate PE RVUs are established for procedures that can be performed in both a nonfacility setting, such as a physician's office, and a facility setting, such as a hospital outpatient department. The difference between the facility and nonfacility RVUs reflects the fact that a facility typically receives separate payment from Medicare for its costs of providing the service, apart from payment under the PFS. The nonfacility RVUs reflect all of the direct and indirect PEs of providing a particular service.

Section 212 of the Balanced Budget Refinement Act of 1999 (BBRA) (Pub. L. 106-113) directed the Secretary of Health and Human Services (the Secretary) to establish a process under which we accept and use, to the maximum extent practicable and consistent with sound data practices, data collected or developed by entities and organizations to supplement the data we normally collect in determining the PE component. On May 3, 2000, we published the interim final rule (65 FR 25664) that set forth the criteria for the submission of these supplemental PE survey data. The criteria were modified in response to comments received, and published in the Federal Register (65 FR 65376) as part of a November 1, 2000 final rule. The PFS final rules published in 2001 and 2003, respectively, (66 FR 55246 and 68 FR 63196) extended the period during which we would accept these supplemental data through March 1, 2005.

In the Calendar Year (CY) 2007 PFS final rule with comment period (71 FR 69624), we revised the methodology for calculating PE RVUs beginning in CY 2007 and provided for a 4-year transition for the new PE RVUs under this new methodology.

3. Resource-Based Malpractice (MP) RVUs

Section 4505(f) of the BBA amended section 1848(c) of the Act requiring us to implement resource-based malpractice (MP) RVUs for services furnished on or after 2000. The resource-based MP RVUs were implemented in the PFS final rule published November 2, 1999 (64 FR 59380). The MP RVUs were based on malpractice insurance premium data collected from commercial and physician-owned insurers from all the States, the District of Columbia, and Puerto Rico.

4. Refinements to the RVUs

Section 1848(c)(2)(B)(i) of the Act requires that we review all RVUs no less

often than every 5 years. The first 5-Year Review of the physician work RVUs was published on November 22, 1996 (61 FR 59489) and was effective in 1997. The second 5-Year Review was published in the CY 2002 PFS final rule with comment period (66 FR 55246) and was effective in 2002. The third 5-Year Review of physician work RVUs was published in the CY 2007 PFS final rule with comment period (71 FR 69624) and was effective on January 1, 2007. (Note: Additional codes relating to the third 5-Year Review of physician work RVUs were addressed in the CY 2008 PFS final rule with comment period (72 FR 66360).)

In 1999, the AMA's RUC established the Practice Expense Advisory Committee (PEAC) for the purpose of refining the direct PE inputs. Through March 2004, the PEAC provided recommendations to CMS for over 7,600 codes (all but a few hundred of the codes currently listed in the AMA's Current Procedural Terminology (CPT) codes). As part of the CY 2007 PFS final rule with comment period (71 FR 69624), we implemented a new methodology for determining resourcebased PE RVUs and are transitioning this over a 4-year period. (Note: In section II.A.2. of this proposed rule, we are proposing to use new survey data under the PE methodology.)

In the CY 2005 PFS final rule with comment period (69 FR 66236), we implemented the first 5-Year Review of the MP RVUs (69 FR 66263). (Note: In section II.C. of this proposed rule, we are proposing to update the malpractice RVUs with the use of new data.)

5. Adjustments to RVUs are Budget Neutral

Section 1848(c)(2)(B)(ii)(II) of the Act provides that adjustments in RVUs for a year may not cause total PFS payments to differ by more than \$20 million from what they would have been if the adjustments were not made. In accordance with section 1848(c)(2)(B)(ii)(II) of the Act, if adjustments to RVUs cause expenditures to change by more than \$20 million, we make adjustments to ensure that expenditures do not increase or decrease by more than \$20 million.

As explained in the CY 2009 PFS final rule with comment period (73 FR 69730), as required by section 133(b) of the Medicare Improvements for Patients and Providers Act of 2008 (MIPPA) (Pub. L. 110–275), the separate budget neutrality (BN) adjustor resulting from the third 5-Year Review of physician work RVUs is being applied to the CF beginning with CY 2009 rather than the work RVUs.

B. Components of the Fee Schedule Payment Amounts

To calculate the payment for every physicians' service, the components of the fee schedule (physician work, PE, and MP RVUs) are adjusted by a geographic practice cost index (GPCI). The GPCIs reflect the relative costs of physician work, PE, and malpractice expense in an area compared to the national average costs for each component.

RVUs are converted to dollar amounts through the application of a CF, which is calculated by CMS' Office of the Actuary (OACT).

The formula for calculating the Medicare fee schedule payment amount for a given service and fee schedule area can be expressed as:

 $\begin{aligned} \text{Payment} &= \left[(\text{RVU work} \times \text{GPCI work}) + \\ & (\text{RVU PE} \times \text{GPCI PE}) + (\text{RVU} \\ & \text{malpractice} \times \text{GPCI malpractice}) \right] \times \\ & \text{CF} \end{aligned}$

C. Most Recent Changes to the Fee Schedule

The CY 2009 PFS final rule with comment period (73 FR 69726) implemented changes to the PFS and other Medicare Part B payment policies finalized the CY 2008 interim RVUs and implemented interim RVUs for new and revised codes for CY 2009 to ensure that our payment systems are updated to reflect changes in medical practice and the relative value of services.

The CY 2009 PFS final rule with comment period also addressed other policies, as well as certain provisions of the MIPPA.

As required by the statute, and based on section 131 of the MIPPA, the CY 2009 PFS final rule with comment period also announced that the PFS update is 1.1 percent for CY 2009, the initial estimate for the sustainable growth rate for CY 2009 is 7.4 percent, and the conversion factor (CF) for CY 2009 is \$36.0666.

II. Provisions of the Proposed Regulation

A. Resource-Based Practice Expense (PE) Relative Value Units (RVUs)

Practice expense (PE) is the portion of the resources used in furnishing the service that reflects the general categories of physician and practitioner expenses, such as office rent and personnel wages but excluding malpractice expenses, as specified in section 1848(c)(1)(B) of the Act.

Section 121 of the Social Security Amendments of 1994 (Pub. L. 103–432), enacted on October 31, 1994, required CMS to develop a methodology for a resource-based system for determining PE RVUs for each physician's service. Until that time, PE RVUs were based on historical allowed charges. This legislation stated that the revised PE methodology must consider the staff, equipment, and supplies used in the provision of various medical and surgical services in various settings beginning in 1998. The Secretary has interpreted this to mean that Medicare payments for each service would be based on the relative PE resources typically involved with furnishing the service.

The initial implementation of resource-based PE RVUs was delayed from January 1, 1998, until January 1, 1999, by section 4505(a) of the BBA. In addition, section 4505(b) of the BBA required that the new payment methodology be phased in over 4 years, effective for services furnished in CY 1999, and fully effective in CY 2002. The first step toward implementation of the statute was to adjust the PE values for certain services for CY 1998. Section 4505(d) of the BBA required that, in developing the resource-based PE RVUs, the Secretary must-

 Use, to the maximum extent possible, generally-accepted cost accounting principles that recognize all staff, equipment, supplies, and expenses, not solely those that can be linked to specific procedures and actual data on equipment utilization.

 Develop a refinement method to be used during the transition.

 Consider, in the course of notice and comment rulemaking, impact projections that compare new proposed payment amounts to data on actual

In CY 1999, we began the 4-year transition to resource-based PE RVUs utilizing a "top-down" methodology whereby we allocated aggregate specialty-specific practice costs to individual procedures. The specialtyspecific PEs were derived from the American Medical Association's (AMA's) Socioeconomic Monitoring Survey (SMS). In addition, under section 212 of the BBRA, we established a process extending through March 2005 to supplement the SMS data with data submitted by a specialty. The aggregate PEs for a given specialty were then allocated to the services furnished by that specialty on the basis of the direct input data (that is, the staff time, equipment, and supplies) and work RVUs assigned to each CPT code.

For CY 2007, we implemented a new methodology for calculating PE RVUs. Under this new methodology, we use the same data sources for calculating PE, but instead of using the "top-down" approach to calculate the direct PE

RVUs, under which the aggregate direct and indirect costs for each specialty are allocated to each individual service, we now utilize a "bottom-up" approach to calculate the direct costs. Under the "bottom up" approach, we determine the direct PE by adding the costs of the resources (that is, the clinical staff, equipment, and supplies) typically required to provide each service. The costs of the resources are calculated using the refined direct PE inputs assigned to each CPT code in our PE database, which are based on our review of recommendations received from the AMA's Relative Value Update Committee (RUC). For a more detailed explanation of the PE methodology, see the Five-Year Review of Work Relative Value Units Under the PFS and Proposed Changes to the Practice Expense Methodology proposed notice (71 FR 37242) and the CY 2007 PFS final rule with comment period (71 FR 69629).

Note: In section II.A.1 of this proposed rule, we discuss the current methodology used for calculating PE. In section II.A.2. of this proposed rule, which contains PE proposals for CY 2010, we are proposing to use data from the AMA Physician Practice Information Survey (PPIS) in place of the AMA's SMS survey data and supplemental survey data that is currently used in the PE methodology.

1. Current Methodology

a. Data Sources for Calculating Practice Expense

The AMA's SMS survey data and supplemental survey data from the specialties of cardiothoracic surgery, vascular surgery, physical and occupational therapy, independent laboratories, allergy/immunology, cardiology, dermatology, gastroenterology, radiology, independent diagnostic testing facilities (IDTFs), radiation oncology, and urology are used to develop the PE per hour (PE/ HR) for each specialty. For those specialties for which we do not have PE/HR, the appropriate PE/HR is obtained from a crosswalk to a similar specialty.

The AMA developed the SMS survey in 1981 and discontinued it in 1999. Beginning in 2002, we incorporated the 1999 SMS survey data into our calculation of the PE RVUs, using a 5year average of SMS survey data. (See the CY 2002 PFS final rule with comment period (66 FR 55246).) The SMS PE survey data are adjusted to a common year, 2005. The SMS data provide the following six categories of PE costs:

· Clinical payroll expenses, which are payroll expenses (including fringe benefits) for nonphysician clinical personnel.

 Administrative payroll expenses, which are payroll expenses (including fringe benefits) for nonphysician personnel involved in administrative, secretarial, or clerical activities.

 Office expenses, which include expenses for rent, mortgage interest, depreciation on medical buildings, utilities, and telephones.

 Medical material and supply expenses, which include expenses for drugs, x-ray films, and disposable medical products.

 Medical equipment expenses, which include depreciation, leases, and rent of medical equipment used in the diagnosis or treatment of patients.

• All other expenses, which include expenses for legal services, accounting, office management, professional association memberships, and any professional expenses not previously mentioned in this section.

In accordance with section 212 of the BBRA, we established a process to supplement the SMS data for a specialty with data collected by entities and organizations other than the AMA (that is, those entities and organizations representing the specialty itself). (See the Criteria for Submitting Supplemental Practice Expense Survey Data interim final rule with comment period (65 FR 25664).) Originally, the deadline to submit supplementary survey data was through August 1, 2001. In the CY 2002 PFS final rule (66 FR 55246), the deadline was extended through August 1, 2003. To ensure maximum opportunity for specialties to submit supplementary survey data, we extended the deadline to submit surveys until March 1, 2005 in the Revisions to Payment Policies Under the Physician Fee Schedule for CY 2004 final rule with comment period (68 FR 63196) (hereinafter referred to as CY 2004 PFS final rule with comment period).

The direct cost data for individual services were originally developed by the Clinical Practice Expert Panels (CPEP). The CPEP data include the supplies, equipment, and staff times specific to each procedure. The CPEPs consisted of panels of physicians, practice administrators, and nonphysicians (for example, RNs) who were nominated by physician specialty societies and other groups. There were 15 CPEPs consisting of 180 members from more than 61 specialties and subspecialties. Approximately 50 percent of the panelists were physicians.

The CPEPs identified specific inputs involved in each physician's service provided in an office or facility setting. The inputs identified were the quantity and type of nonphysician labor, medical supplies, and medical equipment. The CPEP data has been regularly updated by various RUC committees on PE.

b. Allocation of PE to Services

The aggregate level specialty-specific PEs are derived from the AMA's SMS survey and supplementary survey data. To establish PE RVUs for specific services, it is necessary to establish the direct and indirect PE associated with each service.

(i) Direct costs. The direct costs are determined by adding the costs of the resources (that is, the clinical staff, equipment, and supplies) typically required to provide the service. The costs of these resources are calculated from the refined direct PE inputs in our PE database. These direct inputs are then scaled to the current aggregate pool of direct PE RVUs. The aggregate pool of direct PE RVUs can be derived using the following formula: (PE RVUs × physician CF) × (average direct percentage from SMS /(Supplemental PE/HR data)).

(ii) Indirect costs. The SMS and supplementary survey data are the source for the specialty-specific aggregate indirect costs used in our PE calculations. We then allocate the indirect costs to the code level on the basis of the direct costs specifically associated with a code and the greater of either the clinical labor costs or the physician work RVUs. For calculation of the 2010 PE RVUs, we use the 2008 procedure-specific utilization data crosswalked to 2010 services. To arrive at the indirect PE costs—

• We apply a specialty-specific indirect percentage factor to the direct expenses to recognize the varying proportion that indirect costs represent of total costs by specialty. For a given service, the specific indirect percentage factor to apply to the direct costs for the purpose of the indirect allocation is calculated as the weighted average of the ratio of the indirect to direct costs (based on the survey data) for the specialties that furnish the service. For example, if a service is furnished by a single specialty with indirect PEs that were 75 percent of total PEs, the indirect percentage factor to apply to the direct costs for the purposes of the indirect allocation would be (0.75/0.25) = 3.0. The indirect percentage factor is then applied to the service level adjusted indirect PE allocators.

 We use the specialty-specific PE/HR from the SMS survey data, as well as the supplemental surveys for cardiothoracic surgery, vascular surgery, physical and occupational therapy, independent

laboratories, allergy/immunology, cardiology, dermatology, radiology, gastroenterology, IDTFs, radiation oncology, and urology. (Note: For radiation oncology, the data represent the combined survey data from the American Society for Therapeutic Radiology and Oncology (ASTRO) and the Association of Freestanding Radiation Oncology Centers (AFROC)). As discussed in the CY 2008 PFS final rule with comment period (72 FR 66233), the PE/HR survey data for radiology is weighted by practice size. We incorporate this PE/HR into the calculation of indirect costs using an index which reflects the relationship between each specialty's indirect scaling factor and the overall indirect scaling factor for the entire PFS. For example, if a specialty had an indirect practice cost index of 2.00, this specialty would have an indirect scaling factor that was twice the overall average indirect scaling factor. If a specialty had an indirect practice cost index of 0.50, this specialty would have an indirect scaling factor that was half the overall average indirect scaling factor.

• When the clinical labor portion of the direct PE RVU is greater than the physician work RVU for a particular service, the indirect costs are allocated based upon the direct costs and the clinical labor costs. For example, if a service has no physician work and 1.10 direct PE RVUs, and the clinical labor portion of the direct PE RVUs is 0.65 RVUs, we would use the 1.10 direct PE RVUs and the 0.65 clinical labor portions of the direct PE RVUs to allocate the indirect PE for that service.

c. Facility and Nonfacility Costs

Procedures that can be furnished in a physician's office, as well as in a hospital or facility setting have two PE RVUs: Facility and nonfacility. The nonfacility setting includes physicians' offices, patients' homes, freestanding imaging centers, and independent pathology labs. Facility settings include hospitals, ambulatory surgical centers (ASCs), and skilled nursing facilities (SNFs). The methodology for calculating PE RVUs is the same for both facility and nonfacility RVUs, but is applied independently to yield two separate PE RVUs. Because the PEs for services provided in a facility setting are generally included in the payment to the facility (rather than the payment to the physician under the PFS), the PE RVUs are generally lower for services provided in the facility setting.

d. Services With Technical Components (TCs) and Professional Components (PCs)

Diagnostic services are generally comprised of two components: A professional component (PC) and a technical component (TC), both of which may be performed independently or by different providers. When services have TCs, PCs, and global components that can be billed separately, the payment for the global component equals the sum of the payment for the TC and PC. This is a result of using a weighted average of the ratio of indirect to direct costs across all the specialties that furnish the global components, TCs, and PCs; that is, we apply the same weighted average indirect percentage factor to allocate indirect expenses to the global components, PCs, and TCs for a service. (The direct PE RVUs for the TC and PC sum to the global under the bottom-up methodology.)

e. Transition Period

As discussed in the CY 2007 PFS final rule with comment period (71 FR 69674), the change to the PE methodology was implemented over a 4-year period. In CY 2010, the transition period is concluded and PE RVUs will be calculated based entirely on the current methodology.

f. PE RVU Methodology

The following is a description of the PE RVU methodology.

(i) Setup File

First, we create a setup file for the PE methodology. The setup file contains the direct cost inputs, the utilization for each procedure code at the specialty and facility/nonfacility place of service level, and the specialty-specific survey PE per physician hour data.

(ii) Calculate the Direct Cost PE RVUs Sum the Costs of Each Direct Input

Step 1: Sum the direct costs of the inputs for each service. The direct costs consist of the costs of the direct inputs for clinical labor, medical supplies, and medical equipment. The clinical labor cost is the sum of the cost of all the staff types associated with the service; it is the product of the time for each staff type and the wage rate for that staff type. The medical supplies cost is the sum of the supplies associated with the service; it is the product of the quantity of each supply and the cost of the supply. The medical equipment cost is the sum of the cost of the equipment associated with the service; it is the product of the number of minutes each piece of equipment is used in the

service and the equipment cost per minute. The equipment cost per minute is calculated as described at the end of this section.

Apply a BN Adjustment to the Direct Inputs

Step 2: Calculate the current aggregate pool of direct PE costs. To do this, multiply the current aggregate pool of total direct and indirect PE costs (that is, the current aggregate PE RVUs multiplied by the CF) by the average direct PE percentage from the SMS and supplementary specialty survey data.

Step 3: Calculate the aggregate pool of direct costs. To do this, for all PFS services, sum the product of the direct costs for each service from Step 1 and the utilization data for that service.

Step 4: Using the results of Step 2 and Step 3 calculate a direct PE BN adjustment so that the aggregate direct cost pool does not exceed the current aggregate direct cost pool and apply it to the direct costs from Step 1 for each service.

Step 5: Convert the results of Step 4 to an RVU scale for each service. To do this, divide the results of Step 4 by the Medicare PFS CF.

(iii) Create the indirect PE RVUs.

Create indirect allocators.

Step 6: Based on the SMS and supplementary specialty survey data, calculate direct and indirect PE percentages for each physician

Step 7: Calculate direct and indirect PE percentages at the service level by taking a weighted average of the results of Step 6 for the specialties that furnish the service. Note that for services with TCs and PCs, we are calculating the direct and indirect percentages across the global components, PCs, and TCs. That is, the direct and indirect percentages for a given service (for example, echocardiogram) do not vary by the PC, TC and global component.

Step 8: Calculate the service level allocators for the indirect PEs based on the percentages calculated in Step 7. The indirect PEs are allocated based on the three components: The direct PE RVU, the clinical PE RVU, and the work RVU

For most services the indirect allocator is: *indirect percentage* * (direct PE RVU/direct percentage) + work RVU.

There are two situations where this formula is modified:

• If the service is a global service (that is, a service with global, professional, and technical components), then the indirect allocator is: Indirect percentage * (direct PE RVU/direct percentage) + clinical PE RVU + work RVU.

• If the clinical labor PE RVU exceeds the work RVU (and the service is not a global service), then the indirect allocator is: *Indirect percentage* * (direct PE RVU/direct percentage) + clinical PE RVU.

Note: For global services, the indirect allocator is based on both the work RVU and the clinical labor PE RVU. We do this to recognize that, for the professional service, indirect PEs will be allocated using the work RVUs, and for the TC service, indirect PEs will be allocated using the direct PE RVU and the clinical labor PE RVU. This also allows the global component RVUs to equal the sum of the PC and TC RVUs.

For presentation purposes in the examples in the Table 1, the formulas were divided into two parts for each service. The first part does not vary by service and is the indirect percentage * (direct PE RVU/direct percentage). The second part is either the work RVU, clinical PE RVU, or both depending on whether the service is a global service and whether the clinical PE RVU exceeds the work RVU (as described earlier in this step.)

Apply a BN Adjustment to the Indirect Allocators

Step 9: Calculate the current aggregate pool of indirect PE RVUs by multiplying the current aggregate pool of PE RVUs by the average indirect PE percentage from the physician specialty survey data. This is similar to the Step 2 calculation for the direct PE RVUs.

Step 10: Calculate an aggregate pool of indirect PE RVUs for all PFS services by adding the product of the indirect PE allocators for a service from Step 8 and the utilization data for that service. This is similar to the Step 3 calculation for the direct PE RVUs.

Step 11: Using the results of Step 9 and Step 10, calculate an indirect PE adjustment so that the aggregate indirect allocation does not exceed the available aggregate indirect PE RVUs and apply it to indirect allocators calculated in Step 8. This is similar to the Step 4 calculation for the direct PE RVUs.

Calculate the Indirect Practice Cost Index

Step 12: Using the results of Step 11, calculate aggregate pools of specialty-specific adjusted indirect PE allocators for all PFS services for a specialty by adding the product of the adjusted indirect PE allocator for each service and the utilization data for that service.

Step 13: Using the specialty-specific indirect PE/HR data, calculate specialty-specific aggregate pools of indirect PE for all PFS services for that specialty by adding the product of the indirect PE/HR for the specialty, the physician time

for the service, and the specialty's utilization for the service.

Step 14: Using the results of Step 12 and Step 13, calculate the specialty-specific indirect PE scaling factors as under the current methodology.

Step 15: Using the results of Step 14, calculate an indirect practice cost index at the specialty level by dividing each specialty-specific indirect scaling factor by the average indirect scaling factor for the entire PFS.

Step 16: Calculate the indirect practice cost index at the service level to ensure the capture of all indirect costs. Calculate a weighted average of the practice cost index values for the specialties that furnish the service.

Note: For services with TCs and PCs, we calculate the indirect practice cost index across the global components, PCs, and TCs. Under this method, the indirect practice cost index for a given service (for example, echocardiogram) does not vary by the PC, TC and global component.

Step 17: Apply the service level indirect practice cost index calculated in Step 16 to the service level adjusted indirect allocators calculated in Step 11 to get the indirect PE RVU.

(iv) Calculate the Final PE RVUs

Step 18: Add the direct PE RVUs from Step 6 to the indirect PE RVUs from Step 17.

Step 19: Calculate and apply the final PE BN adjustment by comparing the results of Step 18 to the current pool of PE RVUs. This final BN adjustment is required primarily because certain specialties are excluded from the PE RVU calculation for ratesetting purposes, but all specialties are included for purposes of calculating the final BN adjustment. (See "Specialties excluded from ratesetting calculation" below in this section.)

(v) Setup File Information

• Specialties excluded from ratesetting calculation: For the purposes of calculating the PE RVUs, we exclude certain specialties such as midlevel practitioners paid at a percentage of the PFS, audiology, and low volume specialties from the calculation. These specialties are included for the purposes of calculating the BN adjustment.

 Crosswalk certain low volume physician specialties: Crosswalk the utilization of certain specialties with relatively low PFS utilization to the associated specialties.

• Physical therapy utilization: Crosswalk the utilization associated with all physical therapy services to the specialty of physical therapy.

• Identify professional and technical services not identified under the usual

TC and 26 modifiers: Flag the services that are PC and TC services, but do not use TC and 26 modifiers (for example, electrocardiograms). This flag associates the PC and TC with the associated global code for use in creating the indirect PE RVU. For example, the professional service code 93010 is associated with the global code 93000.

• Payment modifiers: Payment modifiers are accounted for in the creation of the file. For example, services billed with the assistant at surgery modifier are paid 16 percent of the PFS amount for that service; therefore, the utilization file is modified to only account for 16 percent of any

service that contains the assistant at surgery modifier.

• Work RVUs: The setup file contains the work RVUs from this proposed rule.

(vi) Equipment cost per minute

The equipment cost per minute is calculated as:

(1/(minutes per year * usage)) * price * ((interest rate/(1 – (1/((1 + interest rate) ** life of equipment)))) + maintenance)

Where:

minutes per year = maximum minutes per year if usage were continuous (that is, usage = 1); 150,000 minutes.

usage = equipment utilization assumption;
 0.9 for certain equipment (see section
 II.A.2. of this proposed rule) and 0.5. for others.

 $interest\ rate = 0.11.$

life of equipment = useful life of the
 particular piece of equipment.
maintenance = factor for maintenance; 0.05.

Note: To illustrate the PE calculation, in Table 1 we have used the conversion factor (CF) of \$36.0666 which is the CF effective January 1, 2009 as published in CY 2009 PFS final rule with comment period.

- 2. PE Proposals for CY 2010
- a. SMS and Supplemental Survey Background

Currently, we use PE/HR obtained from the SMS surveys from 1995–1999. For several specialties that collected additional PE/HR data through a more recent supplemental survey, we accepted and incorporated these data in developing current PE/HR values.

While the SMS survey was not specifically designed for the purpose of establishing PE RVUs, we found these data to be the best available at the time. The SMS was a multi-specialty survey effort conducted using a consistent survey instrument and method across specialties. The survey sample was randomly drawn from the AMA Physician Masterfile to ensure national

representativeness. The AMA discontinued the SMS survey in 1999.

As required by the BBRA, we also established a process by which specialty groups could submit supplemental PE data. In the May 3, 2000 interim final rule entitled, Medicare Program; Criteria for Submitting Supplemental Practice Expense Survey Data, (65 FR 25664), we established criteria for acceptance of supplemental data. The criteria were modified in the CY 2001 and CY 2003 PFS final rules with comment period (65 FR 65380 and 67 FR 79971, respectively). We currently use supplemental survey data for the following specialties: Cardiology; dermatology; gastroenterology; radiology; cardiothoracic surgery; vascular surgery; physical and occupational therapy; independent laboratories; allergy/immunology; independent diagnostic testing facilities (IDTFs); radiation oncology; medical oncology; and urology.

Because the SMS data and the supplemental survey data are from different time periods, we have historically inflated them by the MEI to help put them on as comparable a time basis as we can when calculating the PE RVUs. This MEI proxy has been necessary in the past due to the lack of contemporaneous, consistently collected, and comprehensive multispecialty survey data.

b. Physician Practice Information Survey (PPIS)

The AMA has conducted a new survey, the PPIS, which was expanded (relative to the SMS) to include nonphysician practitioners (NPPs) paid under the PFS. The PPIS, administered in CY 2007 and CY 2008, was designed to update the specialty-specific PE/HR data used to develop PE RVUs.

The AMA and our contractor, The Lewin Group (Lewin), analyzed the PPIS data and calculated the PE/HR for physician and nonphysician specialties, respectively. The AMA's summary worksheets and Lewin's final report are available on the CMS Web site at http://www.cms.gov/ PhysicianFeeSched/. (See AMA PPIS Worksheets 1–3 and Lewin Group Final Report PPIS.) Table 2 shows the current indirect PE/HR based on SMS and supplemental surveys, the PPIS indirect PE/HR, and the indirect cost percentages of total costs.

TABLE 2—INDIRECT PE/HR AND INDIRECT PERCENTAGES—Continued [Current and PPIS]

The PPIS is a multispecialty, nationally representative, PE survey of both physician and NPPs using a consistent survey instrument and methods highly consistent with those used for the SMS and the supplemental surveys. The PPIS has gathered information from 3,656 respondents across 51 physician specialty and health care professional groups. We believe the PPIS is the most comprehensive source of PE survey information available to date.

As noted, the BBRA required us to establish criteria for accepting supplemental survey data. Since the supplemental surveys were specific to individual specialties and not part of a comprehensive multispecialty survey, we had required certain precision levels be met in order to ensure that the supplemental data was sufficiently valid, and to be accepted for use in the development of the PE RVUs. Because the PPIS is a contemporaneous, consistently collected, and comprehensive multispecialty survey, we do not believe similar precision requirements are necessary and are not proposing to establish them for the use of the PPIS data.

For physician specialties, the survey responses were adjusted for non-response bias. Non-response bias is the bias that results when the characteristics of survey respondents differ in meaningful ways, such as in the mix of practice sizes, from the general population. The non-response adjustment was developed based on a comparison of practice size and other characteristic information between the

PPIS survey respondents and data from the AMA Masterfile (for physician specialties) or information from specialty societies (for non-physician specialties). For six specialties (that is, chiropractors, clinical social workers, nuclear medicine, osteopathic manipulative therapy, physical therapy, and registered dietians) such an adjustment was not possible due to a lack of available characteristic data. The AMA and Lewin have indicated that the non-response weighting has only a small impact on PE/HR values.

Under our current policy, various specialties without SMS or supplemental survey data have been crosswalked to other similar specialties to obtain a proxy PE/HR. For specialties that were part of the PPIS for which we currently use a crosswalked PE/HR, we are proposing instead to use the PPIS-based PE/HR. We are proposing to continue current crosswalks for specialties that did not participate in PPIS.

Supplemental survey data on independent labs, from the College of American Pathologists, was implemented for payments in CY 2005. Supplemental survey data from the National Coalition of Quality Diagnostic Imaging Services (NCQDIS), representing IDTFs, was blended with supplementary survey data from the American College of Radiology (ACR) and implemented for payments in CY 2007. Neither IDTFs nor Independent Labs participated in PPIS. Therefore, we are proposing to continue using the current PE/HR that was developed using their supplemental survey data.

We are not proposing to use the PPIS data for reproductive endocrinology, sleep medicine, and spine surgery since these specialties are not separately recognized by Medicare and we do not know how to blend this data with the Medicare recognized specialty data. We seek comment on this issue.

We are not proposing changes to the manner in which the PE/HR data are used in the current PE RVU methodology. We are merely proposing to update the PE/HR data itself based on the new survey. We propose to utilize the PE/HR developed using PPIS data for all Medicare recognized specialties that participated in the PPIS for payments effective January 1, 2010. The impact of using the new PPIS-based PE/HR is discussed in the Regulatory Impact Analysis in section V. of this proposed rule.

c. Equipment Utilization Rate

As part of the PE methodology associated with the allocation of equipment costs for calculating PE RVUs, we have adopted an equipment usage assumption of 50 percent. Most recently, we included a discussion in the CY 2008 PFS proposed rule on this equipment usage assumption (72 FR 38132). We noted that if the assumed equipment usage percentage is set too high, the result would be an insufficient allowance at the service level for the practice costs associated with equipment. If the assumed equipment usage percentage is set too low, the result would be an excessive allowance for the practice costs of equipment at the service level. We acknowledged that

^{*}Did not participate in PPIS. Data based on Supplemental Survey.

the current 50 percent usage assumption does not capture the actual usage rates for all equipment, but stated that we did not believe that we had strong empirical evidence to justify any alternative approaches.

The commenters' recommendations about making adjustments to the 50 percent utilization rate assumption varied. Certain commenters recommended we do nothing until stronger empirical evidence is available, while other commenters recommended a decrease in the utilization assumption, and some commenters recommended an increase in the utilization assumption. The particular changes recommended in the utilization assumption were, in most cases, directly related to a specific code. In the CY 2008 PFS final rule with

In the CY 2008 PFS final rule with comment period (72 FR 66232), we agreed with commenters that the equipment utilization rate should continue to be examined for accuracy. We reiterated our commitment to continue to work with interested parties on this issue. We indicated that we would continue to monitor the appropriateness of the equipment utilization assumption, and evaluate whether changes should be proposed in light of the data available.

Since the publication of the CY 2008 PFS final rule with comment period, MedPAC addressed this issue again in its March 2009 Report to Congress (see http://www.medpac.gov/documents/Mar09_EntireReport.pdf). In part of its discussion. MedPAC stated:

'In 2006, the Commission sponsored a survey by NORC of imaging providers in six markets, which found that MRI and CT machines are used much more than the 25 hours per week that CMS assumes (Table 2B-6). According to data from this survey, MRI scanners are used 52 hours per week, on average (median of 46 hours), and CT machines are operated 42 hours per week, on average (median of 40 hours) (NORC 2006).32 Although the survey results are not nationally representative, they are representative of imaging providers in the six markets included in the survey. We also analyzed data from a 2007 survey of CT providers by IMV, a market research firm (IMV Medical Information Division 2008). IMV data are widely used in the industry and have also appeared in published studies (Baker et al. 2008, Baker and Atlas 2004). Using IMV's data on 803 nonhospital CT providers (imaging centers, clinics, and physician offices), we calculated that the average provider uses its CT scanner 50 hours per week, which is twice the number CMS assumes.³³ The IMV survey also found that nonhospital providers increased the average number of procedures per CT machine by 31 percent from 2003 to 2007, which indicates that providers either used their machines more hours per day or performed more scans per hour (IMV Medical Information Division 2008)." (p. 108)

We believe the studies cited by MedPAC strongly suggest that our current usage rate assumption is significantly understated, especially with respect to the types of high cost equipment that were the subject of the studies. Our current 50 percent utilization rate translates into about 25 hours per week out of a 50 hour work week. The median value of 46 hours for MRIs from the first study cited by MedPAC is equivalent to a utilization rate of 92 percent on a 50-hour week. For CT scanners, averaging the value from the first study of 40 hours per week and the value from the second study of 50 hours per week yields 45 hours and is equivalent to a 90 percent utilization rate on a 50 hour work week. We believe the studies cited by MedPAC suggest what we have long suspected, that physicians and suppliers would not typically make huge capital investments in equipment that would only be utilized 50 percent of the time. All of the equipment cited in the MedPAC studies is priced over \$1 million. Therefore, we are proposing to change the equipment usage assumption from the current 50 percent usage rate to a 90 percent usage rate for equipment priced over \$1 million. We will continue to explore data sources regarding the utilization rates of equipment priced at less than \$1 million dollars, but are not proposing a change in the usage rate for this less expensive equipment at this

As MedPAC indicated in its report, we do not believe this proposal would create access issues in rural areas.

MedPAC noted,

"According to our analysis of data from the American Hospital Association's 2006 AHA annual survey of hospitals, 95% of rural hospitals provide CT services in their community (AHA 2007). Therefore, if rural areas do not have physician offices or freestanding centers with MRI and CT machines, most of these communities have access to such services through a hospital." (p. 110)

However, we welcome any additional analyses regarding access issues, and, as in our CY 2008 and CY 2009 rulemaking, we welcome additional empirical data relating to equipment utilization rates. Our understanding is that the PPIS survey did not produce information that can inform the utilization rate discussion, but we invite comments on this or other data sources.

d. Miscellaneous PE Issues

As we have discussed in the past rulemaking (see the CY 2008 PFS final rule with comment period (72 FR 66236) and the CY 2007 PFS final rule with comment period (71 FR 69647)),

we continue to have concerns about the issue of PE RVUs for services which are utilized 24 hours a day/7 days a week, such as certain monitoring systems. For example, the PE equipment methodology was not developed with this type of 24/7 equipment in mind. We are continuing to analyze the issue of PEs for services which are utilized 24 hours a day/7 days a week to identify any modifications to our methodology that would address the specific "constant use" issues associated with these services. Services that are currently contractor priced in CY 2009 would remain contractor priced in CY 2010. Any proposed changes will be communicated through future rulemaking.

We also received comments regarding the PE direct cost inputs (for example, supply costs and the useful life of the renewable sources) related to several high dose radiation therapy (HDRT) and placement CPT codes. Based on our review of these codes and comments received, we are requesting that the AMA RUC consider these CPT codes for additional review.

e. AMA RUC Recommendations for Direct PE Inputs

The AMA RUC provided recommendations for PE inputs for the codes listed in Table 3.

TABLE 3—CODES WITH AMA RUC PE RECOMMENDATIONS

| CPT ¹ code | Description |
|-------------------------------------------|-------------------------------------------|
| 37183
47382
50200
55873
93025 | Biopsy of kidney.
Cryoablate prostate. |

¹ CPT codes and descriptions are Copyright 2009 American Medical Association.

We are in agreement with the AMA RUC recommendations for the direct PE inputs for the codes listed in Table 3 and propose to adopt these for CY 2010.

B. Geographic Practice Cost Indices (GPCIs): Locality Discussion

1. Update—Expiration of 1.0 Work GPCI Floor

Section 1848(e)(1)(A) of the Act requires us to develop separate Geographic Practice Cost Indices (GPCIs) to measure resource cost differences among localities compared to the national average for each of the three fee schedule components (that is, work, PE and malpractice). While requiring that the PE and malpractice GPCIs reflect the full relative cost differences, section 1848(e)(1)(A)(iii) of

the Act requires that the physician work GPCIs reflect only one-quarter of the relative cost differences compared to the national average.

Section 1848(e)(1)(C) of the Act requires us to review and, if necessary, adjust the GPCIs at least every 3 years. This section also specifies that if more than 1 year has elapsed since the last GPCI revision, we must phase in the adjustment over 2 years, applying only one-half of any adjustment in each year. As discussed in the CY 2009 PFS final rule with comment period (73 FR 69740), the CY 2009 adjustment to the GPCIs reflected the fully implemented fifth comprehensive GPCI update. We also noted that section 134 of the MIPPA extended the 1.000 work GPCI floor from July 1, 2008, through December 31, 2009. (Note: The 1.000 work GPCI floor was enacted and implemented for CY 2006, and, prior to enactment of the MIPPA, was set to expire on June 30, 2008.) Additionally, section 1848(e)(1)(G) of the Act, as amended by section 134(b) of the MIPPA, set a permanent 1.5 work GPCI floor in Alaska for services furnished beginning January 1, 2009. Therefore, as required by the MIPPA, beginning on January 1, 2010, the 1.000 work GPCI floor will be removed. However, the 1.500 work GPCI floor for Alaska will remain in place. See Addenda D and E of this proposed rule for the GPCIs and summarized geographic adjustment factors (GAFs), respectively.

2. Payment Localities

a. Background

As stated above in this section, section 1848(e)(1)(A) of the Act requires us to develop separate GPCIs to measure resource cost differences among localities compared to the national average for each of the three fee schedule components (this is, work, PE, and malpractice). Payments under the PFS are based on the relative resources involved in furnishing physicians' services, and are adjusted for differences in relative resource costs among payment localities using the GPCIs. As a result, PFS payments vary between localities.

The current PFS locality structure was developed and implemented in 1997. There are currently 89 localities including 37 higher-cost areas; 16 Rest of State areas (comprising the remaining counties not located in a higher-cost area within a State); 34 Statewide areas; and Puerto Rico and the Virgin Islands which are designated as "territory-wide" localities. The development of the current locality structure is described in detail in the CY 1997 PFS

proposed rule (61 FR 34615) and the subsequent final rule (61 FR 59494).

As we have frequently noted, any changes to the locality configuration must be made in a budget neutral manner. Therefore, any change in localities can lead to significant redistributions in payments. For many years, we have not considered making changes to localities without the support of a State medical association in order to demonstrate consensus for the change among the professionals whose payments would be affected (with some increasing and some decreasing). However, we have recognized that, over time, changes in demographics or local economic conditions may lead us to conduct a more comprehensive examination of existing payment localities.

Payment Locality Approaches Discussed in the CY 2008 PFS Proposed Rule

For the past several years, we have been involved in discussions with California physicians and their representatives about recent shifts in relative demographics and economic conditions among a number of counties within the current California payment locality structure. In the CY 2008 PFS proposed rule and final rule with comment period, we described three potential options for changing the payment localities in California (72 FR 38139 and 72 FR 66245, respectively).

After reviewing the comments on these options, we decided not to proceed with implementing any of them at that time. We explained that there was no consensus among the California medical community as to which, if any, of the options would be most acceptable. We also received suggestions from the Medicare Payment Advisory Commission (MedPAC) for developing changes in payment localities for the entire country and other States expressed interest in having their payment localities reconfigured as well. In addition, other commenters wanted us to consider a national reconfiguration of localities rather than just making changes one State at a time. Because of the divergent views expressed in comments, we explained in the CY 2008 PFS final rule with comment period that we intended to conduct a thorough analysis of potential approaches to reconfiguring localities and would address this issue again in future rulemaking.

Interim Study of Alternative Payment Localities Under the PFS

As a follow-up to the CY 2008 PFS final rule with comment period, we contracted with Acumen, LLC

(Acumen), to conduct a preliminary study of several options for revising the payment localities on a nationwide basis. The contractor's interim report was posted on the CMS Web site on August 21, 2008, and we requested comments from the public. The report entitled, "Review of Alternative GPCI Payment Locality Structures," is still accessible from the CMS PFS Web page under the heading "Interim Study of Alternative Payment Localities under the PFS." The report may also be accessed directly from the following link: http://www.cms.hhs.gov/ PhysicianFeeSched/ 10 Interim Study.asp#TopOfPage. We accepted comments on the interim report through November 3, 2008. The alternative locality configurations discussed in the report are described briefly below in this section.

Option 1: CMS Core Based Statistical Area (CBSA) Payment Locality Configuration

This option uses the Office of Management and Budget (OMB's) Metropolitan Statistical Area (MSA) designations for the payment locality configuration. MSAs would be considered as urban CBSAs. Micropolitan Areas (as defined by OMB) and rural areas would be considered as non-urban (rest of State) CBSAs. This approach would be consistent with the inpatient hospital prospective payment system (IPPS) pre-reclassification CBSA assignments and with the geographic payment adjustments used in other Medicare payment systems. This option would increase the number of localities from 89 to 439.

Option 2: Separate High Cost Counties From Existing Localities (Separate Counties)

Under this approach, higher cost counties are removed from their existing locality structure and they would each be placed into their own locality. This option would increase the number of localities from 89 to 214 using a 5 percent GAF differential to separate high cost counties.

Option 3: Separate MSAs From Statewide Localities (Separate MSAs)

This option begins with Statewide localities and creates separate localities for higher cost MSAs (rather than removing higher cost counties from their existing locality as described in option 2). This option would increase the number of localities from 89 to 130 using a 5 percent GAF differential to separate high cost MSAs.

Option 4: Group Counties Within a State Into Locality Tiers Based on Costs (Statewide Tiers)

This option creates tiers of counties (within each State) that may or may not be contiguous but share similar practice costs. This option would increase the number of localities from 89 to 140 using a 5 percent GAF differential to group similar counties into Statewide tiers.

Additionally, as discussed in the interim locality study report, our contractor, Acumen, applied a "smoothing" adjustment to the current PFS locality structure, as well as to each of the alternative locality configurations (except option 4: Statewide Tiers). The "smoothing" adjustment was applied to mitigate large payment differences (or payment "cliffs") between adjacent counties. Since large payment differences between adjacent counties could influence a physician's decision on a practice location (and possibly impact access to care), the "smoothing" adjustment was applied to ensure that GAF differences between adjacent counties do not exceed 10 percent. (For more information on the "smoothing" adjustment see the interim locality study report on the PFS Web page via the link provided above.)

b. Summary of Public Comments on Interim Locality Study Report

In the CY 2009 PFS proposed rule (73 FR 38514), we encouraged interested parties to submit comments on the options presented both in the proposed rule and in the interim report posted on our Web site. We also requested comments and suggestions on other potential alternative locality configurations (in addition to the options described in the report). Additionally, we requested comments on the administrative and operational issues associated with the various options under consideration. We also emphasized that we would not be proposing any changes to the current PFS locality structure for CY 2009 and that we would provide extensive opportunities for public comment before proposing any change. The following is a summary of the comments received on the alternative locality options discussed in the CY 2009 PFS proposed rule and interim locality study report.

(1) Introduction and General Support for Change

We received approximately 200 comments on the CY 2009 PFS proposed rule and locality study report from various specialty groups, medical societies, State medical associations,

individual practitioners, and beneficiaries. Commenters generally commended us for acknowledging the need to reconfigure PFS payment localities and expressed support for our study of alternative locality configurations. Many commenters urged us to expedite changes to the current locality structure in order to accurately reflect the geographic cost differences of operating a medical practice. For example, the Connecticut State Medical Society commented that the current locality configuration contributes to medical access issues and problems with recruitment and retention of practitioners (with an emphasis on access to primary care).

Another commenter stated that Ohio's Statewide locality configuration needs to be changed because a Statewide locality designation does not account for the (presumably higher) cost of operating a medical practice in northern Ohio. The commenter also objected to the agency's approach to requests for changes to the current locality structure (which includes an assessment of support for the changes by the medical community, including the relevant State medical associations). The commenter believes the State medical association does not represent all of the physicians in Ohio.

Another commenter stated that a change in the PFS locality structure is long overdue. The commenter stated that San Diego County is the most underpaid area in the nation and that grouping that county with the Rest of California locality is erroneous. Moreover, several commenters stated that a timely reassessment is needed and urged us to update the locality structure every 3 years. Two commenters believe that previous studies completed on the PFS locality structure by MedPAC, GAO, Urban Institute, as well as the current study by Acumen, support immediate reform to the current PFS locality structure.

We received many comments from hospitals and physicians located in Frederick County Maryland (which is currently grouped with the Rest of Maryland locality). The commenters support each of the alternative locality configurations we presented because each option results in PFS payment increases for services furnished in Frederick County. The commenters stated that Frederick County is considered a 'bedroom community' for the DC/Northern Virginia area, has experienced the highest growth rate in the State, and noted that the cost of living has increased significantly. Additionally, the commenters noted that the last economic census aligns

costs in Frederick County with those in Montgomery County (whose doctors receive higher payment amounts) and that Frederick County competes with physician practices in Montgomery County for professional staff. Moreover, the commenters believe that because of inadequate PFS payment amounts, access to care is becoming a problem and emergency room visits are on the rise.

(2) Cautious Approach

Some commenters requested that we take a cautious approach to reconfiguring the locality structure. For instance, the Texas Medical Association stated that because of the redistributive impact that results from any locality reconfiguration, CMS should avoid making large scale changes at one time. Additionally, another commenter stated that "stakeholders" should be given a long advance notification period (at least 2 full calendar years) prior to the effective date of any changes to the PFS locality configuration. The commenter also stated that the current locality structure should remain in place (for each locality) unless the need for revision is strongly substantiated because of a change in practice cost patterns. A specialty society expressed support for postponing any adjustments for at least 1 year to allow for more discussion between CMS and "stakeholders".

(3) Guiding Principles

We received several comments from California that suggested a set of goals for reforming the PFS payment locality structure. The goals suggested by the commenters are as follows:

- Improve payment accuracy (as compared to the current locality structure);
- Move towards MSA-based localities;
- Mitigate payment reductions to rural California areas (and therefore minimize corresponding negative impact on access to care in California);

• Promote administrative simplification by aligning physician and hospital payment localities.

The California Medical Association (CMA) urged us to apply a consistent methodology across all payment localities and requested that any revision to the localities include a "formula driven" mechanism that can be applied repeatedly to future revisions. A California county medical society stated that more specific objectives for reforming PFS payment localities should be developed. For example, the commenter suggested that

payment reductions for practitioners should not exceed 1.5 percent in any given year, GAF differentials between adjacent localities should not exceed 10 percent, and that contiguous localities with less than a 1 percent difference in their GAF's should be combined into a single locality.

(4) Comments on the Studied Alternative Locality Options

We received many comments on the options for reconfiguring PFS payment localities presented in the interim locality study report. One commenter stated that option 1 (the CMS CBSA locality configuration) is the best option because it provides the greatest payment accuracy. The same commenter also stated that using CBSAs as the PFS locality definition would be similar to other Medicare payment systems (for example, the IPPS). Therefore, the commenter believed that geographic payment adjustments for physicians and hospitals would be consistent for a given geographic area. The CMA and a California county medical society stated that although option 1 would provide the greatest payment accuracy, it would also lead to significant payment reductions for many counties. Those same commenters expressed concern with the negative impact of transitioning directly to the CMS CBSA locality configuration. If adopted, the commenters suggested that the CMS CBSA locality configuration be implemented in stages over several years. The Texas Medical Association echoed this concern and urged us not to adopt option 1 unless we employ a hold harmless floor along with "material" increases in the conversion factor.

The Texas Medical Association also stated that option 2 (Separate High Cost Counties from Existing Localities) results in less significant payment reductions to rural practitioners, as compared to the reductions seen under option 1 (CMS CBSA) and option 4 (Statewide Tiers). However, the commenter did not support option 2 because it would create different localities within major urban areas and, therefore, provide incentives for "border-crossing," (in other words, incentives for physicians to move their medical practice to an adjacent urbanized county to obtain a higher payment amount). Additionally, the Texas Medical Association stated that option 2 increases administrative complexity due to the additional number of localities and the need to reallocate source data into smaller (county level) areas. The CMA also stated that option 2 results in less significant payment reductions (as

compared to the other options). However, the CMA stated that option 2 continues to produce inaccurate payments because it applies MSA-based data to county-based localities.

Many commenters from the State of California expressed support for option 3 (Separate High Cost MSAs from Statewide Localities) because the commenters believed it would improve payment accuracy (over the current locality configuration) and at the same time mitigate the payment reductions to rural areas that would occur under option 1 (CMS CBSA) and option 4 (Statewide Tiers). The CMA explained that selecting an MSA-based locality approach would provide consistency with the hospital payment system and enable physicians to better compete with hospitals for the local work force. For example, the commenters stated that hospitals located in the Santa Cruz MSA are some of the highest paid in the nation. However, under the PFS locality structure, Santa Cruz County is grouped with the Rest of California locality, which is the lowest paid PFS locality in the State.

The Texas Medical Association suggested that we adopt option 3 because it minimizes payment reductions to lower cost rural areas. For example, since option 3 results in the fewest payment localities (as compared to the other alternative locality configurations), it reduces the redistribution effects of separating higher cost areas from rural "rest of State" areas. The commenter also stated that option 3 (Separate MSAs) matches payment with the underlying data better than option 2 (Separate Counties) and option 4 (Statewide Tiers). Some commenters expressed their belief that MSAs are better basic locality units than counties because the cost data is more reliably derived directly from MSAs (instead of counties). Several commenters who supported the adoption of an MSA-based PFS locality structure suggested that option 3 could be used as a transition to the CMS CBSA locality configuration (option 1).

With regard to option 4 (Statewide Tiers), the Texas Medical Association stated that the Statewide Tiers locality configuration creates payment areas that are poorly aligned with the underlying data and results in unacceptable payment decreases to small urban and rural areas. The Florida Medical Association explained that many localities have experienced a shift in population and economic development since the last PFS locality reconfiguration. The commenter stated that counties with similar costs should be grouped together in the same locality

regardless of geographic location and that the Statewide cost tier locality structure (option 4) would accomplish this objective. The CMA stated that under option 4, counties are not geographically contiguous and noted that the counties grouped together in a locality may not be related to one another economically. The commenter suggested that noncontiguous counties may experience more frequent economic changes than contiguous counties. The commenter expressed concern that option 4 would need to be updated more frequently and therefore payments to physicians will fluctuate more often. A California county medical society stated that option 4 creates payment errors for counties in seven California localities that currently have accurate payments. The Connecticut State Medical Society stated that New Haven County would experience an increase under option 4.

(5) Smoothing Adjustment

Many commenters from the State of California did not support the concept of "smoothing" because it would require payment reductions for higher cost counties to offset the increases given to lower cost counties (in order to achieve budget neutrality). Additionally, the same commenters stated that physicians in "smoothed" counties benefit financially from the smoothing adjustment solely because they are located adjacent to high cost areas. They also stated that a "smoothing" adjustment would be complex to administer, and difficult to understand. The CMA, a California county medical society, and another commenter from California stated that a "smoothing" adjustment would require a change in the statute and that current Medicare statute requires GPCIs to reflect the relative costs differences among localities for work, PE, and malpractice expense. Another commenter recommended that we study the extent to which a "smoothing" adjustment can be used as a temporary measure; in order to phase-in significant changes in payment levels resulting from a PFS locality reconfiguration.

(6) Other Alternative Options

A few commenters submitted suggestions on other potential alternative PFS locality configurations in addition to those discussed in the interim report. For example, one medical clinic suggested a "market-based" approach instead of the current "cost-based" methodology. Under this approach, PFS payment would be geographically adjusted based on the ratio of Medicare participating

physicians to Medicare beneficiaries. The commenter suggested that payment amounts should be increased in geographic areas with a low physician to Medicare beneficiary ratio (for example, 1 physician for every 3,000 beneficiaries) and decreased in areas with a higher ratio (for example, 1 physician for every 200 beneficiaries). The commenter stated that "this process could be used to bring physician to patient ratios in the United States to equilibrium."

The CMA and a California county medical society suggested variations of option 2 (Separate Counties) with the intention of reducing the number of localities that would result under this option. The commenters suggested adopting a "basic locality unit" (for example, MSA) instead of a county when removing areas from an existing locality. For example, if 5 counties are removed from a "Rest of State" locality, and included within the same MSA, the 5 counties would be grouped into a single new locality rather than 5 separate new localities. The commenter also suggested that if removed counties are contiguous and have similar costs (even if not part of same MSA); they should be consolidated into one new locality instead of separate localities. The commenters stated that either of these variations would reduce the number of new localities created under option 2.

Additionally, the CMA and a California county medical society suggested a variation of option 4 (Statewide Tiers). The commenters stated that fixed cost tiers be established for each State using .05 GAF increments which would lock in the upper and lower GAF values for each cost tier. Under this approach, the fixed cost tiers would not change based on updates to the GPCIs; however, a county could be moved to a lower (or higher) cost tier without the need to define new tiers for the entire state.

(7) Redistribution of Payment

Many commenters acknowledged that a significant redistribution of payments would occur under each alternative locality configuration option and requested that we minimize the payment discrepancy between urban and rural areas to ensure continued access to services. Additionally several commenters stated that any changes to the locality configuration should not be unfair to rural practitioners. One specialty college noted that any new locality configuration must be budget neutral, resulting in a shift of resources from one geographic area to another. The commenter expressed concern that

the requirement for budget neutrality may help physicians who practice in certain geographic areas, but will be costly to others. As such, the commenters stated that each alternative PFS locality option could create problems for medical access in areas where payments are reduced. As a method to minimize payment reduction, a few commenters requested that we continue the application of the 1.0 work GPCI floor.

The AMA stated that any proposal to reconfigure PFS payment localities should not necessitate budget-neutral payment redistributions. The commenter expressed the concern raised by other commenters that some localities would receive payment increases under some options while other localities would experience significant payment reductions to offset these increases. The commenters requested that if new locality definitions are proposed, new funding should be provided to increase payments in localities that are found to be underpaid. The commenters also stated that budget neutral redistributions would only exacerbate an already flawed and under-funded Medicare PFS. The AMA suggested that States with a Statewide locality should be given the option of remaining a Statewide locality and that CMS should continue its policy of allowing any State the option of converting to a Statewide locality at the request of the State Medical Association.

The Iowa Medical Society stated that Medicare PFS payment levels in Iowa are among the lowest in the country and that the four alternative locality configurations all appear to further reduce payments to State physicians. As such, they requested that Iowa remain a Statewide locality under any nationwide locality change.

Because of the redistribution effect of any locality reconfiguration, some commenters did not find any of the potential alternative locality configurations preferable to the current payment locality structure. For example, one physician academy stated that all four of the alternative locality scenarios result in disproportionately lower GAFs for non-MSA counties. Therefore, the commenter encouraged us to maintain the current locality structure until we identify an alternative that decreases the number of payment localities and supports practitioners in rural and underserved areas. The commenter also expressed support for a locality reconfiguration that minimizes the number of payment localities; does not exceed the current number of 89 localities and eliminates geographic

payment adjustments (except those designed to encourage physicians to practice in underserved areas). Furthermore, the Florida Medical Association urged us to work with Congress to remove the application of budget neutrality when making changes to the PFS payment locality structure. The commenter suggested that we use the current GCPI values as a "floor" to ensure that future updates to the localities will not result in payment reductions.

(8) Methodology

The CMA and a California county medical society commended the contractor, Acumen, for the accuracy of its calculations, modeling of the options, and observations. However, they recommended a change in the iterative methodology used to develop option 2 and option 3. The commenters stated that the threshold for removing high cost counties from existing localities (option 2) and removing high cost MSAs from Statewide localities (option 3) should be equal to or greater than 5 percent (not just greater than 5 percent) with no rounding up for GAF differences below 5 percent. Additionally, with regard to option 2, the commenters recommended that counties with identical GAFs to the county being considered for a new locality should not be included in the calculation of the "Rest of Locality" GAF (which is used for comparison to the higher cost county).

Additionally, the commenters objected to the methodology used for the "smoothing" adjustment. The commenters believe that a new locality created by smoothing should not have a significantly lower GAF than it would if the county was a single locality. For example, the commenters noted that San Diego County (which is currently included in the Rest of California locality) has a county-level GAF of 1.056. However, when the smoothing adjustment is applied to the current locality configuration, the GAF for San Diego is 1.018.

One research institute questioned why high cost counties were separated from existing localities (option 2) and high cost MSAs were separated from Statewide localities (option 3); instead of separating low cost counties and low cost MSAs. The commenter stated that the CMS CBSA methodology is not designed to be sensitive enough to detect significant geographic differences in physician compensation and PE. The commenter questioned whether compensation and PE costs are correlated directly with population density.

Clarification on Methodology Used To Develop Alternative Locality Configurations Discussed in the Interim Report

With regard to the iterative methodology used for option 2 and option 3, the contractor, Acumen, analyzed these alternative locality configurations based on its understanding of the MedPAC ideas. A threshold of greater than 5 percent was used to separate high cost counties from existing localities (option 2) and to separate high cost MSAs from Statewide localities (option 3). Additionally, the contractor compared just one county (or MSA) at a time against the weighted average GAF of all the lower-ranked counties in the Medicare locality. Counties with the same GAF were not treated as a group. In ranking counties by GAF, the contractor used physician work RVUs to break "ties." In other words, when two counties in a Medicare locality had the same GAF, the county with the higher physician work RVU was ranked as if it had the higher GAF. Keeping counties with identical GAFs together would be another possible strategy for developing alternative PFS payment localities. The high cost counties and MSAs were removed in the iterative process to reflect ongoing concerns regarding individual high cost counties (usually in "rest of state" areas) where the GAF is significantly higher than the norm for the locality. Removing low cost counties would isolate very low cost areas leading to further reductions in PFS payment levels for physicians and practitioners in these

With regard to the sensitivity of the CBSA methodology and whether compensation and PE cost are correlated directly to population density; the CBSA methodology has three types of areas: MSAs, Metropolitan Divisions within MSAs, and non-MSA areas. None of these definitions involve population density per se, although MSAs must include core areas with populations of 50,000 or greater. Given that the CBSA methodology has more regions than the other alternative locality configurations, it could potentially draw on more detailed levels of data than the other options, and therefore, result in a more precise reflection of geographic cost differences.

(9) Suggested Additional Topics for Review

One commenter stated that the interim locality study report should have addressed how a change in payment locality structure might impact a physician's choice regarding practice

location and Medicare beneficiary access to physician services.

The CMA and a California county medical society stated that the interim locality study should have included a discussion of payment accuracy under the current locality structure and under each potential locality configuration. The commenters stated that a discussion of the potential negative impact under a particular option without a discussion of the accuracy of payment for each option is misleading. Additionally, they suggested adding a discussion of potential methods to mitigate payment reductions.

(10) Administrative and Operational Issues

We received few comments on administrative and operational issues related to making changes to the PFS payment locality structure. Some commenters stated that a locality revision would impose a minimal amount of additional administrative burden. However, the commenters did not specify whose administrative burden they were assessing. One commenter stated that implementing the CMS CBSA locality configuration (option 1) would be a significant administrative burden. Additionally, one health care plan explained that many Medicare Advantage Plans are based on Medicare fees in specific localities. As such, any fee schedule locality revision would be a large scale and costly administrative undertaking for managed care plans as well as for "traditional" Medicare.

(11) Underlying Data

We also received comments on the data used to develop GPCI values. Although we appreciate these comments, the focus of the interim locality study was not intended to be a review of the underlying data sources used to develop GPCI values. As discussed earlier, the interim locality study was a review of potential approaches for redefining the Medicare PFS payment localities.

Response to Comments

We would like to thank the public for the many thoughtful comments on the interim locality study report entitled, "Review of Alternative GPCI Payment Locality Structures". As noted by the commenters and reflected in the report, significant payment redistribution would occur if a nationwide change in the PFS locality configuration were undertaken. All four of the potential alternative payment locality configurations reviewed in the report would increase the number of localities

and separate higher cost, typically urban areas from lower cost, typically rural "Rest of State" areas. In general, payments to urban areas would increase while rural areas would see a decrease in payment under each of the options studied because they would no longer be grouped with higher cost "urbanized" areas. We intend to review the suggestions made by the commenters and consider the impact of each of the potential alternative locality configurations. We will also explore whether alternative underlying data sources are available nationwide. A final report will be posted to the CMS Web site after further review of the studied alternative locality approaches.

We are not proposing changes in the PFS locality structure at this time. As explained in the CY 2009 PFS final rule with comment period, in the event we decide to make a specific proposal for changing the locality configuration, we would provide extensive opportunities for public input (for example, town hall meetings or open door forums, as well as opportunities for public comments afforded by the rulemaking process).

C. Malpractice Relative Value Units (RVUs)

1. Background

Section 1848(c) of the Act requires that each service paid under the PFS be comprised of three components: work, PE, and malpractice. From 1992 to 1999, malpractice RVUs were charge-based, using weighted specialty-specific malpractice expense percentages and 1991 average allowed charges. Malpractice RVUs for new codes after 1991 were extrapolated from similar existing codes or as a percentage of the corresponding work RVU. Section 4505(f) of the BBA required us to implement resource-based malpractice RVUs for services furnished beginning in 2000. Initial implementation of resource-based malpractice RVUs occurred in 2000. The statute also requires that we review, and if necessary adjust, RVUs no less often than every 5 years. The first review and update of resource based malpractice RVUs was addressed in the CY 2005 PFS final rule (69 FR 66263). Minor modifications to the methodology were addressed in the CY 2006 PFS final rule (70 FR 70153). In this current rule, we are proposing to implement the second review and update of malpractice RVUs.

2. Proposed Methodology for the Revision of Resource-Based Malpractice RVIIs

The proposed malpractice RVUs were developed by Acumen, LLC (Acumen) under contract to us.

The methodology used in calculating the proposed second review and update of resource-based malpractice RVUs largely parallels the process used in the CY 2005 update. The calculation requires information on malpractice premiums, linked to the physician work conducted by different specialties that furnish Medicare services. Because malpractice costs vary by State and specialty, the malpractice premium information must be weighted geographically and across specialties. Accordingly, the proposed malpractice expense RVUs are based upon three data sources:

• Actual CY 2006 and CY 2007 malpractice premium data.

• CY 2008 Medicare payment data on allowed services and charges.

 CY 2008 Geographic adjustment data for malpractice premiums.

Similar to the previous update of the resource-based malpractice expense RVUs, we are proposing to revise the RVUs using specialty-specific malpractice premium data because they represent the actual malpractice expense to the physician. In addition, malpractice premium data are widely available through State Departments of Insurance. We propose to use actual CY 2006 and CY 2007 malpractice premium data because they are the most current data available (CY 2008 malpractice premium data were not consistently available during the data collection process). Accounting for market shares, three fourths of all included rate filings were implemented in CY 2006 and CY 2007. The remaining rate filings were implemented in CY 2003 through CY 2005 but still effective in CY 2006 and CY 2007. Carriers submit rate filings to their State Departments of Insurance listing the premiums and other features of their coverage. The rate filings include an effective date, which is the date the premiums go into effect. Some States require premium changes to be approved before their effective date; others just require the rate filings to be

submitted. We try to capture at least 2 companies and at least 50 percent of the market share, starting with the largest carriers in a State.

The primary determinants of malpractice liability costs continue to be physician specialty, level of surgical involvement, and the physician's malpractice history. We collected malpractice premium data from 49 States and the District of Columbia for all physician specialties represented by major insurance providers. Rate filings were not available through Departments of Insurance in Mississippi or Puerto Rico. Premiums were for \$1 million/\$3 million, mature, claims-made policies (policies covering claims made, rather than services furnished during the policy term). A \$1 million/\$3 million liability limit policy means that the most that would be paid on any claim is \$1 million and that the most that the policy would pay for several claims over the timeframe of the policy is \$3 million. We collected data from commercial and physician-owned insurers and from joint underwriting associations (JUAs). A JUA is a State government-administered risk pooling insurance arrangement in areas where commercial insurers have left the market. Adjustments were made to reflect mandatory surcharges for patient compensation funds (PCFs) (funds to pay for any claim beyond the statutory amount, thereby limiting an individual physician's liability in cases of a large suit) in States where PCF participation is mandatory. We sought to collect premium data representing at least 50 percent of physician malpractice premiums paid in each State as identified by State Departments of Insurance and by the National Association of Insurance Commissioners (NAIC).

Rather than select the top 20 physician specialties as when the malpractice RVU were originally established and updated, we included premium information for all physician and surgeon specialties and risk classifications available in the collected rate filings. Most insurance companies provided crosswalks from insurance services office (ISO) codes to named specialties; we matched these

crosswalks to CMS specialty codes. We also preserved information obtained regarding surgery classes, which are categorizations that affect premium rates. For example, many insurance companies grouped general practice physicians into nonsurgical, minorsurgical and major-surgical classes, each with different malpractice premiums. Some companies provided additional surgical subclasses; for example, distinguishing general practice physicians that conducted obstetric procedures, which further impacted malpractice rates. We standardized this information to CMS specialty codes.

We could not identify malpractice premium rates through typical malpractice rate filings for some physician specialties, nonphysician practitioners (NPPs), and other entities (for example, independent diagnostic testing facilities (IDTFs)) paid under the PFS. In the absence of available premium data for these specialties and entities, we took a number of steps.

We collected data from one of the largest association program insurance brokers and administrators in the United States providing malpractice insurance to medical physicists. We incorporated the data into the calculation of the proposed update to the malpractice RVUs for TC services. (See section II.C.3 of this proposed rule for a discussion of this issue.)

We also crosswalked 13 specialties for which there was not significant collected data available (those in less than 35 States' malpractice premium rate filings) to similar specialties and risk classes. The unassigned specialties and the specialty to which we are proposing to assign them are shown in Table 4. The remaining four specialties were dropped, meaning they were not included in the weighted averages for calculating the malpractice RVUs.

Note: While we were able to collect data on many more specialties on this survey than under the previous one, these four specialties were also dropped under the previous version of the survey because of a lack of available data. This left 44 specialties, representing 90 percent of Medicare services, for which we used the malpractice premium data to develop risk factors.

^{*}Lowest Physician Specialty.

The methodology presented in this proposed rule conceptually follows the specialty-weighted approach used in the CY 2000 and CY 2005 PFS final rules with comment period (63 FR 59383 and 69 FR 66263, respectively) and incorporates the minor modifications discussed in the CY 2006 final rule with comment period (70 FR 70153). We revised the current specialty-weighted approach to accommodate additional data gathered during the malpractice premium data collection. The specialtyweighted approach bases the malpractice RVUs upon a weighted average of the risk factors of all specialties furnishing a given service. This approach ensures that all specialties furnishing a given service are accounted for in the calculation of the

final malpractice RVUs. Our proposed methodology is as follows:

(1) Compute a preliminary national average premium for each specialty. Insurance rating area malpractice premiums for each specialty were mapped to the county level. The specialty premium for each county is then multiplied by the total county RVUs (as defined by Medicare claims data), which had been divided by the malpractice GPCI applicable to each county to standardize the relative values for geographic variations. If the malpractice RVUs were not normalized for geographic variation, the locality cost differences (as reflected by the GPCIs) would be counted twice. The product of the malpractice premiums and standardized RVUs is then summed across counties for each specialty. This

calculation is then divided by the total RVUs for all counties, for each specialty, to yield a national average premium for each specialty.

(2) Determine which risk class(es) to use within each specialty. Many specialties had premium rates that differed for major surgery, minor surgery, and no surgery. These surgery classes are designed to reflect differences in risk of professional liability and the cost of malpractice claims if they occur. The same concept applies to procedures; some procedures carry greater liability risks. Accordingly, we identified major, minor, nonsurgical, and obstetric procedures among all Medicare procedures by established indicators (Global Surgery Flags). Table 5 shows the surgery class definitions used in the proposed methodology.

TABLE 5—SURGERY CLASSES BY PROCEDURE CODE

| Surgery class | CPT code range | Global surgery flag |
|-------------------------------------------------------------------------|----------------|---------------------------------------|
| Major Surgery (Maj) Minor Surgery (Min) Obstetrics (OB) No Surgery (NS) | 10000–69999 | 90 Day.
All Other.
N/A.
N/A. |

To account for the presence of surgery classes in the malpractice premium data and the task of mapping these premiums to procedures, we sought to calculate distinct risk factors for major, minor, and nonsurgical procedures, as well as a comparable approach for obstetric premiums and procedures. However, the availability of data by surgery class varied across specialties. In light of the complexity of the surgery class data, we evaluated both the frequency with which rate class data were reported and a preliminary set of normed national average premiums, calculated for all classes reported in the data. Because no single approach accurately addressed the risk weights and value differences of various specialty/procedure combinations, we developed five strategies for handling the surgical

classes and defining specialties. These strategies are summarized in Table 6.

(a) Substantial Data for Each Class: For 13 out of 44 specialties, we determined that there was sufficient data for each surgical class, as well as sufficient differences in rates between classes, to use the surgical class data as the basis for risk factors by surgical class.

(b) Major Surgery Dominates: These 8 surgical specialties typically had rate filings that specified major surgery as the predominate rate reported. Filings that distinguished minor surgery or nonsurgical were relatively rare. For most of these surgical specialties, we did not have "unspecified" rate filings. When we had "unspecified" rate filings, the unspecified category was sometimes above and sometimes below the major

surgery rate. For these cases, we assigned the premium for major surgery to all procedures conducted by this specialty. (In practice, the major surgery procedures dominate the services actually furnished.)

(c) Little or No Data for Major Surgery: For five other specialties, specific premiums for major surgery were uncommon, but most States had rate filings that represented minor surgery or nonsurgical coverage. These five specialties had unspecified rates that were less common than the minor surgery-nonsurgery distinction and the nonsurgery rates. Therefore, for these five specialties we assigned the minor surgery rate filings for both major surgery and minor surgery procedures, and the nonsurgery filings for nonsurgical procedures.

(d) Unspecified Dominates: Many malpractice rate filings did not specify surgery classes for some specialties; we refer to these instances as unspecified malpractice rates. In only two cases, we choose the unspecified premium as the premium information to use for the specialty. For both of these specialties, fewer than 20 States had rate filings that distinguished by surgical classes, while

more than 40 had general rate filings for the specialty.

(e) Blend All Available: For the last 16 specialties, there was wide variation across the State filings in terms of whether or not surgical classes were reported and which categories were reported. Because there was no clear strategy for these remaining specialties, we blended the rate information we

collected into one general premium rate and applied that rate for all three premiums (major, minor and nonsurgical). For these specialties, we developed a weighted average "blended" premium at the national level, according to the percentage of physician work RVUs correlated with the surgery classes within each specialty.

TABLE 6—SUMMARY OF APPROACHES TO DEFINING PREMIUMS BY SURGICAL CLASS

| Situation | Specialty codes |
|-------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|
| 1. Substantial Data for Each Class (13) | 01 (non-OB), 04, 06, 07.
08 (non-OB), 10, 13, 18.
16 (non-OB), 38, 39, 46, 93. |
| Major Surgery Dominates (8) Little or No Data for Major Surgery (5) Unspecified Dominates (2) | 11, 22, 37, 44, 82.
05, 72. |
| 5. Blend All Available (16) | 03, 25, 26, 29, 30, 34, 36, 40, 48, 66, 71, 81, 83, 84, 90, 92. |

For rarely-billed Medicare procedures, we did not apply the 5 percent threshold for inclusion of services or specialties as utilized in previous MP RVU updates. Rather, we are proposing to use the risk factor of the dominant specialty by services for each procedure for which the number of allowed services is less than 100. This approach reflects the risk factors of the

specialty that most frequently furnishes these low volume procedures.

(3) Calculate a risk factor for each specialty. Differences among specialties in malpractice premiums are a direct reflection of the malpractice risk associated with the services furnished by a given specialty. The relative differences in national average premiums between various specialties

can be expressed as a specialty risk factor. These risk factors are an index calculated by dividing the national average premium for each specialty by the national average premium for the specialty with the lowest average premium, allergy/immunology. Table 7 shows the risk factors by specialty and surgery class.

TABLE 7—RISK FACTORS BY SPECIALTY AND SURGERY CLASS—Continued

One complication in the calculation of specialty risk factors is technical component (TC) data. Many procedures are comprised of professional components (PC) and TCs. These components are referred to as global procedures when billed together. The TC represents the cost of equipment, supplies, and technician/staff salaries involved in furnishing a procedure, such as the taking of an x-ray by a technician. The PC represents the portion of a service that is furnished by a physician such as the interpretation of an x-ray by the physician. The distinction is important because PCs and TCs have different associated risk factors and face different malpractice insurance costs. The previous update of the malpractice RVUs did not update the TCs due to the lack of available malpractice premium data for entities providing TC services. In the past, we were unable to obtain data concerning malpractice costs associated with the TC, so we based the malpractice RVUs for TC services and the TC portion of global services on historical allowed

We have had ongoing discussions with the AMA RUC and various specialty societies about this issue. In the CY 2008 PFS proposed rule (72 FR 38143), we noted that the Professional Liability Insurance (PLI) workgroup, a subset of the AMA RUC brought to our attention the fact that there are approximately 600 services that have TC malpractice RVUs that are greater than the PC malpractice RVUs. The PLI

workgroup requested that we make changes to these malpractice RVUs and suggested that it is illogical for the malpractice RVUs for the TC of a service to be higher than the malpractice RVUs for the PC.

Unknown Physician Specialty

We responded that we would like to develop a resource-based methodology for the technical portion of these malpractice RVUs; but that we did not have data to support such a change. We asked for information about whether, and if so, how technicians employed by facilities purchase PLI or how their professional liability is covered. We also asked for comments on what types of PLI are carried by entities that furnish these technical services.

In the CY 2009 PFS proposed rule (73 $\,$ FR 38515), we stated that the issue of assigning malpractice RVUs for the TC of certain services continues to be a source of concern for several physician associations and for CMS. We noted that we did not receive a response to our CY 2008 request for additional data on this issue and that this issue is one of importance to CMS. We also stated that the lack of available PLI data affects our ability to make a resource-based evaluation of the TC malpractice RVUs for these codes. We indicated that as part of our work to update the malpractice RVUs in CY 2010, we would instruct our contractor to research available data sources for the malpractice costs associated with the TC portion of these codes and that we would also ask the contractor to look at what is included in general liability

insurance versus PLI for physicians and other professional staff. We also stated that if data sources were available, we would instruct the contractor to gather the data so we will be ready to implement revised malpractice RVUs for the TC of these codes in conjunction with the update of malpractice RVUs for the PCs in CY 2010.

2.26

1.50

In the CY 2009 PFS final rule (73 FR 69741), we again responded to comments on this issue. We noted that one commenter provided us with the name of a company that provides liability insurance to imaging facilities. We stated that we planned to share the information with our contractor and that if premium data could be identified; it would be incorporated into the malpractice RVU update. Our contractor, Acumen LLC, contacted the company suggested by the commenter and obtained medical physicist malpractice premium data from one of the largest association program insurance brokers and administrators in the United States providing this type of malpractice insurance. The premium data indicate that medical physicists have very low malpractice premiums relative to physicians.

Medical physicists are involved in complex services such as Intensity-Modulated Radiation Therapy (IMRT). IMRT is an advanced mode of radiotherapy that utilizes computer-controlled x-ray accelerators to deliver radiation doses to a malignant tumor. Based on the complexity of these services, we believe that medical

physicists would pay one of the highest malpractice premium rates of the entities furnishing TC services and that using their data as a proxy (in the absence of actual premium data) to develop malpractice RVUs for TC services would be more realistic than our current approach for these entities. Moreover, we believe it is unlikely that actual malpractice premium rates for these entities would exceed those for medical physicists. Therefore, based on this new data collection, we are proposing to use the medical physicists' premium data as a proxy for the malpractice premiums paid by entities providing TC services. We believe that the use of this data will better reflect the level of malpractice premiums paid by entities providing TC services than the current charge-based malpractice RVUs or crosswalks to the malpractice premium data of physician specialties.

As we have done in the past, we continue to encourage public commenters to submit or identify alternative data that we might use for the purpose of establishing malpractice RVUs.

(4) Calculate malpractice RVUs for each code. Resource-based malpractice RVUs were calculated for each procedure. The first step was to identify the percentage of services furnished by each specialty for each respective procedure code. This percentage was then multiplied by each respective specialty's risk factor as calculated in Step 3. The products for all specialties for the procedure were then added together, yielding a specialty-weighted malpractice RVU reflecting the weighted malpractice costs across all specialties for that procedure. This sum was then multiplied by the procedure's work RVUs to account for differences in riskof-service.

Certain codes have no physician work RVUs. The overwhelming majority of these codes are the TCs of diagnostic tests, such as x-rays and cardiac catheterization, which have a distinctly separate TC (the taking of an x-ray by a technician) and PC (the interpretation of the x-ray by a physician). Examples of other codes with no work RVUs are audiology tests and injections. These services are usually furnished by NPPs, in this example, audiologists and nurses, respectively. In many cases, the NPP or entity furnishing the TC is distinct and separate from the physician ordering and interpreting the test. We believe it is appropriate for the malpractice RVUs assigned to TCs to be based on the malpractice costs of the NPP or entity, not the professional liability of the physician.

Our proposed methodology, however, would result in zero malpractice RVUs for codes with no physician work, since we propose the use of physician work RVUs to adjust for risk-of-service. We believe that zero malpractice RVUs for reasons other than rounding would be inappropriate because NPPs and entities such as IDTFs also have malpractice liability.

Note that the earlier discussion above in "(3) Calculate a risk factor for each specialty" addressed the proposed use of the medical physicist premium data to develop a TC risk factor. This TC risk factor is used in (3), as noted above, along with the global risk factor to calculate a PC risk factor. Once the global and PC risk factors are calculated, they are used here in step (4) to calculate the global and PC malpractice RVUs. Once we have calculated the global and PC malpractice RVUs, we propose to address the lack of work RVUs for TC services by setting the TC malpractice RVUs equal to the difference between the global malpractice RVUs and PC malpractice RVUs.

(5) Rescale for budget neutrality. The statute requires that changes to fee schedule RVUs be budget neutral. The current resource-based malpractice RVUs and the proposed resource-based malpractice RVUs were constructed using entirely different malpractice premium data. Thus, the last step is to adjust for budget neutrality by rescaling the proposed malpractice RVUs so that the total proposed resource-based malpractice RVUs equal the total current resource-based malpractice RVUs.

We are requesting comments on our proposed methodology for updating the malpractice RVUs. We are especially interested in comments on our proposed process for revising the malpractice RVUs of the TC of codes with no physician work. Additionally, we intend to post the Acumen report, "Interim Report on Malpractice RVUs for the CY 2010 Medicare Physician Fee Schedule Proposed Rule" on the CMS Web site in conjunction with publication of this proposed.

D. Medicare Telehealth Services

1. Requests for Adding Services to the List of Medicare Telehealth Services

Section 1834(m)(4)(F) of the Act defines telehealth services as professional consultations, office visits, and office psychiatry services, and any additional service specified by the Secretary. In addition, the statute requires us to establish a process for adding services to or deleting services

from the list of telehealth services on an annual basis.

In the December 31, 2002 Federal Register (67 FR 79988), we established a process for adding services to or deleting services from the list of Medicare telehealth services. This process provides the public an ongoing opportunity to submit requests for adding services. We assign any request to make additions to the list of Medicare telehealth services to one of the following categories:

• Category #1: Services that are similar to professional consultations, office visits, and office psychiatry services. In reviewing these requests, we look for similarities between the requested and existing telehealth services for the roles of, and interactions among, the beneficiary, the physician (or other practitioner) at the distant site and, if necessary, the telepresenter. We also look for similarities in the telecommunications system used to deliver the proposed service, for example, the use of interactive audio and video equipment.

• Category #2: Services that are not similar to the current list of telehealth services. Our review of these requests includes an assessment of whether the use of a telecommunications system to deliver the service produces similar diagnostic findings or therapeutic interventions as compared with the face-to-face "hands on" delivery of the same service. Requesters should submit evidence showing that the use of a telecommunications system does not affect the diagnosis or treatment plan as compared to a face-to-face delivery of the requested service.

Since establishing the process, we have added the following to the list of Medicare telehealth services: Psychiatric diagnostic interview examination; ESRD services with two to three visits per month and four or more visits per month (although we require at least one visit a month to be furnished in-person "hands on," by a physician, clinical nurse specialist (CNS), nurse practitioner (NP), or physician assistant (PA) to examine the vascular access site); individual medical nutrition therapy; neurobehavioral status exam; and follow-up inpatient telehealth consultations.

Requests to add services to the list of Medicare telehealth services must be submitted and received no later than December 31 of each calendar year to be considered for the next rulemaking cycle. For example, requests submitted before the end of CY 2008 are considered for the CY 2010 proposed rule. Each request for adding a service to the list of Medicare telehealth

services must include any supporting documentation you wish us to consider as we review the request. Because we use the annual PFS rulemaking process as a vehicle for making changes to the list of Medicare telehealth services, requesters should be advised that any information submitted is subject to disclosure for this purpose. For more information on submitting a request for an addition to the list of Medicare telehealth services, including where to mail these requests, visit our Web site at http://www.cms.hhs.gov/telehealth/.

2. Submitted Requests for Addition to the List of Telehealth Services

We received requests in CY 2008 to add the following services as Medicare telehealth services effective for CY 2010: (1) Health and behavior assessment and intervention (HBAI) procedures; and (2) nursing facility services. In addition, we received a number of requests to add services that we considered previously and did not approve as Medicare telehealth services in previous PFS rules. These requested services include critical care services; initial and subsequent hospital care; group medical nutrition therapy; diabetes selfmanagement training; speech and language pathology services; and physical and occupational therapy services. The following is a discussion of these requests.

a. Health and Behavior Assessment and Intervention (HBAI)

The American Psychological Association (APA) submitted a request to add HBAI services (as described by HCPCS codes 96150 through 96154) to the list of approved telehealth services. The APA asks us to evaluate and approve HBAI services as Category #1 service because they are comparable to the psychotherapy services currently approved for telehealth.

CMS Review

To determine whether to assign a request to Category #1, we look for similarities between the service that is being considered for addition and the existing telehealth services in the roles of, and interactions among, the beneficiary, the physician (or other practitioner) at the distant site and, if necessary, the telepresenter.

Clinical psychologists furnish HBAI services to beneficiaries to help them manage or improve their behavior in response to physical problems. Elements of HBAI services typically include interviewing, observing, and counseling beneficiaries to help them modify their behavior. These elements are also common to the office psychiatry

services currently approved for telehealth. We believe the interaction between a practitioner and a beneficiary receiving individual HBAI services (as described by HCPCS codes 96150 through 96152) is similar to the assessment and counseling elements of the individual office psychiatry services currently approved for telehealth. Therefore, we are proposing to revise § 410.78 and § 414.65 to include individual HBAI services as Medicare telehealth services.

With regard to group HBAI (as described by HCPCS code 96153) or family-with-patient HBAI (as described by HCPCS code 96154), we note that no group services are currently approved as Medicare telehealth services. Group counseling services have a different interactive dynamic between the physician or practitioner and his or her patients as compared to individual services. No other group counseling or other group services are approved as telehealth services. Since the interactive dynamic for group HBAI services is not similar to that for individual HBAI services or any other approved telehealth services, we do not believe that group HBAI or family-with-patient HBAI services are properly considered as Category #1 requests. To be considered as a Category #1 request, a service must be similar to the current list of Medicare telehealth services. (See 70 FR 45787 and 70157, and 73 FR 38516 and 69743).

Since the interactive dynamic between practitioner and patient for group HBAI and family-with-patient HBAI is not similar to that for office psychiatry services or any other service currently approved for telehealth, we believe that group HBAI and familywith-patient HBAI must be evaluated as Category #2 services. Because we consider group HBAI and family-withpatient HBAI to be Category #2 services, we need to evaluate whether these are services for which telehealth can be an adequate substitute for a face-to-face encounter. The requester did not submit evidence suggesting that the use of a telecommunications system to deliver these services would produce similar diagnostic findings or therapeutic interventions as compared to the faceto-face delivery of these services. As such, we do not propose to add group HBAI (as described by HCPCS code 96153) or family-with-patient HBAI (as described by HCPCS code 96154) to the list of approved telehealth services.

b. Nursing Facility Services

In 2005, we received a request to add the following nursing facility services to the list of approved telehealth services:

Initial nursing facility care (as described by HCPCS codes 99304 through 99306); subsequent nursing facility care (HCPCS codes 99307 through 99310); nursing facility discharge services (HCPCS codes 99315 and 99316); and other nursing facility services (HCPCS code 99318). In the CY 2007 PFS final rule with comment period, we did not add these nursing facility care services to the list of approved telehealth services because these procedure codes did not describe services that were appropriate to add to the list of available telehealth originating sites in CY 2007. At that time, skilled nursing facilities (SNFs) were not defined in the statute as originating sites (71 FR 69657)

However, section 149 of the MIPPA added SNFs as telehealth originating sites effective for services furnished on or after January 1, 2009. In light of this provision, the American Telemedicine Association (ATA) urged us to add nursing facility care codes to the list of telehealth services for CY 2009, as

requested in 2005.

In the CY 2009 PFS final rule with comment period, we noted that section 149 of the MIPPA did not add any services to the list of Medicare telehealth services. In the CY 2009 PFS final rule with comment period, we also responded to the ATA's comment suggesting that we add nursing facility care codes to the list of telehealth services for CY 2009, as requested in 2005. In our response, we noted that when we received the 2005 request to consider the addition of nursing facility care services for telehealth for CY 2007, we did not include a full review of these codes in either the CY 2007 PFS proposed rule or final rule with comment period since we believed it was not relevant to add the nursing facility services codes when the SNFs in which these services would be furnished were not eligible originating sites. In the CY 2009 PFS final rule with comment period, we responded that we believe it would be more appropriate to consider the addition of nursing facility care services for telehealth through our existing process, including full notice and comment procedures. We committed to revisiting the 2005 request to add the nursing facility codes in the CY 2010 PFS proposed rule, and we noted that we would accept additional information in support of the 2005 request if we received the information prior to December 31, 2008 (73 FR 69747).

Subsequent to publication of the CY 2009 PFS final rule with comment period, the ATA submitted an amended request to add subsequent nursing facility care; nursing facility discharge

services; and other nursing facility services to the list of approved telehealth services. The Center for Telehealth and e-Health Law submitted a request to add the same nursing facility services and indicated its support of ATA's request. We also received a request from the Marshfield Clinic to add the same services requested by the ATA, plus the initial nursing facility care services. The requesters drew analogies to the evaluation and management (E/M) services currently approved for telehealth, and they provided evidence in support of their belief that the use of telehealth could be a reasonable surrogate for the face-to-face delivery of this type of care.

CMS Review

The procedure codes included in these requests are used to report E/M services furnished onsite to patients in nursing facilities. In the context of these codes, "nursing facility" describes SNFs, NFs, intermediate care facilities, and psychiatric residential treatment centers.

Medicare telehealth services can only be furnished to beneficiaries located at an originating site authorized by law. A SNF (as defined in section 1819(a) of the Act) is the only type of nursing facility that can also be considered an originating site for telehealth services. Therefore, our review of these services focuses on the potential impact of adding these services when furnished via telehealth to a Medicare beneficiary located in a SNF.

Federally-Mandated Visits in Skilled Nursing Facilities

In describing our assessment, we first describe the service requirements of a Medicare SNF stay. In response to concerns about inadequate care provided to residents of nursing homes, the Omnibus Budget Reconciliation Act of 1987 (OBRA '87) (Pub. L. 100-203) included extensive revisions to the requirements for Medicare and Medicaid certified nursing homes. These provisions were designed to significantly improve the quality of life and the quality of care provided to residents of nursing homes, and were a high priority for the Department of Health and Human Services.

Specific requirements for assuring the quality of care that SNFs must meet to participate in Medicare are specified in section 1819 of the Act. In addition, section 1819(d)(4)(B) of the Act provides that "[a] skilled nursing facility must meet such other requirements relating to the health, safety, and well-being of residents or relating to the physical

facilities thereof as the Secretary may find necessary." The provisions of 42 CFR Part 483 codify the requirements set forth in the statute that long term care facilities are obligated to meet in order to participate in the Medicare and/or Medicaid program.

Section 1819(b)(6)(A) of the Act requires that the medical care of every SNF resident must be provided under the supervision of a physician. The requirements contained in § 483.40 include a prescribed visit schedule and specify that the physician must perform the initial visit personally. Section 483.40(c) requires that the resident of a SNF must be seen by a physician at least once every 30 days for the first 90 days after admission, and at least once every 60 days thereafter. As we indicated in the preamble to the February 2, 1989 final rule (54 FR 5341), and again in response to comments in the September 26, 1991 final rule (56 FR 48826), the wording of the regulation states that the resident "must be seen" by the physician and requires an actual, faceto-face contact. Except for certain stated exceptions, all required physician visits must be made personally by the physician. Section 483.40(e)(2) requires that when personal performance of a particular task by a physician is specified in the regulations, performance of that task cannot be delegated to anyone else. Section 483.40(c)(4) requires that the physician must perform the initial visit personally, and § 483.40(c)(5), allows the physician the option of alternating with a qualified NPP (that is, physician assistant, nurse practitioner, or clinical nurse specialist) in making the subsequent required visits. These regulations ensure that at least a minimal degree of personal contact between physician or qualified NPP and resident is maintained, both at the point of admission to the facility and periodically during the course of the resident's stay (54 FR 5342).

In the CY 2009 PFS final rule with comment period (73 FR 69747), we noted that in considering nursing facility care for telehealth, we would need to carefully evaluate the use of telehealth for the personal visits that are currently required under § 483.40. The OBRA '87 and other long-term care legislation enacted since then require a SNF to care for its residents "in such a manner and in such an environment as will promote maintenance or enhancement of the quality of life of each resident" as specified in section 1819(b)(1)(A) of the Act. We believe that a minimum number of periodic, comprehensive, hands-on examinations of a resident by a physician or a qualified NPP are necessary to ensure

that the resident receives quality care. We believe that the complexity of care required by many residents of SNFs warrants at least a minimal degree of direct personal contact between physicians or qualified NPPs and SNF residents. Therefore, we believe that these Federally-mandated visits should be conducted in-person, and not as telehealth services, in order to provide direct personal contact between the resident and the physician or qualified NPP.

In the MMA, the Congress recognized the importance of furnishing the Federally-mandated visits in person, rather than via telehealth. Section 418 of the MMA required the Secretary to submit a Report to Congress evaluating the use of telehealth in SNFs. If the Secretary determined that it was advisable to permit a SNF to be an originating site for telehealth services, the MMA provided the Secretary with the authority to expand telehealth originating sites to include SNFs. SNFs were permitted to be added as originating sites only if the Secretary could establish a mechanism to ensure that telehealth does not serve as a substitute for in-person visits furnished by a physician, or for in-person visits furnished by a physician assistant, nurse practitioner, or clinical nurse specialist.

On November 9, 2007, the Secretary provided to Congress the report specified under section 418 of the MMA, entitled, "Permitting Skilled Nursing Facilities to be Originating Telehealth Sites." Overall, the Report noted that evidence concerning the net impact of allowing SNFs to be originating telehealth sites was not conclusive and further analysis was needed. With respect to Federallymandated visits in SNFs, the Report stated that the Secretary could use its authority to add services to and delete services from the list of Medicare telehealth services as a mechanism to ensure that Federally-mandated visits are not furnished as a Medicare telehealth service by not adding these visits to the lists of Medicare telehealth

In consideration of the history of the OBRA '87, 42 CFR part 483, and Congressional concern expressed in section 418 of the MMA, we do not propose to add any procedure codes that are used exclusively to describe E/M services that fulfill Federal requirements for personal visits under § 483.40. We are proposing to revise § 410.78 to restrict physicians and practitioners from using telehealth to furnish the physician visits required under § 483.40(c).

In the following sections, we will separately review the use of telehealth for each of the subcategories of nursing facility services included in these requests. In these discussions, we will also indicate which of these subcategories are used to describe E/M services that fulfill Federal requirements for personal visits under § 483.40.

Initial Nursing Facility Care

The initial nursing facility care procedure codes (as described by HCPCS codes 99304 through 99306) are used to report the initial E/M visit in a SNF or NF that fulfills Federallymandated requirements under § 483.40(c). For survey and certification requirements, this initial visit must occur no later than 30 days after admission. In a SNF, a physician must furnish the initial visit.

One of the requesters noted that once the patient is transferred to the SNF, it might be days until a physician can see a resident in-person. The requester believes a higher quality of care would be provided if the initial nursing facility service can be done in an expeditious manner—via telehealth—rather than delayed until the physician is on site.

As noted above, we are not proposing to add any procedure codes that are used exclusively to describe E/M services that fulfill Federal requirements for personal visits under § 483.40. We believe that these Federally-mandated visits should be conducted in-person because this will ensure at least a minimal degree of direct personal contact between physicians or qualified NPPs and residents. Further, we believe it is particularly important that the Federally-mandated initial visit should be conducted in-person because this will ensure that the physician can comprehensively assess the resident's condition upon admission to the SNF through a thorough hands-on examination. We believe that even if the initial visit is delayed for a few days, it is necessary for the resident of a SNF to have a face-to-face visit with the physician who is developing a plan of care. Under section 1819(b)(2) of the Act, a SNF must provide services to attain or maintain the highest practicable physical, mental, and psychosocial well-being of each resident. We believe that furnishing the initial visit in a face-to-face encounter, and not via telehealth, is necessary to assure quality care. As such, we are not proposing to add the initial nursing facility care services (as described by HCPCS codes 99304 through 99306) to the list of approved telehealth services.

Subsequent Nursing Facility Care

The subsequent nursing facility care procedure codes (as described by HCPCS codes 99307 through 99310) are used to report either a Federallymandated periodic visit under § 483.40(c), or any E/M visit, prior to and after the initial physician visit, that is reasonable and medically necessary to meet the medical needs of the individual resident.

The long-term care regulations at § 483.40 require periodic physician visits for residents of SNFs (and NFs) at least once every 30 days for the first 90 days after admission and at least once every 60 days thereafter. After the initial visit, Federally-mandated periodic visits in SNFs may, at the option of the physician, alternate between personal visits by the physician and visits by a qualified NPP (who is under the supervision of a physician, and meets the other requirements specified at § 483.40(e)). As noted above, we are not proposing to allow the use of telehealth to furnish these Federally-mandated personal visits. We believe that these Federally-mandated periodic visits should be conducted in-person because this will ensure at least a minimal degree of direct personal contact between physicians or qualified NPPs and residents. Under section 1819(b)(2) of the Act, a SNF must provide services to attain or maintain the highest practicable physical, mental, and psychosocial well-being of each resident. We believe that furnishing the periodic personal visits in face-to-face encounters, and not via telehealth, is necessary to assure quality care.

We considered the possibility of approving subsequent nursing facility care for telehealth with specific limitations, for example, approving subsequent nursing facility care for telehealth only when the codes are used for medically necessary E/M visits that are in addition to Federally mandated periodic personal visits. In past years, we did not add hospital E/M visits to the list of Medicare approved telehealth services because of our concern regarding the use of telehealth for the ongoing E/M of a high-acuity hospital inpatient. (See 69 FR 47511, 69 FR 66276, 72 FR 38144, 72 FR 66250, 73 FR 38517, and 73 FR 69745.) Many residents of SNFs require medically complex care, and we have similar concerns about allowing physicians or NPPs to furnish E/M visits via telehealth to residents of SNFs.

Because the complexity of care required by many residents of SNFs may be significantly greater than the complexity of care generally associated with patients receiving the office visits approved for telehealth, we do not consider E/M visits furnished to residents of SNFs similar to the office visits on the current list of Medicare telehealth services. Therefore, we believe the use of subsequent nursing facility care for medically necessary E/M visits that are in addition to Federally mandated periodic personal visits must be evaluated as a Category #2 service.

Because we consider subsequent nursing facility care to be a Category #2 request, we evaluate whether these are services for which telehealth can be an adequate substitute for a face-to-face encounter. The requesters submitted supporting documentation intended to suggest that the use of telehealth could be a reasonable surrogate for the face-toface delivery of this type of care.

One study assessed the impact of videoconferencing (as opposed to communication by telephone without video) on nighttime, on-call medical decision-making in the nursing home. The comparison of videoconferencing with telephonic communication of information by nurses does not provide a comparative analysis demonstrating that E/M visits furnished via telehealth to residents of SNFs is equivalent to the face-to-face delivery of such services. As such, this study was not relevant to this review.

Another study assessed the value of a monitoring system in reducing falls and injuries in non-acute late-evening and nighttime situations in a nursing home setting. The monitoring system described in this study was comprised of sensors to alert caregivers via a silent pager when a high-risk resident exits his or her bed, bedroom, or bathroom. This allows caregivers to aid the resident and potentially reduce falls. The technologies utilized in this study do not correspond with our definitions of telehealth as specified in § 410.78. In addition, this type of resident monitoring is performed typically by nursing staff and is not an E/M visit. As such, this study was not relevant to this review.

A third study presented the savings achieved through avoiding transport to emergency departments and physicians' offices by furnishing visits via telehealth to residents in nursing facilities. The study did not provide any comparative analysis of the services furnished via telehealth with those furnished in person.

A fourth study evaluated the impact of telemedicine as a decision aid for residents of long-term care SNFs with chronic wounds. The patients selected for this study were alert and intellectually interactive. The study concluded that furnishing a telehealth consultation prior to a face-to-face consultation increased the level of patient comfort with care-related decisions made during the face-to-face consultation. The control group did not receive an equivalent intermediate consultation face-to-face that could be compared to the services furnished to the test group. We acknowledge the study's findings that the intermediate telehealth consultation was a useful decision aid, but we do not consider this a comparative analysis between delivery of the same type of care via telehealth versus face-to-face.

We received a pilot study evaluating the usefulness of E/M services furnished via telehealth for making routine medical decisions in the nursing home. The nursing home residents were evaluated over videoconferencing and then evaluated immediately afterward by the same clinician in person. On a scale of 1 to 5 (1 being the least ill), the clinicians assessed the illness level of these residents at 3 or below, with the illness level for over 65 percent of the encounters assessed at "1." Videoconferencing without a face-toface examination was sufficient for making medical decisions in most cases studied in this pilot, although face-toface examinations were preferred. Clinicians generated orders in 30 percent of these paired encounters, with a predominance of orders generated after, rather than before, the face-to-face examination. The study also noted that even when nursing home residents were alert, they had limited participation in the telemedicine interactions and were not as involved in making informed medical decisions with their clinicians, compared to face-to-face encounters. The study suggests that remote examination by video might serve as a substitute for some routine visits, if interspersed with face-to-face examinations. The study concluded that videoconferencing is feasible for making routine medical decisions in the nursing

We appreciate the comparative analysis provided by this study. However, we note that this study focused on the usefulness of telehealth for routine decision-making in the nursing home, and the reported illness levels of the residents in these sample encounters was relatively low to moderate. We do not consider these findings persuasive that telehealth can, more generally, be an adequate substitute for the face-to-face delivery of E/M visits to residents of SNFs who might require more medically complex care.

We considered the possibility of approving the use of telehealth to furnish E/M visits to residents of SNFs who do not require medically complex care or approving subsequent nursing facility care for telehealth only for medically necessary E/M visits with straightforward or low complexity medical decision-making (as described by HCPCS codes 99307 and 99308). Although this last pilot study concluded that videoconferencing is feasible for making routine medical decisions in the nursing home, we are concerned with the study's finding that residents with low to moderate levels of reported illness had limited participation in the telemedicine interactions and less involvement in making informed medical decisions with their clinicians, compared to face-to-face encounters. Under section 1819(c)(1)(A) of the Act, a SNF must protect and promote the rights of each resident, including the right to be fully informed in advance of any changes in care or treatment that may affect the resident's well-being, and (except with respect to a resident adjudged incompetent) to participate in planning care and treatment or changes in care or treatment. Under § 483.10(b)(3), a resident has the right to be fully informed in language that he or she can understand of his or her total health status, including but not limited to his or her medical condition. If the use of telehealth does not elicit from residents with low to moderate reported illness adequate participation in making informed medical decisions with their clinicians when compared to face-toface encounters, we believe that telehealth is not an adequate substitute for the face-to-face delivery of E/M visits to any residents of SNFs.

After reviewing these studies, we do not have sufficient comparative analysis or other compelling evidence to demonstrate that furnishing E/M visits via telehealth to residents of SNFs is an adequate substitute for the face-to-face encounter between the practitioner and the resident, especially in cases where the resident requires medically complex care. Therefore, we are not proposing to add subsequent nursing facility care services (as described by HCPCS codes 99307 through 99310) to the list of approved telehealth services.

Nursing Facility Discharge Day Management

The nursing facility discharge day management codes (as described by HCPCS codes 99315 and 99316) are used to report an E/M visit that prepares a resident for discharge from a nursing facility. We note that there is no Medicare Part B requirement to furnish

and bill an E/M visit in preparation for a resident's discharge from a SNF. However, if a physician or qualified NPP bills a Nursing Facility Discharge Services code, we believe that a face-toface encounter will better insure that the resident is prepared for discharge, as we do not have evidence that nursing facility discharge services via telehealth is adequately equivalent to face-to-face provision. As such, we are not proposing to add the nursing facility discharge day management services (as described by HCPCS codes 99315 and 99316) to the list of approved telehealth services.

Other Nursing Facility Service

In 2006, CPT added a procedure code for Other Nursing Facility Service (CPT code 99318) to describe an annual nursing facility assessment. An annual assessment is not one of the required visits under the long-term care regulations at § 483.40. For Medicare purposes, this code can be used in lieu of a Subsequent Nursing Facility Care code to report a Federally-mandated periodic personal visit furnished under § 483.40(c). An annual assessment visit billed using CPT code 99318 does not represent a distinct benefit service for Medicare Part B physician services, and it cannot be billed in addition to the required number of Federally-mandated periodic personal visits. Under Medicare Part B, we cover this procedure code if the visit fully meets the CPT code 99318 requirements for an annual nursing facility assessment and if such an annual assessment falls on the 60-day mandated visit cycle. We are not proposing to add the other nursing facility care services (as described by HCPCS code 99318) to the list of approved telehealth services because this code is payable by Medicare only if the visit is substituted for a Federallymandated visit under § 483.40(c). As explained above, we believe all of the Federally-mandated periodic visits must be conducted in person.

Follow-up Inpatient Consultations

Prior to 2006, follow-up inpatient consultations (as described by CPT codes 99261 through 99263) were approved telehealth services. In 2006, the CPT Editorial Panel of the American Medical Association (AMA) deleted the codes for follow-up inpatient consultations. In the hospital setting, the AMA advised practitioners to bill for services that would previously have been billed as follow-up inpatient consultations using the procedure codes for subsequent hospital care (as described by CPT codes 99231 through 99233). In the nursing facility setting,

the AMA advised practitioners to bill for these services using the procedure codes for subsequent nursing facility care (as described by CPT codes 99307 through 99310).

In the CY 2008 PFS proposed rule (72 FR 38144) and subsequent final rule with comment period (72 FR 66250), we discussed a request from the ATA to add subsequent hospital care to the list of approved telehealth services. Because there was no method for practitioners to bill for follow-up consultations delivered via telehealth to hospital inpatients, the ATA requested that we add the subsequent hospital care codes to the list of Medicare approved telehealth services. We expressed our concern that subsequent hospital care codes describe a broader range of services than follow-up consultations, including some services that may not be appropriate to be furnished via telehealth. We committed to continue evaluating the issues.

In the CY 2009 PFS proposed rule (73 FR 38517), we proposed to create a new series of HCPCS codes for follow-up inpatient telehealth consultations. In the CY 2009 PFS final rule with comment period (73 FR 69745), we finalized our proposal to create follow-up inpatient telehealth consultation codes (as described by HCPCS codes G0406 through G0408) and added these Gcodes to the list of Medicare telehealth services. These HCPCS codes are limited to the range of services included in the scope of the previous CPT codes for follow-up inpatient consultations, and the descriptions limit the use of such services for telehealth. (See the CMS Internet-Only Medicare Benefit Policy Manual, Pub. 100-02, Chapter 15, Section 270.2.1 and the Medicare Claims Processing Manual, Pub. 100–04, Chapter 12, Section 190.3.1 for the current definition of follow-up inpatient telehealth consultations.)

We note that if the former codes for follow-up consultations (as described by CPT codes 99261 through 99263) still existed, these procedure codes would also be available to practitioners to submit claims to their Medicare contractors for payment of follow-up consultations provided via telehealth to patients located in SNFs. Although we did not receive a public request to add follow-up inpatient consultations for patients in SNFs to the list of approved Medicare telehealth services, we recognize a similar need to establish a method for practitioners to furnish and bill for follow-up consultations delivered via telehealth to patients in SNFs.

We considered the possibility of approving subsequent nursing facility

care for telehealth with specific limitations, for example, approving subsequent nursing facility care for telehealth only when the codes are used for follow-up consultations. However, as discussed above, we do not believe it would be appropriate for E/M visits to be furnished via telehealth to treat residents of SNFs requiring medically complex care. We are concerned that it could be difficult to implement sufficient controls and monitoring to ensure that the use of the subsequent nursing facility care codes for telehealth is limited to the delivery of services that were formerly described as follow-up inpatient consultations.

We considered creating new G-codes to enable practitioners to bill for the services that were formerly described as follow-up inpatient telehealth consultations when furnished to residents of SNFs. We examined the feasibility of creating such codes to parallel the subsequent nursing facility care services, which are the codes currently used to bill these follow-up consultations in a face-to-face encounter. We found that the elements of the four levels of subsequent nursing facility care did not correspond to the three levels of the deleted CPT codes previously used for follow-up inpatient consultations. We believe that it would be administratively simpler to utilize the three existing codes for follow-up inpatient telehealth consultations rather than add additional G-codes. The use of the same "follow-up inpatient telehealth consultation" G-codes for services furnished in both hospital inpatient and SNF settings would also correspond to the use of the previous CPT codes for services furnished to hospital inpatients and residents of SNFs.

For CY 2010, we are proposing to revise § 410.78 to specify that the Gcodes for follow-up inpatient telehealth consultations (as described by HCPCS codes G0406 through G0408) include follow-up telehealth consultations furnished to beneficiaries in hospitals and SNFs. The HCPCS codes will clearly designate these services as follow-up consultations provided via telehealth, and not subsequent nursing facility care used for E/M visits. Utilization of these codes for patients in SNFs will facilitate payment for these services, as well as enable us to monitor whether the codes are used appropriately.

As described in the CMS Internet-Only Medicare Benefit Policy Manual, Pub. 100-02, Chapter 15, Section 270.2.1 and the Medicare Claims Processing Manual, Pub. 100-04, Chapter 12, Section 190.3.1, follow-up inpatient telehealth consultations

include monitoring progress, recommending management modifications, or advising on a new plan of care in response to changes in the patient's status or no changes on the consulted health issue. Counseling and coordination of care with other providers or agencies is included as well, consistent with the nature of the problem(s) and the patient's needs. The physician or practitioner who furnishes the inpatient follow-up consultation via telehealth cannot be the physician of record or the attending physician, and the follow-up inpatient consultation would be distinct from the follow-up care provided by a physician of record or the attending physician. If a physician consultant has initiated treatment at an initial consultation and participates thereafter in the patient's ongoing care management, such care would not be included in the definition of a follow-up inpatient consultation and is not appropriate for delivery via telehealth.

Consistent with our policy for followup telehealth consultations furnished to hospital inpatients, in order to bill and receive payment for these services, physicians and practitioners must submit the appropriate HCPCS procedure code for follow-up inpatient telehealth consultations along with the "GT" modifier ("via interactive audio and video telecommunications system"). By coding and billing the "GT" modifier with the follow-up inpatient telehealth consultation codes, the distant site physician or practitioner certifies that the beneficiary was present at an eligible originating site when the telehealth service was furnished. (See the CMS Internet-Only Medicare Claims Processing Manual, Pub. 100–04, Chapter 12, Section 190.6.1 for instructions for submission of interactive telehealth claims.)

In the case of Federal telemedicine demonstration programs conducted in Alaska or Hawaii, store and forward technologies may be used as a substitute for an interactive telecommunications system. Covered store and forward telehealth services are billed with the "GQ" modifier, "via asynchronous telecommunications system." By using the "GQ" modifier, the distant site physician or practitioner certifies that the asynchronous medical file was collected and transmitted to him or her at the distant site from a Federal telemedicine demonstration project conducted in Alaska or Hawaii. (See the CMS Internet-Only Medicare Claims Processing Manual, Pub. 100-04, Chapter 12, Section 190.6.2 for instructions for submission of telehealth store and forward claims.)

c. Critical Care Services

In the CY 2009 PFS proposed rule (73 FR 38517), we reviewed a request submitted by the University of Pittsburgh Medical Center (UPMC) to add critical care services (as described by HCPCS codes 99291 and 99292) to the list of approved telehealth services. UPMC drew analogies to the E/M consultation services currently approved for telehealth and described how it uses telehealth to give stroke patients timely access to consultative input from highly specialized physicians who are not available to furnish services face-to-face.

In the CY 2009 PFS final rule with comment period (73 FR 69744), we did not add critical care services to the list of approved telehealth services. This request was not considered as a category #1 request because, as we stated, we believe that remote critical care services are a different service than the telehealth delivery of critical care (as described by HCPCS codes 99291 and 99292). We stated that we had no evidence suggesting that the use of telehealth could be a reasonable surrogate for the face-to-face delivery of this type of care, and we did not add critical care services to the list of Medicare approved telehealth services. We noted that this decision does not preclude physicians from providing telehealth consultations to critically ill patients.

Following publication of the CY 2009 PFS final rule with comment period, Philips Healthcare, the maker of a remote critical care system, submitted an expanded request to add critical care services to the list of Medicare approved telehealth services. The Philips Healthcare request stated that critical care services can be approved as a Category #1 service based on their similarity to the inpatient consultation services currently approved for telehealth. The requester noted that many of the components of critical care are similar to a high-level inpatient consultation service, which is currently approved for telehealth. Common components include obtaining a patient history, conducting an examination, and engaging in complex medical decisionmaking for patients who may be severely ill. Because we classified critical care as a Category #2 service last year, Philips also submitted evidence to support its belief that the use of telehealth could be a reasonable surrogate for the face-to-face delivery of this type of care.

CMS Review

To determine whether to assign a request to Category #1, we look for similarities between the service that is being considered for addition and existing telehealth services for the roles of, and interactions among, the beneficiary, the physician (or other practitioner) at the distant site and, if necessary, the telepresenter. In this case, we look for such similarities between critical care and inpatient consultations and other similar services on the current list of approved Medicare telehealth services. Critical care (as described by HCPCS codes 99291 and 99292) is the direct delivery by a physician of medical care for a critically ill or critically injured patient. It involves high complexity decision-making to assess, manipulate, and support vital system function(s) to treat single or multiple vital organ system failure and/ or to prevent further life-threatening deterioration of the patient's condition. Within the current standards of practice, we believe critical care services require the physical presence of the physician rendering the critical care services. We also note that a number of hands-on interventions (for example, gastric intubation and vascular access procedures), when furnished on the day a physician bills for critical care, are included in the critical care service and are not reported separately. Inpatient consultations generally do not include hands-on interventions. Because we believe that critical care services (as described by HCPCS codes 99291 and 99292) require the physical presence of a physician who is available to furnish any necessary hands-on interventions, we do not consider critical care services similar to any services on the current list of Medicare telehealth services. Therefore, we believe critical care must be evaluated as a Category #2 service.

In order to evaluate critical care services as a Category #2 service, we need to determine whether these are services for which telehealth can be an adequate substitute for a face-to-face encounter. In CPT 2009, the AMA defined remote critical care services tracking codes (codes 0188T through 0189T) with cross-references to critical care services (HCPCS codes 99291 through 99292). CPT directs that only one physician may report either critical care services or remote critical care services for the same period. The requester cites this as evidence that the AMA considers the two services equivalent, and that critical care should be approved as a Category #2 service. We do not consider the CPT coding guidance persuasive evidence that

remote critical care is the telehealth delivery of critical care, as defined by HCPCS codes 99291 and 99292. We believe that if the AMA valued the two services equally, they would not have created separate tracking codes for remote critical care services.

As we noted in the CY 2009 PFS final rule with comment period, consistent with the AMA's creation of tracking codes, we believe that remote critical care services are different from the telehealth delivery of critical care services (as described by HCPCS codes 99291 and 99292). Category III CPT codes track utilization of a service, facilitating data collection on, and assessment of, new services and procedures. We believe that the data collected for these tracking codes will help provide useful information on how to best categorize and value remote critical care services in the future.

The requester also submitted studies which conclude that remote critical care services furnished by intensivists improve mortality rates, decrease length of stay, reduce per patient costs, and improve compliance with best practices, thereby improving patient outcomes. These studies are similar to the ones we received and reviewed from the CY 2009 PFS proposed rule. We maintain that remote critical care services are not the telehealth delivery of critical care services (as described by HCPCS codes 99291 and 99292). Therefore, we do not find the new studies submitted with the CY 2010 request persuasive that telehealth can be an adequate substitute for the face-to-face delivery of critical care services (as described by HCPCS codes 99291 and 99292).

We continue to believe that remote critical care services are different services than the telehealth delivery of critical care (as described by HCPCS codes 99291 and 99292). As such, we are not proposing to add critical care services (as described by HCPCS codes 99291 and 99292) to the list of approved telehealth services. We reiterate that our decision not to add critical care services to the list of approved telehealth services does not preclude physicians from furnishing telehealth consultations to critically ill patients.

d. Other Requests

We received a number of requests to add services that we reviewed and did not approve in previous PFS Rules. The following are brief summaries and references to previous discussions regarding our decisions not to add these procedure codes to the list of Medicare approved telehealth services. As explained further below, we are not reconsidering these previous decisions.

Initial and Subsequent Hospital Care

We received a request to add initial hospital care (as described by HCPCS codes 99221 through 99223) and subsequent hospital care (as described by HCPCS codes 99231 through 99233) to the list of approved telehealth services. In response to previous requests, we did not add initial or subsequent hospital care to the list of approved telehealth services because of our concern regarding the use of telehealth for the ongoing E/M of a highacuity hospital inpatient. (See 69 FR 47510 and 66276, 72 FR 38144 and 66250, and 73 FR 38517 and 69745.) We did not receive any new information with this request that would alter our previous decisions. Therefore, we are not proposing to add initial hospital care (as described by HCPCS codes 99221 through 99223) or subsequent hospital care (as described by HCPCS) codes 99231 through 99233) to the list of approved telehealth services.

Group Medical Nutrition Therapy Services

We received a request to add group medical nutrition therapy (MNT) services (as described by HCPCS codes G0271 and 97804) to the list of approved telehealth services. In response to a previous request, we did not add group MNT to the list of approved telehealth services because we believe that group services are not appropriately delivered through telehealth. (See 70 FR 45787 and 70157.) We did not receive any new information with this request that would alter our previous decision. Therefore, we are not proposing to add group MNT (as described by HCPCS codes G0271 and 97804) to the list of approved telehealth services.

Diabetes Self-Management Training (DSMT)

We received a request to add diabetes self-management training (DSMT) (as described by HCPCS codes G0108 and G0109) to the list of approved telehealth services. In response to previous requests, we did not add DSMT to the list of approved telehealth services because of the statutory requirement that DSMT include teaching beneficiaries to self-administer injectable drugs. Furthermore, DSMT is often performed in group settings and we believe that group services are not appropriately delivered through telehealth. (See 70 FR 45787 and 70157, and 73 FR 38516 and 69743.) We did not receive any new information with this request that would alter our previous decisions. Therefore, we are

not proposing to add DSMT (as described by HCPCS codes G0108 and G0109) to the list of approved telehealth services

Speech and Language Pathology Services

We received a request to add various speech and language pathology services to the list of approved telehealth services. Speech-language pathologists are not permitted under current law to furnish and receive payment for Medicare telehealth services. Therefore, we do not propose to add any speech and language pathology services to the list of Medicare telehealth services. (For further discussion, see 69 FR 47512 and 66276, and 71 FR 48995 and 69657.)

Physical and Occupational Therapy Services

We received a request to add various physical and occupational therapy services to the list of approved telehealth services. Physical and occupational therapists are not permitted under current law to furnish and receive payment for Medicare telehealth services. Therefore, we are not proposing to add any physical and occupational therapy services to the list of approved telehealth services. (For further discussion, see 71 FR 48995 and 69657.)

E. Coding Issues

1. Canalith Repositioning

In 2008, the CPT Editorial Panel created a new code for canalith repositioning (CRP). This procedure is a treatment for vertigo which involves therapeutic maneuvering of the patient's body and head in order to use the force of gravity to redeposit the calcium crystal debris in the semicircular canal system.

In the CY 2009 PFS final rule with comment period (73 FR 69896), new CPT code 95992, Canalith repositioning procedure(s) (eg, Epley maneuver, Semont maneuver), per day, was assigned the bundled status indicator (B). We explained that this procedure previously was billed as part of an evaluation and management (E/M) service or under a number of CPT codes, including CPT code 97112, Therapeutic procedure, one or more areas, each 15 minutes; neuromuscular reeducation of movement, balance, coordination, kinesthetic sense, posture, and/or proprioception for sitting and/or standing activities. We also explained that because neurologists and therapists are the predominant providers of this service to Medicare patients (each at 22 percent), it was assigned as a

"sometimes therapy" service under the therapy code abstract file.

We received comments on this issue from the American Physical Therapy Association (APTA), as well as other organizations expressing opposition to our decision to bundle the new code. Commenters stated that they believe that our decision to bundle CPT code 95992 is flawed since physical therapists are unable to bill E/M services. The commenter also stated that therapists would be precluded from using another code for billing for this service because CPT correct coding instructions require that the provider/ supplier select the procedure that most accurately defines the service provided. Commenters also expressed concern that this could impact beneficiary access to this service.

Based upon the commenters' feedback, we realized that we had failed to address how therapists would bill for the service since they cannot bill E/M services. In order to address this situation so that access to this service would not be impacted, we included language in a change request (CR) (the quarterly update CR for April) and also released a MedLearn article informing PTs to continue using one of the more generally defined "always therapy" CPT codes (97112) as a temporary measure. See http://www.cms.hhs.gov/ transmittals/downloads/R1691CP.pdf and http://www.cms.hhs.gov/ MLNMattersArticles/downloads/ MM6397.pdf.

In response to the concerns raised and upon additional review of this issue for CY 2010, we are proposing to change the status indicator from B (Bundled) to I (Invalid). We propose that physicians would continue to be paid for CRP as a part of an E/M service. Physical therapists would continue to use one of the more generally defined "always therapy" CPT codes (97112). We believe that this will enable beneficiaries to continue to receive this service while at the same time it will address our concerns about the potential for duplicate billing for this service to the extent that this service is paid as a part of an E/M service. As a result of this proposal, CPT code 95992 would be removed as a "sometimes" therapy code from the therapy code list.

2. Payment for an Initial Preventive Physical Examination (IPPE)

Beginning January 1, 2010, we propose to increase the payment for an initial preventive physical examination (IPPE) furnished face-to-face with the patient and billed with HCPCS code G0402, *Initial preventive physical examination; face-to-face visit, services*

limited to new beneficiary during the first 12 months of Medicare enrollment. The IPPE service includes a broad array of components and focuses on primary care, health promotion, and disease prevention.

Section 101(b) of the MIPPA changed the IPPE benefit by adding to the IPPE visit the measurement of an individual's body mass index and, upon an individual's consent, end-of-life planning. Section 101(b) of the MIPPA also removed the screening electrocardiogram (EKG) as a mandatory service of the IPPE.

In order to implement this MIPPA provision, in the CY 2009 PFS final rule with comment period (73 FR 69870), we created HCPCS code G0402 as a new HCPCS code and retained, on an interim basis, the work RVUs of 1.34 assigned to HCPCS code G0344, the code that was previously used to bill for the IPPE. While we did not believe the revisions to the IPPE required by MIPPA impacted the work RVUs associated with this service, we solicited public comments on this issue, as well as suggested valuations of this service to reflect resources involved in furnishing the service.

We received comments from several medical groups representing primary care physicians and geriatricians, as well as comments from the American Medical Association concerning this issue. The commenters stated that the IPPE service was undervalued prior to the addition of components by the MIPPA. Commenters also stated that the current level of work RVUs would discourage delivery of appropriate endof-life planning with the beneficiary. One commenter suggested the work associated with HCPCS code G0402 for the IPPE, as described in statute, is captured in existing CPT code 99387, Preventive Medicine Service, new patient, Initial comprehensive preventive medicine, 65 years and older. (This code is not paid under the PFS.) The work RVUs for this CPT code are

Based on a review of the comments and upon further evaluation of the component services of the IPPE, we believe the services, in the context of work and intensity, contained in HCPCS code G0402 are most equivalent to those services contained in CPT code 99204, Evaluation and management new patient, office or other outpatient visit, and propose increasing the work RVUs for HCPCS code G0402 to 2.30 effective for services furnished beginning on January 1, 2010.

3. Audiology Codes: Policy Clarification of Existing CPT Codes

In the CY 2009 PFS final rule with comment period (73 FR 69890), we noted that the RUC reviewed and recommended work RVUs for 6 audiology codes with which we agreed (that is, CPT codes 92620, 92621, 92625, 92626, 92627, and 92640). We also noted that in the Medicare program, audiology services are provided under the diagnostic test benefit and that some of the work descriptors for these services include "counseling," ''potential for remediation,'' and "establishment of interventional goals." We noted that we do not believe these aspects fit within the diagnostic test benefit, and therefore, we solicited comment on this issue.

Since audiology services fall under the diagnostic test benefit, aspects of services that are therapeutic or management activities are not payable to audiologists. This distinction is of particular importance since CPT codes 92620, 92621, 92626, 92627, and 92640 are "timed" codes, that is, these codes are billed based on the actual time spent furnishing the service. In response to our request, the society that represents speech language pathologists, audiologists, and speech and language scientists, provided the following comments.

Comment: With respect to the term "counseling," the commenter stated that "counseling" as used in the intraservice work description for CPT code 92640, Diagnostic analysis with programming of auditory brainstem implant, per hour, is used in the context of informational rather than personal counseling. In this instance the counseling provides information and guidance to the patient on what to expect relative to the service (application of the electrical stimulation). This counseling is an integral part of the diagnostic procedure and not a means of providing therapy or active treatment.

Response: We appreciate the comments related to counseling by the specialty society, but are not persuaded that counseling is an integral part of a diagnostic test. Although we understand that test results are sometimes conveyed to the patient during or at the conclusion of a diagnostic test, counseling the patient about how to compensate for a hearing loss is part of a therapeutic service. As such, therapeutic and/or management of disease process counseling are not part of the diagnostic test benefit and time attributable to such activities is not payable to audiologists under the Medicare program.

Comment: With respect to the term 'potential for remediation," which is found as part of the intraservice work descriptor for CPT code 92625, Assessment of tinnitus (includes pitch, loudness matching, and masking), the commenter states that the procedure evaluates the frequency and intensity characteristics of the perceived tinnitus in addition to measuring how the tinnitus responds to a masking noise. The response to masking noise is diagnostic information that audiologists and physicians refer to as the "potential for remediation." This assessment is thus a part of a complete diagnostic workup and is not a treatment or therapeutic service.

Response: The intraservice work for this service includes informing the patient of the outcome of the evaluation and the potential for remediation. As noted above, although we understand that test results are sometimes conveyed to the patient during or at the conclusion of a diagnostic test, discussing therapeutic options and/or providing therapy or management based on test results are not part of a diagnostic test. Discussing the potential for remediation does not appear to be part of a diagnostic test. While this service can involve a small amount of nondiagnostic work, CPT code 92625 is not a timed code and the bulk of the work described in the code appears to be diagnostic in nature.

Comment: With respect to the term "establishment of interventional goals," this phrase is found in the intraservice work description of CPT code 92626, Evaluation of auditory rehabilitation status; first hour. The commenter states that this procedure focuses on diagnostic information relative to the patient's ability to use residual hearing with a hearing aid, a cochlear implant, or with no electronic device. The intervention goals may take a variety of forms, such as the following: Meeting audiological criteria for cochlear implantation; a recommendation to continue use of hearing aids (that is, not a cochlear implant candidate); and the need to coordinate with a speechlanguage pathologist for auditory training. This provides the physician with a complete diagnostic evaluation of the patient's residual hearing status. There is no element of therapy or treatment associated with this service.

Response: Diagnostic testing usually does not involve the establishment of interventional goals. The test report usually contains test findings and may suggest additional tests. While we appreciate the comments of the specialty society, we are not persuaded that establishing interventional goals is

part of a diagnostic test under Medicare. The establishment of interventional goals is clearly a function of therapeutic management. As such, establishment of goals is not part of the diagnostic test benefit and time attributable to such activity is not payable to an audiologist under the Medicare program.

We appreciate the comments we received on this issue. We want to emphasize that therapeutic and/or management activities associated with these audiology tests are not payable to audiologists because of the benefit category under which these tests are covered. We may also issue instructions to contractors to monitor these services to prevent inappropriate payments.

4. Consultation Services

a. Background

The current physician visit and consultation codes were developed by the American Medical Association (AMA) Current Procedural Terminology (CPT) Editorial Panel in November 1990. A consultation service is an evaluation and management (E/M) service furnished to evaluate and possibly treat a patient's problem(s). It can involve an opinion, advice, recommendation, suggestion, direction, or counsel from a physician or qualified NPP at the request of another physician or appropriate source. (See the Internet-Only Medicare Claims Processing Manual, Pub. 100-04, chapter 12, § 30.6.10A for more information.) A consultation service must be documented and a written report given to the requesting professional. Currently, consultation services are predominantly billed by specialty physicians. Primary care physicians infrequently furnish these services.

The required documentation supports the accuracy and medical necessity of a consultation service that is requested and provided. Medicare pays for a consultation service when the request and report are documented as a consultation service, regardless of whether treatment is initiated during the consultation evaluation service. (See the Internet-Only Medicare Claims Processing Manual, Pub. 100-04, chapter 12, § 30.6.10B.) A consultation request between professionals may be done orally by telephone, face-to-face, or by written prescription brought from one professional to another by the patient. The request must be documented in the medical record.

In the Physician Fee Schedule Final Rule issued June 5, 1991, (56 FR 25828) we stated that the agency's goal for the development of the new visit and consultation codes was that they meet two criteria: (1) They should be used reliably and consistently by all physicians and carriers; that is, the same service should be coded the same way by different physicians; and (2) they should be defined in a way that enables us to properly crosswalk the new codes to the relative values for the Harvard vignettes so valid RVUs for work are assigned to the new codes.

Based on requests from the physician community to clarify our consultation payment policy and to provide consultation examples, we convened an internal workgroup of medical officers within CMS (then called the Health Care Financing Administration, or HCFA) and revised the payment policy instructions in August 1999 in the Medicare Claims Processing Manual (at § 30.6.10 as cited above). We provided examples of consultation services and examples of clinical scenarios that did not satisfy Medicare criteria for consultation services. Without explicit instructions for every possible clinical scenario outlined in national policy instructions or in AMA coding definitions or coding instructions, the local policy interpretations by Medicare contractors were not universally equivalent or acceptable to the physician community and resulted in denials in different localities. Some Medicare contractors would consider a consultation service with treatment to be an initial visit rather than a consultation thus resulting in a denial for the billed consultation. We clarified in the 1999 revision that Medicare would pay for a consultation whether treatment was initiated at the consultation visit or not. The physician community has stated that terms such as referral, transfer and consultation, used interchangeably by physicians in clinical settings, confuse the actual meaning of a consultation service and that interpretation of these words varies greatly among members of that community as some label a transfer as a referral and others label a consultation as a referral. Although we clarified the terms referral and consultation in the 1999 revision, there was disagreement with our policy by physicians in the health care community and by AMA CPT staff. We provided our documentation guidance so physicians would be in compliance with our payment policy. The consultation definition in the AMA CPT simply stated that the consultant's opinion or other information must be communicated to the requesting physician.

Ådditional manual revisions in both January and September 2001 (at § 30.6.10 as cited above) clarified that NPPs can both request and furnish consultation services within their scope of practice and licensure requirements. We continued to explain our documentation requirements to the physician community through our Medicare contractors and in our discussions with the AMA CPT staff. Under our current policy and in the AMA CPT definition, a consultation service must have a request from another physician or other professional and be followed by a report to the requesting professional. The AMA CPT definition does not state the request must be written in the requesting physician's medical record. However, we require the request to be documented in the requesting physician's plan of care in the medical record as a condition for Medicare payment. The E/M documentation guidelines which apply to all E/M visits or consultations (http:// www.cms.hhs.gov/MLNEdWebGuide/ 25 EMDOC.asp) clearly state that when referrals are made, consultations are requested, or advice is sought, the medical record should indicate to whom and where the referral or consultation is made or from whom the advice is requested. Our Medicare contractors are responsible for reviewing and paying consultation claims when submitted. When there is a question that triggers a review of a consultation service, our Medicare contractors will look at both the requesting physician's medical record (where the request should be noted) and the consultant's medical record where the consultation is reported and at the report generated for the requesting physician. Medicare contractors do not look for evidence of documentation on every claim, only when there is a concern raised during random sampling or during a specific audit performed by a contractor. The AMA CPT coding manual, which is not a payment manual, does not specify these requirements, and, therefore, as we understand it, many physicians do not agree with the CMS policy.

In March 2006, the Office of the Inspector General (OIG) published a report entitled, "Consultations in Medicare: Coding and Reimbursement" (OEI–09–02–00030). The purpose of the report was to assess whether Medicare's payments for consultation services were appropriate. While the OIG study was being conducted, we continued our ongoing discussions with the AMA CPT staff for potential changes to the consultation definition and guidance in CPT. The findings in the OIG report (based on claims paid by Medicare in 2001) indicated that Medicare allowed

approximately \$1.1 billion more in 2001 than it should have for services that were billed as consultations.

Approximately 75 percent of services paid as consultations did not meet all applicable program requirements (per the Medicare instructions) resulting in improper payments. The majority of these errors (47 percent of the claims reviewed) were billed as the wrong type or level of consultation. The second most frequent error was for services that did not meet the definition of a consultation (19 percent of the claims reviewed). The third category of improperly paid claims was a lack of appropriate documentation (9 percent of the claims reviewed). The OIG recommended that CMS, through our Medicare contractors, should educate physicians and other health care practitioners about Medicare criteria and proper billing for all types and levels of consultations with emphasis on the highest levels and follow-up inpatient consultation services.

We agreed with the OIG findings that additional education would help physicians understand the differences in the requirements for a consultation service from those for other E/M services. With each additional revision from 1999 until the OIG study began, we continually educated physicians through the guidance provided by our Medicare contractors. However, there remained discrepancies with unclear and ambiguous terms and instructions in the AMA CPT consultation coding definition, transfer of care and documentation, and the feedback from the physician community indicated they disagreed with Medicare guidance.

Prior to the official publication of the OIG report, we issued a Medlearn Matters article, effective January 2006, to educate the physician community about requirements and proper billing for all types and levels of consultation services as requested by the OIG in their report. The Medlearn Matters article reflected the manual changes we made in 2006 and the AMA CPT coding changes as noted below.

continued as a work-in-progress over several years as disagreements were raised by the physician community. We continued to work with AMA CPT coding staff in an attempt to have improved guidance for consultation services in the CPT coding definition. In looking at physician claims data (for example, the low usage of confirmatory consultation services) and in response

Our consultation policy revisions

to concerns from the physician community regarding how to correctly use the follow-up consultation codes, the AMA CPT Editorial Panel chose to delete some of the consultation codes for 2006. The Follow-Up Inpatient Consultation codes (CPT codes 99261 through 99263) and the Confirmatory Consultation codes (CPT codes 99271 through 99275) were deleted. During our ongoing discussions, the AMA CPT staff, maintained that physicians did not fully understand the use of these codes and historically submitted them inappropriately for payment as was reflected in the OIG study.

We issued a manual revision in the Medicare Claims Processing Manual (at § 30.6.10 as cited above) simultaneously with the publication of AMA CPT 2006 coding changes removing the follow-up consultation codes, and instructed physicians to use the existing subsequent hospital care code(s) and subsequent nursing facility care codes for visits following a consultation service. The confirmatory consultation codes (which were typically used for second opinions) were also removed and we instructed physicians to use the existing E/M codes for a second opinion service. We further clarified the documentation requirements by making it easier to document a request for a consultation service from another physician and to submit a consultation report to the requesting professional. Again, physicians stated that a consultant has no control over what a requesting or referring physician writes in a medical record, and that they should not be penalized for the behavior of others. However, our consultation policy instructions apply to all physicians, whether they request a consultation or furnish a consultation. As noted above, documentation by both the requesting physician and the physician who furnishes the consultation, is required under the E/M documentation guidelines. The E/M documentation guidelines have been in use since 1995. In our discussions with the AMA CPT staff and physician groups, and national physician open door conference calls, we have emphasized that the requesting physician medical record is not reviewed unless there is a specific audit or random sampling performed. The physician furnishing the consultation service should document in the medical record from whom a request is received.

We continue to hear from the AMA and from specific national physician specialty representatives that physicians are dissatisfied with Medicare documentation requirements and guidance that distinguish a consultation service from other E/M services such as transfer of care. CPT has not clarified transfer of care. Therefore, many physician groups disagree with our

requirements for documentation of transfer of care. Interpretation differs from one physician to another as to whether transfer of care should be reported as an initial E/M service or as a consultation service.

Despite our efforts, the physician community disagrees with Medicare interpretation and guidance for documentation of transfer of care and consultation. The existing consultation coding definition in the AMA CPT definition remains ambiguous and confusing for certain clinical scenarios and without a clear definition of transfer of care. The CPT consultation codes are used by physicians and qualified NPPs to identify their services for Medicare payment. There is an absence of any guidance in the AMA CPT consultation coding definition that distinguishes a transfer of care service (when a new patient visit is billed) from a consultation service (when a consultation service is billed). Medicare does provide guidance although there is disagreement with our policy from AMA CPT staff and some members of the physician community. Because of the disparity between AMA coding guidance and Medicare policy some physicians state they have difficulty in choosing the appropriate code to bill. The payment for both inpatient consultation and office/outpatient consultation services is higher than for initial hospital care and new patient office/outpatient visits. However, the associated physician work is clinically similar. Many physicians contend that there is more work involved with a new patient visit than a consultation service because of the post work involvement with a new patient. The payment for a consultation service has been set higher than for initial visits because a written report must be made to the requesting professional. However, all medically necessary Medicare services require documentation in some form in a patient's medical record. Over the past several years, some physicians have asked CMS to recognize the provision of the consultation report via a different form of communication in lieu of a written letter report to the requesting physician so as to lessen any paperwork burden on physicians. We have eased the consultation reporting requirements by lessening the required level of formality and permitting the report to be made in any written form of communication, (including submission of a copy of the evaluation examination taken directly from the medical record and submitted without a letter format) as long as the identity of the physician who furnished the consultation is

evident. Although preparation and submission of the consultant's report is no longer the major defining aspect of consultation services, the higher payment has remained. (See the Internet-Only Medicare Claims Processing Manual, Pub. 100–04, chapter 12, § 30.6.10 F.)

Both AMA CPT coding rules and Medicare Part B payment policy have always required that there is only one admitting physician of record for a particular patient in the hospital or nursing facility setting. (AMA CPT 2009, Hospital Inpatient Services, Initial Hospital Care, p.12) This physician has been the only one permitted to bill the initial hospital care codes or initial nursing facility codes. All other physicians must bill either the subsequent hospital care codes, subsequent nursing facility care codes or consultation codes. (See the Internet-Only Medicare Claims Processing Manual, Pub. 100-04, chapter 12, § 30.6.9.1 G.)

Beginning January 1, 2008, we ceased to recognize office/outpatient consultation CPT codes for payment of hospital outpatient visits (72 FR 66790 through 66795). Instead, we instructed hospitals to bill a new or established patient visit CPT code, as appropriate to the particular patient, for all hospital outpatient visits. Regardless of all of our efforts to educate physicians on Medicare guidance for documentation, transfer of care, and consultation policy, disagreement in the physician community prevails.

b. Proposal

Beginning January 1, 2010, we propose to budget neutrally eliminate the use of all consultation codes (inpatient and office/outpatient codes for various places of service except for telehealth consultation G-codes) by increasing the work RVUs for new and established office visits, increasing the work RVUs for initial hospital and initial nursing facility visits, and incorporating the increased use of these visits into our PE and malpractice RVU calculations.

We note that section 1834(m) of the Act includes "professional consultations" (including the initial inpatient consultation codes "as subsequently modified by the Secretary") in the definition of telehealth services. We recognize that consultations furnished via telehealth can facilitate the provision of certain services and/or medical expertise that might not otherwise be available to a patient located at an originating site. Therefore, for CY 2010, if we finalize our proposed policy to eliminate

consultations from the PFS, then we propose to create HCPCS codes specific to the telehealth delivery of initial inpatient consultations. The purpose of these codes would be solely to preserve the ability for practitioners to provide and bill for initial inpatient consultations delivered via telehealth. These codes are intended for use by practitioners when furnishing services that meet Medicare requirements relating to coverage and payment for telehealth services. Practitioners would use these codes to submit claims to their Medicare contractors for payment of initial inpatient consultations provided via telehealth. The new HCPCS codes would be limited to the range of services included in the scope of the CPT codes for initial inpatient consultations, and the descriptions would be modified to limit the use of such services for telehealth. The HCPCS codes would clearly designate these as initial inpatient consultations provided via telehealth, and not initial hospital care or initial nursing facility care used for inpatient visits. Utilization of these codes would allow us to provide payment for these services, as well as enable us to monitor whether the codes are used appropriately.

If we create HCPCS G-codes specific to the telehealth delivery of initial inpatient consultations, then we also propose to crosswalk the RVUs for these services from the RVUs for initial hospital care (as described by CPT codes 99221 through 99223). We believe this is appropriate because a physician or practitioner furnishing a telehealth service is paid an amount equal to the amount that would have been paid if the service had been furnished without the use of a telecommunication system. Since physicians and practitioners furnishing initial inpatient consultations in a face-to-face encounter to hospital inpatients must continue to utilize initial hospital care codes (as described by CPT codes 99221 through 99223), we believe it is appropriate to set the RVUs for the proposed inpatient telehealth consultation G-codes at the same level as for the initial hospital care

We considered creating separate G-codes to enable practitioners to bill initial inpatient telehealth consultations when furnished to residents of SNFs and crosswalking the RVUs to initial nursing facility care (as described by CPT codes 99304 through 99306). For the sake of administrative simplicity, if we create HCPCS G-codes specific to the telehealth delivery of initial inpatient consultations, they will be defined in § 410.78 and in our manuals as appropriate for use to deliver care to

beneficiaries in hospitals or skilled nursing facilities. If we adopt this proposal, then we will make corresponding changes to our regulations at § 410.78 and § 414.65. In addition, we will add the definition of these codes to the CMS Internet-Only Medicare Benefit Policy Manual, Pub. 100–02, Chapter 15, Section 270 and the Medicare Claims Processing Manual, Pub. 100–04, Chapter 12, Section 190.

Outside the context of telehealth services, physicians will bill an initial hospital care or initial nursing facility care code for their first visit during a patient's admission to the hospital or nursing facility in lieu of the consultation codes these physicians may have previously reported. The initial visit in a skilled nursing facility and nursing facility must be furnished by a physician except as otherwise permitted as specified in § 483.40(c)(4). In the nursing facility setting, an NPP who is enrolled in the Medicare program, and who is not employed by the facility, may perform the initial visit when the State law permits this. (See this exception in the Internet-Only Medicare Claims Processing Manual, Pub. 100–04, chapter 12, § 30.6.13A). An NPP, who is enrolled in the Medicare program is permitted to report the initial hospital care visit or new patient office visit, as appropriate, under current Medicare policy. Because of an existing CPT coding rule and current Medicare payment policy regarding the admitting physician, we will create a modifier to identify the admitting physician of record for hospital inpatient and nursing facility admissions. For operational purposes, this modifier will distinguish the admitting physician of record who oversees the patient's care from other physicians who may be furnishing specialty care. The admitting physician of record will be required to append the specific modifier to the initial hospital care or initial nursing facility care code which will identify him or her as the admitting physician of record who is overseeing the patient's care. Subsequent care visits by all physicians and qualified NPPs will be reported as subsequent hospital care codes and subsequent nursing facility care codes.

We believe the rationale for a differential payment for a consultation service is no longer supported because documentation requirements are now similar across all E/M services. To be consistent with OPPS policy, as noted above, we will pay only new and established office or other clinic visits under the PFS.

This proposed change would be implemented in a budget neutral

manner, meaning it would not increase or decrease PFS expenditures. We would make this change budget neutral for the work RVUs by increasing the work RVUs for new and established office visits by approximately 6 percent to reflect the elimination of the office consultation codes and the work RVUs for initial hospital and facility visits by approximately 2 percent to reflect the elimination of the facility consultation codes. We have crosswalked the utilization for the office consultation codes into the office visits and the utilization of the hospital and facility consultation codes into the initial hospital and facility visits. This change would be made budget neutral in the PE and malpractice RVU methodologies through the use of the new work RVUs and the crosswalked utilization. The PE and malpractice RVU methodologies are described elsewhere in this proposed rule.

We are soliciting comments on the proposal, described more fully above, to eliminate payment for all consultation services codes under the PFS and to allow all physicians to bill, in lieu of a consultation service code, an initial hospital care visit or initial nursing facility care visit for their first visit during a patient's admission to the hospital or nursing facility.

Additionally, we are soliciting comments on the proposal to create HCPCS G-codes to identify the telehealth delivery of initial inpatient consultations.

- F. Potentially Misvalued Services Under the Physician Fee Schedule
- 1. Valuing Services Under the Physician Fee Schedule

The American Medical Association's (AMA) Relative Value System Update Committee (RUC) provides recommendations to CMS for the valuation of new and revised codes, as well as codes identified as misvalued. On an ongoing basis, the AMA RUC's Practice Expense (PE) Subcommittee reviews direct PE (clinical staff, medical supplies, medical equipment) for individual services and examines the many broad and methodological issues relating to the development of PE relative value units (RVUs).

To address concerns expressed by stakeholders with regard to the process we use to price services paid under the PFS, the AMA RUC created the Five-Year Review Identification Workgroup. As we stated in the CY 2009 PFS proposed rule (73 FR 38582), the workgroup identified some potentially misvalued codes through several vehicles, namely, identifying codes with

site of service anomalies, high intraservice work per unit time (IWPUT), and services with high volume growth. The IWPUT is derived from components of the "building-block" approach, as described in the CY 2007 PFS proposed rule (71 FR 37172), and is used as a measure of service intensity. There were 204 services identified as misvalued last year and we plan to continue working with the AMA RUC to identify additional codes that are potentially misvalued. In the CY 2009 PFS proposed rule (73 FR 38586), we also listed approaches for the AMA RUC to utilize, namely, the review of the fastest growing procedure codes, review of Harvard-valued codes, and review of PE RVUs.

We plan to address the AMA RUC's recommendations from the February and April 2009 meetings for codes with site of service anomalies in the CY 2010 PFS final rule with comment period in a manner consistent with the way we address other AMA RUC recommendations. Specifically, we complete our own review of the AMA RUC recommendations; and then in the PFS final rule with comment period, we describe the AMA RUC's recommendations, indicate whether or not we accept them, and provide a rationale for our decision. The values for these services will be published as interim values for the next calendar

We believe that there are additional steps we can take to help address the issue of potentially misvalued services. In the CY 2009 PFS proposed rule, we identified approaches to address this issue including reviewing services often billed together and the possibility of expanding the multiple procedure payment reduction (MPPR) to additional nonsurgical procedures and the update of high cost supplies.

2. High Cost Supplies

In the CY 2009 PFS proposed rule (73 FR 38582), we proposed a process to update the prices associated with high cost supplies over \$150 every 2 years. We explained that we would need the cooperation of the medical community in obtaining typical prices in the marketplace. We also outlined examples of acceptable documentation. Although we received many thoughtful comments on the proposed process for updating high-cost supplies, as stated in the CY 2009 PFS final rule with comment period (73 FR 69882), we are continuing to examine alternatives on the best way to obtain accurate pricing information and will propose a revised process in future rulemaking.

3. Review of Services Often Billed Together and the Possibility of Expanding the Multiple Procedure Payment Reduction (MPPR) to Additional Nonsurgical Procedures

In the CY 2009 PFS final rule with comment period (73 FR 69882), we stated that we plan to perform a data analysis of nonsurgical CPT codes that are often billed together. This would identify whether there are inequities in PFS payments that are a result of variations between services in the comprehensiveness of the codes used to report the services, or in the payment policies applied to each (for example, global surgery and MPPRs). The rationale for the MPPR is that certain clinical labor activities, supplies, and equipment are not performed or furnished twice when multiple procedures are performed. We stated that we would consider developing a proposal either to bundle additional services or expand application of the MPPR to additional procedures.

Several specialty groups noted that the AMA RUC has already taken action to identify frequently occurring code pairs. The commenters support the AMA RUC's recommendation that CMS analyze data to identify nonsurgical CPT codes that are billed together 90 to 95 percent of the time. Additionally, the Medicare Payment Advisory Committee (MedPAC) requested that we consider duplicative physician work, as well as PE, in any expansion of the MPPR.

We plan to analyze codes furnished together more than 75 percent of the time, excluding E/M codes. We will analyze both physician work and PE inputs. If duplications are found, we will consider whether an MPPR or bundling of services is most appropriate. Any proposed changes will be made through rulemaking and be subject to public comment at a later date.

4. AMA RUC Review of Potentially Misvalued Codes

a. Site of Service Anomalies

The AMA RUC created the Five-Year Review Identification Workgroup to respond to concerns expressed by the MedPAC, the Congress, and other stakeholders regarding accurate pricing under the PFS. The workgroup identified potentially misvalued codes through several vehicles. For example, the workgroup focused on codes for which there have been shifts in the site of service (site of service anomalies), codes with a high intra-service work per unit of time (IWPUT), and codes that were high volume. There were 204 potentially misvalued services

identified in 2008 (see the CY 2009 PFS final rule with comment period (73 FR 69883)). These codes were reviewed by the AMA RUC and recommendations were submitted to CMS in 2008.

In the CY 2009 PFS final rule with comment period (73 FR 69883), we noted that although we would accept the AMA RUC valuation for these site of service anomaly codes for 2009, we recognized that many of them included deletion or modification of certain inputs such as hospital days, office visits, service times, and discharge day management services in the global period. We also indicated that we had concerns about the methodology used by the AMA RUC to review these services which may have resulted in removal of hospital days and deletion or reallocation of office visits without extraction of the associated RVUs from the valuation of the code. However, we stated that we believed the AMA RUCrecommended valuations were still a better representation of the resources used to furnish these services than the current ones. We also stated that we would continue to examine these codes and would consider whether it would be appropriate to propose additional changes in future rulemaking.

After further review of these codes, we believe it would be appropriate to propose further changes to several of the codes where the valuation has been adjusted to reflect changes in the site of service. Specifically, we are proposing changes to codes for which the AMA RUC review process deleted or reallocated pre-service and post service times, hospital days, office visits, and discharge day management services

without the extraction of the associated RVUs.

We believe the AMA RUCrecommended values do not reflect the extraction of the RVUs associated with deleted or reallocated pre-service and post-service times, hospital days, office visits, and discharge day management services. Therefore, we have recalculated the work RVUs based upon the AMA RUC-recommended inputs (that is, changes in pre-service and postservice times and associated E/M services). The proposed work RVUs for each CPT code shown in Table 8 were recalculated using the pre-AMA RUC review work RVUs as a starting point, and adjusting them for the addition or extraction of pre-service and postservice times, inpatient hospital days, discharge day management services and outpatient visits as recommended by the AMA RUC. We used the following methodology:

- 1. For each CPT code noted in Table 8, we separated out each component (that is, pre-service time, intra-service time, post-service time, inpatient hospital day, discharge day management services, and outpatient visits) that comprised the entire work RVUs for the service.
- 2. We calculated the incremental difference between the pre-service and post-service time from before and after the AMA RUC review, and multiplied that difference by an IWPUT intensity factor of 0.0224, which is a constant in the IWPUT equation. For example, if the pre-service time prior to the AMA RUC review was 75 minutes and, following its review, the AMA RUC recommended an increase in pre-service time to 85 minutes, we multiplied the difference

- (10 minutes) by 0.0224 to determine the RVUs associated with the increase in pre-service time, and then added that number of RVUs to the pre-AMA RUC evaluation work RVU.
- 3. We then added or removed the work RVUs associated with the extraction or reallocation of each inpatient hospital day, outpatient visit or discharge day management service as appropriate. For example, assume that prior to the AMA RUC review a code was assigned:
- 1 inpatient hospital day (currently billed using CPT code 99231 and assigned 0.76 work RVUs);
- 1 discharge day management service (currently billed using CPT code 99238 and assigned 1.28 work RVUs); and
- 2 outpatient visits (currently billed using 99212 and assigned 0.45 work RVUs).

After the AMA RUC review, the inpatient hospital day and discharge day management service were removed. To account for the removal of these services, we would have subtracted 0.76 work RVUs (represents the removal of the work RVUs for 1 inpatient hospital day) and 1.28 work RVUs (represents the removal of the work RVUs for 1 discharge day management service) from the pre-AMA RUC review work RVUs in order to develop the CMS proposed work RVUs.

The methodology discussed above was used for each code noted in Table 8 and reflects the extraction of the RVUs associated with deleted or reallocated hospital days, office visits, discharge day management services, and preservice and post-service times based upon the AMA RUC recommendations.

TABLE 8: CY 2010 CMS PROPOSED WORK RVUS—Continued

Using the methodology described above, the adjustments to work RVUs for CPT codes 62355, 62360, 62361, 62362, and 62365 would result in negative valuation: 62355 = -1.96; 62360 = -2.31; 62361 = -2.42; 62362 = -2.46; and 62365 = -1.88. For these codes, we are requesting that the AMA RUC re-review the entire family of associated codes and in the interim will maintain the AMA RUC recommended values until a methodology is developed to address codes that result in negative valuation when the methodology described above is utilized.

In addition to the proposed revisions to the AMA RUC-recommended RVUs described above, we encourage the AMA RUC to utilize the building block methodology as described in the CY 2007 PFS proposed rule (71 FR 37172) in the future when revaluing codes with site of service anomalies. We recognize that the AMA RUC looks at families of codes and may assign RVUs based on a particular code ranking within the family. However, the relative value scale requires each service to be valued based on the resources used in furnishing the service.

We are also seeking public comment on alternative methodologies that could be utilized to establish work RVUs for codes that would have a negative valuation under the methodology we used for the proposed revisions to the AMA RUC-recommended values described above.

b. "23-Hour" Stay

For services that are performed in the outpatient setting and require a hospital stay of less than 24 hours, we consider this an outpatient service and recognize the additional time associated with the patient evaluation and assessment in the post-service period. We are requesting that the AMA RUC include the additional minutes in their recommendations to CMS. We do not believe the current minutes assigned in the post-service period accurately reflects the total time required for evaluation and assessment of the patient. We believe the use of E/M codes

for services rendered in the post-service period for procedures requiring less than a 24-hour hospital stay would result in overpayment for pre-service and intraservice work that would not be provided. Therefore, we will not allow an additional E/M service to be billed for care furnished during the post procedure period when care is furnished for an outpatient service requiring less than a 24-hour hospital stay.

5. Establishing Appropriate Relative Values for Physician Fee Schedule Services

In MedPAC's March 2006 Report to Congress, MedPAC made a number of recommendations to improve the review of the relative values for PFS services. Since that time, we have taken significant action to improve the accuracy of the RVUs. As MedPAC noted in its recent March 2009 Report to Congress, "CMS and the AMA RUC have taken several steps to improve the review process" in the intervening years since those initial recommendations. Many of our efforts to improve the accuracy of RVUs have also resulted in substantial increases in the payments for primary care services, which was one of the motivations for MedPAC's recommendations.

- We completed the most recent Five-Year Review of work RVUs, resulting in an increase in over 25 percent to the work RVUs for primary care services.
- We significantly revised the methodology for determining PE RVUs, resulting in more than a 5 percent increase for primary care services.
- We improved our processes for identifying potentially misvalued services by engaging in an ongoing review that includes screens for rapidly growing services and services with substantial shifts in site of service. We also identified approaches to address the issue of potentially misvalued services including reviewing services often billed together and the possibility of expanding the multiple procedure payment reduction (MPPR) to additional

nonsurgical procedures and the update of high cost supplies.

• As discussed elsewhere in this proposed rule, we are proposing a number of improvements to the calculation and establishment of the work, PE, and malpractice RVUs that would result in overall payment increases to primary care specialties of between 6 percent and 8 percent in CY 2010. These changes include a 6 percent increase in the work RVUs for office visits as a result of our proposal regarding consultation services; our proposed use of more accurate specialty-specific survey data on physician practice costs; our proposal to revise the utilization rate assumption for certain equipment; and our proposed use of updated and expanded malpractice premium data in the calculation of the malpractice RVUs.

MedPAC has in the past also recommended the establishment of a group panel of experts separate from the AMA RUC to review RVUs. This original March 2006 recommendation was summarized in its March 2008 Report to Congress:

"We also recommended that CMS establish a group of experts, separate from the AMA RUC, to help the agency conduct these and other activities. This recommendation was intended not to supplant the AMA RUC but to augment it. To that end, the panel should include members who do not directly benefit from changes to Medicare's payment rates, such as experts in medical economics and technology diffusion and physicians who are employed by managed care organizations and academic medical centers."

The idea of a group of experts separate from the AMA RUC, to help the agency improve the review of relative values raises a number of issues. We seek broad public input on the following questions and other aspects of such an approach:

- How could input from a group of experts best be incorporated into existing processes of rulemaking and agency receipt of AMA RUC recommendations?
- What specifically would be the roles of a group of experts (for example,

¹ All CPT codes copyright 2008 American Medical Association.

identify potentially misvalued services, provide recommendations on valuation of specified services, review AMA RUC recommendations selected by the Secretary, etc.)?

- What should be the composition of a group of experts? How could such a group provide expertise on services that clinician group members do not furnish?
- How would such a group relate to the AMA RUC and existing Secretarial advisory panels such as the Practicing Physician Advisory Committee?

Also of interest are comments on the resources required to establish and maintain such a group. As MedPAC noted in its March 2006 Report with respect to the group of experts "we recognize that these recommendations will increase demands on CMS and urge the Congress to provide the agency with the financial resources and administrative flexibility needed to undertake them."

We welcome comments on these topics, as well as others of interest to the stakeholder community. We will consider these comments as we consider the establishment of a group of experts to assist us in our ongoing reviews of the PFS RVUs.

G. Issues Related to the Medicare Improvements for Patients and Providers Act of 2008 (MIPPA)

This section addresses certain provisions of the Medicare Improvements for Patients and Providers Act of 2008 (MIPPA) (Pub. L. 110–275). We are proposing to revise our policies and regulations as described below in order to conform them to the statutory amendments.

1. Section 102: Elimination of Discriminatory Copayment Rates for Medicare Outpatient Psychiatric Services

Prior to the enactment of the MIPPA, section 1833(c) of the Act provided that for expenses incurred in any calendar year in connection with the treatment of mental, psychoneurotic, and personality disorders of an individual who is not an inpatient of a hospital, only 62½ percent of such expenses are considered to be incurred under Medicare Part B when determining the amount of payment and application of the Part B deductible in any calendar year. This

provision is known as the outpatient mental health treatment limitation (the limitation), and has resulted in Medicare paying only 50 percent of the approved amount for outpatient mental health treatment, rather than the 80 percent that is paid for most other outpatient services.

Section 102 of the MIPPA amends the statute to phase out the limitation on recognition of expenses incurred for outpatient mental health treatment, which will result in an increase in the Medicare Part B payment for outpatient mental health services to 80 percent by CY 2014. When this section is fully implemented in 2014, Medicare will pay for outpatient mental health services at the same level as other Part B services. For CY 2010, section 102 of the MIPPA provides that Medicare will recognize 683/4 percent of expenses incurred for outpatient mental health treatment, which translates to a payment of 55 percent of the Medicareapproved amount. Section 102 of the MIPPA specifies that the phase out of the limitation will be implemented as shown in Table 9 (provided that the patient has satisfied his or her deductible).

TABLE 9—IMPLEMENTATION OF SECTION 102 OF THE MIPPA

| Calendar year | Recognized incurred expenses (in percent) | Patient pays (in percent) | Medicare pays (in percent) |
|----------------------------------|-------------------------------------------|---------------------------|----------------------------|
| CY 2009 and prior calendar years | 62.50 | 50 | 50 |
| CY 2010 and CY 2011 | 68.75 | 45 | 55 |
| CY 2012 | 75.00 | 40 | 60 |
| CY 2013 | 81.25 | 35 | 65 |
| CY 2014 | 100.00 | 20 | 80 |

At present, § 410.155(c) of the regulations includes examples to illustrate application of the current limitation. We are proposing to remove these examples from our regulations and, instead, to provide examples in this proposed rule, in our manual, and under provider education materials as needed. The following examples illustrate the application of the

limitation in various circumstances as it is gradually reduced under section 102 of the MIPPA. We note that although we have used the CY 2009 Part B deductible of \$135 for purposes of the examples below, the actual deductible amount for CY 2010 and future years will be subject to change.

Example #1: In 2010, a clinical psychologist submits a claim for \$200 for

outpatient treatment of a patient's mental disorder. The Medicare-approved amount is \$180. Since clinical psychologists must accept assignment, the patient is not liable for the \$20 in excess charges. The patient previously satisfied the \$135 annual Part B deductible. The limitation reduces the amount of incurred expenses to 68¾ percent of the approved amount. Medicare pays 80 percent of the remaining incurred expenses. The Medicare payment and patient liability are computed as shown in Table 10.

TABLE 10—EXAMPLE #1—CY 2010

| 1. Actual charges | \$200.00 |
|-----------------------------------------------------------------|----------|
| 2. Medicare-approved amount | 180.00 |
| 3. Medicare incurred expenses (0.6875 × line 2)* | 123.75 |
| 4. Unmet deductible | 0.00 |
| 5. Remainder after subtracting deductible (line 3 minus line 4) | 123.75 |
| 6. Medicare payment (0.80 × line 5) | 99.00 |
| 7. Patient liability (line 2 minus line 6) | 81.00 |

^{*}The recognized incurred expenses for 2010 are 683/4 percent.

Example #2: In 2012, a clinical social worker submits a claim for \$135 for outpatient treatment of a patient's mental disorder. The Medicare-approved amount is

\$120. Since clinical social workers must accept assignment, the patient is not liable for the \$15 in excess charges. The limitation reduces the amount of incurred expenses to

75 percent of the approved amount. The patient previously satisfied \$70 of the \$135 annual Part B deductible, leaving \$65 unmet (see Table 11).

TABLE 11—EXAMPLE #2—CY 2012

| 1 Actual charges | \$135.00 |
|-----------------------------------------------------------------|----------|
| 1. Actual charges | φ133.00 |
| 2. Medicare-approved amount | 120.00 |
| 3. Medicare incurred expenses (0.75 × line 2)* | 90.00 |
| 4. Unmet deductible | 65.00 |
| 5. Remainder after subtracting deductible (line 3 minus line 4) | 25.00 |
| 6. Medicare payment (0.80 × line 5) | 20.00 |
| 7. Patient liability (line 2 minus line 6) | 100.00 |

^{*}The recognized incurred expenses for CY 2012 are 75 percent.

Example #3: In CY 2013, a physician who does not accept assignment submits a claim for \$780 for services in connection with the treatment of a mental disorder that did not

require inpatient hospitalization. The Medicare-approved amount is \$750. Because the physician does not accept assignment, the patient is liable for the \$30 in excess charges. The patient has not satisfied any of the \$135 Part B annual deductible (*see* Table

TABLE 12—EXAMPLE #3—CY 2013

| 1. Actual charges | \$780.00 |
|-----------------------------------------------------------------|----------|
| 2. Medicare-approved amount | 750.00 |
| 3. Medicare incurred expenses (0.8125 × line 2)* | 609.38 |
| 4. Unmet deductible | 135.00 |
| 5. Remainder after subtracting deductible (line 3 minus line 4) | 474.38 |
| 6. Medicare payment (0.80 × line 5) | 379.50 |
| 7. Patient liability (line 1 minus line 6) | 400.50 |

^{*}The recognized incurred expenses for CY 2013 are 811/4 percent.

Example #4: A patient's Part B expenses during CY 2014 are for a physician's services in connection with the treatment of a mental disorder that initially required inpatient hospitalization, with subsequent physician services furnished on an outpatient basis. The patient has not satisfied any of the \$135

Part B deductible. The physician accepts assignment and submits a claim for \$780. The Medicare-approved amount is \$750. Since the limitation will be completely phased out as of January 1, 2014, the entire \$750 Medicare-approved amount is recognized as the total incurred expenses

because such expenses are no longer reduced. Also, there is no longer any distinction between mental health services the patient receives as an inpatient or outpatient (see Table 13).

TABLE 13—EXAMPLE #4—CY 2014

| 1. Actual charges | \$780.00 |
|-----------------------------------------------------------------|----------|
| 2. Medicare-approved amount | 750.00 |
| 3. Medicare incurred expenses (1.00 × line 2) * | 750.00 |
| 4. Unmet deductible | 135.00 |
| 5. Remainder after subtracting deductible (line 3 minus line 4) | 615.00 |
| 6. Medicare payment (0.80 × line 5) | 492.00 |
| 7. Beneficiary liability (line 2 minus line 6) | 258.00 |

^{*}The recognized incurred expenses for CY 2014 are 100 percent.

Section 102 of the MIPPA did not make any other changes to the outpatient mental health treatment limitation. Therefore, other aspects of the limitation will remain unchanged during the transition period between CYs 2010 and 2014. The limitation will continue to be applied as it has been in accordance with our regulation at § 410.155(b) which specifies that the limitation applies to outpatient treatment of a mental, psychoneurotic, or personality disorder, identified under the International Classification of Diseases (ICD) diagnosis code range 290-319. We use the place of service

code, and the procedure code to identify services to which the limitation applies.

Additionally, we are proposing to make technical corrections to § 410.155(b)(2) in order to update and clarify the services to which the limitation does not apply. Our proposed technical changes are as follows:

• Under § 410.155(b)(2)(ii), revise the regulation to specify the HCPCS code, M0064 (or any successor code), that represents the statutory exception to the limitation for brief office visits for the sole purpose of monitoring or changing drug prescriptions used in mental health treatment.

- At § 410.155(b)(2)(iv), we are proposing to revise the regulation to add neuropsychological tests and diagnostic psychological tests to the examples of diagnostic services that are not subject to the limitation when performed to establish a diagnosis.
- Under § 410.155(b)(2)(v), we are proposing to revise the regulation to specify the CPT code 90862 (or any successor code) that represents pharmacologic management services to which the limitation does not apply when furnished to treat a patient who is diagnosed with Alzheimer's disease or a related disorder.

Finally, we are proposing to add a new paragraph (c) to § 410.155 that provides a basic formula for computing the limitation during the phase-out period from CY 2010 through CY 2013, as well as after the limitation is fully removed from CY 2014 onward.

2. Section 131: Physician Payment, Efficiency, and Quality Improvements— Physician Quality Reporting Initiative (PQRI)

a. Program Background and Statutory Authority

The Physician Quality Reporting Initiative (PQRI) is a voluntary reporting program that provides an incentive payment to eligible professionals who satisfactorily report data on quality measures for covered professional services during a specified reporting period. Under section 1848(k)(3)(B) of the Act, the term "eligible professional" means any of the following: (1) A physician; (2) A practitioner described in section 1842(b)(18)(C); (3) A physical or occupational therapist or a qualified speech-language pathologist; (4) A qualified audiologist. The PQRI was first implemented in 2007 as a result of section 101 of Division B of the Tax Relief and Health Care Act of 2006—the Medicare Improvements and Extension Act of 2006 (Pub. L. 109-432) (MIEA-TRHCA), which was enacted on December 20, 2006. The PQRI was extended and further enhanced as a result of the Medicare, Medicaid, and SCHIP Extension Act of 2007 (Pub. L. 110-173) (MMSEA), which was enacted on December 29, 2007, and the MIPPA, which was enacted on July 15, 2008. Changes to the PQRI as a result of these laws, as well as information about the PQRI in 2007, 2008, and 2009 are discussed in detail in the CY 2008 PFS proposed rule (72 FR 38196 through 38204), CY 2008 PFS final rule with comment period (72 FR 66336 through 66353), CY 2009 PFS proposed rule (73 FR 38558 through 38575), and CY 2009 PFS final rule with comment period (73 FR 69817 through 69847). In addition, detailed information about the PQRI is available on the CMS Web site at http://www.cms.hhs.gov/PQRI.

b. Incentive Payments for the 2010 PQRI

For 2010, section 1848(m)(1)(B) of the Act authorizes the Secretary to provide an incentive payment equal to 2.0 percent of the estimated total allowed charges (based on claims submitted not later than 2 months after the end of the reporting period) for all covered professional services furnished during the reporting period for 2010. Although PQRI incentive payments are only

authorized through 2010 under section 1848(m)(1)(A) of the Act, section 1848(k)(2)(C) of the Act provides for the use of consensus-based quality measures for the PQRI for 2010 and subsequent years.

The PQRI incentive payment amount is calculated using estimated allowed charges for all covered professional services furnished under the PFS, not just those charges associated with the reported quality measures. "Allowed charges" refers to total charges, including the beneficiary deductible and coinsurance, and is not limited to the 80 percent paid by Medicare or the portion covered by Medicare where Medicare is secondary payer. Amounts billed above the PFS amounts for assigned and non-assigned claims will not be included in the calculation of the incentive payment amount. In addition, since, by definition under section 1848(k)(3)(A)) of the Act, "covered professional services" are limited to services for which payment is made under, or is based on, the PFS and which are furnished by an eligible professional, other Part B services and items that may be billed by eligible professionals but are not paid under or based upon the Medicare Part B PFS are not included in the calculation of the incentive payment amount.

Under section 1848(m)(6)(C) of the Act, the "reporting period" for the 2008 through 2011 PQRI is defined to be the entire year, but the Secretary is authorized to revise the reporting period for years after 2009 if the Secretary determines such "revision is appropriate, produces valid results on measures reported, and is consistent with the goals of maximizing scientific validity and reducing administrative burden.'

We are also required by section 1848(m)(5)(F) of the Act to establish alternative criteria for satisfactorily reporting and alternative reporting periods for registry-based reporting and for reporting measures groups. Therefore, eligible professionals who meet the proposed alternative criteria for satisfactorily reporting for registrybased reporting and for reporting measures groups for the proposed 2010 alternative reporting periods for registry-based reporting and for reporting measures groups would also be eligible to earn an incentive payment equal to 2.0 percent of the estimated total Medicare Part B PFS allowed charges for all covered professional services furnished by the eligible professional during the proposed alternative reporting periods for 2010 PQRI registry-based reporting or for reporting measures groups.

The proposed PQRI reporting options for an individual eligible professional seeking to qualify for a 2010 PQRI incentive payment (that is, the proposed PQRI reporting mechanisms, proposed reporting periods, and proposed criteria for satisfactory reporting, including the proposed alternative reporting periods and alternative criteria for satisfactorily reporting for registry-based reporting and for reporting measures groups) are addressed in sections II.G.2.c. through II.G.2.f. of this proposed rule. The proposed 2010 PQRI quality measures and proposed 2010 PQRI measures groups are discussed in section II.G.2.i. of this proposed rule.

Prior to 2010, the PQRI was an incentive program in which determination of whether an eligible professional satisfactorily reported quality data was made at the individual professional level, based on the National Provider Identifier (NPI). Although the incentive payments were made to the practice(s) represented by the Tax Identification Number (TIN) to which payments are made for the individual professional's services, there were no incentive payments made to the group practice based on a determination that the group practice, as a whole, satisfactorily reported PQRI quality measures data. To the extent individuals (based on the individuals' NPIs) satisfactorily reported data on PQRI quality measures that were associated with more than one practice or TIN, the determination of whether an eligible professional satisfactorily reported PQRI quality measures data was made for each unique TIN/NPI combination. Therefore, the incentive payment amount was calculated for each unique TIN/NPI combination and payment was made to the holder of the applicable TIN.

However, section 1848(m)(3)(C)(i) of the Act requires that by January 1, 2010, the Secretary establish and have in place a process under which eligible professionals in a group practice (as defined by the Secretary) shall be treated as satisfactorily submitting data on quality measures for the PQRI for covered professional services for a reporting period, if, in lieu of reporting measures under subsection (k)(2)(C), the group practice reports measures determined appropriate by the Secretary, such as measures that target high-cost chronic conditions and preventive care, in a form and manner, and at a time, specified by the Secretary. Therefore, beginning with the 2010 PQRI, group practices who satisfactorily submit data on quality measures also would be eligible to earn an incentive payment equal to 2.0 percent of the

estimated total allowed charges for all covered professional services furnished by the group practice during the applicable reporting period. As required by section 1848(m)(3)(C)(iii) of the Act, payments to a group practice by reason of the process described above shall be in lieu of the PQRI incentive payments that would otherwise be made to eligible professionals in the group practice for satisfactorily submitting data on quality measures. Therefore, an individual eligible professional who is participating in the group practice reporting option as a member of a group practice would not be able to separately earn a PQRI incentive payment as an individual eligible professional.

The process proposed to be used to determine whether a group practice satisfactorily submits data on quality measures for the 2010 PQRI is described in section II.G.2.g. of this proposed rule. The proposed measures on which a group practice would need to report in order to be treated as satisfactorily submitting data on quality measures for the 2010 PQRI are discussed in section II.G.2.j. of this proposed rule.

c. Proposed 2010 Reporting Periods for Individual Eligible Professionals

As we indicated above, section 1848(m)(6)(C) of the Act defines "reporting period" for 2010 to be the entire year. Section 1848(m)(6)(C)(ii) of the Act, however, authorizes the Secretary to revise the reporting period for years after 2009 if the Secretary determines such revision is appropriate, produces valid results on measures reported, and is consistent with the goals of maximizing scientific validity and reducing administrative burden. To be consistent with section 1848(m)(6)(C) of the Act and with prior years, we propose the 2010 PQRI reporting period for the reporting of individual PQRI quality measures through claims or a qualified electronic health record (EHR) (see section II.G.2.d. of this proposed rule for discussion of proposed 2010 PQRI reporting mechanisms) will be the entire year (that is, January 1, 2010 through December 31, 2010).

We also considered exercising our authority to revise the reporting period for claims-based reporting of individual measures by proposing to add an alternative reporting period beginning July 1, 2010 for claims-based reporting of individual measures. Doing so would make the reporting periods for claims-based reporting of individual measures consistent with the alternative reporting periods for registry-based reporting that have been in place since the 2008 PQRI. This would allow an eligible

professional to earn a PORI incentive payment equal to 2.0 percent of his or her estimated allowed charges for covered professional services furnished for the last half of 2010 if he or she satisfactorily reports data on individual PQRI quality measures through claims during the last half of 2010. We received input from a few stakeholders in support of a partial year reporting period for claims-based reporting of individual measures to give more eligible professionals the opportunity to begin reporting later in the year. Other stakeholders recommended that we offer the same reporting periods for all reporting mechanisms. We agree that having the same reporting periods for all reporting mechanisms may be less complex. We also agree that the addition of a 6-month reporting period may facilitate participation in PORI for certain eligible professionals. However, we do not believe that making a 6month reporting period available would serve to enhance the validity of results on measures reported or to maximize scientific validity as required under section 1848(m)(6)(C)(ii) of the Act. In addition, given our desire to transition from the use of the claims-based reporting mechanism as the primary reporting mechanism for clinical quality measures for PQRI after 2010 to rely more heavily on registry-based reporting (see section II.G.2.d. of this proposed rule for further discussion), we do not believe it appropriate to add a new 6month reporting period for claims-based reporting of individual measures. Given the fact that we seek to lessen reliance on the claims-based reporting mechanism for the PQRI after 2010, we believe the cost of adding a 6-month reporting period for claims-based reporting of individual measures outweighs any added flexibility that eligible professionals may receive in the short-term.

Nevertheless, we invite comments on the decision to not propose a 6-month reporting period for claims-based reporting of individual PQRI quality measures.

In addition, section 1848(m)(5)(F) of the Act requires, for 2008 and subsequent years, the Secretary to establish alternative reporting periods for reporting groups of measures and for registry-based reporting. To satisfy the requirements of section 1848(m)(5)(F) of the Act and to maintain program stability, we propose to retain the 2 alternative reporting periods from the 2008 and 2009 PQRI for reporting measures groups and for registry-based reporting: (1) The entire year; and (2) a 6-month reporting period beginning July 1. Therefore, for 2010, the proposed

alternative reporting periods for reporting measures groups and for registry-based reporting are: (1) January 1, 2010 through December 31, 2010; and (2) July 1, 2010 through December 31, 2010. We note that the 6-month reporting period, beginning July 1, 2010, is proposed to be available for reporting on measures groups and for reporting using the registry-based reporting mechanism only. For an eligible professional who satisfactorily reports measures groups or through the registrybased reporting mechanism for the 6month reporting period, the eligible professional would qualify to earn a PQRI incentive payment equal to 2.0 percent of his or her total estimated allowed charges for covered professional services furnished between July 1, 2010 and December 31, 2010 only. The incentive payment would not be calculated based on the eligible professional's charges for covered professional services for the entire year.

d. Proposed 2010 PQRI Reporting Mechanisms for Individual Eligible Professionals

When the PQRI was first implemented in 2007, there was only 1 reporting mechanism available to submit data on PQRI quality measures. For the 2007 PQRI, the only way that eligible professionals could submit data on PQRI quality measures was by reporting the appropriate quality data codes on their Medicare Part B claims (claimsbased reporting). For the 2008 PQRI, we added a second reporting mechanism as required by section 1848(k)(4) of the Act, so that eligible professionals could submit data on PQRI quality measures to a qualified PQRI registry and request the registry to submit PQRI quality measures results and numerator and denominator data on the 2008 PQRI quality measures or measures groups on their behalf (registry-based reporting). For the 2009 PQRI, we retained the 2 reporting mechanisms used in the 2008 PQRI (that is, claims-based reporting and registry-based reporting) for reporting individual PQRI quality measures and for reporting measures

To promote the adoption of EHRs, we also conducted limited testing of a third reporting mechanism for the 2008 PQRI, which was the submission of clinical quality data extracted from an EHR, or the EHR-based reporting mechanism. No incentive payment was available to those eligible professionals who participated in testing the EHR-based reporting mechanism. In the CY 2009 PFS proposed rule (73 FR 38564 through 38565), we described our plans to test the submission of clinical quality

data extracted from qualified EHR products for five 2008 PORI measures and proposed to accept PQRI data from EHRs and to pay PQRI incentive payments based on that submission for a limited subset of the proposed 2009 PQRI quality measures. However, as described in the CY 2009 PFS final rule with comment period (73 FR 69830), we did not finalize our proposal to allow eligible professionals to submit clinical quality data extracted from EHRs for purposes of receiving a PQRI incentive payment for 2009. Since the 2008 EHR testing process was not complete at the time of publication of the CY 2009 PFS final rule, we instead opted to continue to test the submission of clinical quality data extracted from EHRs in 2009 and provide no incentive payment to those eligible professionals participating in testing the EHR-based reporting mechanism in 2009.

For the 2010 PQRI, we are proposing to retain the claims-based reporting mechanism and the registry-based reporting mechanism. In addition, we are again proposing for the 2010 PQRI to accept PQRI quality measures data extracted from a qualified EHR product for a limited subset of the proposed 2010 PQRI quality measures, as identified in Table 20, contingent upon the successful completion of our 2009 EHR data submission testing process and a determination based on that testing process that accepting data from EHRs on quality measures for the 2010 PQRI is practical and feasible. We will make the determination as to whether accepting data from EHRs on quality measures is practical and feasible for the 2010 PQRI prior to publication of the CY 2010 PFS final rule with comment period. We will indicate in the CY 2010 PFS final rule with comment period whether we intend to finalize this proposal. If we finalize this proposal, then, unlike in prior years, an eligible professional would be able to earn a PQRI incentive payment through the EHR-based reporting mechanism in 2010.

We seek to offer more reporting mechanisms because we recognize that 1 mode of quality reporting does not suit all practices and our experience with the registry-based reporting mechanism thus far has been favorable. While the availability of multiple reporting mechanisms should increase opportunities for eligible professionals to satisfactorily report quality data for the PQRI, we also recognize that there are a number of limitations associated with claims-based reporting. On one hand, claims submission is available to nearly all eligible professionals. On the other hand, submission of quality data

on claims has certain drawbacks since the claims processing system was developed for billing purposes and not for the submission of quality data. As we noted in the CY 2009 PFS final rule with comment period (73 FR 69833), for example, measures with complex specifications, such as those that require multiple diagnosis codes are not as conducive to claims-based reporting and may be associated with a greater number of invalidly reported quality data codes. Similarly, when multiple measures share the same codes it may be difficult to determine which measure(s) the eligible professional intended to report through claims.

We believe that EHR-based reporting is a viable option for overcoming the limitations associated with claims-based reporting of quality measures. Therefore, we propose to add an EHR-based reporting mechanism for the 2010 PQRI in order to promote the adoption and use of EHRs and to provide both eligible professionals and CMS experience on EHR-based quality reporting.

Furthermore, on February 17, 2009, the President signed into law the American Recovery and Reinvestment Act (the Recovery Act) (Pub. L. 111-5). Section 4101(a) of the Health Information Technology for Economic and Clinical Health (HITECH) Act (Title IV of Division B of the Recovery Act, together with Title XIII of Division A of the Recovery Act), which amends section 1848 of the Act to add new subsection (o), authorizes incentive payments under Medicare for certain eligible professionals who are "meaningful EHR users" beginning in 2011. However, the provisions in this proposed rule do not implement any HITECH Act statutory provisions. While our efforts to encourage the adoption and use of EHRs through testing EHRbased data submission in the 2008 and 2009 PQRI and our proposal to add an EHR-based reporting mechanism for the purpose of receiving a PQRI incentive payment for the 2010 PQRI could potentially provide invaluable experience and serve as a foundation for establishing the capacity for eligible professionals to send, and for CMS to receive, data on quality measures via EHRs, the provisions of the HITECH Act will be implemented in future notice and comment rulemaking.

In summary, we propose that for 2010, an eligible professional may choose to report data on PQRI quality measures through claims, to a qualified registry (for the qualification requirements for registries, see section II.G.2.i.(4) of this proposed rule), or through a qualified EHR product (for the

qualification requirements for EHR vendors and their products, see section II.G.2.i.(5) of this proposed rule). Depending on which PQRI individual quality measures or measures groups an eligible professional selects, however, one or more of the proposed reporting mechanisms may not be available for reporting a particular 2010 PQRI individual quality measure or measures group. The proposed 2010 reporting mechanisms through which each proposed 2010 PQRI individual quality measure and measures group could be reported is identified in Tables 14 through 15. We invite comments on the proposed reporting mechanisms for the 2010 PQRI, including our proposal to add an EHR-based reporting mechanism to the 2010 PQRI, contingent upon the successful completion of our 2009 EHR data submission testing process and a determination that accepting data from EHRs on quality measures for the 2010 PQRI is practical and feasible.

While we propose to retain the claims-based reporting mechanism for 2010, we note that we are considering significantly limiting the claims-based mechanism of reporting clinical quality measures for the PQRI after 2010. This would be contingent upon there being an adequate number and variety of registries available and/or EHR reporting options. Potentially, we would retain claims-based reporting in years after 2010 principally for the reporting of structural measures, such as Measure #124 Health Information Technology (HIT): Adoption/Use of Electronic Health Records (EHR), and circumstances where claims-based reporting is the only available mechanism for certain categories of eligible professionals to report on PQRI quality measures.

Reducing our reliance on the claimsbased reporting mechanism after 2010 will allow us and eligible professionals to devote available resources to maximizing the potential of registries and EHRs for quality measurement reporting. Both mechanisms hold the promise of more sophisticated and timely reporting on clinical quality measures. Clinical data registries allow the collection of more detailed data, including outcomes, without the necessity of a single submission contemporaneously with claims billing, which overcomes some of the limitations of the claims-based reporting mechanism. Registries can also provide feedback and quality improvement information based on reported data. Finally, clinical data registries can also receive data from EHRs, and therefore, serve as an alternative means to reporting clinical quality data extracted

from an EHR. As we continue to qualify additional registries, we believe that there will be a sufficient number of qualified PQRI registries by 2011 to make it possible to reduce or even discontinue the claims-based reporting mechanism for most measures after 2010. We invite comments on our intent to lessen our reliance on the claims-based reporting mechanism for the PQRI beyond 2010.

Řegardless of the reporting mechanism chosen by an eligible professional, there is no requirement for the eligible professional to sign up or register to participate in the PQRI. However, there may be some requirements for participation through a specific reporting mechanism that are unique to that particular reporting mechanism. In addition to the criteria for satisfactory reporting of individual measures and measures groups described in sections II.G.2.e. and II.G.2.f., respectively, of this proposed rule, eligible professionals must ensure that they meet all requirements for their chosen reporting mechanism.

(1) Requirements for Individual Eligible Professionals Who Choose the Claims-Based Reporting Mechanism

For eligible professionals who choose to participate in the PORI by submitting data on individual quality measures or measures groups through the claimsbased reporting mechanism, the only requirement associated with claimsbased reporting that we are proposing apart from the proposed criteria for satisfactory reporting of individual measures and measures described below in sections II.G.2.e. and II.G.2.f., respectively, of this proposed rule, is the submission of the appropriate PQRI quality data codes on the professionals' Medicare Part B claims. An eligible professional would be permitted to submit the quality data codes for the eligible professional's selected individual PQRI quality measures or measures group at any time during the 2010 reporting period. Please note, however, that as required by section 1848(m)(1)(A) of the Act, all claims for services furnished between January 1, 2010 and December 31, 2010 must be processed by no later than February 28, 2011 to be included in the 2010 PQRI analysis.

(2) Requirements for Individual Eligible Professionals Who Choose the Registry-Based Reporting Mechanism

In order to report quality measures results and numerator and denominator data on the 2010 PQRI individual quality measures or measures group through a qualified clinical registry, we

propose that eligible professionals would need to enter into and maintain an appropriate legal arrangement with a qualified 2010 PQRI registry. Such arrangements would provide for the registry's receipt of patient-specific data from the eligible professional and the registry's disclosure of quality measures results and numerator and denominator data on PQRI quality measures or measures groups on behalf of the eligible professional to CMS. Thus, the registry would act as a Health Insurance Portability and Accountability Act of 1996 (Pub. L. 104-191) (HIPAA) Business Associate and agent of the eligible professional. Such agents are referred to as "data submission vendors." The "data submission vendors" would have the requisite legal authority to provide clinical quality measures results and numerator and denominator data on individual quality measures or measures groups on behalf of the eligible professional for the PQRI. The registry, acting as a data submission vendor, would submit registry-derived measures information to the CMS designated database for the PQRI, using a CMS-specified record layout. The record layout will be provided to the registry by CMS.

To maintain compliance with applicable statutes and regulations, our program and its data system must maintain compliance with the HIPAA requirements for requesting, processing, storing, and transmitting data. Eligible professionals that conduct HIPAA covered transactions also must maintain compliance with the HIPAA requirements.

Éligible professionals choosing to participate in PQRI by submitting quality measures results and numerator and denominator data on PQRI individual quality measures or measures groups through the registry-based reporting mechanism for 2010 would need to select a qualified PQRI registry and submit information on PQRI individual quality measures or measures groups to the selected registry in the form and manner and by the deadline specified by the registry.

The process and requirements that we propose to use to determine whether a registry is qualified to submit quality measures results and numerator and denominator data on PQRI quality measures or measures groups on an eligible professional's behalf in 2010 are described in section II.G.2.d. of this proposed rule. We will post on the PQRI section of the CMS Web site at http://www.cms.hhs.gov a list of qualified registries for the 2010 PQRI, including the registry name, contact information, and the 2010 measure(s) and/or

measures group(s) for which the registry is qualified and intends to report. We propose to post the names of 2010 PQRI qualified registries in 2 phases. In either event, even though a registry is listed as "qualified," we cannot guarantee or assume responsibility for the registry's successful submission of PQRI quality measures results and numerator and denominate data on PQRI quality measures or measures groups on behalf of eligible professionals.

In the first phase, we anticipate that by December 31, 2009, we will be able to, at minimum, post a list of those registries qualified for the 2010 PQRI based on: (1) Being a qualified registry for the 2008 and 2009 PQRI that successfully submitted 2008 PQRI quality measures results and numerator and denominator data on the quality measures; (2) having received a letter indicating their continued interest in being a PQRI registry for 2010; and (3) the registry's compliance with the 2010 PQRI registry requirements. By posting this first list of qualified registries for the 2010 PQRI, we seek to make available the names of registries that can be qualified at the start of the 2010 reporting period. We do this to accommodate requests we have received from eligible professionals who wish to avoid claims-based reporting pending knowing whether a particular registry is qualified for the 2010 PORI.

In the second phase, we anticipate to complete posting of the list of qualified 2010 registries as soon as we have completed vetting the registries interested in participating in the 2010 PQRI and identified the qualified registries for the 2010 PQRI, which we anticipate will be completed by no later than Summer 2010. An eligible professional's ability to report PQRI quality measures results and numerator and denominator data on PQRI quality measures or measures groups using the registry-based reporting mechanism should not be impacted by the complete list of qualified registries for the 2010 PQRI being made available after the start of the reporting period. First, registries will not begin submitting eligible professionals' PQRI quality measures results and numerator and denominator data on the quality measures or measures groups to CMS until 2011. Second, if an eligible professional decides that he or she is no longer interested in submitting quality measures results and numerator and denominator data on PQRI individual quality measures or measures group through the registry-based reporting mechanism after the complete list of qualified registries becomes available, this does not preclude the eligible

professional from attempting to meet the criteria for satisfactory reporting through another 2010 PQRI reporting mechanism.

In addition to meeting the above proposed requirements specific to registry-based reporting, eligible professionals who choose to participate in PQRI through the registry-based reporting mechanism would need to meet the relevant criteria proposed for satisfactory reporting of individual measures or measures groups that all eligible professionals must meet in order to qualify to earn a 2010 PQRI incentive payment. The criteria for satisfactory reporting of individual measures and measures groups are described in sections II.G.2.e. and II.G.2.f., respectively, of this proposed

(3) Requirements for Individual Eligible Professionals Who Choose the EHR-Based Reporting Mechanism

For eligible professionals who choose to participate in the 2010 PQRI by submitting data on individual quality measures through the EHR-based reporting mechanism, the only proposed requirements associated with EHRbased reporting other than meeting the criteria for satisfactory reporting of individual measures described in section II.G.2.e. of this proposed rule are to: (1) Select a qualified EHR product and (2) submit clinical quality data extracted from the EHR to a CMS clinical data warehouse. Provided that our 2009 EHR data submission testing process is successful, we propose to begin accepting submission of clinical quality data extracted from "qualified" EHRs on January 1, 2010, or as soon thereafter as is technically feasible. We propose that eligible professionals will have until March 31, 2011 to complete data submission through qualified EHRs for services furnished during the 2010 PQRI reporting period. The process that was used to determine whether an EHR vendor and its EHR product(s) are qualified to submit clinical quality data extracted from EHRs for the 2010 PQRI is described in section II.G.2.d.5. of this

The specifications for the electronic transmission of the proposed 2010 PQRI measures identified in Table 20 (section II.G.2.i.(4) of this proposed rule) as being under consideration for EHR-based reporting in 2010 will be posted on a public Web site when available. We will announce the availability and exact location of these specifications through familiar CMS communications channels, including the PQRI section of the CMS Web site at http://www.cms.hhs.gov/PQRI. The posting of

specifications for the electronic transmission of any particular measure prior to publication of the final rule does not signify that the measure will necessarily be selected for the 2010 PORI measure set, nor that EHR-based reporting will be accepted for that measure even if it may otherwise be included in the 2010 PQRI. However, by posting the specifications for electronic transmission of these measures, we seek to allow sufficient time for EHR vendors to adapt their products to support EHRbased capture and submission of data for these measures prior to the start of any 2010 PQRI reporting periods.

We do not propose any option to report measures groups through EHR-based reporting on services furnished during 2010. Because EHR-based reporting to CMS of data on quality measures would be new to PQRI for 2010, we propose to make available only the criteria applicable to reporting of individual PQRI measures.

We cannot assume responsibility for the successful submission of data from eligible professionals' EHRs. Any eligible professional who chooses to submit PQRI data extracted from an EHR should contact the EHR product's vendor to determine if the product is qualified and has been updated to facilitate PQRI quality measures data submission. Such professionals also should begin attempting submission promptly after we announce that the clinical data warehouse is ready to accept 2010 PQRI quality measures data through the EHR mechanism in order to assure the professional has a reasonable period of time to work with his or her EHR and/or its vendor to correct any problems that may complicate or preclude successful quality measures data submission through that EHR. As we indicated above, data submission for the 2010 PQRI would need to be completed by March 31, 2011.

(4) Qualification Requirements for Registries

In order to be "qualified" to submit quality measures results and numerator and denominator data on PQRI quality measures and measures groups on behalf of eligible professionals pursuing incentive payment for the 2008 and 2009 PQRI, we required registries to complete a self-nomination process and to meet certain technical and other requirements. For the 2009 PQRI, registries that were "qualified" for 2008 did not need to be "re-qualified" for 2009 unless they were unsuccessful at submitting 2008 PQRI data (that is, failed to submit 2008 PQRI data per the 2008 PQRI registry requirements). Registries that were "qualified" for 2008 and wished to continue to participate in 2009 were only required to communicate their desire to continue participation for 2009 by submitting a letter to CMS indicating their continued interest in being a PQRI registry for 2009 and their compliance with the 2009 PQRI registry requirements by March 31, 2009.

For the 2010 PQRI, we are again proposing to require a self-nomination process for registries wishing to submit 2010 PQRI quality measures or measures groups on behalf of eligible professionals for services furnished during the applicable reporting periods in 2010. Similar to the 2008 and 2009 PQRI registry self-nomination process, the proposed registry self-nomination process for the 2010 PQRI would be based on a registry meeting specific technical and other requirements.

In order to be consistent with the registry requirements from prior program years, we propose that the 2010 registry requirements be substantially the same as for 2008 and 2009. Specifically, to be considered a qualified registry for purposes of submitting individual quality measures and measures groups on behalf of eligible professionals who choose to report using this reporting mechanism under the 2010 PQRI, we propose that a registry would need to:

- Be in existence as of January 1, 2009.
- Be able to collect all needed data elements and calculate results for at least 3 measures in the 2010 PQRI program (according to the posted 2010 PQRI Measure Specifications).
- Be able to calculate and submit measure-level reporting rates by TIN/ NPI;
- Be able to calculate and submit, by TIN/NPI, a performance rate (that is, the percentage of a defined population who receive a particular process of care or achieve a particular outcome) for each measure on which the TIN/NPI reports;
- Be able to separate out and report on Medicare Part B FFS patients;
 - Provide the name of the registry;
- Provide the reporting period start date the registry will cover;
- Provide the reporting period end date the registry will cover;
- Provide the measure numbers for the PQRI quality measures on which the registry is reporting;
- Provide the measure title for the PQRI quality measures on which the registry is reporting;
- Report the number of eligible instances (reporting denominator);
- Report the number of instances of quality service performed (numerator);

- Report the number of performance exclusions;
- Report the number of reported instances, performance not met (eligible professional receives credit for reporting, not for performance);

• Be able to transmit this data in a CMS-approved XML format. We expect that this CMS-specified record layout will be substantially the same as for the 2008 and 2009 PQRI. This layout will be provided to registries in 2010;

• Comply with a CMS-specified secure method for data submission, such as submitting its data in an XML file through an Individuals Access to CMS Systems (IACS) user account;

 Submit an acceptable "validation strategy" to CMS by March 31, 2010. A validation strategy ascertains whether eligible professionals have submitted accurately and on at least the minimum number (80 percent) of their eligible patients, visits, procedures, or episodes for a given measure. Acceptable validation strategies often include such provisions as the registry being able to conduct random sampling of their participants' data, but may also be based on other credible means of verifying the accuracy of data content and completeness of reporting or adherence to a required sampling method;

• Enter into and maintain with its participating professionals an appropriate Business Associate agreement that provides for the registry's receipt of patient-specific data from the eligible professionals, as well as the registry's disclosure of quality measure results and numerator and denominator data on behalf of eligible professionals who wish to participate in

the PQRI program; Obtain and keep on file signed documentation that each holder of an NPI whose data are submitted to the registry has authorized the registry to submit quality measures results and numerator and denominator data to CMS for the purpose of PQRI participation. This documentation must be obtained at the time the eligible professional signs up with the registry to submit PQRI quality measures data to the registry and must meet any applicable laws, regulations, and contractual business associate agreements;

• Provide CMS access (if requested) to review the Medicare beneficiary data on which 2010 PQRI registry-based submissions are founded;

• Provide the reporting option (reporting period and reporting criteria) that the eligible professional has satisfied or chosen; and

• Provide CMS a signed, written attestation statement via mail or e-mail

which states that the quality measure results and numerator and denominator data provided to CMS are accurate and complete.

With respect to the submission of 2010 measure results and numerator and denominator data on measures groups, we propose to retain the following registry requirements from the 2009 PORI:

• Indicate the reporting period chosen for each eligible professional who chooses to submit data on measures groups;

• Base reported information on measures groups only on patients to whom services were furnished during the 12-month reporting period of January through December 2010 or the 6-month reporting period of July 2010 through December 2010:

• Agree that the registry's data may be inspected by CMS under our oversight authority if non-Medicare patients are included in the patient sample;

• Be able to report data on all of the measures in a given measures group and on either 30 patients from January 1 through December 31, 2010 (note this patient sample must include some Medicare Part B FFS beneficiaries) or on 80 percent of applicable Medicare Part B FFS patients for each eligible professional (with a minimum of 15 patients during the January 1, 2010 through December 31, 2010 reporting period or a minimum of 8 patients during the July 1, 2010 through December 31, 2010 reporting period) (see criteria for satisfactory reporting of measures groups described in section II.G.2.f. of this proposed rule for further information); and

• Be able to report the number of Medicare FFS patients and the number of Medicare Advantage patients that are included in the patient sample for a given measures group.

In addition to the above requirements, we propose the following new requirements for registries for the 2010 PQRI:

• Registries must have at least 25 participants;

 Registries must provide at least 1 feedback report per year to participating eligible professionals;

• Registries must not be owned and managed by an individual locally-owned single-specialty group (in other words, single-specialty practices with only 1 practice location or solo practitioner practices would be prohibited from self-nominating to become a qualified PQRI registry);

 Registries must participate in ongoing 2010 PQRI mandatory support conference calls hosted by CMS (approximately 1 call per month); • Registries must provide a flow and XML of a measure's calculation process for each measure type that the registry intends to calculate; and

 Registries must use PQRI measure specifications to calculate reporting or performance unless otherwise stated.

These proposed new requirements are intended to improve the registry-based reporting mechanism by taking advantage of some of the registries' existing quality improvement functions, maximizing the registry's ability to successfully submit eligible professionals' quality measure results and numerator and denominator data on PQRI individual quality measures or measures groups to CMS, and discouraging small physician offices or an individual eligible professional from self-nominating to become a qualified registry. We are concerned that an individual eligible professional or a small practice does not have the resources or capabilities to successfully submit quality measures results and numerator and denominator data on PQRI individual measures or measures groups through the registry data submission process.

We propose to post the final 2010 PQRI registry requirements, including the exact date by which registries that wish to qualify for 2010 must submit a self-nomination letter and instructions for submitting the self-nomination letter, on the PQRI section of the CMS Web site at http://www.cms.hhs.gov/PQRI by November 15, 2009. We anticipate that new registries that wish to self-nominate for 2010 will be required to do so by January 31, 2010.

Similar to the 2009 PQRI, we propose that registries that were "qualified" for 2009 and wish to continue to participate in 2010 would not need to be "requalified" for 2010 unless they are unsuccessful at submitting 2009 PQRI data (that is, fail to submit 2009 PORI data per the 2009 PQRI registry requirements). We further propose that registries that were "qualified" for 2009, were successful in submitting 2009 PQRI data, and wish to continue to participate in 2010 would need to indicate their desire to continue participation for 2010 by submitting a letter to CMS indicating their continued interest in being a PQRI registry for 2010 and their compliance with the 2010 PQRI registry requirements by no later than October 31, 2009. Instructions regarding the procedures for submitting this letter will be provided to qualified 2009 PQRI registries on the 2009 PQRI registry support conference calls.

If a qualified 2009 PQRI registry fails to submit 2009 PQRI data per the 2009 PQRI registry requirements, we propose the registry would be considered unsuccessful at submitting 2009 PQRI data and would need to go through the full self-nomination process again to participate in the 2010 PQRI. By March 31, 2010, registries that are unsuccessful submitting quality measures results and numerator and denominator data for 2009 would need to be able to meet the 2010 PQRI registry requirements and go through the full vetting process again. Finally, as discussed further under

Finally, as discussed further under section II.G.5.c.(1) of this proposed rule, we propose that the above registry requirements would apply not only for the purpose of a registry qualifying to report 2010 PQRI quality measure results and numerator and denominator data on PQRI individual quality measures or measures groups, but also for the purpose of a registry qualifying to submit the proposed electronic prescribing measure for the 2010 E-Prescribing Incentive Program.

(5) Qualification Requirements for EHR Vendors and Their Products

In the CY 2009 PFS final rule with comment period (73 FR 69830), we announced our intent to qualify EHR vendors and their specific products to submit quality data extracted from their EHR products to the CMS clinical quality data warehouse so that we may potentially begin to accept data via EHRs for purposes of satisfactorily reporting data on quality measures in future PQRI reporting. We stated that we anticipate posting on the PQRI section of the CMS Web site at http:// www.cms.hhs.gov/PQRI, by December 31, 2008, a list of requirements that EHR vendors must be able to meet in order to self-nominate to have their product "qualified" to potentially be able to submit quality measures data for the 2010 PQRI to CMS. We also stated that qualifying EHR vendors ahead of actual data submission will facilitate the live data submission process.

On December 31, 2008, the "Requirements for Electronic Health Record (EHR) Vendors to Participate in the 2009 PQRI EHR Testing Program," was posted on the Reporting page of the PQRI section of the CMS Web site at http://www.cms.hhs.gov/PQRI/20_Reporting.asp#TopOfPage, which described the EHR vendor requirements and the EHR vendor self-nomination process.

The vendor's EHR system must be updated according to the Draft 2009 EHR specifications posted on the QualityNet Web site at http://www.qualitynet.org in order for an EHR vendor and its product to qualify to submit test information on 2009 PQRI measures, and for possible EHR data

submission for future PQRI reporting years. In addition, the 2009 PQRI EHR test-vendors must meet the following requirements:

 Be able to collect and transmit all required data elements according to the 2009 EHR Specifications.

 Be able to separate out and report on Medicare Part B FFS patients only.

• Be able to include TIN/NPI information submitted with an eligible professional's quality data.

• Be able to transmit this data in the CMS-approved format.

• Comply with a secure method for data submission.

• Enter into and maintain with its participating professionals an appropriate legal arrangement that provides for the EHR vendor to receive patient-specific data from the eligible professional, as well as the EHR vendor's disclosure of protected health information on behalf of eligible professionals who wish to participate in the 2009 PQRI EHR test program.

 Obtain and keep on file signed documentation that each NPI whose data is submitted to the EHR vendor has authorized the EHR vendor to submit patient data to CMS for the purpose of PQRI testing. This documentation must meet the standards of applicable law, regulations, and contractual or business

associate agreements.

As described in the "Requirements for Electronic Health Record (EHR) Vendors to Participate in the 2009 PQRI EHR Testing Program," which is posted on the Reporting page of the PQRI section of the CMS Web site at http:// www.cms.hhs.gov/PQRI/ $20_Reporting.\bar{a}sp\#TopOfPage$, EHR vendors who wish to qualify to participate in the 2009 PORI EHR test program were required to submit a selfnomination letter requesting inclusion in the 2009 EHR testing process by February 13, 2009. All nominees would then go through a vetting process. Those nominees passing this vetting process would be asked to submit test data (that is, mock-up data) or to submit live test data from some of their clients (users) with their permission. Vendors who successfully submit their test data would also need to be able to adapt their system to any changes in the measure specifications that may arise due to Healthcare Information Technology Standards Panel (HITSP) or Certification Commission for Healthcare Information Technology (CCHIT) adoption of quality measure data reporting criteria.

It is expected that the process for qualifying self-nominated EHR vendors may conclude in 2009. At the conclusion of this process, we propose that those EHR products that meet all of the EHR vendor requirements will be listed on the PQRI section of the CMS Web site at http://www.cms.hhs.gov/PQRI as a "qualified" EHR product (that is, the name of the vendor software product and the version that is qualified), which indicates that the product's users may submit quality data to CMS (either directly from their system or through the vendor—which is yet to be determined) for the 2010 PQRI, if and when, EHR submission is included in the 2010 PQRI as a PQRI reporting mechanism.

As discussed further under section II.G.5.c.(1) of this proposed rule, we propose that the above EHR vendor requirements would apply not only for the purpose of a vendor's EHR product being qualified for the purpose of the product's users being able to submit data extracted from the EHR for the 2010 PQRI, but also for the purpose of a vendor's EHR product being qualified for the purpose of the product's users being able to electronically submit data extracted from the EHR for the electronic prescribing measure for the 2010 E-Prescribing Incentive Program.

During 2010, we expect to use the self-nomination process described in the "Requirements for Electronic Health Record (EHR) Vendors to Participate in the 2009 PQRI EHR Testing Program" posted on the PQRI section of the CMS Web site at http://www.cms.hhs.gov/ *PQRI/20 Reporting.asp#TopOfPage*, to qualify additional EHR vendors and their EHR products to submit quality data extracted from their EHR products to the CMS clinical quality data warehouse for program years after 2010. We anticipate that the requirements will be similar to those used to qualify EHR products for the 2009 PQRI EHR testing, but they may be modified based on the results of our 2009 EHR testing. At the conclusion of this process, sometime in late 2010, those EHR products that meet all of the EHR vendor requirements will be listed on the PQRI section of the CMS Web site at http://www.cms.hhs.gov/ PQRI as a "qualified" EHR product, which indicates that the product's users may submit quality data to CMS (either directly from their system or through the vendor—which is yet to be determined) for the 2011 PQRI or subsequent years, if and when, EHR submission is included as a PQRI reporting mechanism for years after 2010.

e. Proposed Criteria for Satisfactory Reporting of Individual Quality Measures for Individual Eligible Professionals

Under section 1848(m)(3)(A) of the Act, the criteria for satisfactorily

submitting data on individual quality measures through claims-based reporting require the reporting of at least 3 applicable measures in at least 80 percent of the cases in which the measure is reportable. If fewer than 3 measures are applicable to the services of the professional, the professional may meet the criteria by reporting on all applicable measures (that is, 1 to 2 measures) for at least 80 percent of the cases where the measures are reportable. It is assumed that if an eligible professional submits quality data codes for a particular measure, the measure applies to the eligible professional.

İn prior program years, when we were required, under section 1848(m)(5)(F) of the Act, to establish alternative criteria for satisfactorily reporting using the registry-based reporting mechanism, we decided that the criteria for registrybased reporting of individual measures should be consistent with the criteria for claims-based reporting of individual measures. Thus, we adopted the same criteria for satisfactory reporting of individual measures through registrybased reporting as the criteria for satisfactory reporting of individual measures through claims-based reporting except that an eligible professional could choose to report through the registry-based reporting mechanism only if there are at least 3 PQRI quality measures applicable to the services of the professional. For the 2008 or 2009 PQRI, eligible professionals could not satisfactorily report PQRI measures through the registry-based reporting mechanism by reporting on fewer than 3 measures.

For years after 2009, section 1848(m)(3)(D) of the Act authorizes the Secretary, in consultation with stakeholders and experts, to revise the criteria for satisfactorily reporting data on quality measures. Based on this authority and the input we have received from stakeholders via the invitation to submit suggestions for the 2010 PQRI reporting options posted on the PQRI section of the CMS Web site at http://www.cms.hhs.gov/PQRI in April 2009, we propose 3 criteria for satisfactory reporting of individual PORI quality measures for 2010. In an effort to continue to be consistent with the criteria of satisfactory reporting used in prior PQRI program years, we propose to retain the following 2 criteria with respect to satisfactorily reporting data on individual quality measures in circumstances where 3 or more individual quality measures apply to the services furnished by an eligible professional:

• Report on at least 3 2010 PQRI measures (unless fewer than 3 2010

PQRI measures apply to the services furnished by the eligible professional); and

• Report each measure for at least 80 percent of the eligible professional's Medicare Part B FFS patients for whom services were furnished during the reporting period to which the measure applies.

These criteria would apply to all proposed 2010 PQRI reporting mechanisms available for reporting individual PQRI quality measures (that is, claims-based reporting, registry-based reporting, and EHR-based

reporting).

If an eligible professional has fewer than 3 PQRI measures that apply to the professional's services, then the professional would be able to meet the criteria for satisfactorily reporting data on individual quality measures by meeting the following 2 proposed criteria:

- Reporting on all measures that apply to the services furnished by the professional (that is 1 to 2 measures);
- Reporting each measure for at least 80 percent of the eligible professional's Medicare Part B FFS patients for whom services were furnished during the reporting period to which the measure applies.

We propose that, as in previous years, these criteria for satisfactorily reporting data on fewer than 3 individual quality measures would be available for the claims-based reporting mechanism only. An eligible professional who has fewer than 3 PQRI measures that apply to the professional's services would not be able to meet the criteria for satisfactory reporting by reporting on all applicable measures (that is, 1 or 2 measures) through the registry-based reporting mechanism.

While we have received input from several stakeholders requesting that we permit an eligible professional to report fewer than 3 measures through the registry-based reporting mechanism if fewer than 3 measures apply to him or her, doing so would be inefficient. First, in addition to needing to analyze the data submitted to us by the registry, we would have to analyze the claims data to ensure that no additional measures are applicable to the eligible professional, much like what we do under the Measure Applicability Validation process for claims-based reporting. Second, we would also have to analyze the claims data to ensure that the eligible professional had not attempted to report additional measures through claims. For these reasons, we are not proposing to permit eligible professionals who choose the registrybased or EHR-based reporting mechanism to report on individual quality measures to report on fewer than 3 measures if only 1 or 2 measures apply to the services they furnish.

Based on the previously stated assumption that a measure applies to the eligible professional if an eligible professional submits quality data codes for a particular measure, we propose that an eligible professional who reports on fewer than 3 measures through the claims-based reporting mechanism in 2010 may be subject to the Measure Applicability Validation process, which allows us to determine whether an eligible professional should have reported quality data codes for additional measures. This process was applied in the 2007 and 2008 PQRI. When an eligible professional reports on fewer than 3 measures, we propose to review whether there are other closely related measures (such as those that share a common diagnosis or those that are representative of services typically provided by a particular type of professional). If an eligible professional who reports on fewer than 3 measures in 2010 reports on a measure that is part of an identified cluster of closely related measures and did not report on any other measure that is part of that identified cluster of closely related measures, then the professional would not qualify to receive a 2010 PORI incentive payment. Additional information on the Measure Applicability Validation process can be found on the Analysis and Payment page of the PORI section of the CMS Web site at http://www.cms.hhs.gov/ PQRI.

In addition to the above criteria related to the number of measures on which an eligible professional would be required to report and the frequency of reporting, we propose a third criterion for satisfactory reporting of individual measures. Based on our authority to revise the criteria for satisfactory reporting under section 1848(m)(3)(D) of the Act, we propose that an eligible professional also be required to report data on at least one individual measure on a minimum number of Medicare Part B FFS patients seen during the reporting period, as detailed below. Establishing a minimum patient sample size requirement would enhance the scientific validity of eligible professionals' performance results and encourage eligible professionals to select to report only measures that are representative of the types of services they typically provide in their practice. If, for example, an eligible professional selects 3 patient-level measures (that is, measures in which the required

reporting frequency is a minimum of once per reporting period per individual eligible professional) where only one of his or her Medicare Part B FFS patients are eligible for the measures and there is no minimum patient sample size requirement, then the eligible professional currently could qualify to earn a PQRI incentive payment by reporting PQRI quality measures data only 3 times during the entire reporting period. We believe that information on such a small sample of cases would be insufficient to do any meaningful analysis of the eligible professional's performance on the reported measure. We also believe that a minimum patient sample size requirement would prevent an eligible professional from purposely selecting measures that apply to only a few of their patients.

Regardless of the reporting mechanism chosen by the eligible professional, we propose that the minimum patient sample size for reporting individual quality measures be 15 Medicare Part B FFS patients for the 12-month reporting period. An eligible professional would need to meet this minimum patient sample size requirement for at least one measure on which the eligible professional chooses to report. This proposed number is

based on our experience with the 2007 PQRI and the limited information we have available regarding the 2008 PORI reporting experience. For the 2007 PQRI measures, where the only reporting period was a 6-month reporting period beginning July 1, 2007, the median number of instances in which an eligible professional could have reported a 2007 PQRI measure was, on average, 9 eligible instances per measure. If we assume that the number of eligible instances for the first half of 2007 were similar to the number of eligible instances in the second half of 2007, then we can assume that the median number of eligible instances was an average of 18 instances per measure for the entire year. Preliminary information from the 2008 PQRI, based on data through September 2008, indicate that the median number of instances in which an eligible professional could have reported a 2008 PQRI measure was, on average, 18 eligible instances per measure. Since eligible professionals are not required to report a measure for all eligible cases, we based the proposed minimum patient sample size threshold on 80 percent of 18 eligible instances, which is 14.4.

Similarly, for the 6-month reporting period (available for registry-based reporting only), we propose that the minimum patient sample size for reporting on individual quality measures be 8 Medicare Part B FFS patients seen during the 6-month reporting period. An eligible professional would need to meet this minimum patient sample size requirement for at least one measure on which the eligible professional chooses to report. We welcome comments on the proposal to add a minimum patient sample size criterion to the criteria for satisfactory reporting of data on individual quality measures. In addition, we invite comments on the specific thresholds proposed for the 12month reporting period (available for claims-based, registry-based, and EHRbased reporting) and for the 6-month reporting period (available for registrybased reporting only) for reporting individual quality measures.

The proposed 2010 criteria for satisfactory reporting of data on individual PQRI quality measures are summarized in Table 14 and are arranged by reporting mechanism and reporting period.

TABLE 14—PROPOSED 2010 CRITERIA FOR SATISFACTORY REPORTING OF DATA ON INDIVIDUAL PQRI QUALITY MEASURES, BY REPORTING MECHANISM AND REPORTING PERIOD

| Reporting mechanism | Reporting criteria | Reporting period |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------|
| Claims-based reporting | Report at least 3 PQRI measures, or 1–2 measures if less than 3 measures apply to the eligible professional; Report each measure for at least 80% of the eligible professional's Medicare Part B FFS patients seen during the reporting period to whom the measure applies; and Report at least 1 PQRI measure on at least 15 Medicare Part B FFS patients seen during the reporting period to which the measure applies. | January 1, 2010–December 31, 2010. |
| Registry-based reporting | Report at least 3 PQRI measures; Report each measure for at least 80% of the eligible professional's Medicare Part B FFS patients seen during the reporting period to whom the measure applies; and Report at least 1 PQRI measure on at least 15 Medicare Part B FFS patients seen during the reporting period to which the measure applies. | January 1, 2010–December 31, 2010. |
| Registry-based reporting | Report at least 3 PQRI measures; Report each measure for at least 80% of the eligible professional's Medicare Part B FFS patients seen during the reporting period to whom the measure applies; and Report at least 1 PQRI measure on at least 8 Medicare Part B FFS patients seen during the reporting period to which the measure applies. | July 1, 2010–December 31, 2010. |
| EHR-based reporting | Report at least 3 PQRI measures; Report each measure for at least 80% of the eligible professional's Medicare Part B FFS patients seen during the reporting period to whom the measure applies; and Report at least 1 PQRI measure on at least 15 Medicare Part B FFS patients seen during the reporting period to which the measure applies. | January 1, 2010-December 31, 2010. |

As illustrated in Table 14, there are a total of 4 proposed reporting options, or ways in which an eligible professional may meet the criteria for satisfactory reporting on individual quality measures for the 2010 PQRI. Each reporting option consists of the criteria for satisfactorily reporting such data and results on individual quality measures relevant to a given reporting mechanism and reporting period. While eligible professionals may potentially qualify as satisfactorily reporting individual quality measures under more than one of the proposed reporting criteria, proposed reporting mechanisms, and/or for more than one proposed reporting period, only one incentive payment would be made to an eligible professional based on the longest reporting period for which the eligible professional satisfactorily reports.

f. Proposed Criteria for Satisfactory Reporting Measures Groups for Individual Eligible Professionals

As described above, section 1848(m)(5)(F) of the Act requires that, for 2008 and subsequent years, the Secretary establish alternative reporting periods and alternative criteria for satisfactorily reporting groups of measures. In establishing these alternatives in prior years, we have labeled these groups of measures "measures groups." We have previously defined "measures groups" as a subset of four or more PQRI measures that have a particular clinical condition or focus in common. The denominator definition and coding of the measures group identifies the condition or focus that is shared across the measures within a particular measures group.

In the 2008 and 2009 PQRI, measures groups were reportable through claimsbased or registry-based reporting. For the 2008 and 2009 PQRI, there were 2 basic sets of criteria for satisfactory reporting measures groups through claims-based or registry-based reporting: (1) The reporting of at least 1 measures group for at least 80 percent of patients to whom the measures group applies during the reporting period; or (2) the reporting of at least 1 measures group for a specified number of consecutive patients to whom the measures group applies during the reporting period. For registry-based reporting in the 2008 and 2009 PQRI, we allowed eligible professionals to include some non-Medicare Part B FFS patients in the consecutive patient sample under the second set of criteria. For registry-based reporting quality measures results and numerator and denominator data on measures groups in 2009, we also added to the first set of criteria a requirement

to report the measures group on a minimum number of patients commensurate with the reporting period duration.

For the 2010 PQRI, we again propose 2 basic sets of criteria for satisfactory reporting on measures group. Both sets of criteria would apply to the claims-based and registry-based reporting mechanism. As discussed in section II.G.2.d.(3) of this proposed rule, we are not proposing to make the EHR-based reporting mechanism available for reporting on measures groups in 2010.

The first set of proposed criteria, which we propose to make available for either the 12-month or 6-month reporting period in 2010, would be consistent with the 2009 criteria for satisfactory reporting of measures groups through registry-based reporting, which require the reporting of at least 1 measures group for at least 80 percent of patients to whom the measures group applies during the applicable reporting period (with reporting required on a minimum number of Medicare Part B FFS patients commensurate with the reporting period duration). In the 2009 PQRI, there was a requirement under these criteria to report each measures group on at least 30 Medicare Part B FFS patients for the 12-month reporting period and at least 15 Medicare Part B FFS patients for the 6-month reporting period for registry-based reporting of measures groups. For the 2010 PQRI, we propose to revise the requirement by making these criteria applicable to both registry-based and claims-based reporting and to change the number of Medicare Part B FFS patients on which an eligible professional would be required to report a measures group. We propose to require an eligible professional who chooses to report on measures groups based on reporting on 80 percent of applicable patients to report on a minimum of 15 Medicare Part B FFS patients for the 12-month reporting period and a minimum of 8 Medicare Part B FFS patients for the 6month reporting period, regardless of whether the eligible professional chooses to report the measures group through claims-based reporting or registry-based reporting. We propose to revise the required minimum sample size to make the proposed 2010 criteria for satisfactory reporting of measures groups consistent with the proposed 2010 criteria for satisfactory reporting of individual measures. We invite comments on our proposal to make the criteria for satisfactory reporting of measures groups more consistent with those proposed for reporting individual measures. We especially would be interested in comments with respect to

our proposal to revise the minimum sample size requirement related to satisfactory reporting on measures group through the registry-based reporting mechanism so that the criteria for satisfactory reporting of measures groups, regardless of reporting mechanism, would be identical to those proposed for reporting individual measures.

The second set of proposed criteria, which we propose to make available for the 12-month reporting period only, would be based on reporting on a measures group on a specified minimum number of patients. The second set of criteria would require reporting on at least 1 measures group for at least 30 patients seen between January 1, 2010 and December 31, 2010 to whom the measures group applies. Unlike the 2009 PQRI, which required that eligible professionals report on consecutive patients (that is, patients seen in order, by date of service), the 30 patients on which an eligible professional would need to report a measures group for 2010 would not need to be consecutive patients. The eligible professional would be able to report on any 30 patients seen during the reporting period to which the measures group applies. We propose to remove the requirement to report on patients seen consecutively by date of service because our preliminary analysis of the 2008 PORI claims-based reporting experience through September 2008 suggests that this requirement is difficult for professionals to apply accurately to meet the criteria for satisfactory reporting of measures groups. In addition, the questions we receive from eligible professionals indicate that many eligible professionals are not clear on how to determine which patients are "consecutive" and should be included in the patient sample. We believe that any adverse effect on the reliability or validity of the quality information received as a result of the removal of the requirement to report on patients seen consecutively and allowing eligible professionals to report on any 30 patients would be minimal. When eligible professionals report measures groups, they are required to report on multiple measures for a given clinical condition or focus, which makes it harder for them to selectively choose patients in an attempt to improve their performance results. We invite comments on our proposal to allow eligible professionals to report on measures groups on any 30 patients rather than a consecutive patient sample.

As in previous years, we propose that for 2010, the patients, for claims-based

reporting, would be limited to Medicare Part B FFS patients. We receive claims on Medicare patients only. For registrybased reporting, however, we propose that the patients could include some,

but not be exclusively, non-Medicare Part B FFS patients.

The proposed 2010 criteria for satisfactory reporting on measures groups are summarized in Table 15,

which is arranged by reporting mechanism and reporting period.

TABLE 15—PROPOSED 2010 CRITERIA FOR SATISFACTORY REPORTING ON MEASURES GROUPS, BY REPORTING MECHANISM AND REPORTING PERIOD

| Reporting mechanism | Reporting criteria | Reporting period |
|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------|
| Claims-based reporting | Report at least 1 PQRI measures group; | January 1, 2010–December 31, 2010. |
| Claims-based reporting | Report each measures group for at least 30 Medicare Part B FFS patients. Report at least 1 PQRI measures group; | January 1, 2010–December 31, 2010. |
| | Report each measures group for at least 80% of the eligible professional's Medicare Part B FFS patients seen during the reporting period to whom the measures group applies; and | |
| | Report each measures group on at least 15 Medicare Part B FFS patients seen during the reporting period to which the measures group applies. | heled 0040 December 04 |
| Claims-based reporting | Report at least 1 PQRI measures group; | July 1, 2010–December 31, 2010. |
| | Report each measures group for at least 80% of the eligible professional's Medicare Part B FFS patients seen during the reporting period to whom the measures group applies; and | January 1, 2010-December 31, 2010. |
| | Report each measures group on at least 8 Medicare Part B FFS patients seen | |
| Registry-based reporting | during the reporting period to which the measures group applies. • Report at least 1 PQRI measures group; | January 1, 2010-December 31, 2010. |
| | Report each measures group for at least 30 patients. Patients may include, but may not be exclusively, non-Medicare Part B FFS patients. | |
| Registry-based reporting | Report at least 1 PQRI measures group; | January 1, 2010–December 31, 2010. |
| | Report each measures group for at least 80% of the eligible professional's Medicare Part B FFS patients seen during the reporting period to whom the measures group applies; and | |
| Registry-based reporting | Report each measures group on at least 15 Medicare Part B FFS patients seen during the reporting period to which the measures group applies. Report at least 1 PQRI measures group; | July 1, 2010-December 31, |
| riegistry-based reporting | riepoit at least 11 Qtil measures group, | 2010. |
| | Report each measures group for at least 80 % of the eligible professional's Medicare Part B FFS patients seen during the reporting period to whom the measures group applies; and | |
| | Report each measures group on at least 8 Medicare Part B FFS patients seen
during the reporting period to which the measures group applies. | |

As illustrated in Table 15, there are a total of 6 proposed reporting options, or ways in which an eligible professional may meet the proposed criteria for satisfactory reporting of measures groups for the 2010 PQRI. Each reporting option consists of the criteria for satisfactory reporting relevant to a given reporting mechanism and reporting period. As stated previously, while eligible professionals may potentially qualify as satisfactorily reporting on measures groups under more than one of the proposed reporting criteria, proposed reporting mechanisms, and/or for more than one proposed reporting period, only one incentive payment would be made to an eligible professional based on the longest reporting period for which the eligible professional satisfactorily reports.

g. Proposed Reporting Option for Satisfactory Reporting on Quality Measures by Group Practices

As stated previously, section 1848(m)(3)(C)(i) of the Act requires the Secretary to establish and have in place a process by January 1, 2010 under which eligible professionals in a group practice (as defined by the Secretary) shall be treated as satisfactorily submitting data on quality measures under PQRI if, in lieu of reporting measures under PQRI, the group practice reports measures determined appropriate by the Secretary, such as measures that target high-cost chronic conditions and preventive care, in a form and manner, and at a time specified by the Secretary. Section 1848(m)(3)(C)(ii) of the Act requires that this process provide for the use of a statistical sampling model to submit data on measures, such as the model

used under the Medicare Physician Group Practice (PGP) demonstration project under section 1866A of the Act.

In addition, payments to a group practice under section 1848(m) of the Act by reason of the process proposed herein shall be in lieu of the PQRI incentive payments that would otherwise be made to eligible professionals in the group practice for satisfactorily submitting data on quality measures (that is, prohibits double payments). Therefore, in addition to making incentive payments for 2010 to group practices based on separately analyzing whether the individual eligible professionals within the group practice (that is, for each TIN/NPI combination) satisfactorily reported on PQRI quality measures, we will begin making incentive payments to group practices based on the determination that the group practice, as a whole (that is, for the TIN), satisfactorily reports on

PQRI quality measures for 2010. In addition, an individual eligible professional who is affiliated with a group practice participating in the group practice reporting option that satisfactorily reports under the proposed group practice reporting option would not be eligible to earn a separate PQRI incentive payment for 2010 on the basis of his or her satisfactorily reporting PQRI quality measures data at the individual level.

(1) Definition of "Group Practice"
As stated above, section
1848(m)(3)(C)(i) of the Act authorizes
the Secretary to define "group practice."
For purposes of determining whether a
group practice satisfactorily submits
PQRI quality measures data, we propose
that a "group practice" would consist of
a physician group practice, as defined
by a TIN, with at least 200 or more
individual eligible professionals (or, as
identified by NPIs) who have reassigned
their billing rights to the TIN.

Generally, our intent is to build on an existing quality reporting program that group practices may already be familiar with by modeling the PQRI group practice reporting option after the PGP demonstration. Since the PGP demonstration is a demonstration program for large group practices, one of the requirements for group practices participating in the PGP demonstration is for each practice to have 200 or more members. To be consistent with the PGP demonstration, we also propose to limit initial implementation of the PQRI group practice reporting option for 2010 to similar large group practices. As we gain more experience with the group practice reporting option, we may consider lowering the group size threshold in the future. We invite comments on the proposed definition of 'group practice' and our proposal to limit initial implementation of the PQRI group practice reporting option in 2010 to practices with 200 or more individual

In order to participate in the 2010 PQRI through the group practice reporting option, we propose to require group practices to complete a selfnomination process and to meet certain technical and other requirements. Group practices interested in participating in the 2010 PQRI through the group practice reporting option would be required to submit a self-nomination letter to CMS or a CMS designee requesting to participate in the 2010 PQRI group practice reporting option. We propose that each group practice would be required to meet the following requirements:

eligible professionals.

 Have an active Individuals Access to CMS Systems (IACS) user account;

- Provide CMS or a CMS designee with the group practice's TIN and the NPI numbers and names of all eligible professionals who will be participating as part of the group practice (that is, all individual NPI numbers associated with the group practice's TIN). This information must be provided in an electronic format specified by CMS, such as in an Excel spreadsheet; and
- Agree to have the group practice's PQRI quality measurement performance rates for each measure publicly reported by posting of the results on a CMS Web site.

We propose to post the final participation requirements for group practices, including the exact date by which group practices that wish to participate in the 2010 PQRI through the group practice reporting option must submit a self-nomination letter and other instructions for submitting the self-nomination letter, on the PQRI section of the CMS Web site at http:// www.cms.hhs.gov/PQRI by November 15, 2009. We anticipate that group practices that wish to self-nominate for 2010 will be required to do so by the end of the first quarter of 2010, but not later than the end of the second quarter of 2010. Upon receipt of the selfnomination letters we will assess whether the participation requirements proposed above have been met by each self-nominated group practice.

(2) Process for Physician Group Practices To Participate as Group Practices and Criteria for Satisfactory Reporting Data on Quality Measures by Group Practices

For physician groups selected to participate in the PQRI group practice reporting option for 2010, we propose the reporting period would be the 12month reporting period beginning January 1, 2010. We propose that group practices would be required to submit information on these measures using a data collection tool based on the data collection tool used in CMS' Medicare Care Management Performance (MCMP) demonstration and the quality measurement and reporting methods used in CMS' PGP demonstration. We propose that physician groups selected to participate in the 2010 PQRI through the group practice reporting option would be required to report on a common set of 26 NQF-endorsed quality measures that are based on measures currently used in the MCMP and/or PGP demonstration and that target high-cost chronic conditions and preventive care. These quality measures are identified in Table 34. Additional information on the MCMP and PGP demonstrations is posted on the Medicare Demonstrations

section of the CMS Web site at http://www.cms.hhs.gov/
DemoProjectsEvalRpts/MD/
list.asp#TopOfPage. Although our
proposed process for physician groups
to participate in PQRI as a group
practice incorporates some
characteristics and methods from the
PGP demonstration and the MCMP
demonstration, the PQRI group practice
reporting option will be a separate
program with its own specifications and
methodology from the PGP and MCMP
demonstration programs.

The proposed quality measures identified in Table 34 are based on a subset of the Doctor's Office Quality (DOQ) quality measures set developed and specified under the direction of CMS and which are used in the PGP and/or MCMP demonstration programs. Contributors to the development of the DOQ measure set included the American Medical Association's Physician Consortium for Performance Improvement (AMA-PCPI), the American College of Cardiology (ACC), the American Heart Association (AHA), the National Diabetes Quality Improvement Alliance, the National Committee for Quality Assurance (NCQA), and the Veterans Health Administration (VA) and, in most instances, overlap with proposed 2010 PQRI measures. These quality measures are grouped into four disease modules: diabetes; heart failure; coronary artery disease; and preventive care services.

As part of the data submission process, we propose that, beginning in 2011, each group practice would be required to report quality measures with respect to services furnished during the 2010 reporting period (that is, January 1, 2010 through December 31, 2010) on an assigned sample of Medicare beneficiaries. We propose to analyze the January 1, 2010 through October 29, 2010 (that is, the last business day of October 2010) National Claims History (NCH) file to assign Medicare beneficiaries to each physician group practice using the same patient assignment methodology used in the PGP demonstration. Assigned beneficiaries are limited to those Medicare FFS beneficiaries with Medicare Parts A and B for whom Medicare is the primary payer. Assigned beneficiaries do not include Medicare Advantage enrollees. Essentially, a beneficiary would be assigned to the physician group that provides the plurality of a beneficiary's office or other outpatient E/M allowed charges (based on Medicare Part B claims submitted for the beneficiary for dates of services between January 1, 2010 and October 29, 2010). Beneficiaries with

only 1 visit to the group practice between January 1, 2010 and October 29, 2010 would be eliminated from the group practice's assigned patient sample. Once the beneficiary assignment has been made for each physician group, each physician group would be required to report the quality measures on a random sample of the assigned beneficiaries per disease module or preventive care measure. For each disease module or preventive care measure, the physician group would be required to report information on the assigned patients in the order in which they appear in the group's sample (that is, consecutively). In the fourth quarter of 2010, we would pull a random sample of assigned beneficiaries for each disease module or preventive care measure and provide the sample to the physician group consistent with the methods used in the PGP demonstration. Identical to the sampling method used in the PGP demonstration, the random sample must consist of at least 411 assigned beneficiaries. If the pool of eligible assigned beneficiaries is less than 411, then the group practice must report on 100 percent of the assigned beneficiaries to participate in the group practice reporting option.

We propose a unique reporting mechanism for the group practice reporting option that would not be available to individual eligible professionals participating in the 2010 PORI. We propose that each physician group selected to participate in the group practice reporting option would have access to a database (that is, a data collection tool) that would include the assigned beneficiary sample and the quality measures. This data collection tool was originally developed for use in the PGP demonstration, updated for use in the MCMP demonstration, and would be updated as needed for use in the PQRI. The assigned beneficiaries' demographic and utilization information would be prepopulated based on claims data. We anticipate being able to provide the selected physician groups with access to this prepopulated database by the fourth quarter of 2010. The physician group would be required to populate the remaining data fields necessary for capturing quality measure information on each of the assigned beneficiaries. Numerators for each of the quality measures would include all beneficiaries in the denominator population who also satisfy the quality performance criteria for that measure. Denominators for each quality measure would include a sample of the assigned beneficiaries who meet the eligibility

criteria for that quality measure module or preventive care measure.

We invite comments on our proposal to adopt the PGP demonstration's quality measurement and reporting methods for the PQRI group practice reporting option. We specifically request comments on the proposed patient assignment methodology and our proposal to use a data collection tool based on the one used in the MCMP demonstration as the reporting mechanism for physician groups selected to participate in the PQRI group practice reporting option.

We propose 2 criteria for satisfactory reporting of quality measures by a physician group. First, the physician group would be required to report completely on all of the proposed modules and measures listed in Table 34. Second, the physician group would be required to report on the first 411 consecutively assigned Medicare beneficiaries per disease module or preventive care measure. This is identical to the reporting criteria used in the PGP demonstration. By building on an existing demonstration program that large group practices may already have experience with, we hope to minimize burden on both group practices and CMS. The sample that we pull for and provide to each physician group would include more than the 411 assigned beneficiaries (the sample would include an over sample of approximately 50 percent). More beneficiaries are provided in the sample than the group practice is required to report on in order to account for beneficiaries included in the sample who cannot be confirmed with the diagnosis for a particular disease module or whose medical information may not be able to be located within the physician group's systems.

h. Statutory Requirements and Other Considerations for Measures Proposed for Inclusion in the 2010 PQRI

(1) Statutory Requirements for Measures Proposed for Inclusion in the 2010 PQRI

As a result of section 131(b) of the MIPPA, the statutory requirements with respect to the use of quality measures for the 2010 PQRI are different from the statutory requirements for previous program years. For the 2007 PQRI, section 1848(k)(2)(A)(i) of the Act required the Secretary to generally select the quality measures identified as 2007 physician quality measures under the Physician Voluntary Reporting Program. For the 2008 and 2009 PQRI, section 1848(k)(2)(B) of the Act required that the quality measures be measures that have been adopted or endorsed by

a consensus organization (such as the National Quality Forum or AQA), that include measures that have been submitted by a physician specialty, and that the Secretary identifies as having used a consensus-based process for developing such measures. For purposes of reporting data on quality measures for covered professional services furnished during 2010 and subsequent years for the PQRI, subject to the exception noted below, section 1848(k)(2)(C)(i) of the Act, as added by MIPPA, requires that the quality measures shall be such measures selected by the Secretary from measures that have been endorsed by the entity with a contract with the Secretary under subsection 1890(a) of the Act, as added by section 183 of the MIPPA. On January 14, 2009, the U.S. Department of Health and Human Services awarded the contract required under section 1890(a) of the Act to the National Quality Forum (NQF).

In the case of a specified area or medical topic determined appropriate by the Secretary for which a feasible and practical measure has not been endorsed by the NQF, however, section 1848(k)(2)(C)(ii) of the Act authorizes the Secretary to specify a measure that is not so endorsed as long as due consideration is given to measures that have been endorsed or adopted by a consensus organization identified by the Secretary, such as the AQA alliance. In light of these statutory requirements, we believe that, except in certain specified circumstances, each proposed 2010 PQRI quality measure would need to be endorsed by the NQF by July 1, 2009. In those circumstances in which a feasible and practical measure has not been endorsed by the NQF, we believe that all other proposed 2010 PQRI quality measures would need to have at least been adopted by the AQA or another organization with comparable consensus-organization characteristics. However, in January 2009, the AQA announced that it will no longer be adopting measures and we are not aware of any other organizations with consensus-organization characteristics (see 73 FR 38565 through 38566 for discussion of the considerations applied in determining whether an entity is a consensus organization). Therefore, our policy with respect to identifying exceptions under section 1848(k)(2)(C)(ii) of the Act would be to give due consideration to measures that have been endorsed by the NQF. As a result, in reviewing measures for possible inclusion in the 2010 PQRI quality measure set, we propose that any new quality measures proposed for the 2010 PQRI must be NQF-endorsed

by July 1, 2009, while any proposed 2010 PORI quality measures selected from the 2009 PQRI quality measure set would need to have been adopted by the AQA as of January 31, 2009, if the measure still is not endorsed by the

NQF by July 1, 2009.

In addition, section 1848(k)(2)(D) of the Act requires that for each 2010 PQRI quality measure, "the Secretary shall ensure that eligible professionals have the opportunity to provide input during the development, endorsement, or selection of measures applicable to services they furnish." Measure developers generally include a public comment phase in their measure development process. As part of the measure development process, measure developers typically solicit public comments on measures that they are testing in order to determine whether additional refinement of the measure(s) is needed prior to submission for consensus endorsement. For example, information on the measure development process employed by us when CMS or a CMS contractor is the measure developer is available in the "Measures Management System Blueprint" found on the CMS Web site at http://www.cms.hhs.gov/apps/QMIS/ mmsBlueprint.asp.

Eligible professionals also have the opportunity to provide input on a measure as the measure is being vetted through the NOF consensus endorsement process (and previously, the AQA consensus adoption process). In particular, the NQF employs a public comment period for measures vetted through its consensus endorsement process (and previously, for the AQA, its consensus adoption process).

Finally, eligible professionals have an opportunity to provide input on the measures proposed for inclusion in the 2010 PQRI through this proposed rule, which provides a 60-day comment period. Accordingly, with regard to the 2010 PQRI, we believe we have satisfied this requirement in multiple ways.

(2) Other Considerations for Measures Proposed for Inclusion in the 2010 PQRI

Consistent with the statutory requirements described in section II.G.2.h.(1) of this proposed rule, we propose to apply the following considerations with respect to the selection of 2009 PQRI quality measures proposed for inclusion in the 2010 PQRI quality measure set:

 Where some 2009 PQRI quality measures have been endorsed by the NQF and others have not, those 2009 PQRI quality measures that have been specifically considered by NQF for possible endorsement, but NQF has

declined to endorse it, are not proposed for inclusion in the 2010 PORI quality measure set (that is, we propose to retire

the measure for 2010).

· In circumstances where no NQFendorsed measure is available, we propose to exercise the exception under section 1848(k)(2)(C)(ii) of the Act. Under these circumstances, a 2009 PQRI quality measure that previously (that is, prior to January 31, 2009) has been adopted by the AQA would meet the requirements under the Act and we propose that it would be appropriate for eligible professionals to use the measure to submit quality measures data and/or quality measures results and numerator and denominator data on quality measures, as appropriate.

• Although we do not propose to include any 2009 PQRI measures that have not been endorsed by the NQF or adopted by the AQA in the final 2010 PQRI quality measure set, we acknowledge that section 1848(k)(C)(ii) of the Act provides an exception to the requirement that the Secretary select measures that have been endorsed by the entity with a contract under section 1890(a) of the Act (that is, the NQF) as long as an area or medical topic for which a feasible and practical NQFendorsed measure is not available has been identified and due consideration has been given to measures that have been endorsed by the NOF and/or, prior to January 31, 2009, adopted by the AQA.

- The statutory requirements under section 1848(k)(2)(C) of the Act, subject to the exception noted above, require only that the measures be selected from measures that have been endorsed by the entity with a contract with the Secretary under section 1890(a) (that is, the NQF) and are silent with respect to how the measures that are submitted to the NQF for endorsement were developed. The basic steps for developing measures applicable to physicians and other eligible professionals prior to submission of the measures for endorsement may be carried out by a variety of different organizations. We do not believe there needs to be any special restrictions on the type or make up of the organizations carrying out this basic development of physician measures, such as restricting the initial development to physiciancontrolled organizations. Any such restriction would unduly limit the basic development of quality measures and the scope and utility of measures that may be considered for endorsement as voluntary consensus standards.
- 2009 PQRI measures that were part of the 2007 and/or 2008 PQRI in which the 2007 and 2008 PQRI analytics

indicate a lack of significant reporting and usage were not considered for inclusion in the 2010 PQRI

In addition to reviewing the 2009 PQRI measures and previously retired measures, for purposes of developing the proposed 2010 PQRI measures, we have reviewed and considered measure suggestions including comments received in response to the CY 2009 PFS proposed rule and final rule with comment period. Additionally, suggestions and input received through other venues, such as an invitation for measures suggestions posted on the PQRI section of the CMS Web site in February 2009 were also reviewed and considered for purposes of our development of the list of proposed 2010 PQRI quality measures.

With respect to the selection of new measures (that is, measures that have never been selected as part of a PQRI quality measure set for 2009 or any prior year), we propose to apply the following considerations, which include many of the same considerations applied to the selection of 2009 PQRI quality measures for proposed inclusion in the 2010 PQRI quality measure set described above:

High Impact on Healthcare.

- Measures that are high impact and support CMS and HHS priorities for improved quality and efficiency of care for Medicare beneficiaries. These current and long term priority topics include: Prevention; chronic conditions; high cost and high volume conditions; elimination of health disparities; healthcare-associated infections and other conditions; improved care coordination; improved efficiency; improved patient and family experience of care; improved end-of-life/palliative care; effective management of acute and chronic episodes of care; reduced unwarranted geographic variation in quality and efficiency; and adoption and use of interoperable HIT.
- Measures that are included in, or facilitate alignment with, other Medicare, Medicaid, and CHIP programs in furtherance of overarching healthcare goals.

NQF Endorsement.

- + Measures must be NQF-endorsed by July 1, 2009 in order to be considered for inclusion in the 2010 PQRI quality measure set.
- + Although we do not propose to include any new measures that are not endorsed by the NQF by July 1, 2009 in the final 2010 PQRI quality measure set, we acknowledge that section (k)(2)(C)(ii) of the Act provides an exception to the requirement that the Secretary select measures that have been endorsed by the entity with a contract under section 1890(a) of the Act (that is, the NQF). As

long as an area or medical topic for which a feasible and practical NQF-endorsed measure is not available has been identified and due consideration has been given to measures that have been adopted by the AQA or other consensus organization identified by Secretary.

+ The statutory requirements under section 1848(k)(2)(C) of the Act, subject to the exception noted above, require only that the measures be selected from measures that have been endorsed by the entity with a contract with the Secretary under section 1890(a) (that is, the NQF) and are silent with respect to how the measures that are submitted to the NQF for endorsement were developed. The basic steps for developing measures applicable to physicians and other eligible professionals prior to submission of the measures for endorsement may be carried out by a variety of different organizations. We do not believe there needs to be any special restrictions on the type or make up of the organizations carrying out this basic development of physician measures, such as restricting the initial development to physiciancontrolled organizations. Any such restriction would unduly limit the basic development of quality measures and the scope and utility of measures that may be considered for endorsement as voluntary consensus standards. The requirements under section 1848(k)(2)(C) of the Act pertain only to the selection of measures and not to the development of measures.

Address Gaps in PQRI Measure Set.

+ Measures that increase the scope of applicability of the PQRI measures to services furnished to Medicare beneficiaries and expand opportunities for eligible professionals to participate in PQRI. We seek to achieve broad ability to assess the quality of care furnished to Medicare beneficiaries, and ultimately to compare performance among professionals. We seek to increase the circumstances where eligible professionals have at least 3 measures applicable to their practice and measures that help expand the number of measures groups with at least four measures in a group.

 Measures of various aspects of clinical quality including outcome measures, where appropriate and feasible, process measures, structural measures, efficiency measures, and measures of patient experience of care.

Other considerations that we propose to apply to the selection of measures for 2010, regardless of whether the measure is a 2009 PQRI measure or not, are:

 Measures that are functional, which is to say measures that can be

technically implemented within the capacity of the CMS infrastructure for data collection, analysis, and calculation of reporting and performance rates. This leads to preference for measures that reflect readiness for implementation, such as those that are currently in the 2009 PQRI program or have been through testing. The purpose of measure testing is to reveal the measure's strengths and weaknesses so that the limitations can be addressed and the measure refined and strengthened prior to implementation. For new measures, preference is given to those that can be most efficiently implemented for data collection and submission. Therefore, any measures that have been found to be technically impractical to report because they are analytically challenging due to any number of factors, including those that are claimsbased, have not been included in the 2010 PQRI. For example, in some cases, we have proposed to replace existing 2009 PQRI measures with updated and improved measures that are less technically challenging to report.

 For some measures that are useful, but where data submission is not feasible through all otherwise available PQRI reporting mechanisms, a measure may be included for reporting solely through specific reporting mechanism(s) in which its submission is feasible. For example, we are proposing to limit reporting of some measures that previously were available for claimsbased reporting and registry-based reporting to registry-based reporting only because they were technically challenging to report and/or analyze through the claims-based reporting mechanism. For further discussion of the proposed reporting mechanisms, see section II.G.2.d. of this proposed rule.

We also reviewed 33 measures that have been retired from the PQRI in previous years using the considerations for selecting proposed measures for the 2010 PQRI discussed above. None were found to be eligible for inclusion in the 2010 PQRI quality measure set because they did not meet the criteria described above.

We welcome comments on the implication of including or excluding any given measure or measures proposed herein in the final 2010 PQRI quality measure set and on our approach in selecting measures. We recognize that some commenters may also wish to recommend additional measures for inclusion in the 2010 PQRI measures that we have not herein proposed. While we welcome all constructive comments and suggestions, and may consider such recommended

measures for inclusion in future measure sets for PQRI and/or other programs to which such measures may be relevant, we will not be able to consider such additional measures for inclusion in the 2010 measure set.

As discussed above, section 1848(k)(2)(D) of the Act requires that the public have the opportunity to provide input during the selection of measures. We also are required by other applicable statutes to provide opportunity for public comment on provisions of policy or regulation that are established via notice and comment rulemaking. Measures that were not included in this proposed rule for inclusion in the 2010 PORI that are recommended to CMS via comments on this proposed rule have not been placed before the public with opportunity for the public to comment on the selection of those measures within the rulemaking process. Even when measures have been published in the **Federal Register**, but in other contexts and not specifically proposed as PQRI measures, such publication does not provide true opportunity for public comment on those measures' potential inclusion in PQRI. Thus, such additional measures recommended for selection for the 2010 PQRI via comments on this proposed rule cannot be included in the 2010 measure set. However, as discussed above, we will consider comments and recommendations for measures, which may not be applicable to the final set of 2010 PQRI measures, for purposes of identifying measures for possible use in future years' PQRI or other initiatives to which those measures may be pertinent.

In addition, as in prior years, we note that we do not use notice and comment rulemaking as a means to update or modify measure specifications. Quality measures that have completed the consensus process have a designated party (usually, the measure developer/ owner) who has accepted responsibility for maintaining the measure. In general, it is the role of the measure owner, developer, or maintainer to make changes to a measure. Therefore, comments requesting changes to a specific proposed PORI measure's title, definition, and detailed specifications or coding should be directed to the measure developer identified in Tables 16 through 34. Contact information for the 2009 PQRI measure developers is listed in the "2009 PQRI Quality Measures List," which is available on the PQRI section of the CMS Web site at http://www.cms.hhs.gov/PQRI.

i. Proposed 2010 PQRI Quality Measures for Individual Eligible Professionals

As stated previously, individual eligible professionals have the choice of reporting PQRI quality measures data on either individual quality measures or on measures groups.

Consistent with the statutory requirements for measures included in the 2010 PORI and other considerations for identifying proposed 2010 quality measures discussed in section II.G.2.h.(1) and II.G.2.h.(2), respectively, of this proposed rule, the individual quality measures identified for use in the 2010 PQRI will be selected from those we propose in this rule and will be finalized as of the date the CY 2010 PFS final rule with comment period goes on display at the Office of the Federal Register. No changes (that is, additions or deletions of measures) will be made after publication of the CY 2010 PFS final rule with comment period. However, as was the case for 2008 and 2009, we may make modifications or refinements, such as revisions to measures titles and code additions, corrections, or revisions to the detailed specifications for the 2010 measures until the beginning of the reporting period. Such specification modifications may be made through the last day preceding the beginning of the reporting period. The 2010 measures specifications for individual quality

measures will be available on the PQRI section of the CMS Web site at http://www.cms.hhs.gov/PQRI when they are sufficiently developed or finalized. We are targeting finalization and publication of the detailed specifications for all 2010 PQRI measures on the PQRI section of the CMS Web site by November 15, 2009 and will, in no event, publish these specifications later than December 31, 2009. The detailed specifications will include instructions for reporting and identify the circumstances in which each measure is applicable.

For 2010, we are proposing that final PQRI quality measures will be selected from 153 of the 2009 PQRI measures and 149 measure suggestions received in response to the February 2009 invitation to submit suggestions for measures and measures groups for possible inclusion in the 2010 PORI (that is, the "Call for 2010 Measure Suggestions"). We propose to include a total of 168 measures (this includes both individual measures and measures that are part of a proposed 2010 measures group) on which individual eligible professionals can report for the 2010 PQRI. The individual PQRI quality measures proposed for the 2010 PQRI are listed in Tables 17 through 20 and fall into four broad categories as set forth below in this section. The four categories are the following:

- (1) Proposed 2010 Individual Quality Measures Selected From the 2009 PQRI Quality Measures Set Available for Claims-based Reporting and Registry-Based Reporting;
- (2) Proposed 2010 Individual Quality Measures Selected From the 2009 PQRI Quality Measures Set Available for Registry-based Reporting Only;
- (3) New Individual Quality Measures Proposed for 2010; and
- (4) Proposed 2010 Measures Available for EHR-based Reporting.

In addition, we propose 13 measures groups for 2010. The measures proposed for inclusion in each of the proposed 2010 measures groups are listed in Tables 21 through 33.

(1) Proposed 2010 Individual Quality Measures Selected From the 2009 PQRI Quality Measures Set Available for Claims-based Reporting and Registrybased Reporting

After careful consideration of 2009 PQRI measures, we propose to retire 7 measures because they did not meet one or more of the considerations for selection of proposed 2010 measures discussed in section II.G.2.h. of this proposed rule. The measures, including their Measure Number and Measure Title, and the specific reason(s) we are using as the basis for our proposal to retire the measures are identified in Table 16.

Table 16—2009 PQRI Quality Measures Not Proposed for Inclusion in the 2010 PQRI

| Measure no. | Measure title | Reason for retirement |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|

We propose to include in the 2010 PQRI quality measure set 116 of the 2009 PQRI measures, which would be available for either claims-based reporting or registry-based reporting as individual quality measures. We note that one of these proposed measures, Measure #46 Medication Reconciliation: Reconciliation After Discharge from an Inpatient Facility, is reportable through the registry-based reporting mechanism only in the 2009 PQRI. However, for the 2010 PQRI, we propose to make this measure available for either claimsbased reporting or registry-based reporting. For the 2009 PQRI, registries have reported difficulty capturing the

required information since the measure requires the inpatient discharge to be correlated to the outpatient visit. Therefore, for the 2010 PQRI we propose to make this measure available for both claims-based and registry-based reporting.

These 116 proposed measures do not include any measures that are proposed to be included as part of the 2010 Back Pain measures group. Similar to the 2009 PQRI, we propose that any 2010 PQRI measure that is included in the Back Pain measures group would not be reportable as individual measures through claims-based reporting or registry-based reporting.

The 116 individual 2009 PQRI measures proposed for inclusion in the 2010 PQRI quality measure set as individual quality measures for either claims-based reporting or registry-based reporting are listed by their Measure Number and Title in Table 17, along with the name of the measure's developer/owner, their NQF endorsement status as of May 1, 2009, and their AQA adoption status as of January 31, 2009. The PQRI Measure Number is a unique identifier assigned by CMS to all measures in the PQRI measure set. Once a PQRI Measure Number is assigned to a measure, it will not be used again to identify a different

measure, even if the original measure to which the number was assigned is subsequently retired from the PQRI measure set. A description of the proposed measures listed in Table 17 can be found in the "2009 PQRI Quality Measures List," which is available on the Measures and Codes page of the PQRI section of the CMS Web site at http://www.cms.hhs.gov/PQRI. The 2009 measures that are proposed to be available for registry-based reporting only for the 2010 PQRI are discussed and identified in section II.G.2.i.(2) of this proposed rule.

Please note that detailed measure specifications for 2009 individual PQRI quality measures may have been updated or modified during the NQF endorsement process or for other reasons prior to 2010. The 2010 PQRI quality measure specifications for any given individual quality measure may, therefore, be different from specifications for the same quality measure used for 2009. Specifications for all 2010 individual PQRI quality measures, whether or not included in the 2009 PQRI program, must be obtained from the specifications document for 2010 individual PQRI quality measures, which will be available on the PQRI section of the CMS Web site on or before December 31, 2009.

(2) Proposed 2010 Individual Quality Measures Selected From the 2009 PQRI Quality Measures Set Available for Registry-Based Reporting Only

In the 2008 PQRI, all 2008 PQRI quality measures were reportable through either claims-based reporting or registry-based reporting. In the CY 2009 PFS final rule with comment period (73 FR 69833), we noted that some measures are not as conducive to claims-based reporting and indicated that 18 of the 2009 PQRI quality measures are not currently reportable through claims-based reporting due to their complexity. Instead, these 18

measures must be reported through a qualified PQRI registry for the 2009 PQRI. We referred to these measures as "registry-only" measures. As discussed further in section II.G.2.d. of this proposed rule, registry-based reporting overcomes some of the limitations of claims-based reporting.

For the 2010 PQRI, we again propose to include registry-only individual measures. For 2010, we propose to select 26 registry-only individual measures from the 2009 PQRI.

As we noted previously, 1 measure (measure #46) that was a registry-only measure for the 2009 PQRI is now proposed to be available for either claims-based reporting or registry-based reporting in the 2010 PQRI. Therefore, this measure is not included among these 26 proposed registry-only individual measures. These 26 proposed measures do include 9 measures that are available for either claims-based reporting or registry-based reporting in the 2009 PQRI and are now proposed to be included in the 2010 PQRI as registry-only measures. We are proposing to make more 2009 measures registry-only to relieve some analytical difficulties encountered during the 2009 PORI.

Ålthough we are designating certain measures as registry-only measures, we cannot guarantee that there will be a registry qualified to submit each registry-only measure for 2010. We rely

on registries to self-nominate and identify the types of measures for which they would like to be qualified to submit quality measures results and numerator and denominator data on quality measures. If no registry self-nominates to submit measure results and numerator and denominator data on a particular type of measure for 2010, then an eligible professional would not be able to report that particular measure type. We invite comments on our proposal to increase the number of registry-only measures for the 2010 PQRI.

The Measure Number and Measure Title for these proposed registry-only measures are listed in Table 18 along with the name of each measure's developer, the measure's NQF endorsement status as of May 1, 2009, and the measure's AQA adoption status as of January 31, 2009. A description of the proposed measures listed in Table 18 can be found in the "2009 PQRI Quality Measures List," which is available on the Measures and Codes page of the PQRI section of the CMS Web site at http://www.cms.hhs.gov/ PORI. Measures that were available for either claims-based reporting or registrybased reporting in the 2009 PQRI but are proposed to be available for registrybased reporting only in the 2010 PQRI are identified by an asterisk (*) in Table

| 174 | Pediatric End Stage Renal Disease (ESRD):
Plan of Care for Inadequate Hemodialysis. | No | Yes | AMA-PCPI. |

^{*} Individual 2009 PQRI measures that were available for both claims-based and registry-based reporting but proposed to be available for registry-based reporting only for the 2010 PQRI.

Please note that detailed measure specifications for 2009 PQRI quality measures may have been updated or modified during the NQF endorsement process or for other reasons prior to 2010. Therefore, the 2010 PQRI quality measure specifications for any given quality measure may be different from specifications for the same quality

measure used for 2009. Specifications for all 2010 individual PQRI quality measures, whether or not included in the 2009 PQRI program, must be obtained from the specifications document for 2010 individual PQRI quality measures, which will be available on the PQRI section of the

CMS Web site on or before December 31, 2009.

(3) New Individual Quality Measures Proposed for 2010

We propose to include in the 2010 PQRI quality measure set 22 measures that were not included in the 2009 PQRI quality measures provided that each measure obtains NQF endorsement by July 1, 2009 and its detailed specifications are completed and ready for implementation in PQRI by August 15, 2009. Besides having NQF endorsement, the development of a measure is considered complete for the purposes of the 2010 PQRI if by August 15, 2009—(1) The final, detailed specifications for use in data collection for PQRI have been completed and are ready for implementation, and (2) all of the Category II Current Procedural Terminology (CPT II) codes required for

the measure have been established and will be effective for CMS claims data submission on or before January 1, 2010. The titles of these proposed additional, or new, measures are listed in Table 19 along with the name of the measure developer and the proposed reporting mechanism (that is, whether the measure is proposed to be reportable using claims, registries, or both). For these 22 proposed measures, a PQRI Measure Number will be assigned to a measure if and when the measure is

included in the final set of 2010 PQRI measures.

Due to the complexity of their measure specifications, we propose that 16 of these 22 measures would be available as registry-only measures for the 2010 PQRI. We do not believe that these 16 measures are conducive to the claims-based reporting mechanism. The remaining 6 measures would be available for reporting through either claims-based reporting or registry-based reporting.

(4) Proposed 2010 Individual Quality Measures Available for EHR-Based Reporting

As discussed in section II.G.2.d.(3) of this proposed rule, we propose to accept PQRI data from EHRs for a limited subset of the proposed 2010 PQRI quality measures, contingent upon the successful completion of our 2009 EHR data submission testing process and a determination that accepting data from EHRs on quality measures for the 2010 PQRI is practical and feasible. The 10 proposed 2010 PQRI quality measures on which we propose to accept clinical quality data extracted from EHRs are identified in Table 20. We propose to make these measures available for electronic submission via an EHR because these measures target preventive care or common chronic

conditions. In addition, 4 of these proposed measures overlap with measures used in the Medicare Quality Improvement Organization program's 9th Statement of Work. Finally, it is much less burdensome for an eligible professional to report Measure #124, which assesses adoption and use of EHRs, through an EHR than through claims.

TABLE 20—PROPOSED 2010 MEASURES AVAILABLE FOR EHR-BASED REPORTING

| Measure
number | Measure title | NQF endorse-
ment status as
of 5/1/09 | AQA adoption
status as of

|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|-----------------------------------------|-------------------|
| 1 | Diabetes Mellitus: Hemoglobin A1c Poor Control in Diabetes Mellitus. | Yes | Yes | NCQA |
| 2 | Diabetes Mellitus: Low Density Lipoprotein (LDL–C) Control in Diabetes Mellitus. | | | NCQA |
| 3 | Diabetes Mellitus: High Blood Pressure Control in Diabetes Mellitus. | | | NCQA |
| 5 | Heart Failure: Angiotensin-Converting Enzyme (ACE) Inhibitor or Angiotensin Receptor Blocker (ARB) Therapy for Left Ventricular Systolic Dysfunction (LVSD). | | Yes | AMA-PCPI |
| 7 | Coronary Artery Disease (CAD): Beta-
Blocker Therapy for CAD Patients with
Prior Myocardial Infarction (MI). | Yes | Yes | AMA-PCPI |
| 110 | Preventive Care and Screening: Influenza Immunization for Patients ≥ 50 Years Old. | Yes | No | AMA-PCPI |
| 111 | Preventive Care and Screening: Pneumonia Vaccination for Patients 65 Years and Older. | Yes | Yes | NCQA |
| 112 | Preventive Care and Screening: Screening Mammography. | Yes | Yes | NCQA |
| 113 | Preventive Care and Screening: Colorectal Cancer Screening. | Yes | Yes | NCQA |
| 124 | Health Information Technology (HIT): Adoption/Use of Electronic Health Records (EHR). | Yes | Yes | CMS/QIP |

(5) Measures Proposed for Inclusion in 2010 Measures Groups

We propose to retain the 7 2009 PQRI measures groups for the 2010 PQRI: (1) Diabetes Mellitus; (2) CKD; (3) Preventive Care; (4) CABG; (5) Rheumatoid Arthritis; (6) Perioperative Care; and (7) Back Pain. These measures groups were selected for inclusion in the 2010 PQRI because they each contain at least 4 PQRI quality measures that share a common denominator definition.

Except for the CABG measures group, all 2009 measures groups are reportable either through claims-based reporting or registry-based reporting. The CABG measures group, for the 2009 PQRI, is reportable through the registry-based reporting mechanism only since some measures included in the 2009 CABG measures group are registry-only individual PQRI measures. For this reason, we propose the CABG measures group would be reportable through the registry-based reporting mechanism

only for 2010 while the remaining 6 2009 PQRI measures groups would be reportable through either claims-based reporting or registry-based reporting for the 2010 PQRI.

Except for the measures included in the Back Pain measures group, the measures included in a 2009 PQRI measures group are reportable either as individual measures or as part of a measures group. As stated in the CY 2009 PFS final rule with comment period (73 FR 69843 through 69844), as individual measures, the measures in the Back Pain measures group are too basic. However, taken together they are meaningful indicators of quality of care for back pain. For this reason, for the 2010 PQRI, we propose that except for the measures included in the Back Pain measures group, the measures included in a 2009 PQRI measures group that we propose to carry forward for the 2010 PQRI would be reportable either as individual measures or as part of a measures group.

The measures proposed for inclusion in the 2010 measures groups that are based on the measures groups from 2009 are identified in Tables 21 through 27. Some measures proposed for inclusion in some of these measures groups for 2010 were not included in the measures groups in 2009. The 2009 measures proposed for inclusion in a 2010 measures group that were not included in the measures group for 2009 are identified with an asterisk (*).

As with measures group reporting in the 2008 and 2009 PQRI, we propose that each eligible professional electing to report a group of measures for 2010 must report all measures in the group that are applicable to each patient or encounter to which the measures group applies at least up to the minimum number of patients required by applicable reporting criteria (described above in section II.G.2.f. of this proposed rule). The individual measures included in the final 2010 PQRI measures groups will be limited to

those measures which will be identified $\,$ comment period as final 2010 PQRI in the CY 2010 PFS final rule with $\,$ measures

| 149 | Back Pain: Initial Visit | Yes | Yes | NCQA. |
| 150 | | Yes | Yes | NCQA. |

In addition to the 7 measures groups that we propose to retain from the 2009 PQRI, we propose 6 new measures groups for the 2010 PQRI, for a total of 13 CY 2010 measures groups. The 6 new measures groups proposed for the 2010 PQRI are: (1) Coronary Artery Disease (CAD); (2) Heart Failure (HF); (3) Ischemic Vascular Disease (IVD): (4) Hepatitis C; (5) Human Immunodeficiency Virus (HIV)/ Acquired Immune Deficiency Syndrome (AIDS); and (6) Community Acquired Pneumonia (CAP). Many of the 6 new measures groups proposed for 2010 contain proposed new registry-only measures, which would make them reportable through registry-based reporting only. Therefore, only 8 proposed 2010 measures groups would be reportable through either claimsbased reporting or registry-based reporting: Diabetes Mellitus; CKD; Preventive Care; Perioperative Care;

Rheumatoid Arthritis; Back Pain; Hepatitis C; and Community Acquired Pneumonia. We invite comments on our proposal to limit claims-based reporting of measures groups in 2010.

New measures groups are proposed for the 2010 PQRI in order to address gaps in quality reporting and are those that have a high impact on HHS and CMS priority topics for improved quality and efficiency for Medicare beneficiaries (such as prevention, chronic conditions, high cost/high volume conditions, improved care coordination, improved efficiency, improved patient and family experience of care, and effective management of acute and chronic episodes of care). Groups were identified in topical areas where: (1) 4 or more proposed 2010 measures are available; (2) the measures are NQF endorsed; and (3) they address a gap in quality reporting. The measures proposed for inclusion in these new

2010 measures groups are identified in Tables 28 through 33.

Some measures proposed for inclusion in these 6 measures group are current 2009 individual PQRI measures. The title of each such measure is preceded with its PQRI Measure Number in Tables 28 through 33. As stated previously, the PQRI Measure Number is a unique identifier assigned by CMS to all measures in the PORI measure set. Once a PQRI Measure Number is assigned to a measure, it will not be used again, even if the measure is subsequently retired from the PQRI measure set. Measures that are not preceded by a number (in other words, those preceded by "TBD") in Tables 28 through 33 have never been part of a PQRI measure set until being proposed now. A number will be assigned to such measures if we include them in the final set of 2010 PQRI measures groups.

| 59 | Community-Acquired Pneumonia (CAP): Empiric Antibiotic. | Yes | Yes | AMA-PCPI/NCQA. |

We note that the specifications for measures groups do not necessarily contain all the specification elements of each individual measure making up the measures group. This is based on the need for a common set of denominator specifications for all the measures making up a measures group in order to define the applicability of the measures group. Therefore, the specifications and instructions for measures groups will be provided separately from the specifications and instructions for the individual 2010 PQRI measures. We will post the detailed specifications and specific instructions for reporting measures groups on the PQRI section of the CMS Web site at http:// www.cms.hhs.gov/PQRI by no later than December 31, 2008.

Additionally, the detailed measure specifications and instructions for submitting data on those proposed 2010 measures groups that were also included as 2009 PQRI measures groups may be updated or modified prior to 2010. Therefore, the 2010 PORI measure specifications for any given measures group could be different from specifications and submission instructions for the same measures group used for 2009. These measure specification changes do not materially impact the intended meaning of the measures or the strength of the measures.

(6) Request for Public Comment on Measure Suggestions for Future PQRI Quality Measure Sets

As stated above, on February 1, 2009, we posted a "Call for 2010 PQRI Measure Suggestions" on the PQRI section of the CMS Web site at http://

www.cms.hhs.gov/PQRI. The "Call for 2010 PQRI Measure Suggestions" invited the public to submit suggestions for individual quality measures and measures groups (that is, suggestions for new measures groups and/or suggestions for the composition of existing measures groups) for consideration for possible inclusion in the proposed set of quality measure for use in the 2010 PQRI. To facilitate our evaluation of the suggested measures, we asked individuals or organizations submitting suggestions to provide us with the following information:

- Requestor contact information, such as name and title, organization/practice name, phone number and e-mail address;
 - Measure title;
 - Measure description;
 - Measure owner/developer;
- NQF endorsement status, including the date of endorsement or anticipated endorsement (if not NQF-endorsed) and type of endorsement (for example, timelimited endorsement);
- AQA adoption status, including date of AQA adoption or anticipated AQA adoption;
- Preferred PQRI reporting option for the suggested measure(s) (that is, claims, registry, registry-only, measures group, measures group only, EHRs); and
- The measure specifications. In lieu of posting a call for 2011 PQRI measure suggestions on the PQRI section of the CMS Web site in 2010, we invite commenters to submit suggestions for individual quality measures and measures groups (that is, suggestions for new measures groups and/or suggestions for the composition of proposed 2010 measures groups) for

consideration for possible inclusion in the proposed set of quality measures for use in the 2011 PQRI. When submitting suggestions for future PQRI quality measure sets as part of the comment period for this proposed rule, commenters should submit all the information requested above for the "Call for 2010 PQRI Measure Suggestions."

Please note that suggesting individual measures or measures for a new or proposed measures group does not mean that the measure(s) will be included in the proposed or final sets of measures of any proposed or final rules that address the 2011 PQRI. We will determine what individual measures and measures group(s) to include in the proposed set of quality measures, and after a period of public comment, we will make the final determination with regard to the final set of quality measures for the 2011 PQRI.

j. Proposed 2010 PQRI Quality Measures for Physician Groups Selected to Participate in the Group Practice Reporting Option

As discussed in section II.G.2.g. of this proposed rule, we propose that physician groups selected to participate in the 2010 PQRI group practice reporting option would be required to report on 26 measures. These measures are NQF-endorsed measures currently collected as part of the PGP and/or MCMP demonstrations and are identified in Table 34. To the extent that a measure is an existing PQRI measure, the Measure Title is preceded by the measure's PQRI Measure Number. If there is no number in the Measure Number column of the table, then the

measure is not an existing PQRI measure and will be added to the 2010

PQRI for purposes of the group practice reporting option.

TABLE 34—MEASURES PROPOSED FOR PHYSICIAN GROUPS PARTICIPATING IN THE 2010 PQRI GROUP PRACTICE REPORTING OPTION

| Measure No. | Measure title | NQF endorse-
ment status as
of 5/1/09 | AQA adoption
status as of
1/31/09 | Measure developer |
|-------------|-------------------------------------------------------------------------------------------|---------------------------------------------|-----------------------------------------|-------------------|
| 1 | Diabetes Mellitus: Hemoglobin A1c Poor Control. | Yes | Yes | NCQA. |
| 2 | Diabetes Mellitus: Low Density Lipoprotein Control. | Yes | Yes | NCQA. |
| 3 | Diabetes Mellitus: High Blood Pressure Control. | Yes | No | NCQA. |
| 5 | Heart Failure: ACE Inhibitor or ARB Therapy for LVSD. | Yes | Yes | AMA-PCPI. |
| 6 | Coronary Artery Disease: Oral Anti-platelet Therapy. | Yes | Yes | AMA-PCPI. |
| 7 | Coronary Artery Disease:Beta-blocker Therapy for CAD Patients with Prior MI. | Yes | Yes | AMA-PCPI. |
| 8 | Heart Failure: Beta-blocker Therapy for LVSD. | Yes | Yes | AMA-PCPI. |
| 110 | Preventive Care: Influenza Vaccination for Patients > 50 years. | Yes | No | AMA-PCPI. |
| 111 | Preventive Care: Pneumonia Vaccination for Patients 65+ years. | Yes | Yes | NCQA. |
| 112 | Preventive Care: Screening Mammography | Yes | Yes | NCQA. |
| 113 | Preventive Care: Screening Colorectal Cancer. | Yes | Yes | NCQA/AMA-PCPI. |
| 117 | Diabetes Mellitus: Dilated Eye Exam | Yes | Yes | NCQA. |
| 118 | Coronary Artery Disease: ACE/ARB for Patients with CAD and Diabetes and/or LVSD. | Yes | No | AMA-PCPI. |
| 119 | Diabetes Mellitus: Urine Screening for Microalbumin or Medical Attention for Nephropathy. | Yes | No | NCQA. |
| 163 | Diabetes Mellitus: Foot Exam | Yes | No | NCQA. |
| TBD | Diabetes Mellitus: Hemoglobin A1c Testing | Yes | No | NCQA. |
| TBD | Diabetes Mellitus: Lipid Profile | Yes | No | NCQA. |
| TBD | Heart Failure: Left Ventricular Function Testing. | Yes | Yes | CMS. |
| TBD | Heart Failure: Left Ventricular Function Assessment. | Yes | Yes | ACC/AHA/AMA-PCPI. |
| TBD | Heart Failure: Weight Measurement | Yes | No | ACC/AHA/AMA-PCPI. |
| TBD | Heart Failure: Patient Education | Yes | Yes | ACC/AHA/AMA-PCPI. |
| TBD | Heart Failure: Warfarin Therapy for Patients with Atrial Fibrillation. | Yes | Yes | ACC/AHA/AMA-PCPI. |
| TBD | Coronary Artery Disease: Drug Therapy for Lowering LDL-Cholesterol. | Yes | Yes | ACC/AHA/AMA—PCPI. |
| TBD | Preventive Care: Blood Pressure Management. | Yes | No | ACC/AHA/AMA-PCPI. |
| TBD | Hypertension: Blood Pressure Control | Yes | No | CMS/NCQA. |
| TBD | Hypertension: Plan of Care | Yes | No | ACC/AHA/AMA-PCPI. |

k. Public Reporting of PQRI Data

Section 1848(m)(5)(G) of the Act, as added by the MIPPA, requires the Secretary to post on the CMS Web site, in an easily understandable format, a list of the names of eligible professionals (or group practices) who satisfactorily submitted data on quality measures for the PQRI and the names of the eligible professionals (or group practices) who are successful electronic prescribers as defined and discussed further in section II.G.5. of this proposed rule. In accordance with section 1848(m)(5)(G) of the Act, we indicated in the CY 2009 PFS final rule

with comment period (73 FR 69846 through 69847) our intent, in 2010, to enhance the current Physician and Other Health Care Professionals directory at http://www.medicare.gov with the names of eligible professionals that satisfactorily submit quality data for the 2009 PQRI. In December 2008, we listed, by State, the names of eligible professionals who participated in the 2007 PQRI on the Physician and Other Health Care Professionals Directory.

As required by section 1848(m)(5)(G) of the Act, we intend to make public the names of eligible professionals and group practices that satisfactorily

submit quality data for the 2010 PQRI on the Physician and Other Health Care Professionals Directory. We anticipate that the names of individual eligible professionals and group practices that satisfactorily submit quality data for the 2010 PQRI will be available in 2011 after the 2010 incentive payments are paid.

For purposes of publicly reporting the names of eligible professionals, on the Physician and Other Health Care Professionals Directory, we propose to post the names of eligible professionals who: (1) Submit data on the 2010 PQRI quality measures through one of the

reporting mechanisms available for the 2010 PQRI; (2) meet one of the proposed satisfactory reporting criteria of individual measures or measures groups for the 2010 PQRI described above in section II.G.2.e. and II.G.2.f., respectively of this proposed rule; and (3) qualify to earn a PQRI incentive payment for covered professional services furnished during the applicable 2010 PQRI reporting period.

Similarly, for purposes of publicly reporting the names of group practices, on the Physician and Other Health Care Professionals Directory, we propose to post the names of group practices who: (1) Submit data on the 2010 PQRI quality measures through the proposed group practice reporting option described in section II.G.2.g. of this proposed rule; (2) meet the proposed criteria for satisfactory reporting under the group practice reporting option; and (3) qualify to earn a PQRI incentive payment for covered professional services furnished during the applicable 2010 PQRI reporting period for group

In addition to posting the information required by section 1848(m)(5)(G) of the Act, for those group practices that are selected to participate in PQRI under the group practice reporting option, we also propose to make the group practices' PQRI performance rates publicly available, for each of the measures. As we stated in the CY 2009 PFS proposed rule (73 FR 38574 through 38575), it is our goal to make the quality of care for services furnished to Medicare beneficiaries publicly available by making physician quality measure performance rates, either at the individual practitioner level or physician group level, publicly available. While we currently have Web pages at http://www.medicare.gov for the public reporting of performance results on standardized quality measures for hospitals (Hospital Compare), dialysis facilities (Dialysis Facility Compare), nursing homes (Nursing Home Compare), and home health facilities (Home Health Compare), we do not have a similar Compare Web site for information on the quality of care for services furnished by physicians and other professionals to Medicare beneficiaries.

Public reporting of group practices' PQRI performance results at the group practice level would allow us to move toward our goal of making information on physician performance publicly available. We believe that the way we have proposed to design the group practice reporting option (see section II.G.2.g. of this proposed rule) facilitates public reporting of the groups'

performance results. Group practices participating in the group practice reporting option would have already agreed in advance to have their performance results publicly reported. All groups participating in the group practice reporting option would be reporting on identical measures, which facilitate comparison of the results across groups. In addition, as a result of the proposed reporting criteria, no performance results would be calculated based on small denominator sizes. Finally, because we intend to modify the data collection tool will provide each group practice with numerator, denominator, and performance rates for each measure at the time of tool submission, the group practice will have had an opportunity to review their performance results before they are made public.

In making performance rates for group practices publicly available, we will attribute the group practice's performance to the entire group. We will not post information with respect to the performance of individual physicians or other eligible professionals associated with the group. However, we may identify the individual eligible professionals who were associated with the group during the reporting period. We invite comments regarding our proposal to publicly report group practices' PQRI performance results.

3. Section 131(c): Physician Resource Use Measurement and Reporting Program

a. Statutory Authority

As required under section 1848(n) of the Act, as added by section 131(c) of the MIPPA, we established and implemented by January 1, 2009, a Physician Feedback Program using Medicare claims data and other data to provide confidential feedback reports to physicians (and as determined appropriate by the Secretary, to groups of physicians) that measure the resources involved in furnishing care to Medicare beneficiaries. Section 1848(n) of the Act authorizes us, as we determine appropriate, to include information on the quality of care furnished to Medicare beneficiaries by the physician (or group of physicians) in the reports. Although we initially called this effort the Physician Resource Use Feedback Program, we are renaming this initiative the "Physician Resource Use Measurement and Reporting Program" (hereinafter referred to as "Program").

b. Background

As we stated in the CY 2009 PFS final rule with comment period (73 FR 69866), the Program would consist of multiple phases. We included a summary of the activities of phase I of the Program in the CY 2009 PFS final rule with comment period (73 FR 69866 through 69869). In addition to discussing phase I of the Program, we also highlighted the activities of several other initiatives, including Medicare Value-Based Purchasing (VBP) programs and demonstrations and related activities undertaken by the MedPAC and the Government Accountability Office (GAO). We refer readers to the CY 2009 PFS final rule with comment period (73 FR 69866 through 69869) for a detailed discussion of these activities.

In the CY 2009 PFS final rule with comment period (73 FR 69866 through 69869), we finalized, on an interim basis, the following parameters for phase I of the Program: (1) Use of both per capita and episode of care methodologies for resource use measurement; (2) cost of service category analysis (for example, imaging services or inpatient admissions); (3) use of 4 calendar years of claims data; (4) focus on high cost and/or high volume conditions; (5) reporting to physician specialties relevant to the selected focal conditions; (6) focus on physicians practicing in certain geographic areas, and (7) low, median, and high cost benchmarks. We intend to finalize these parameters in the CY 2010 PFS final rule with comment period.

c. Summary of Comments From the CY 2009 PFS Final Rule With Comment Period

Section 1848(n)(1)(B) of the Act requires that the Program measures resources based on the following: (1) An episode basis; (2) a per capita basis; or (3) both an episode and a per capita basis. We solicited public comments on the use of each of these measurement methodologies (73 FR 69868).

Comment: Commenters were in favor of using both the per capita and the per episode measurement methodologies.

Response: We agree with commenters that both the per capita and per episode methodologies are appropriate measures of cost for the Program. Each methodology offers distinct advantages. For a further discussion regarding the advantages, we refer readers to CMS' Medicare Resource Use Measurement Plan Web site at http://www.cms.hhs.gov/QualityInitiativesGenInfo/downloads/ResourceUse_Roadmap_OEA_1-15_508.pdf. We intend to finalize both

methodologies as options for use in future phases of the Program in the CY 2010 PFS final rule with comment period.

In phase I of the Program, we included cost of service (COS) category information from aggregated Medicare FFS claims data. We solicited public comment on which COS categories are most meaningful and actionable (73 FR 69868).

Comment: Commenters were overwhelmingly in favor of including E/M services and imaging services as meaningful and actionable COS categories. Further, commenters supported including laboratory services, outpatient services, procedures, and post-acute services as COS categories. No commenters raised specific categories that should be excluded.

Response: We appreciate the comments in support of the COS category analysis. We intend to finalize the option to include information on all of these COS categories in future phases of the Program in the CY 2010 PFS final rule with comment period.

Section 1848(n)(3) of the Act requires that, to the extent practicable, the data for the reports shall be based on the most recent data available. In phase I of the Physician Resource Use Feedback Program, we used Medicare FFS claims data from CY 2004 through CY 2007. We solicited public comment on this approach (73 FR 69868).

Comment: The majority of commenters stated that 3 calendar years of data is sufficient for calculating resource use measures. Further, commenters emphasized, to the extent practicable, CMS should use the most recent three years of data available for the Program.

Response: We agree with commenters that 3 years of Medicare FFS claims data are sufficient for calculating resource use measures. We intend to finalize the use of the most recent 3 years of data available for the Program in the CY 2010 PFS final rule with comment period.

Under section 1848(n)(4)(B) of the Act, the Secretary may focus the Program as appropriate, including focusing on physicians who treat conditions that are high cost, high volume, or both. We finalized on an interim basis for phase I of the Program, the following conditions: (1) Congestive heart failure; (2) chronic obstructive pulmonary disease; (3) prostate cancer; (4) cholecystitis; (5) coronary artery disease with acute myocardial infarction; (6) hip fracture; (7) community-acquired pneumonia; and (8) urinary tract infection (73 FR 69868). We solicited public comments on the

use of these high cost/high volume conditions (73 FR 69868).

Comment: Commenters strongly supported these conditions as appropriate for measuring the resources furnished to Medicare beneficiaries. In addition, several commenters suggested that we include diabetes among the priority conditions for the Program.

Response: We agree with commenters that diabetes is an important condition to capture in the Program. We intend to finalize the option to include: (1) Congestive heart failure; (2) chronic obstructive pulmonary disease; (3) prostate cancer; (4) cholecystitis; (5) coronary artery disease with acute myocardial infarction; (6) hip fracture; (7) community-acquired pneumonia; (8) urinary tract infection; and (9) diabetes, in the Program in the CY 2010 PFS final rule with comment period.

Under section $18\overline{4}8(n)(4)(A)$ of the Act, we are permitted to focus reporting on physician specialties that account for a certain percentage of spending for physicians' services. Based on the high cost and high volume conditions selected above, we included the following physician specialties in phase I of the Program: General internal medicine, family practice, gastroenterology, cardiology, general surgery, infectious disease, neurology, orthopedic surgery, physical medicine and rehabilitation, pulmonology, and urology (73 FR 69868). We solicited public comments on the inclusion of these physician specialties (73 FR 69868).

Comment: Commenters supported including all of the physician specialties listed above as appropriate for measurement and reporting based on the selected conditions.

Response: We agree with commenters that the physician specialties listed above should be included in the Program. We intend to finalize the option to include these physician specialties in the Program in the CY 2010 PFS final rule with comment period.

Section 1848(n)(4)(D) of the Act permits us to focus the Program on physicians practicing in certain geographic areas. In the CY 2009 PFS final rule with comment period (73 FR 69866 through 69869) we referenced two geographic sites (Baltimore, MD and Boston, MA) for phase I of the Program, which we generally selected based on close proximity to the CMS central office and due to high per capita Medicare costs, respectively. Since the final rule was published, we have also mailed reports to physicians in the following sites:

Greenville, SC;

- Indianapolis, IN;
- Northern New Jersey;
- Orange County, CA;
- Seattle, WA;
- · Syracuse, NY;
- Boston, MA;
- Cleveland, OH;
- East Lansing, MI;
- Little Rock, AR;
- Miami, FL; and
- Phoenix, AZ.

Comment: Commenters were in favor of including a limited number of sites representing a wide range of geographic locations to facilitate a phased implementation. No commenters submitted specific areas that should be excluded.

Response: We appreciate the comments in support of including a limited number of sites. We intend to continue to include the geographic sites listed above, and identify a limited number of new locations, in the Program in the CY 2010 PFS final rule with comment period.

Section 1848(n)(4)(C) of the Act also permits us to focus the program on physicians who use a high amount of resources compared to other physicians. The resource use reports disseminated in phase I of the Program defined peer groups of physicians by focusing on one condition, one specialty, and one of the geographic locations mentioned above. Within each peer group, the resource use reports indicated whether the physician fell over the 90th percentile (high cost benchmark), below the 10th percentile (low cost benchmark), or over the 50th percentile (median cost benchmark). We solicited public comments on which cost benchmarks make the resource use reports meaningful, actionable, and fair (73 FR 69869).

Comment: Commenters supported the use of high, median, and low cost benchmarks because the benchmarks highlight useful cost categories within a given peer group.

Response: We agree with commenters that the high, median, and low cost benchmarks are appropriate. We intend to finalize these cost benchmarks as options to include in the Program in the CY 2010 PFS final rule with comment period.

Comment: A few commenters expressed support for including small geographic areas for benchmarking.

Response: Though we recognize that a small geographic benchmark may capture a more homogenous beneficiary population for comparison, smaller sample sizes may adversely affect the statistical precision of the comparison. A larger sample captured through broader geographic benchmarks makes

it less likely that physicians will be erroneously identified as high or low cost outliers.

In addition to commenting on specific statutory parameters, commenters also provided feedback on other general topics. Those comments and responses are included below.

Comment: A few commenters mentioned the use of proprietary commercial episode grouper software as a barrier to transparency within the Program. These commenters indicated that in order to understand and validate the resource use reports, physicians would need additional information about how the proprietary commercial software allocated costs to episodes.

Response: One of the primary goals of CMS' VBP initiatives is to implement performance-based incentive payment programs with transparent methodologies. We note that the Program is currently limited under section 1848(n)(1)(A) of the Act to confidential reporting. Use of physician resource use information for other purposes, such as payment or public reporting, would likely require a higher level of transparency than confidential reporting.

We note that we have previously discussed the use of proprietary products for payment purposes in previous rules published in the **Federal Register**. For example, we discussed the use of a proprietary product prior to implementation of the MS–DRGs in the FY 2007 IPPS final rule (72 FR 47171).

We recognize the efforts of episode grouper vendors toward improved transparency. For more information on episode groupers that is publicly available, we refer readers to the following Web sites: http://www.thomsonreuters.com/ and http://www.thomsonreuters.com/ business units/healthcare/.

We are soliciting public comment on the use of proprietary products to measure episodes of the care in the Program.

Comment: Some commenters expressed that the best method for dissemination of resource use reports is paper copies distributed via the mail. Others favored an electronic mechanism for dissemination. Some commenters expressed that resource use reports should be made available in both paper format and electronically.

Response: For phase I of the Program, we disseminated reports in paper form via mail. We agree with commenters that electronic dissemination would also be desirable. Pending resource availability, we will consider this

suggestion in a future phase of the Program.

d. Phase I of the Program

As indicated above, the Program consists of multiple phases. Under this approach, each phase of the Program will inform future phases of the Program. We refer readers to the CY 2009 PFS final rule with comment period (73 FR 69866 through 69869) for a description of phase I Program activities. Using the parameters that were finalized on an interim basis, we have disseminated approximately 230 resource use reports to physicians in each of the 12 geographic regions listed above in this section. We refer readers to the following Web site to review a deidentified sample of the resource use reports disseminated to physicians: http://rurinfo.mathematica-mpr.com/. We are soliciting public comment on the design and elements of the sample resource use report used in phase I of the Program. We are particularly interested in receiving comment on the usefulness of the cost of service category drill-down analysis included on pages 10, 16, 20, 24, 28, 32, and 36 of the sample resource use report. These comments will inform future phases of the Program.

e. Phase II of the Program

For phase II, we are proposing to expand the Program in ways that will make the information more meaningful and actionable for physicians. We are proposing to add reporting to groups of physicians recognizing that physicians practice in various arrangements. Group level reporting provides a mechanism for addressing sample size issues that arise when individual physicians have too few Medicare beneficiaries with specific conditions to generate statistically significant reports. We are also proposing to add quality measurement information as context for interpreting comparative resource use. These proposals are addressed in greater detail below in this section.

Phase I of the Program focused on providing confidential feedback on resource use measures to individual physicians. Section 1848(n)(1)(A) of the Act states that the Secretary may also provide confidential feedback reports to groups of physicians. Many physicians practice in groups. Recognizing groups of physicians within the Program is consistent with other CMS VBP initiatives and demonstrations under the Medicare program.

We are proposing to provide reports to groups of physicians, in addition to providing reports to individual physicians, for the Program. In

December 2008, CMS posted an Issues Paper on the Development of a Transition to a Medicare Physician Value-Based Purchasing Program for Physician and Other Professional Services.¹ The Issues paper describes cost of care measurement, the focus of Phase I of this Program, as one of the central tenets of Physician Value-Based Purchasing (see section II.G.4. of this proposed rule). Further, the Issues Paper referenced possible groups of physicians under consideration including: (1) Formally established single or multispecialty group practices; (2) physicians practicing in defined geographic regions; and (3) physicians practicing within facilities or larger systems of care. We are soliciting public comments on the appropriateness of resource use measurement and reporting for these and other groups of physicians.

Phase I of the Program focused on providing confidential feedback on resource use measures. Section 1848(n)(1)(A) of the Act states that the Secretary may also include information on quality of care furnished to Medicare beneficiaries by the physician. Providing physicians with feedback on both quality and cost of care better captures the value of the care provided. Including quality measures in the Program is consistent with the direction for other CMS VBP initiatives.

We are proposing the use of quality measures, in addition to resource use measures, for the Program. Possible sources of quality measures include the Physician Quality Reporting Initiative (PORI) (see section II.G.2. of this proposed rule) and the Generating Medicare Physician Quality Performance Measurement Results (referred to as GEM) Project.² We refer readers to the Issues Paper, mentioned above,3 for additional discussion on how CMS would use quality measures in this Program and for Physician Value-Based Purchasing (see section II.G.4. of this proposed rule). We are soliciting public comments on the use of PQRI, GEM, and other broader aggregate quality measures to be used to capture value for the groups proposed above in the Physician Resource Use Measurement and Reporting Program.

4. Section 131(d): Plan for Transition to Value-Based Purchasing Program for Physicians and Other Practitioners

a. Background

Value-based purchasing uses payment incentives and transparency to increase the value of care by rewarding providers for higher quality and more efficient services and for publicly reporting performance information. Section 131(d) of the MIPPA requires the Secretary to develop a plan to transition to a value-based purchasing (VBP) program for Medicare payment for covered professional services made under, or based on, the PFS. Section 131(d) of the MIPPA also states that by May 1, 2010, the Secretary shall submit a report to the Congress, containing the plan, together with recommendations for such legislation and administrative action as the Secretary determines appropriate. The Secretary, through the Physician and Other Health Professional VBP (PVBP) Workgroup, submitted a progress letter to Congress on January 8, 2009 detailing the progress made on the VBP plan for physicians and other professionals.

Currently, Medicare health professional payments are based on quantity of services and procedures provided, without recognition of quality or efficiency. Under various authorities, we have pursued the implementation of building blocks to support the establishment of a VBP program for health professionals. These include initiatives in the following major topic areas: Quality and efficiency measurement and reporting, approaches for aligning incentives with providing higher quality care instead of higher volume of care, care coordination, prevention, and health information technology (HIT). The following is a list of examples of the initiatives specifically relevant to physicians and other health professionals:

- Pay for reporting of quality measurement data instituted under the Physician Quality Reporting Initiative (PORI):
- Resource use reports comparing overall costs, as well as costs for treatment across episodes of care, as part of, as required by the Physician Resource Use Feedback Program (See section II.G.3. of this proposed rule); and
- Demonstration projects, including the Physician Group Practice demonstration of a shared savings model, gainsharing demonstrations, medical home and other care coordination and disease management demonstrations, and the Acute Care

Episodes demonstration of a bundled payment model.

We are fully committed to implementing VBP incentives to drive quality improvement and greater efficiency for services furnished to Medicare beneficiaries.

b. Approach to Plan Development

We have created an internal crosscomponent team, the PVBP Workgroup, to lead development of the PVBP Plan. Four Subgroups were established to address the major sections of the Plan: Measures; incentives; data strategy and infrastructure; and public reporting. The PVBP Workgroup was tasked with reviewing the state-of-the-art in performance-based payment for physicians, including relevant Medicare programs and demonstrations and private sector initiatives; preparing an Issues Paper to present program objectives and design principles; engaging stakeholders and obtaining input on program design; and developing the PVBP Plan and Report to Congress. A similar approach was used in the development of the CMS Hospital

To guide the planning process, the PVBP Workgroup adopted the following goal to improve Medicare beneficiary health outcomes and experience of care by using payment incentives and transparency to encourage higher quality, more efficient professional services. In pursuit of this goal, the Workgroup has defined the following objectives:

- Promote evidence-based medicine through measurement, payment incentives, and transparency.
- Reduce fragmentation and duplication through accountability across settings, alignment of measures and incentives across settings, better care coordination for smoother transitions, and attention to episodes of care.
- Encourage effective management of chronic disease by improving early detection and prevention, focusing on preventable hospital readmissions, and emphasizing the importance of advanced care planning and appropriate end-of-life care.
- Accelerate the adoption of effective, interoperable HIT, including clinical registries, e-prescribing, and electronic health records.
- Empower consumers to make valuebased health care choices and encourage health professionals to improve the value of care by disseminating actionable performance information.

The goal and objectives were captured in an Issues Paper that was posted on the CMS Web site on November 24, 2008, in preparation for the December 9, 2008 Listening Session which was held at CMS headquarters. The Issues Paper included questions seeking public input on key design considerations. The Issues Paper is available on the CMS Web site at http://www.cms.hhs.gov/PhysicianFeeSched/downloads/PhysicianVBP-Plan-Issues-Paper.pdf. Nearly 500 stakeholders participated in the day-long Listening Session. We received both verbal and written comments that are informing the design of the PVBP Plan.

c. Stakeholder Input From the Listening Session

Both at the Listening Session, and in written comments received following the Session, we obtained input from a wide range of diverse stakeholders. A large portion of the comments were received from physician and other professional specialty societies. Commenters also included consumer advocates, health care consulting firms, and health IT vendors, and individual practicing physicians.

(1) Overarching Issues

Commenters generally affirmed the goal and objectives presented in the Issues Paper. Commenters encouraged the consideration of new payment approaches that cut across settings of care to align Medicare Part A and Part B payment incentives. Many commenters stated that the current Medicare payment system for health professionals is flawed in that it fails to align incentives for high-value care across providers and settings and that this cannot be fixed solely by a VBP program. Commenters agreed with the Issues Paper assumption that the Plan will need to contain more than one approach to accommodate different practice arrangements. Several commenters praised the attention given in the Issues Paper to addressing disparities and pointed out the necessity of adequate risk adjustment and proper use of measures, incentives, and program evaluation to protect vulnerable populations. Commenters also urged careful attention to the operational transition from the current payment system to VBP to minimize care delivery disruptions.

(2) Measurement

Commenters emphasized the importance of aligning measures across payment settings and applying measures consistently across payers. Many commenters stressed the need for valid, reliable, nationally-recognized measures, particularly in the areas of outcomes, care coordination, patient

experience, and the effective use of HIT. Adequate risk adjustment was raised as a paramount issue for outcomes and resource use measures. Regarding resource use measures, several commenters noted that quality and cost measures should be reported together and that CMS should get experience with confidential feedback reporting of resource use before using the information for incentives or public reporting (See section II.G.3. of this proposed rule). A few commenters suggested avoidable readmission rates as a good measure of both cost and quality of care. Commenters emphasized the importance of CMS working with health professionals on the selection of quality and cost measures.

Commenters generally agreed with the Issues Paper assumption that the Plan should address multiple levels of accountability, including individual health professionals, care teams, group practices, and accountable care entities. A few commenters mentioned that performance measurement at the regional level could help address regional variation. Consumer advocates made strong arguments for individual accountability, while noting that care delivery is ultimately a team effort. Others noted that measurement is more difficult at the individual level and that accountability at more aggregated levels could support promising payment models like bundled payment, gainsharing, and shared savings.

(3) Incentives

Commenters noted that incentive payments should be large enough to be meaningful, be made timely, and at least cover the cost of participating in the program. Commenters encouraged us to coordinate the incentives, as well as measures, with other payers. Many commenters stated that incentives should reward both improvement and attainment, and not be based on a ranking system that rewards only high attainers; instead, all who perform above a certain prospective benchmark should earn the incentive. Several commenters indicated that use of incentives could be an effective way to promote the use of effective HIT. Most commenters agreed that more than one incentive structure would be necessary to address different practice arrangements and to focus effort on specific objectives (for example, care coordination).

(4) Data Strategy and Infrastructure

Commenters emphasized that the administrative burden of data exchange, for both health professionals and CMS, should be minimized. Several commenters noted that clinical data registries and direct reporting from electronic health records were superior approaches to claims-based reporting for gathering clinical data. Commenters indicated that feedback on performance should be timely and detailed enough to be actionable. Commenters also asked for the opportunity to review and appeal the accuracy of their performance assessments prior to use of that information for payment incentives or public reporting.

(5) Public Reporting

Consumer advocates highlighted the importance of transparency while professional associations urged caution to assure that publicly reported information not be inaccurate or misleading for consumers. Several commenters noted that public reporting should address multiple levels of accountability, including individual health professionals, the care delivery team, group practices, and at the regional level. All agreed that publicly reported information should be user-friendly.

d. Next Steps in Plan Development

Building on input from the Listening Session on the Issues Paper topics, the PVBP Workgroup has begun to develop potential recommendations for inclusion in the Report to Congress. The first step is to design various approaches for performance-based payment that will address the planning goal and objectives for different practice arrangements. This design process will include identifying appropriate measures and incentive structures, considering the necessary data infrastructure, and addressing public reporting options. Consideration will be given to approaches that:

(1) Overlay the current PFS, such as differential fee schedule payments based on measured performance or for providing a medical home;

(2) Address multiple levels of accountability, including individual health professionals, as well as larger teams or organizations; and

(3) Promote more integrated care through shared savings models and bundled payment arrangements.

We are seeking further public comment on the development of the PVBP plan and Report to Congress. Comments already submitted by participating in person at the December 9, 2008 Listening Session or as written comments following the Session, do not need to be resubmitted. At this time, we are soliciting original comments that were not previously submitted. Particularly, we are interested in the

comments further discussing the issues of the appropriate level of accountability (for example, group practice, individual, region), and appropriate data submission mechanisms. The PVBP Workgroup will use public comment to inform its development of the Plan and Report to Congress.

- 5. Section 132: Incentives for Electronic Prescribing (E-Prescribing)—The E-Prescribing Incentive Program
- a. Program Background and Statutory Authority

As defined in § 423.159(a), e-prescribing is the transmission using electronic media, of prescription or prescription-related information between a prescriber, dispenser, pharmacy benefit manager (PBM), or health plan, either directly or through an intermediary, including an e-prescribing network. E-prescribing includes, but is not limited to, two-way transmissions between the point of care and the dispenser.

As discussed in the CY 2009 PFS final rule with comment period (73 FR 69847), there are many potential advantages to e-prescribing. Yet, there has been limited adoption and use of electronic prescribing by physicians and other professionals who prescribe medications. It is estimated that only 12 percent of office-based prescribers currently use e-prescribing (Surescripts. "National Progress Report on E-Prescribing." Welcome to the E-Prescribing Resource Center. 2008. Surescripts. 15 May 2009. http:// www.surescripts.com/downloads/NPR/ national-progress-report.pdf).

As described in the CY 2009 PFS final rule with comment period (73 FR 69847 through 69848), the MMA and the creation of the Medicare Prescription Drug Benefit Program (Part D) promoted the use of e-prescribing by requiring the adoption of uniform standards for the Medicare Part D electronic prescribing ("e-prescribing") program. As required by section 1860D-4(e) of the Act, "foundation standards" were adopted on November 7, 2005 (70 FR 67568) and additional Part D e-prescribing standards were adopted on April 7, 2008, and were implemented April 1, 2009 (73 FR 18918). Section 1848(m) of the Act, as amended by section 132 of the MIPPA, further promotes the use of e-prescribing by authorizing incentive payments to eligible professionals or group practices who are "successful electronic prescribers." This E-Prescribing Incentive Program is expected to encourage significant expansion of the use of e-prescribing by

authorizing a combination of financial incentives and payment adjustment and is separate from, and in addition to, any incentive payment that eligible professionals may earn through the PQRI program discussed in section II.G.2. of this proposed rule. Eligible professionals do not have to participate in PQRI to participate in the E-Prescribing Incentive Program (and vice versa).

For 2010, which is the second year of the E-Prescribing Incentive Program, the Secretary is authorized to provide successful e-prescribers, as defined in section 1848(m)(3)(B) of the Act and further discussed below in this section, an incentive payment equal to 2.0 percent of the total estimated (based on claims submitted not later than 2 months after the end of the reporting period) allowed charges for all covered professional services furnished during the 2010 reporting period. Covered professional services are defined under the statute to be services for which payment is made under, or is based on, the PFS and which are furnished by an eligible professional. The applicable electronic prescribing percent (2 percent) authorized for the 2010 E-Prescribing Incentive Program is the same as that authorized for the 2009 E-Prescribing Incentive Program.

Subject to section 1848(m)(2)(D) of the Act, as added by section 4101(f)(2)(B) of the HITECH Act (Title IV of Division B of the Recovery Act, together with Title XIII of Division A of the Recovery Act) (Pub. L. 111–5), which was enacted on February 17, 2009, the incentive payments for successful electronic prescribers for future years are authorized under section 1848(b)(2)(C) of the Act as follows:

- 1.0 percent for 2011.
- 1.0 percent for 2012.
- 0.5 percent for 2013.

Section 1848(m)(2)(D) of the Act, as added by section 4001(f)(2)(B) of the Recovery Act, specifies a limitation to the e-prescribing incentive in relation to whether the EHR incentive authorized by the Recovery Act is earned. Section 1848(m)(2)(D) of the Act specifically provides that the e-prescribing incentive does not apply to an eligible professional (or group practice), if, for the EHR reporting period, the eligible professional (or group practice) earns an incentive payment under the new Health Information Technology (HIT) incentive program authorized by the Recovery Act for eligible professionals who are meaningful EHR users. The new HIT incentive program for meaningful EHR users begins in 2011. Therefore, beginning in 2011, eligible professionals who earn an incentive

under the new HIT incentive program for meaningful EHR users, with respect to a certified EHR technology that has eprescribing capabilities, would not be eligible to earn a separate incentive payment for being a successful electronic prescriber under the Eprescribing Incentive Program.

In addition, under section 1848(a)(5)(A) of the Act, as added by section 132(b) of the MIPPA and amended by section 4001(f)(1) of the Recovery Act, a PFS payment adjustment applies beginning in 2012 to those who are not successful electronic prescribers. Specifically, for 2012, 2013, and 2014, if the eligible professional is not a successful electronic prescriber for the reporting period for the year, the fee schedule amount for covered professional services furnished by such professionals during the year shall be less than the fee schedule amount that would otherwise apply by:

- 1.0 percent for 2012.
- 1.5 percent for 2013.
- 2.0 percent for 2014.

We note that the criteria for determination of successful electronic prescriber proposed herein may not necessarily be the criteria that will be used to determine the applicability of the payment adjustment in the future. Policy considerations underlying the application of the incentive payment are not necessarily the same as those in applying a payment adjustment. In general, we believe that an incentive should be broadly available to encourage the widest possible adoption of e-prescribing, even for low volume prescribers. On the other hand, a payment adjustment should be applied primarily to assure that those who have a large volume of prescribing do so electronically, without penalizing those for whom the adoption and use of an eprescribing system may be impractical given the low volume of prescribing. We will discuss the application of the payment adjustment in future notice and comment rulemaking, but prior to the beginning of the reporting period that will be used to determine the applicability of the payment adjustment. Under section 1848(m)(6)(A) of the

Under section 1848(m)(6)(A) of the Act, the definition of "eligible professional" for purposes of eligibility for the E-Prescribing Incentive Program is identical to the definition of "eligible professional" for the PQRI under section 1848(k)(3)(B) of the Act. In other words, eligible professionals include physicians, other practitioners as described in section 1842(b)(18)(C) of the Act, physical and occupational therapists, qualified speech-language pathologists, and qualified audiologists. However, for purposes of the E-

prescribing Incentive Program, eligibility is further restricted by scope of practice to those professionals who have prescribing authority. Detailed information about the types of professionals that are eligible to participate in the E-Prescribing Incentive Program is available on the "Eligible Professionals" page of the E-Prescribing Incentive Program section of the CMS Web site at http://www.cms.hhs.gov/ERXIncentive.

Similar to the PQRI, the E-Prescribing Incentive Program, in 2009, is an incentive program in which determination of whether an eligible professional is a successful electronic prescriber will be made at the individual professional level, based on the NPI. Inasmuch as some individuals (identified by NPIs) may be associated with more than one practice or TIN, the determination of whether an eligible professional is a successful electronic prescriber will be made to the holder of each unique TIN/NPI combination. Then, payment will be made to the applicable holder of the TIN. For 2010, the determination of whether an eligible professional is a successful electronic prescriber will continue to be made for each unique TIN/NPI combination. However, section 1848(m)(3)(C) of the Act requires the Secretary by January 1, 2010 to establish and have in place a process under which eligible professionals in a group practice (as defined by the Secretary) shall be treated as meeting the requirements for submitting data on electronic prescribing quality measures for covered professional services for a reporting period (or, for purposes of the payment adjustment under section 1848(a)(5) of the Act, for a reporting period for a year) if, in lieu of reporting the electronic prescribing measure, the group practice reports measures determined appropriate by the Secretary, such as measures that target high-cost chronic conditions and preventive care, in a form and manner, and at a time specified by the Secretary. Therefore, in addition to making incentive payments for 2010 to group practices based on separately analyzing whether the individual eligible professionals within the group practice are successful electronic prescribers, we will also begin making incentive payments to group practices based on the determination that the group practice, as a whole, is a successful electronic prescriber.

b. The Proposed 2010 Reporting Period for the E-Prescribing Incentive Program

Section 1848(m)(6)(C)(i)(II) of the Act defines "reporting period" for the 2010

E-Prescribing Incentive Program to be the entire year. Section 1848(m)(6)(C)(ii) of the Act, as added by the MIPPA, however, authorizes the Secretary to revise the reporting period for years after 2009 if the Secretary determines such revision is appropriate, produces valid results on measures reported, and is consistent with the goals of maximizing scientific validity and reducing administrative burden. We propose the 2010 E-Prescribing Incentive Program reporting period will be the entire year (January 1, 2010-December 31, 2010). We believe that keeping the 2010 E-Prescribing Incentive Program reporting period consistent with the 2009 E-Prescribing Incentive Program reporting period will help to maintain program stability and be less confusing for eligible professionals.

Successful electronic prescribers would be eligible to receive an incentive payment equal to 2.0 percent of the total estimated allowed charges (based on claims submitted by no later than February 28, 2011) for all covered professional services furnished January 1, 2010 through December 31, 2010.

c. Proposed Criteria for Determination of Successful E-Prescriber for Eligible Professionals

Under section 1848(m)(3)(B) of the Act, in order to qualify for the incentive payment, an eligible professional must be a "successful electronic prescriber," which the Secretary is authorized to identify using 1 of 2 possible criteria. One criterion, under section 1848(m)(3)(B)(ii) of the Act, is based on the eligible professional's reporting, in at least 50 percent of the reportable cases, on any e-prescribing quality measures that have been established under the physician reporting system under subsection 1848(k) (which, as noted previously, we have named "PORI" for ease of reference) and are applicable to services furnished by the eligible professional during a reporting period. The second criterion, under section 1848(m)(3)(B)(iii) of the Act, is based on the electronic submission by the eligible professional of a sufficient number (as determined by the Secretary) of prescriptions under Part D during the reporting period. If the Secretary decides to use the latter standard, then, in accordance with section 1848(m)(3)(B)(iv) of the Act, the Secretary is authorized to use Part D drug claims data to assess whether a "sufficient" number of prescriptions has been submitted by eligible professionals. However, under section 1848(m)(3)(B)(i) of the Act, if the standard based on a sufficient number

(as determined by the Secretary) of electronic Part D prescriptions is applied for a particular reporting period, then the standard based on the reporting on e-prescribing measures would no longer apply.

For 2009, as described in the CY 2009 PFS final rule with comment period (73 FR 69847 through 69852), we required eligible professionals to report on the eprescribing measure that had been previously used in the 2008 PQRI. For 2010, we propose to continue to require eligible professionals to report on the electronic prescribing measure used in the 2009 E-Prescribing Incentive Program to determine whether an eligible professional is a successful eprescriber, but we propose to use

modified reporting criteria.

As we stated in the CY 2009 PFS final rule with comment period (73 FR 69848), we intend to consider the use of a certain number of Part D prescribing events as the basis for the incentive payment in future years. However, we do not believe that it is feasible to move to this substitute requirement in 2010. The accuracy and completeness of the Part D data with respect to whether a prescription was submitted electronically is unknown. Information on whether a prescription was submitted electronically by an individual eligible professional will not be collected on the Part D claims, or prescription drug event (PDE) data, until 2010. Also, prescription drug plan sponsors were not required to send PDE data with an individual prescriber's NPI until April 1, 2009. We currently have no information on the accuracy and completeness of the NPI data that is submitted with the PDE data. The NPI is needed in order for us to be able to link an eligible professional's PDE data to his or her Medicare Part B claims to calculate the incentive payment amount. During 2010, we expect to evaluate the adequacy of Part D data to determine the feasibility of its use for determining whether an eligible professional qualifies as a successful eprescriber in future years.

(1) Reporting the Electronic Prescribing Measure

For 2009, we limited the reporting mechanism for the electronic prescribing measure to claims-based reporting. For 2010, we propose 3 reporting mechanisms for individual eligible professionals. First, we propose to retain the claims-based reporting mechanism that is used in the 2009 E-Prescribing Incentive Program. In addition, similar to the PQRI, for the Eprescribing Incentive Program, we propose to implement a registry-based

reporting mechanism and, depending on whether we finalize the proposed EHRbased reporting mechanism for PQRI, we are also proposing that an EHR based reporting mechanism be available for the electronic prescribing measure. In other words, eligible professionals would be able to choose whether to submit data on the electronic prescribing measure through claims, a qualified registry, or a qualified EHR product. As we stated in our discussion of the proposed PQRI reporting mechanisms for 2010 in section II.G.2.d. of this proposed rule, we recognize that one mode of quality reporting does not suit all practices. Similar to the PQRI, we believe that having multiple reporting mechanisms for the reporting of the electronic prescribing measure should increase opportunities for eligible professionals to successfully report the electronic prescribing measure. We invite comments on our proposal to provide alternatives to the claims-based reporting mechanism for reporting the electronic prescribing measure.

We propose that only registries qualified to submit quality measure results and numerator and denominator data on quality measures on behalf of eligible professionals for the 2010 PQRI would be qualified to submit measure results and numerator and denominator data on the electronic prescribing measure on behalf of eligible professionals for the 2010 E-Prescribing Incentive Program. We note that not all registries qualified to submit quality measure results and numerator and denominator data on quality measures on behalf of eligible professionals for the 2010 PQRI would be qualified to submit quality measure results and numerator and denominator data on the e-prescribing measure. PQRI qualified registries will be qualified to submit specific types of measures. The electronic prescribing measure is reportable by an eligible professional any time he or she bills for one of the procedure codes for Part B services included in the measure's denominator. Some registries who self-nominate to become a qualified registry for PQRI may not choose to self-nominate to become a qualified registry for submitting measures that require reporting at each eligible visit. Registries will need to indicate their desire to qualify to submit measure results and numerator and denominator data on the electronic prescribing measure for the 2010 E-Prescribing Incentive Program at the time that they submit their selfnomination letter for the 2010 PQRI. The self-nomination process and

requirements for registries for the PQRI, which also would apply to the registries for the 2010 E-Prescribing Incentive Program, are discussed in section II.G.2.d.(4) of this proposed rule. We will post a list of qualified registries for the 2010 E-Prescribing Incentive Program on the E-Prescribing Incentive Program section of the CMS Web site at http://www.cms.hhs.gov/ERXIncentive when we post the list of qualified registries for the 2010 PQRI on the PQRI section of the CMS Web site.

Similarly, we propose that only EHR products "qualified" to potentially be able to submit clinical quality data extracted from the EHR to CMS for the 2010 PQRI would be considered "qualified" for the purpose of an eligible professional potentially being able to submit data on the electronic prescribing measure for the 2010 E-Prescribing Incentive Program. The selfnomination process and requirements for EHR vendors for the PQRI, which also would apply to the EHR vendors for the 2010 E-Prescribing Incentive Program are discussed in section II.G.2.d.(5) of this proposed rule. EHR vendors will need to indicate their desire to have one or more of their EHR products qualified for the purpose of an eligible professional potentially being able to submit data on the electronic prescribing measure for the 2010 E-Prescribing Incentive Program at the time that they submit their selfnomination letter for the 2010 PQRI. If we finalize the EHR-based reporting mechanism for the 2010 PQRI, we will post a list of qualified EHR vendors and their products (including the version that is qualified) for the 2010 E-Prescribing Incentive Program, on the E-Prescribing Incentive Program section of the CMS Web site at http:// www.cms.hhs.gov/ERXIncentive when we post the list of qualified EHR products for the 2010 PQRI on the PQRI section of the CMS Web site. We welcome comments on our proposal to limit the registries and EHR products qualified to submit the electronic prescribing measure for the 2010 E-Prescribing Incentive Program to those that are qualified registries and EHR products, respectively, for the 2010 PQRI.

(2) The Reporting Denominator for the Electronic Prescribing Measure

The electronic prescribing measure, similar to the PQRI measures, has 2 basic elements. These include: (1) A reporting denominator that defines the circumstances when the measure is reportable; and (2) a reporting numerator.

The denominator for the electronic prescribing measure consists of specific billing codes for professional services. The measure becomes reportable when any one of these procedure codes is billed by an eligible professional as Part B covered professional services. For 2009, the codes included in the measure's denominator were codes that are typically billed for services in the office or outpatient setting furnished by physicians or other eligible professionals. There are no diagnosis codes or age/gender requirements in order to be included in the measure's denominator (that is, reporting of the eprescribing measure is not further limited to certain ages or a specific gender). However, as discussed further under section II.G.5.c.(5) of this proposed rule, eligible professionals are not required to report this measure in all cases in which the measure is reportable. Physicians and other eligible professionals who do not bill for one of the procedure codes for Part B covered professional services included in the measure's denominator will have no occasion to report the electronic prescribing measure.

Currently, the denominator codes for the electronic prescribing measure consist of the following CPT and G-codes: 90801; 90802; 90804; 90805; 90806; 90807; 90808; 90809; 92002; 92004; 92012; 92014; 96150; 96151; 96152; 99201; 99202; 99203; 99204; 99205; 99211; 99212; 99213; 99214; 99215; 99241; 99242; 99243; 99244; 99245; G0101: G0108: G0109.

As initially required under section 1848(k)(2)(A)(ii) of the Act, and further established through rulemaking and under section 1848(m)(2)(B) of the Act, however, we may modify the codes making up the denominator of the electronic prescribing measure. As such, we propose, in response to public comments received, to expand the scope of the denominator codes for 2010 to professional services outside the professional office and outpatient setting, such as professional services furnished in skilled nursing facilities or the home care setting. We propose to add the following CPT codes to the denominator of the electronic prescribing measure for 2010: 99304; 99305; 99306; 99307; 99308; 99309; 99310; 99315; 99316; 99341; 99342; 99343; 99344; 99345; 99347; 99348; 99349; 99350; and 90862. The proposed expansion of the electronic prescribing measure denominator is expected to provide more eligible professionals the opportunity to report the measure, and thus, provide more opportunities for eligible professionals to participate in the E-Prescribing Incentive Program. We

invite comments on the proposed changes to codes identified for the electronic prescribing measure denominator.

By December 31, 2009, we will post the final specifications of the measure on the "E-Prescribing Measure" page of the E-Prescribing Incentive Program section of the CMS Web site at http://www.cms.hhs.gov/ERXIncentive.

(3) Qualified Electronic Prescribing System—Required Functionalities and Part D E-Prescribing Standards

To report the electronic prescribing measure in 2010, we propose that the eligible professional must report 1 of 3 "G" codes, as will be discussed below. However, in reporting any of the Gcodes and thereby qualifying for the incentive payment for e-prescribing in 2010, the professional must have and regularly use a "qualified" electronic prescribing system as defined in the electronic prescribing measure specifications. If the professional does not have general access to an eprescribing system in the practice setting, there is nothing to report. Required Functionalities for a "Qualified" Electronic Prescriber System. What constitutes a "qualified" electronic prescribing system is based upon certain required functionalities that the system can perform. As currently specified in the measure, a "qualified" electronic prescribing system is one that can:

(a) Generate a complete active medication list incorporating electronic data received from applicable pharmacies and PBMs, if available.

(b) Allow eligible professionals to select medications, print prescriptions, electronically transmit prescriptions, and conduct alerts (written or acoustic signals to warn the prescriber of possible undesirable or unsafe situations including potentially inappropriate dose or route of administration of a drug, drug-drug interactions, allergy concerns, or warnings and cautions). This functionality must be enabled.

(c) Provide information related to lower cost, therapeutically appropriate alternatives (if any). The ability of an electronic prescribing system to receive tiered formulary information, if available, would suffice for this requirement for 2010 and until this function is more widely available in the marketplace.

(d) Provide information on formulary or tiered formulary medications, patient eligibility, and authorization requirements received electronically from the patient's drug plan (if available).

Part D E-Prescribing Standards. Section 1848(m)(3)(B)(v) of the Act, to the extent practicable, in determining whether an eligible professional is a successful e-prescriber, "the Secretary shall ensure that eligible professionals utilize electronic prescribing systems in compliance with standards established for such systems pursuant to the Part D Electronic Prescribing Program under section 1860D-4(e)" of the Act. The Part D standards for electronic prescribing systems establish which electronic standards Part D sponsors, providers, and dispensers must use when they electronically transmit prescriptions and certain prescription related information for Part D covered drugs that are prescribed for Part D eligible individuals. To be a qualified electronic prescribing system under the Eprescribing Incentive Program, electronic systems must convey the information listed above under (a) through (d) using the standards currently in effect for the Part D eprescribing program. Additional Part D e-prescribing standards were implemented April 1, 2009. These latest Part D e-prescribing standards, and those that had previously been adopted, can be found on the CMS Web site at http://www.cms.hhs.gov/eprescribing.

To ensure that eligible professionals utilize electronic prescribing systems that meet these requirements, the electronic prescribing measure requires that those functionalities required for a "qualified" electronic prescribing system must utilize the adopted Part D e-prescribing standards. The Part D eprescribing standards relevant to the four functionalities for a "qualified" system in the electronic prescribing measure, described above and listed as

(a), (b), (c), and (d), are:

(a) Generate medication list—Use the National Council for Prescription Drug Programs (NCPDP) Prescriber/ Pharmacist Interface SCRIPT Standard, Implementation Guide, Version 8, Release 1. October 2005 (hereinafter "NCPDP SCRIPT 8.1") Medication History Standard;

(b) Transmit prescriptions electronically—Use the NCPDP SCRIPT 8.1 for the transactions listed at

§ 423.160(b)(2);

(c) Provide information on lower cost alternatives—Use the NCPDP Formulary and Benefits Standard, Implementation Guide, Version 1, Release 0 (Version 1.0), October 2005 (hereinafter "NCPDP Formulary and Benefits 1.0");

(d) Provide information on formulary or tiered formulary medications, patient eligibility, and authorization requirements received electronically from the patient's drug plan—use:

(1) NCPDP Formulary and Benefits 1.0 for communicating formulary and benefits information between prescribers and plans.

(2) Accredited Standards Committee (ASC) X12N 270/271—Health Care Eligibility Benefit Inquiry and Response, Version 4010, May 2000, Washington Publishing Company, 004010X092 and Addenda to Health Care Eligibility Benefit Inquiry and Response, Version 4010A1, October 2002, Washington Publishing Company, 004010X092A1 for communicating eligibly information between the plan and prescribers.

(3) NCPDP Telecommunication Standard Specification, Version 5, Release 1 (Version 5.1), September 1999, and equivalent NCPDP Batch Standard Batch Implementation Guide, Version 1, Release 1 (Version 1.1), January 2000 for communicating eligibility information between the plan and dispensers.

There are, however, Part D eprescribing standards that are in effect for functionalities that are not commonly utilized at this time. Such functionalities are not currently required for a "qualified" system under the electronic prescribing measure. One example is Rx Fill Notification, which is discussed in the Part D e-prescribing final rule (73 FR 18918, 18926). For purposes of the 2010 Electronic Prescribing Program and incentive payments, it is not required that the electronic prescribing system contain all functionalities for which there are available Part D e-prescribing standards. Rather, the only required functionalities are those stated in the measure and described above in the section entitled "Required Functionalities for a 'Qualified' Electronic Prescribing System." For those required functionalities described above, we propose that a "qualified" system must use the adopted Part D e-prescribing standards for electronic messaging.

There are other aspects of the functionalities for a "qualified" system that are not dependent on electronic messaging and are part of the software of the electronic prescribing system, for which Part D standards for electronic prescribing do not pertain. For example, the requirements in qualification (b) listed above that require the system to allow professionals to select medications, print prescriptions, and conduct alerts are functions included in the particular software, for which Part D standards for electronic messaging do not apply.

We are aware that there are significant numbers of eligible professionals who are interested in earning the incentive payment, but currently do not have an electronic prescribing system. The

electronic prescribing measure does not require the use of any particular system or transmission network; only that the system be a "qualified" system having the functionalities described above based on Part D e-prescribing standards.

(4) The Reporting Numerator for the **Electronic Prescribing Measure**

Currently, to report for an applicable case where 1 of the denominator codes is billed for Part B services, an eligible professional must report one of 3 Gcodes specified in the electronic prescribing measure. Currently, the Gcodes are the following:

- One G-code is used to report that all prescriptions in connection with the visit billed were electronically prescribed (G8443);
- Another G-code indicates that no prescriptions were generated during the visit (G8445); and
- A third G-code is used when some or all prescriptions were written or phoned in due to patient request, State or Federal law, the pharmacy's system being unable to receive the data electronically or because the prescription was for a narcotic or other controlled substance (G8446).

However, for 2010, we propose to modify the first G-code (G8443) to indicate that at least 1 prescription in connection with the visit billed was electronically prescribed. In addition, we propose to eliminate the 2 remaining G-codes from the measure's numerator: G8445; and G8446. We believe these modifications to the electronic prescribing measure will simplify reporting of the measure because the measure will only be reportable when an eligible professional has electronically prescribed. We invite comments on the proposed modifications to the electronic prescribing measure numerator.

The e-prescribing quality measure would not apply unless an eligible professional furnishes services indicated by one of the codes included in the measure's denominator. Therefore, for claims-based reporting, for example, it is not necessary for an eligible professional to report G-codes for the electronic prescribing measure on claims not containing one of the denominator codes. However, if reporting a G-code, the G-code data submission will only be considered valid if it appears on the same Part B claim containing one of the eprescribing quality measure's denominator codes.

(5) Criteria for Successful Reporting of the Electronic Prescribing Measure

As discussed above, section 1848(m)(3)(B)(ii) of the Act specifies that an eligible professional shall be treated as a successful electronic prescriber for a reporting period based on the eligible professional's reporting of the electronic prescribing measure in at least 50 percent of applicable cases. However, section 1848(m)(3)(D) of the Act permits the Secretary in consultation with stakeholders and experts to revise the criteria for submitting data on electronic prescribing measures under section 1848(3)(B)(ii) of the Act for years after 2009. Therefore, we propose to revise the criteria for submitting data on the electronic prescribing measure. For 2010, rather than requiring that the electronic prescribing measure be reported for a certain proportion of reportable cases, we propose to make the determination of whether an eligible professional is a successful electronic prescriber based on a count of the number of times an eligible professional reports that at least one prescription created during the encounter was generated using a qualified e-prescribing system (that is, reports the modified G8443 code). We believe that modifying the criteria for submitting the electronic prescribing measure in this manner will bring us closer to our stated intention to transition to using a certain number of electronic Part D prescribing events as the basis for the incentive payment in future years. In proposing to revise the criteria for successful reporting of the electronic prescribing measure in this manner, we also assume that once an eligible professional has invested in an e-prescribing system, integrated the use of the e-prescribing system into the practice's work flows, and has used the system to some extent, he or she is likely to continue to use the eprescribing system for most of the prescriptions he or she generates.

Preliminary data from the 2008 PQRI through September 2008 indicate that half of the eligible professionals who were eligible to report the electronic prescribing measure under the 2008 PQRI (measure #125) had 132 or more instances in which they were eligible to report the measure, with a maximum of 12,655 reporting instances. Therefore, in order to successfully report the measure under the 2009 criteria for successful eprescribing (that is, reporting the measure for at least 50 percent of applicable cases), half of eligible professionals would have had to report measure #125 66 times or more (that is, 50 percent of 132 reporting instances),

with a maximum of 6,328 times (that is, 50 percent of 12,655 reporting instances). For structural measures such as the electronic prescribing measure, once an eligible professional has demonstrated that he or she has integrated use of an e-prescribing system into his or her practice's work flow, requiring the eligible professional to continue to report the measure represents an administrative burden with little added benefit to the reliability and validity of the data being reported. In contrast, for clinical quality measures, the reliability and validity of the performance rates depends on the adequacy of the sample. Therefore, we propose that an eligible professional would be required to report that at least 1 prescription for a Medicare Part B FFS patient created during an encounter that is represented by 1 of the codes in the denominator of the electronic prescribing measure was generated using a qualified e-prescribing system for at least 25 times during the 2010 reporting period.

The proposed minimum reporting threshold of 25 is based on the notion that an eligible professional would need to e-prescribe, on average, for approximately 2 Medicare Part B FFS patient encounters per month during the reporting period in order to be considered a successful e-prescriber. The proposed reporting threshold of 25 also takes into consideration that prescriptions are not generated with every Medicare Part B FFS patient encounter and some prescriptions, such as narcotics, cannot be prescribed electronically.

We welcome comments on the proposed criteria for determination of successful electronic prescriber. We are particularly interested in comments related to the following:

- Our proposal to change the criteria for determining whether an eligible professional is a successful e-prescriber from requiring reporting of the electronic prescribing measure in 50 percent of applicable cases to a count of the number of times the eligible professional electronically prescribed; and
- The proposed threshold number of 25 times in which an eligible professional would be required to report that he or she electronically prescribed during the reporting period.
- d. Determination of the 2010 Incentive Payment Amount for Individual Eligible Professionals Who Are Successful E-Prescribers

Section 1848(m)(2)(B) of the Act imposes a limitation on the E-prescribing incentive payment. The

Secretary is authorized to choose 1 of 2 possible criteria for the limitation. The first criterion, under section 1848(m)(2)(B)(i) of the Act, is based upon whether the Medicare Part B allowed charges for covered professional services to which the electronic prescribing quality measure applies are less than 10 percent of the total Part B allowed charges for all covered professional services furnished by the eligible professional during the reporting period. The second criterion, under section 1848(m)(2)(B)(ii) of the Act, is based on whether the eligible professional submits (both electronically and nonelectronically) a sufficient number (as determined by the Secretary) of prescriptions under Part D (which can, again, be assessed using Part D drug claims data). If the Secretary decides to use the latter criterion, then, in accordance with section 1848(m)(2)(B) of the Act, the criterion based on the reporting on electronic prescribing measures would no longer apply. The statutory limitation also applies to the future application of the payment adjustment.

As discussed above, for 2010, we propose to make the determination of whether an eligible professional is a "successful e-prescriber" based on submission of the electronic prescribing measure. As a result, we propose to apply the criterion under section 1848(m)(2)(B)(i) for the limitation for the 2010 E-Prescribing Incentive Program. Therefore, in determining whether an eligible professional will receive an e-prescribing incentive payment for 2010, we would determine whether the 10 percent threshold is met based on the claims submitted by the eligible professional at the TIN/NPI level. This calculation is expected to take place in the first quarter of 2011 and would be performed by dividing the individual's total 2010 allowed charges for all such covered professional services submitted for the measure's HCPCS codes by the individual's total allowed charges for all covered professional services (as assessed at the TIN/NPI level). If the result is 10 percent or more, then the statutory limitation will not apply and a successful e-prescriber would earn the e-prescribing incentive payment. If the result is less than 10 percent, then the statutory limitation will apply and the eligible professional would not earn an e-prescribing incentive payment—even if he or she electronically prescribes and reports G8443 at least 25 times for those eligible cases that occur during the 2010 reporting period. Although an individual eligible professional may

decide to conduct his or her own assessment of how likely this statutory limitation is expected to apply to him or her before deciding whether or not to report the electronic prescribing measure, an individual eligible professional may report the electronic prescribing measure without regard to the statutory limitation for the incentive payment.

e. Proposed Reporting Option for Satisfactory Reporting of the E-Prescribing Measure by Group Practices

As discussed previously, section 1848(m)(3)(C)(i) requires that by January 1, 2010, the Secretary shall establish and have in place a process under which eligible professionals in a group practice (as defined by the Secretary) shall be treated as meeting the requirements for submitting data on electronic prescribing quality measures for covered professional services for a reporting period (or, for purposes of the payment adjustment under subsection (a)(5), for a reporting period for a year) if, in lieu of reporting the electronic prescribing measure, the group practice reports measures determined appropriate by the Secretary, such as measures that target high-cost chronic conditions and preventive care, in a form and manner, and at a time specified by the Secretary.

Section 1848(m)(3)(C)(ii) of the Act requires that the process established under section 1848(m)(3)(C)(i) of the Act provide for the use of a statistical sampling model to submit data on measures, such as the model used under the Physician Group Practice demonstration project under section 1866A of the Act. In addition, section 1848(m)(3)(C)(iii) of the Act specifies that payments to a group practice by reason of the process established under section 1848(m)(3)(C)(ii) of the Act shall be in lieu of the payments that would otherwise be made under this subsection to eligible professionals in the group practice for being a successful e-prescriber. Therefore, while we will be making incentive payments to group practices based on the determination that the group practice, as a whole, is a successful e-prescriber for 2010, an individual eligible professional who is affiliated with a group practice participating in the group practice reporting option that successfully meets the proposed requirements for group practices would not be eligible to earn a separate e-prescribing incentive payment for 2010 on the basis of his or her successfully reporting the electronic prescribing measure at the individual level.

(1) Definition of "Group Practice"

As stated above, section 1848(m)(3)(C)(i) of the Act authorizes the Secretary to define "group practice." For purposes of determining whether a group practice is a successful eprescriber, we propose that a "group practice" would consist of a physician group practice, as defined by a TIN, with at least 200 or more individual eligible professionals (or, NPIs) who have reassigned their billing rights to the TIN to be consistent with definition of "group practice" proposed for the PQRI group practice reporting option.

However, we propose to limit the group practices eligible to participate in the 2010 E-Prescribing Incentive Program through the group practice reporting option to those group practices selected to participate in the PORI group practice reporting option. At this time, we would like to limit the number of groups participating in the group practice reporting option until we get further experience with the group practice reporting option. Therefore, unlike individual eligible professionals who are not required to participate in the PQRI to be eligible to earn an eprescribing incentive and vice versa, group practices would be required to participate in both PQRI and the E-Prescribing Incentive Program. As discussed in section II.G.2.g. of this proposed rule, group practices interested in participating in the 2010 PQRI through the group practice reporting option would be required to submit a self-nomination letter to CMS or a CMS designee requesting to participate in the 2010 PQRI group practice reporting option. Instructions for submitting the self-nomination letter will be posted on the PORI section of the CMS Web site by November 15, 2009. In addition to meeting the eligibility requirements proposed in section II.G.2.g.(1) of this proposed rule, a group practice would also have to indicate how they intend to report the electronic prescribing measure (that is, which proposed reporting mechanism the group practice intends to use) for purposes of participating in the 2010 E-Prescribing Incentive Program group practice reporting option.

(2) Process for Group Practices to Participate as Group Practices and Criteria for Successful Reporting of the E-Prescribing Measure by Group Practices

For group practices selected to participate in the e-prescribing group practice reporting option for 2010, we propose the reporting period would be January 1, 2010 to December 31, 2010.

We propose that physician groups selected to participate in the 2010 E-Prescribing Incentive Program through the group practice reporting option would be able to choose to report the electronic prescribing measure through the claims-based, the registry-based, or, contingent upon us finalizing this reporting mechanism for the 2010 PQRI, the EHR-based reporting mechanism. As we proposed for individual eligible professionals, only registries and EHR products qualified to participate in the 2010 PQRI would be qualified for purposes of the 2010 e-prescribing group practice reporting option.

In order for a group practice to be considered a successful e-prescriber, we propose the group practice would have to report that at least 1 prescription during an encounter was generated using a qualified e-prescribing system in at least 2,500 instances during the

reporting period.

In the absence of information about the composition of the group practices that may wish to participate in the E-Prescribing Incentive Program through the group practice reporting option rather than as individual eligible professionals, we assumed that the average group practice consists of 200 eligible professionals and that as many as half of the members of an average group practice do not furnish the services represented by the electronic prescribing measure's denominator codes, and thus, would not have an opportunity to report the electronic prescribing measure. Second, to be consistent with the proposed reporting criteria for individual eligible professionals, we also believe that each eligible professional in a group practice should be required to report that at least 1 prescription generated during an encounter that is represented by 1 of the electronic prescribing measure's denominator codes was generated electronically at least 25 times. Thus, for a group of 200 eligible professionals, we could extrapolate from our assumption that only half of the eligible professionals in an average practice of 200 eligible professionals would have the opportunity to report the electronic prescribing measure per group practice, the total number of reporting instances for the 100 remaining eligible professionals would be 2,500. We invite comments on the proposed criteria for determining whether a group practice is a successful e-prescriber. We also invite feedback on our underlying assumptions.

Section 1848(m)(2)(B) of the Act specifies that the limitation on the applicability of the e-prescribing incentive discussed in section II.G.5.d.

of this proposed rule applies to group practices as well as individual eligible professionals. Therefore, in determining whether a group practice will receive an e-prescribing incentive payment for 2010 by meeting the proposed reporting criteria described above, we would determine whether the 10 percent threshold is met based on the claims submitted by the group practice. This calculation is expected to take place in the first quarter of 2011 and would be determined by dividing the group practice's total 2010 allowed charges for all covered professional services submitted for the measure's HCPCS codes by the group practice's total Medicare Part B allowed charges for all covered professional services. If the result is 10 percent or more, then the statutory limitation will not apply and a group practice that is determined to be a successful e-prescriber would qualify to earn the e-prescribing incentive payment. If the result is less than 10 percent, then the statutory limitation will apply and the group practice would not qualify to earn the e-prescribing incentive payment.

f. Public Reporting of Names of Successful E-Prescribers

As discussed in section II.G.2.k. of this proposed rule, section 1848(m)(5)(G) of the Act requires the Secretary to post on the CMS Web site, in an easily understandable format, a list of the names of eligible professionals (or group practices) who satisfactorily submit data on quality measures for the PQRI and the names of the eligible professionals (or group practices) who are successful eprescribers. In accordance with section 1848(m)(5)(G) of the Act, we indicated in the CY 2009 PFS final rule with comment period (73 FR 69851 through 69852) our intent, in 2010, to post the names of eligible professionals who are successful e-prescribers for the 2009 E-Prescribing Incentive Program at http:// www.medicare.gov.

As required by section 1848(m)(5)(G) of the Act, we propose to make public the names of eligible professionals and group practices who are successful electronic prescribers for the 2010 E-Prescribing Incentive Program on the Physician and Other Health Care Professionals Directory. The names of individual eligible professionals and group practices who are successful electronic prescribers for the 2010 E-Prescribing Incentive Program will be available in 2011 after the 2010 incentive payments are paid.

For purposes of publicly reporting the names of individual eligible professionals on the Physician and

Other Health Care Professionals Directory, we propose to post the names of individual eligible professionals: (1) Whose 2010 PFS allowed charges make up at least 10 percent of the eligible professional's Medicare Part B charges for 2010; (2) who report that at least 1 prescription generated during an encounter included in the electronic prescribing measure denominator was generated electronically (that is, who reported the G8443 code) at least 25 times during the 2010 reporting period; and (3) who receive an e-prescribing incentive payment for covered professional services furnished January 1, 2010 through December 31, 2010. Since the PQRI and the E-Prescribing Incentive Program are two separate incentive programs and individual eligible professionals are not required to participate in both programs to earn an incentive under either program, it is possible for an eligible professional who participates in both incentive programs to be listed both as an individual eligible professional who satisfactorily submits data on quality measures for the PQRI and a successful electronic prescriber if he or she meets the criteria for both incentive programs.

For purposes of publicly reporting the names of group practices on the Physician and Other Health Care Professionals Directory, we propose to post the names of group practices who: (1) Report that at least 1 prescription generated during an encounter included in the electronic prescribing measure denominator was generated electronically (that is, who reported the G8443 code) at least 2500 times during the 2010 reporting period; and (2) receive an e-prescribing incentive payment for covered professional services furnished January 1, 2010 through December 31, 2010. Although group practices would be required to participate in both programs to earn an incentive under either program, the criteria for satisfactory reporting of PQRI measures for group practices are different from the criteria for successful reporting of the electronic prescribing measure by group practices. Therefore, it is possible for a group practice to be listed as a group practice that satisfactorily submits data on quality measures for the PQRI but not as a successful electronic prescriber or vice versa.

6. Section 135: Implementation of Accreditation Standards for Suppliers Furnishing the Technical Component (TC) of Advanced Diagnostic Imaging Services

Section 1834(e) of the Act, as added by section 135(a) of the MIPPA, requires that beginning January 1, 2012, Medicare payment may only be made for the technical component (TC) of advanced diagnostic imaging services for which payment is made under the fee schedule established in section 1848(b) of the Act to a supplier who is accredited by an accreditation organization designated by the Secretary.

a. Accreditation Requirement

This proposed rule would set forth the criteria for designating organizations to accredit suppliers furnishing the technical component (TC) of advanced diagnostic imaging services as specified in section 1834(c) of the Act. In addition, it would set forth the required procedures to ensure that the criteria used by an accreditation organization meet minimum standards for each imaging modality. These statutory requirements would be codified in § 414.68 of the payment rules for physicians and other practitioners.

The CMS-designated accreditation organization would apply standards that set qualifications for medical personnel who are not physicians but who furnish the TC. The standards would describe the qualifications and responsibilities of medical directors and supervising physicians including the following: Recognizing whether a particular medical director or supervising physician received training in advanced imaging services in a residency program; and has attained, through experience, the necessary expertise to be a medical director or supervising physician; has completed any continuing medical education courses related to advanced imaging services; or has met such other standards as the Secretary determines appropriate. In addition, the standards would require suppliers to: (1) Establish and maintain a quality control program to ensure the technical quality of diagnostic images produced by the supplier; (2) ensure the equipment used meets performance specifications; and (3) ensure safety of personnel. While the statute authorizes the Secretary to establish as criteria for accreditation any other standards or procedures the Secretary determines appropriate, we are not proposing to establish other standards or procedures

We expect to publish a notice to solicit applications from entities for the purposes of becoming a designated accreditation organization the same day that this proposed rule's subsequent final rule is issued, on or before November 1, 2009. Due to the tight timeframe, we expect to meet the January 1, 2010 statutory deadline in

order to designate organizations to accredit suppliers furnishing the TC of advanced diagnostic imaging services by waiving the 60-day delay in the imaging accreditation provisions of the final rule.

b. Accreditation for Suppliers

Section 1834(e) of the Act requires the Secretary to designate and approve accreditation organizations to accredit suppliers of the TC of advanced diagnostic imaging services. To promote consistency in accrediting providers and suppliers throughout the Medicare program, we are proposing to use existing procedures for the application, selection, and oversight of accreditation organizations detailed at 42 CFR part 488, subparts A and D and apply them to organizations accrediting suppliers of the TC of advanced diagnostic imaging services. We are proposing modifications to the existing part 488 requirements to meet the specialized needs of the advanced imaging industry. These modifications will require an independent accreditation organization applying for approval as a designated accreditation organization to include in their application:

- A detailed description of how the organization's accreditation criteria satisfy the statutory standards at section 1834(e)(3) of the Act, specifically:
- + Qualifications of medical personnel who are not physicians and who furnish the TC of advanced diagnostic imaging services:
- Qualifications and responsibilities of medical directors and supervising physicians, such as training in advanced diagnostic imaging services in a residency program, expertise obtained through experience, or continuing medical education courses;
- + Procedures to ensure the safety of persons who furnish the TC of advanced diagnostic imaging services and individuals to whom such services are furnished:
- + Procedures to ensure the reliability, clarity, and accuracy of the technical quality of diagnostic images produced by the supplier.
- An agreement to conform accreditation requirements to any changes in Medicare statutory requirements in section 1834(e) of the Act.
- Information to demonstrate the accreditation organization's knowledge and experience in the advanced diagnostic imaging arena.
- The organization's proposed fees for accreditation for each modality in which the organization intends to offer accreditation and any plans for reducing

the burden and cost of accreditation to small and rural suppliers.

• Any specific documentation requirements and attestations requested by CMS as a condition of designation under this part.

If, after review of an accreditation organization's submission of information, we determine that additional information is necessary to make a determination for approval or denial of the accreditation organization's application to be designated as an accreditation organization for suppliers of the TC of advanced diagnostic imaging services, the organization will be notified and afforded an opportunity to provide the additional information. We may visit the organization's offices to verify representations made by the organization in its application, including, but not limited to, review of documents and interviews with the organization's staff. The accreditation organization will receive a formal notice from CMS stating whether the request for designation has been approved or denied. If approval was denied, the notice will include the basis for denial and outline the reconsideration procedures. We will make every effort to issue a final decision no more than 30 calendar days from the time the completed reapplication is received by CMS. An accreditation organization may withdraw its application for designation under section 1834(e) of the Act at any time before the formal notice of approval is received. An accreditation organization that has been notified that its request for designation has been denied may request reconsideration in accordance with § 488.201 through § 488.211 in Subpart D. Any accreditation organization whose request for designation has been denied may resubmit its application if the organization (1) revises its accreditation program to address the rationale for denial of its previous request; (2) provides reasonable assurance that its accredited companies meet applicable Medicare requirements; and (3) resubmits the application in its entirety. If an accreditation organization has requested a reconsideration of our determination that its request for designation under section 1834(e) of the Act is denied, it may not submit a new application for the type of modality that is at issue in the reconsideration until the reconsideration is final.

A panel will evaluate all proposals from accreditation organizations seeking designation under section 1834(e) of the Act using existing CMS survey and certification processes as established in § 488.4.

c. Payment Rules for Suppliers of the TC of Advanced Diagnostic Imaging Services (§ 414.68)

We would specify in § 414.68 the statutory requirement of section 1834(e) of the Act that all suppliers of the TC of advanced diagnostic imaging services be accredited by a CMS-designated accreditation organization by January 1, 2012 for payments made under the fee schedule established under section 1848(b). In § 414.68(a), we are proposing to define the following:

• "Accredited supplier" as a supplier that has been accredited by a CMS-approved accreditation organization.

- "Advanced Diagnostic Imaging Services" as diagnostic magnetic resonance imaging, computed tomography, nuclear medicine, and positron emission tomography. We are not proposing at this time to include other diagnostic imaging services in this definition under section 1834(e)(1)(B)(ii) of the Act.
- "CMS-approved accreditation organization" as an independent accreditation organization designated by CMS to perform the accreditation function established in section 1834(e) of the Act.
- d. Ongoing Responsibilities of CMS-Approved Accreditation Organizations

We are proposing to require a CMSapproved accreditation organization to perform the following activities on an ongoing basis. Provide to CMS in written form and on an ongoing basis all of the following:

- Copies of all accreditation surveys of specific suppliers along with any survey-related information that we may require (including corrective action plans and summaries of CMS requirements that were not met).
- Notice of all accreditation decisions.
- Notice of all complaints related to suppliers of the TC of advanced diagnostic imaging service.
- Information about any suppliers of the TC of advanced diagnostic imaging service for which the accrediting organization has denied the supplier's accreditation status.
- Notice of any proposed changes in its accreditation standards or requirements or survey process. If the organization implemented the changes before or without CMS approval, we could withdraw approval of the accreditation organization.
- Permit its surveyors to serve as witnesses if CMS takes an adverse action based on accreditation findings.
- Provide CMS with written notice of any deficiencies and adverse actions

implemented by the CMS-approved accreditation organization against an accredited supplier of the TC of advanced diagnostic imaging within 2 days of identifying such deficiencies, if the deficiencies pose immediate jeopardy to a beneficiary or to the general public.

- Provide written notice of the withdrawal to all accredited suppliers within 10 days of CMS' notice to withdraw approval of the accreditation organization.
- Provide, on an annual basis, summary data specified by CMS that are related to the past year's accreditation activities and trends.
- e. Continuing CMS Oversight of CMS-Approved Accreditation Organizations

We are proposing to add § 414.68 to establish specific criteria and procedures for continuing oversight and for withdrawing approval of an approved accreditation organization.

(1) Validation Audits

We are proposing to audit the accredited organizations in order to validate the survey accreditation process of approved accreditation organizations in the TC of advanced imaging. The audits would be conducted on a representative sample of suppliers who have been accredited by a particular accrediting organization or in response to allegations of supplier noncompliance with the standards. When conducted on a representative sample basis, we are proposing that the audit would be comprehensive and address all of the standards or would focus on a specific standard in issue. When conducted in response to an allegation, we will specify that the CMS team or our contractor would audit for any standard that we determined was related to the allegations. We are proposing to require a supplier selected for a validation audit to authorize the validation audit to occur and authorize the CMS team or our contractor to monitor the correction of any deficiencies found through the validation audit. If a supplier selected for a validation audit failed to comply with the requirements at § 414.68, the supplier would no longer meet the Medicare requirements and, under this proposal, the supplier's accreditation for the TC of the advanced medical imaging would be revoked.

We are proposing that a CMS team or our contractor would conduct an audit of an accredited organization, examine the results of the accreditation organization's own survey procedure onsite, or observe the accreditation organization's survey, in order to validate the organization's accreditation process. At the conclusion of the review, we would identify any accreditation programs for which validation audit results indicated the following:

- A 10 percent rate of disparity between findings by the accreditation organization and findings by CMS or our contractor on standards that did not constitute immediate jeopardy to patient health and safety if not met;
- Any disparity between findings by the accreditation organization and findings by CMS or our contractor on standards that constituted immediate jeopardy to patient health and safety if not met; or
- There were widespread or systemic problems in the organization's accreditation process such that the accreditation no longer provided assurance that suppliers met or exceeded the Medicare requirements, irrespective of the rate of disparity.
- (2) Notice of Intent To Withdraw Approval for Designating Authority

If a validation audit, onsite observation, or our concerns with the ethical conduct (that impacts the health and safety of the beneficiary) of an accreditation organization suggest that the accreditation organization is not meeting the requirements of proposed § 414.68, we would provide the organization written notice of its intent to withdraw approval of the accreditation organization's designating authority.

(3) Withdrawal of Approval for Designating Authority

We are proposing to withdraw approval of an accreditation organization at any time if we determine that:

- Accreditation by the organization no longer provides sufficient assurance that the suppliers of the TC of advanced imaging meet the requirements of section 1834(e) of the Act and the failure to meet those requirements could pose an immediate jeopardy to the health and safety of Medicare beneficiaries;
- Constitutes a significant hazard to the public health; or
- The accreditation organization failed to meet its obligations for application and reapplication procedures.

(4) Reconsideration

We are proposing to implement requirements under part 488 without substantive changes as the requirements have been utilized for the health care providers covered under part 488 since

1992. We are proposing that an accreditation organization dissatisfied with a determination that its accreditation requirements did not provide or do not continue to provide reasonable assurance that the suppliers accredited by the accreditation organization met the applicable standards would be entitled to a reconsideration. We are also proposing to reconsider any determination to deny, remove, or not renew the approval of the designating authority to accreditation organizations if the accreditation organization filed a written request for reconsideration through its authorized officials or through its legal representative.

We are proposing to require the accreditation organization to file the request within 30 calendar days of the receipt of CMS notice of an adverse determination or non-renewal. We propose to require the request for reconsideration to specify the findings or issues with which the accreditation organization disagreed and the reasons for the disagreement. A requestor could withdraw its request for reconsideration at any time before the issuance of a reconsideration determination. In response to a request for reconsideration, we would provide the accrediting organization the opportunity for an informal hearing that would be conducted by a hearing officer appointed by the CMS Administrator and provide the accrediting organization the opportunity to present, in writing and in person, evidence or documentation to refute the determination to deny approval, or to withdraw or not renew its designating authority.

We would provide written notice of the time and place of the informal hearing at least 10 business days before the scheduled date. The informal reconsideration hearing would be open to CMS and the organization requesting the reconsideration, including authorized representatives, technical advisors (individuals with knowledge of the facts of the case or presenting interpretation of the facts), and legal counsel. The hearing would be conducted by the hearing officer who would receive testimony and documents related to the proposed action. Testimony and other evidence could be accepted by the hearing officer. However, it would be inadmissible under the usual rules of court procedures. The hearing officer would not have the authority to compel by subpoena the production of witnesses, papers, or other evidence. Within 45 calendar days of the close of the hearing, the hearing officer would

present the findings and recommendations to the accrediting organization that requested the reconsideration. The written report of the hearing officer would include separate numbered findings of fact and the legal conclusions of the hearing officer. The hearing officer's decision would be final.

We are interested in obtaining additional information on the role of radiology assistants (RA) and radiology practitioner assistants (RPA), including the level of physician supervision that would be appropriate when RAs and RPAs are involved in the performance of the TC of advanced medical imaging, whether the role varies by State, and related information. It would be particularly helpful for the commenter to identify specific clinical scenarios with associated CPT codes that would represent such services involving RAs and RPAs.

7. Section 139: Improvements for Medicare Anesthesia Teaching Programs

Section 139 of the MIPPA establishes a "special payment rule for teaching anesthesiologists" and provides a directive to the Secretary regarding payments for the services of "teaching certified registered nurse anesthetists" (teaching CRNAs). It also specifies the periods when the teaching anesthesiologist must be present during the procedure in order to receive payment for the case at 100 percent of the fee schedule amount (the regular fee schedule rate). These provisions are effective for services furnished on or after January 1, 2010.

a. Teaching Anesthesiologists: Special Payment Rule

The criteria for the payment of teaching anesthesiology services and the special rule for the teaching anesthesiologist are similar to the current criteria for payment of teaching surgeon services and the payment rule for the teaching surgeon involved in overlapping resident cases. Thus, there is a similarity in the payment rules for these physician specialties who work closely together.

(1) Payment for Anesthesia Services Furnished by a Physician

If the physician, usually an anesthesiologist, is involved in furnishing anesthesia services to a patient, the services can be furnished under one of three different scenarios. The anesthesiologist may—

• Personally perform the anesthesia services alone;

• Be involved in the case as a teaching anesthesiologist with an anesthesia resident; or

• Provide medical direction of the performance of anesthesia services for two, three or four concurrent cases involving a qualified individual (who may be a CRNA, an anesthesiologist assistant (AA), an anesthesia resident, or a student nurse anesthetist under certain circumstances).

Under the statute and CMS policy, if the anesthesiologist personally performs the anesthesia service alone or is involved in the case as a teaching anesthesiologist with an anesthesia resident, payment for the anesthesiologist's service is made at the regular fee schedule rate.

If the anesthesiologist furnishes medical direction for two, three or four concurrent anesthesia procedures, then payment for the anesthesiologist's service is made, in accordance with section 1848(a)(4)(B) of the Act, at 50 percent of the otherwise applicable fee schedule amount.

(2) Methodology for Payment of Anesthesia Services

Payment for anesthesia services furnished by a physician is made under the PFS, under section 1848(b)(2)(B) of the Act. The methodology for the calculation of the allowable amount is unique to anesthesia service only. Payment is made on the basis of anesthesia base units and time units, calculated from the actual anesthesia time of the case, instead of on the basis of work, PE, and malpractice RVUs. Payment for anesthesia services is also based on the anesthesia CF instead of the general PFS CF.

(3) Section 139(a) of the MIPPA

Section 139(a) of the MIPPA adds a new paragraph at section 1848(a)(6) of the Act to establish a "special payment rule for teaching anesthesiologists". This provision allows payment to be made at the regular fee schedule rate for the teaching anesthesiologist's involvement in the training of residents in either a single anesthesia case or in two concurrent anesthesia cases furnished on or after January 1, 2010. We will refer to anesthesia cases involving the training of residents as "resident cases" below in this section.

(4) Discussion

The Accreditation Council on Graduate Medical Education (ACGME) is a branch of the AMA, and it accredits allopathic residency programs. In order for a hospital to receive Medicare graduate medical education payments for its training programs, the residents must be in an "approved medical residency program" Under § 413.75(b), an approved medical residency program is one approved by one of the national organizations listed in § 415.152. One of the national organizations is the ACGME.

ACGME's policies and procedures require that each accredited residency program comply with the institutional requirements and the specialty program requirements. For approved anesthesia residency programs, ACGME requirements for faculty supervision and training of anesthesia residents specify that faculty members not direct anesthesia at more than two anesthetizing locations in the clinical setting. (See the ACGME Web site at http://www.acgme.org.)

Consistent with this requirement, the American Society of Anesthesiologists (ASA) has advised us that, when providing services in two concurrent cases, a teaching anesthesiologist might be engaged in two concurrent anesthesia resident cases, or in two mixed concurrent cases, one a resident case and the other a CRNA or AA case.

The statute applies the special payment rule for teaching anesthesiologists to the single resident case or two concurrent cases involving anesthesia residents as long as the teaching anesthesiologist meets the requirements in sections 1848(6)(A) and 1848(6)(B) of the Act. However, the statute does not directly address a single resident case that is concurrent to another case involving a CRNA, AA, or other qualified individual who can be medically directed. The issue is whether the medical direction payment rules apply to each of these cases or whether an alternative payment policy may apply.

One option in implementing this provision would be to strictly limit the special payment rule for teaching anesthesiologists to the single resident case (which is not concurrent to any other case) or the two concurrent resident cases (which are not concurrent to any other cases). For the mixed concurrent case, we could continue to apply our current medical direction payment policy to both the resident case and the other concurrent case. This would represent a continuation of our current medical direction payment policy, and would be predicated on the assumption that this is consistent with Congressional intent since the medical direction payment provisions at section 1848(a)(4) of the Act were left largely unchanged by section 139(a) of the MIPPA.

The other option would be to apply the special payment rule for teaching anesthesiologists to the resident case when it is concurrent to a medically directed case, and to apply the medical direction payment policy to the medically directed case. While this represents a broader interpretation, it still limits the applicability of the special payment rule for teaching anesthesiologists to resident cases consistent with the terms of section 139 of the MIPPA.

The special payment rule under section 1848(a)(6) of the Act clearly applies for two concurrent anesthesia resident cases. The ACGME requirements also allow the supervision of two concurrent cases, but are not specific regarding whether the requirements relate only to two resident cases, or also to mixed concurrent cases. However, both the statute and ACGME requirements seem amenable to a policy that would allow the special teaching payment rule to apply in mixed concurrent cases, that is, the single resident case that is concurrent to another case not involving a resident. Additionally, we are concerned that if we continued to apply the medical direction payment policy to mixed concurrent cases, then financial differences in payment policy might cause teaching anesthesiologists to make changes in the scheduling of mixed resident and CRNA cases. This might limit the utilization of CRNAs in certain scenarios.

Accordingly, we are proposing to delete the current regulatory language at § 414.46(e) (which is no longer relevant) and add new language to specify that the special payment rule for teaching anesthesiologists applies to resident cases under the following scenarios:

- The teaching anesthesiologist is involved in one resident case (which is not concurrent to any other anesthesia case);
- The teaching anesthesiologist is involved in each of two concurrent resident cases (which are not concurrent to any other anesthesia case); or
- The teaching anesthesiologist is involved in one resident case that is concurrent to another case paid under medical direction payment rules.

Other than the application of the special payment rule for teaching anesthesiologists in the mixed concurrent case described above, we are not proposing any other revisions to our medical direction payment policies.

- b. Teaching Anesthesiologists: Criteria for Payment
- (1) Criteria for Payment of Teaching Anesthesiologists

Currently, the teaching anesthesiologist can be paid at the

regular fee schedule rate for his or her involvement in a single resident case. As specified in § 415.178, the teaching anesthesiologist must be present with the anesthesia resident during all critical portions of the anesthesia procedure and be immediately available to furnish services during the entire procedure. Our manual instructions permit different physicians in the same anesthesia group to provide parts of the anesthesia service, and for the group to bill for the single anesthesia service. We refer to this practice as an "anesthesia handoff." (See Medicare Claims Processing Manual 100-04, Chapter 12, Section 50 C.) Of course, the medical record must document those individual physicians who furnished the services.

This manual instruction is not limited in scope to nonteaching hospitals. Thus, it is possible that teaching anesthesiologists have interpreted it to permit handoffs during resident cases.

Our manual instructions state that for two overlapping surgeries, the teaching surgeon must be present during the critical or key portions of both operations (See Medicare Claims Processing Manual 100–04, Chapter 12, Section 100.1.2). It is our understanding that teaching surgeons do not hand off to another teaching surgeon during a key or critical portion of the surgical resident case.

(2) Section 139(a)(2) of the MIPPA

This section adds a new paragraph at section 1848(a)(6) of the Act which requires, in order for the special payment rule for teaching anesthesiologists to apply, that the teaching anesthesiologist is present during all critical or key portions of the anesthesia service or procedure and the teaching anesthesiologist (or another anesthesiologist with whom the teaching anesthesiologist has entered into an arrangement) is immediately available to furnish anesthesia services during the entire procedure. The new MIPPA provision regarding payment for services of a teaching anesthesiologist for two concurrent resident cases is similar to our current policy regarding payment for services of a teaching surgeon for two overlapping surgical resident cases.

(3) Discussion

The ASA has informed us that teaching anesthesiologists who work in the same anesthesia group sometimes provide different parts of the key or critical portions of a single anesthesia procedure. This type of a handoff situation might occur within an anesthesia group practice when there is an anesthesia procedure of long

duration, but would not be limited to that circumstance.

From a quality standpoint, we do not believe multiple handoffs among teaching anesthesiologists during a case that involves the training of an anesthesia resident would be optimal. We do not have data on the extent to which anesthesia handoffs occur during resident or other cases, or whether quality of anesthesia care is affected. We note that section 1848(a)(6)(A) of the Act refers only to "the" teaching anesthesiologist, and requires that the teaching anesthesiologist be present during all critical or key portions of the service. However, section 1848(a)(6)(B) of the Act seems to contemplate some level of handoffs between teaching anesthesiologists, at least between those who have entered into an arrangement for such handoffs.

One option would be to permit different anesthesiologists in the same anesthesia group practice to be considered "the teaching physician" for purposes of being present at the key or critical portions of the anesthesia case. (These physicians must have reassigned their benefits to the group practice in order for the group to bill.) Although this option would be less disruptive to the current anesthesia practice arrangements (as reported by the ASA), it would establish rules for teaching anesthesiologists that are different from those for teaching surgeons.

Another option would be to require that, in order to meet the requirement of section 1848(a)(6)(A) of the Act, only one individual teaching anesthesiologist must be present during all of the key or critical portions of the procedure. However, another teaching anesthesiologist with whom "the teaching anesthesiologist" under subparagraph (A) has an arrangement could be immediately available to furnish services during a non-critical or non-key portion of the procedure in order to meet the requirement under subparagraph (B). We believe this is the most logical reading of the statute and would be consistent with the way the teaching surgeon payment policy is applied for overlapping surgical cases.

In addition to explaining available options for implementing this provision, we are also soliciting specific comments on how the continuity of care and the quality of anesthesia care are preserved during handoffs. We are interested in whether there is an accepted maximum number of handoffs and whether there are any industry studies that have examined this issue. We would like to hear from anesthesia practices that do not use handoffs and what procedures they have implemented to achieve this

result. Finally, we would like to know what factors or variables are contributing to anesthesia handoffs and what short term adjustments can be made to affect these factors.

Although we are interested in receiving comments on these topics, we are proposing to more narrowly interpret the law and require that only one individual teaching anesthesiologist be present during all of the key or critical portions of the anesthesia procedure. We are also proposing that another teaching anesthesiologist with whom the teaching anesthesiologist has an arrangement could be immediately available to furnish services during a non-critical or non-key portion of the procedure.

c. Teaching CRNAs

(1) Payment for Anesthesia Services Furnished by a CRNA

Currently, a CRNA who provides anesthesia services while under the medical direction of an anesthesiologist is paid at 50 percent of the regular fee schedule rate as specified in section 1833(l)(4)(B)(iii) of the Act. A CRNA who provides anesthesia services without the medical direction of a physician is paid the regular fee schedule rate as specified in section 1833(l)(4)(A) of the Act.

(2) Payment for Anesthesia Services Furnished by a Teaching CRNA With a Student Nurse Anesthetist

The legislation that created the CRNA fee schedule payment system (that is, section 9320 of the Omnibus Budget Reconciliation Act of 1986 (Pub. L. 99–509)) did not address payment for services furnished by teaching CRNAs involved in the training of student nurse anesthetists.

In the preamble to the CRNA fee schedule final rule published in the July 31, 1992 Federal Register (57 FR 33888), we stated that we would pay the teaching CRNA who is not medically directed by a physician at the regular fee schedule rate for his or her involvement in a single case with a student nurse anesthetist as long as he or she was present with the student throughout the anesthesia case. No payment would be made if the teaching CRNA divided his or her time between two concurrent cases involving student nurse anesthetists.

In August 2002, based on the recommendations of the American Association of Nurse Anesthetists (AANA), we modified our policy to allow the teaching CRNA not medically directed by a physician to be paid a portion of the regular fee schedule rate

for each of two concurrent cases involving student nurse anesthetists. If the teaching CRNA is present with the student nurse anesthetist during the preand post-anesthesia care for each of the cases involving student nurse anesthetists, the teaching CRNA can bill the full base units (comprised of preand post-anesthesia services not included in the anesthesia time units) for each case and the actual amount of anesthesia time per case. The resulting payment for each of these anesthesia cases is greater than 50 percent, but less than 100 percent, of the regular fee schedule amount because the full base units plus the actual anesthesia time units spent by the teaching CRNA in each of the two cases yields a payment that is greater than 50 percent of the regular fee schedule amount.

(3) Comparison of Payment Policies for Teaching CRNAs and Teaching Anesthesiologists

For several years, the American Society of Anesthesiologists (ASA) requested that we revise our payment regulations to allow the teaching anesthesiologist to be paid the regular fee schedule amount for each of two concurrent resident cases. In the CY 2004 PFS final rule with comment period (68 FR 63224), we finalized a policy to permit the teaching anesthesiologist to be paid similarly to a teaching CRNA for each of two concurrent resident cases. This policy took effect for services furnished on or after January 1, 2004.

Thus, the payment policy is the same for a teaching CRNA for each of two concurrent student nurse anesthetist cases, and for a teaching anesthesiologist for each of two concurrent resident cases. The policy is that the anesthesia provider is paid the full base units plus time units, based on the actual anesthesia time, relating to each of two concurrent cases.

(4) Payment Policy for an Anesthesiologist, or an Anesthesiologist and CRNA Jointly, With a Student Nurse Anesthetist

Currently, there are circumstances where an anesthesiologist may be involved in the training of student nurse anesthetists in two concurrent anesthesia cases. These anesthesia cases are not paid under the teaching anesthesiologist payment policy, but are paid under the usual medical direction payment policy. Payment can be made for the physician's medical direction (that is, 50 percent of the regular fee schedule amount) for each of two concurrent cases.

If an anesthesiologist is medically directing two concurrent cases involving student nurse anesthetists and a CRNA is also jointly involved with the two student nurse anesthetist cases, then the physician service, in each case, can be paid under the medical direction rules at 50 percent of the regular fee schedule. Payment for the CRNA services would also be made at the medically directed rate (that is, 50 percent of the regular fee schedule) for CRNA services, but the time units used to compute the anesthesia fee would be based on the actual time the CRNA is involved in each case.

(5) Section 139(b) of the MIPPA

Section 139(b) of the MIPPA instructs the Secretary to make appropriate adjustments to Medicare teaching CRNA payment policy so that it—

• Is consistent with the adjustments made by the special payment rule for teaching anesthesiologists under section 139(a) of the MIPPA; and

 Maintains the existing payment differences between teaching anesthesiologists and teaching CRNAs.

We are proposing to implement the first directive (under section 139(b)(1) of the MIPPA) by establishing a new payment policy for teaching CRNAs that is similar to the special payment rule for teaching anesthesiologists, and to limit applicability of the rule to teaching CRNAs who are not medically directed. We are proposing to add a new regulation at § 414.61 to explain the conditions under which the special payment rule will apply and the method for calculating the amount of payment for anesthesia services furnished on or after January 1, 2010, by teaching CRNAs involved in the training of student nurse anesthetists. Under this proposal, we would pay the teaching CRNA at the regular fee schedule rate for each of two concurrent student nurse anesthetist cases. Our medical direction payment policy would continue to apply if both an anesthesiologist and a CRNA are involved in a student nurse anesthetist case that is concurrent to other anesthesia cases.

We believe the second directive in section 139(b)(2) of the MIPPA will be satisfied as a result of these proposals. Section 139(b)(1) of the MIPPA instructs CMS to make appropriate adjustments to implement a payment policy for teaching CRNAs that is consistent with the special payment rule for teaching anesthesiologists. Section 139(b)(2) of the MIPPA instructs CMS to maintain the existing payment differences between teaching anesthesiologists and teaching CRNAs. There currently are no substantive differences in payment

between teaching anesthesiologists and teaching CRNAs, and there would continue to be no such differences under our proposed policies.

(6) Payment for Teaching CRNAs Involved in Anesthesia Cases With Student Nurse Anesthetists

Under current policy, when a CRNA is involved in a single student nurse anesthetist case, the teaching CRNA must be present with the student throughout the case in order to be paid at the regular fee schedule rate. We are not proposing any change to this policy.

When the teaching CRNA is involved in two concurrent student nurse anesthetist cases, payment is based on the amount of anesthesia time the teaching CRNA spends with the student in each case. For example, if the teaching CRNA spends 40 percent of his or her time in concurrent case #1 and 60 percent of his or her time in concurrent case #2, and the total anesthesia time in both cases is 3 hours (or 180 minutes), then we would currently pay as follows:

 Case #1: (Base units + (0.4 × 180/ 15)) × Anesthesia CF

• Case #2: (Base units + $(0.6 \times 180/15)$) × Anesthesia CF

The current payment policy has been predicated on paying the teaching CRNA for his or her actual time spent in the student nurse anesthetist case. We are now proposing to pay the teaching CRNA at the regular fee schedule rate for his or her involvement in two concurrent cases. If our goal is to minimize the effect of this change on teaching CRNAs' practice arrangements and time devoted to cases, then we would propose that the teaching CRNA continue to devote 100 percent of his or her time to the two concurrent cases. The teaching CRNA would decide how to allocate his or her time to optimize patient care in the two cases based on the complexity of the anesthesia case, the experience and skills of the student nurse anesthetist, the patient's health status, and other factors.

An alternative to this policy would be to apply the same criteria for teaching CRNAs as we use in § 415.178 with respect to teaching anesthesiologists. These criteria require the teaching anesthesiologist to be present during all critical or key portions of the anesthesia service. However, we believe these criteria are relevant and appropriate only for teaching anesthesiologists due to significant differences in experience, education and other qualifications between anesthesia residents and student nurse anesthetists. The anesthesia resident has completed medical school and is typically a

licensed physician. In contrast, the student nurse anesthetist is an RN who usually has some clinical experience in ICU or critical care nursing prior to starting the CRNA training program. Thus, we believe the resident is more qualified through medical training and education than the student nurse anesthetist to provide elements of the anesthesia service without the immediate presence of the teaching anesthesiologist. Therefore, we propose to retain our current policy.

We note that the Congress did not amend the statutory provisions relating to medical direction at section 1848(a)(4) of the Act. We do not believe the directives at section 139(b) of the MIPPA extend to other arrangements in which anesthesiologists alone or both anesthesiologists and CRNAs jointly supervise student nurse anesthetists during concurrent anesthesia cases. Therefore, we are not proposing any changes to our current payment policies for anesthesia services furnished under other circumstances. We are proposing that when an anesthesia provider (physician or CRNA) furnishes anesthesia services in concurrent cases under other circumstances, the current policies regarding medical direction will continue to apply.

8. Section 144(a): Payment and Coverage Improvements for Patients With Chronic Obstructive Pulmonary Disease and Other Conditions—Cardiac Rehabilitation Services

Section 144(a) of the MIPPA amended Title XVIII of the Act, in pertinent part, to provide for coverage of cardiac rehabilitation (CR) and intensive cardiac rehabilitation (ICR) under Medicare Part B. The statute specifies certain conditions for these services, with coverage to begin on January 1, 2010. The addition of the new CR and ICR programs is designed to improve the health care of Medicare beneficiaries with cardiovascular disease. This proposed rule implements these MIPPA provisions in order to ensure services enhance the patient's clinical outcomes.

a. Background

Intensive cardiac rehabilitation (ICR) is a relatively new practice that is also commonly referred to as a "lifestyle modification" program. These programs typically involve the same elements as general CR programs, but are furnished in highly structured environments in which sessions of the various components may be combined for longer periods of CR and also may be more rigorous.

b. Cardiac Rehabilitation Coverage Under Medicare

One mechanism we use to establish coverage for certain items and services is the national coverage determination (NCD) process. An NCD is a determination by the Secretary with respect to whether or not a particular item or service is covered nationally under Title XVIII.

Since 1982, Medicare has covered, under an NCD, cardiac rehabilitation for patients who experience stable angina, have had coronary artery bypass grafts, or have had an acute myocardial infarction within the past 12 months. The NCD is located in the Medicare NCD Manual (Pub. 100–03), section 20.10. Effective March 22, 2006, we modified the NCD language to cover comprehensive cardiac rehabilitation programs for patients who experience one of the following:

- A documented diagnosis of acute myocardial infarction within the preceding 12 months.
 - A coronary bypass surgery.
 - Stable angina pectoris.
 - A heart valve repair/replacement.
- A percutaneous transluminal coronary angioplasty (PTCA) or coronary stenting.

 A heart or heart-lung transplant. Comprehensive programs must include a medical evaluation, a program to modify cardiac risk factors, prescribed exercise, education, and counseling and may last for up to 36 sessions over 18 weeks or no more than 72 sessions over 36 weeks if determined appropriate by the local Medicare contractors. Facilities furnishing cardiac rehabilitation must have immediately available necessary cardio-pulmonary, emergency, diagnostic, and therapeutic life-saving equipment and be staffed with personnel necessary to conduct the program safely and effectively who are trained in advanced life support techniques and exercise therapy for coronary disease. The program must also be under the direct supervision of a physician. Until section 144(a) of the MIPPA is effective, ICR programs are covered under this NCD and are subject to the same coverage requirements.

We are proposing to implement section 144(a) of the MIPPA and refine coverage for CR and ICR through this rulemaking process. When the rulemaking is completed, we will take the necessary steps to withdraw and/or modify the NCD.

c. Statutory Authority

Section 144(a) of the MIPPA amended the Medicare Part B program by adding new sections 1861(s)(2)(CC) and 1861(s)(2)(DD) of the Act to include items and services furnished under a "cardiac rehabilitation program" and an "intensive cardiac rehabilitation program," respectively. A cardiac rehabilitation program is defined in new section 1861(eee)(1) of the Act and an intensive cardiac rehabilitation program is defined in new section 1861(eee)(4)(A) of the Act.

A cardiac rehabilitation program is a physician-supervised program that furnishes the following: Physicianprescribed exercise; cardiac risk factor modification, including education, counseling, and behavioral intervention; psychosocial assessment; outcomes assessment; and other items or services as determined by the Secretary under certain conditions. These items and services must be furnished in a physician's office, in a hospital on an outpatient basis, or in other settings as determined appropriate by the Secretary. A physician must be immediately available and accessible for medical consultation and emergencies at all times items and services are being furnished in a CR program except when provided in a hospital setting where such availability is presumed. The items and services furnished by a CR program are individualized and set forth in written treatment plans that describe the patient's individual diagnosis; the type, amount, frequency, and duration of items and services furnished under the plan; and the goals set for the individual under the plan. These written plans must be established, reviewed, and signed by a physician every 30 days.

We are proposing that ICR programs must provide the same items and services under the same conditions as CR programs but must demonstrate, as shown in peer-reviewed published research, that they have accomplished one or more of the following: Positively affected the progression of coronary heart disease, or reduced the need for coronary bypass surgery, or reduced the need for percutaneous coronary interventions (PCIs). The peer-reviewed published research must also show that the ICR program has resulted in a statistically significant reduction in 5 or more measures from their levels before ICR services to their levels after receipt of such services. These measures include low density lipoprotein; triglycerides; body mass index; systolic blood pressure; diastolic blood pressure; or the need for cholesterol, blood pressure, and diabetes medications.

Beneficiaries eligible for ICR must have experienced the following: An acute myocardial infarction within the preceding 12 months; a coronary bypass surgery; current stable angina pectoris; a heart valve repair or replacement; a PTCA or coronary stenting; or a heart or heart-lung transplant. Section 1861(eee)(4)(C) of the Act, as added by section 144(a)(1)(B) of the MIPPA, states that an ICR program may be provided in a series of 72, 1-hour sessions (as defined in section 1848(b)(5) of the Act), up to 6 sessions per day, over a period of up to 18 weeks.

The statute directs the Secretary to establish standards for the physician(s) supervising the ICR and/or CR programs to ensure that the physician has expertise in the management of individuals with cardiac pathophysiology and is licensed by the State in which the CR program (or ICR program) is offered. These standards ensure that the physician is responsible for the program and, in consultation with appropriate staff, is involved substantially in directing the progress of individuals in the program.

d. Proposals for Implementation

We are proposing to create new § 410.49, "Cardiac Rehabilitation Program and Intensive Cardiac Rehabilitation Program: Conditions of Coverage."

(1) Definitions

In this section, we are proposing several definitions for the terms used with respect to the programs and services required by section 144(a) of the MIPPA. These terms include the following:

- Cardiac rehabilitation program.
- Individualized treatment plan.
- Intensive cardiac rehabilitation.
- Physician.
- Physician-prescribed exercise
- Psychosocial assessment.
- · Outcomes assessment.

(2) Covered Beneficiaries

In § 410.49, we are proposing to establish coverage for CR and ICR programs for beneficiaries who have experienced any of the following: An acute myocardial infarction within the preceding 12 months; a coronary bypass surgery; current stable angina pectoris; a heart valve repair or replacement; a PTCA or coronary stenting; or a heart or heart-lung transplant. We are proposing to maintain and refine coverage of general CR programs for beneficiaries with these six conditions as originally established in Pub. 100-03, section 20.10 as this coverage was determined to be reasonable and necessary under section 1862(a)(1)(A) of the Act due to a high level of supporting clinical evidence. We are also proposing through this rulemaking to use the NCD process in the future to identify

additional medical indications for patients who could obtain CR under Medicare Part B. While CR programs include certain mandatory services, the written plans are highly individualized, and we propose to allow some flexibility in the type, amount, frequency, and duration of services provided in each session. However, as supported by medical literature and statements of the American Heart Association (AHA) and the American Association of Cardiovascular and Pulmonary Rehabilitation (AACVPR),4 aerobic exercise training using the muscles of ambulation is a mandatory component of any CR or ICR program. We recommend both low- and highintensity exercise to produce optimal benefits, and suggest a combination of endurance, strengthening and stretching exercises. Patients in general CR programs must participate in a minimum of 2, 1-hour CR sessions a week, and a maximum of 2, 1-hour sessions a day. Patients in ICR programs may participate in up to 6, 1-hour sessions per day not to exceed 72, 1hour sessions over an 18-week period. By a 1-hour session, we mean that each session must last a minimum of 60 minutes. Each day CR or ICR items and services are provided to a patient, aerobic exercises along with other exercises must be included (that is, a patient must exercise aerobically every day he or she attends a CR or ICR session). Exercise may include the use of treadmills, bicycles, light weights or other equipment, and should be intended to improve cardiovascular function, strength, endurance, and flexibility.

Section 144(a) of the MIPPA requires CR and ICR programs to furnish items and services including "cardiac risk factor modification." This includes education, counseling, and behavioral intervention to the extent these services are closely related to the individual's care and treatment and tailored to patients' individual needs. We are proposing that patients must be provided with the information and tools to improve their overall cardiovascular health. Items and services furnished as part of the risk factor modification component should be highly

⁴ Balady G, Williams M, Ades P, et al. Core Components of Cardiac Rehabilitation/Secondary Prevention Programs: 2007 Update. A Scientific Statement From the American Heart Association Exercise, Cardiac Rehabilitation, and Prevention Committee, the Council on Clinical Cardiology; the Councils on Cardiovascular Nursing, Epidemiology and Prevention, and Nutrition, Physical Activity, and Metabolism; and the American Association of Cardiovascular and Pulmonary Rehabilitation. Journal of Cardiopulmonary Rehabilitation and Prevention 2007;27:121–129.

individualized as multiple risk factors contribute to poor cardiovascular health. For example, these items and services may include smoking cessation counseling or referral, nutritional education and meal planning, stress management, prescription drug education and management information, disease history education in order to foster a better understanding of disease origins and disease symptomatology, and any other education, counseling and behavioral intervention deemed appropriate in each patient's individualized treatment plan.

The MIPPA provisions require a psychosocial assessment as part of the CR and ICR programs defined above. We are proposing that the initial assessment by program staff evaluate aspects of the individual's family and home situation that may affect their treatment, and consider at the outset if referrals to support groups, community and/or home care services are necessary. Prior to each 30-day review of the individualized treatment plan, the supervising physician or program staff will conduct an evaluation of the individual's response to, and rate of progress under, the treatment plan and make recommendations to the physician as necessary. While the individualized treatment plan discussed below will assist in ensuring that patients begin CR with a program tailored to their needs, a periodic re-evaluation is necessary to ensure that their psychosocial needs are in fact being met.

The MIPPA provisions also require that CR and ICR programs include outcomes assessment. Professional groups, such as the AHA and AACVPR, recognize a number of relevant patient outcomes that may be expected to accrue from the various components of cardiac rehabilitation.5 We propose to define outcomes assessment as an evaluation of the patient's progress in the program using assessments from the commencement and conclusion of CR and ICR programs that are based upon patient centered outcomes. Patient centered outcomes must be measured at the beginning of the CR program, prior to each 30-day review of the individualized treatment plan, and at the end of the CR program. All

assessments are considered part of the CR program and, as such, are conducted in the appropriate settings and not billed separately. These measures should include resting and exercising heart rate, resting and exercising systolic and diastolic blood pressure, weight, BMI, amount and dosage of medications required, self-reported quality of life, and behavioral measures (for example, smoking cessation, increased activity levels, change in exercise levels during CR). As CR programs must be highly individualized, alternate or additional measures may be appropriate. Patients' individualized treatment plans should be altered accordingly with changes and/or progress in each of the outcome measurements. Programs may also develop performance standards which measure the overall quality of the program, by assessing the group as a whole.

The MIPPA provisions require that CR services be provided under written individualized treatment plans. As CR programs are highly individualized, we propose that the physician define and set the parameters, including the individual's diagnosis, the types of services appropriate, and the treatment goals. The MIPPA provisions require the physician to establish the written individualized treatment plan and conduct subsequent reviews every 30 days. This plan may initially be developed by the referring physician or the CR physician. If the plan is developed by the referring physician who is not the CR physician, the CR physician must also review and sign the plan prior to initiation of CR. Direct physician contact is not always required to meet the 30-day review standards, but might be necessary depending upon specific patient factors. Regardless, CR staff must provide both outcome and psychosocial assessments to the supervising physician prior to the 30day deadline and the physician must evaluate the information provided by the CR staff. The CR staff may make recommendations for modifications to the program, but the physician will still modify the plan as needed, and review and sign the plan. The MIPPA provisions require written specificity relating to the type, amount, frequency, and duration of the items and services furnished under the individual's plan. As CR patients have had or may develop disabling cardiovascular disease, they require individual attention and assessments that address their individualized needs and meet realistic individualized goals through a specifically designed treatment plan.

The individualized treatment plan should specify the combination of services necessary to address the patient's needs, as identified through the initial assessment and based upon changes in the patient's condition. It must include measurable and expected outcomes and estimated timetables to achieve these outcomes. The outcomes specified in the individualized treatment plan should be consistent with current evidence-based professionally-accepted clinical practice standards such as those identified by the AHA and AACVPR.

The MIPPA provisions also authorize the Secretary to include other mandatory items and services within the scope of the CR program under certain conditions. We are not proposing to require any other items and services at the present time. If the Secretary determines that the addition of any other items and services is appropriate, additions will be made and implemented through future

rulemaking.

Section 144(a) of the MIPPA provides for coverage of CR and ICR services in various settings which include a physician's office, a hospital on an outpatient basis or other settings determined appropriate by the Secretary. We are not proposing to cover CR or ICR in other settings at this time. If the Secretary determines that the addition of settings is appropriate, additions will be made through rulemaking. All settings should have all equipment and staff necessary, consistent with cardiac rehabilitation professional society recommendations, to provide statutorily-mandated items and services.

Section 144 of the MIPPA includes requirements for immediate and ongoing physician availability and accessibility for both medical consultations and medical emergencies at all times items and services are being furnished under the program. Professional groups such as the AHA and AACVPR recognize the need to provide appropriate patient supervision and, where appropriate, monitoring. We are proposing that such availability be met through existing definitions for direct physician supervision in physician offices and hospital outpatient departments at § 410.26(a)(2) (defined through cross reference to § 410.32(b)(3)(ii)) and § 410.27(f), respectively. Direct supervision, as defined in the regulations, is consistent with the language of the MIPPA because the physician must be present and immediately available where the services are being furnished. The physician must also be able to furnish

 $^{^{\}rm 5}\, \rm Balady$ G, Williams M, Ades P, et al. Core Components of Cardiac Rehabilitation/Secondary Prevention Programs: 2007 Update. A Scientific Statement From the American Heart Association Exercise, Cardiac Rehabilitation, and Prevention Committee, the Council on Clinical Cardiology; the Councils on Cardiovascular Nursing, Epidemiology and Prevention, and Nutrition, Physical Activity, and Metabolism; and the American Association of Cardiovascular and Pulmonary Rehabilitation. Journal of Cardiopulmonary Rehabilitation and Prevention 2007:27:121-129.

assistance and direction throughout the performance of the services, which would include medical consultations and medical emergencies

and medical emergencies. For CR and ICR services provided in physicians' offices and other Part B settings paid under the PFS, the physician must be present in the office suite and immediately available to furnish assistance and direction throughout the performance of the service or procedure in accordance with the § 410.26(b)(5). This does not mean that the physician must be in the room when the service or procedure is performed. For CR and ICR services provided to hospital outpatients, direct physician supervision is the standard set forth in the April 7, 2000 OPPS final rule with comment period (68 FR 18524 through 18526) for supervision of hospital outpatient therapeutic services covered and paid by Medicare in hospitals and provider-based departments of hospitals. We currently define and specify the requirement for direct supervision for services furnished in provider-based departments of hospitals at § 410.27(f). For this purpose, the physician must be on the premises of the location (meaning the provider-based department) and immediately available to furnish assistance and direction throughout the performance of the procedure. This does not mean that the physician must be present in the room when the procedure is furnished. If we were to propose future changes to the physician office or hospital outpatient policies for direct physician supervision, we would provide our assessment of the implications of those proposals for the supervision of cardiac rehabilitation

The MIPPA provisions state that in the case of items and services furnished under such a program in a hospital, physician availability shall be presumed. As we have stated in the CY 2009 OPPS/ASC final rule with comment period (73 FR 68702 through 68704), the longstanding presumption relating to direct physician supervision for hospital outpatient services means that direct physician supervision is the standard for supervision of hospital outpatient therapeutic services covered and paid by Medicare in hospitals and provider-based departments of hospitals, and we expect that hospitals are providing services in accordance with this standard.

services at that time.

New section 1861(eee)(4) of the Act requires ICR programs, to be qualified for Medicare coverage, to meet several standards. To become qualified, an ICR program must demonstrate through peer-reviewed, published research that

it has accomplished one or more of the following: (1) Positively affected the progression of coronary heart disease; (2) reduced the need for coronary bypass surgery; or (3) reduced the need for percutaneous coronary interventions (PCIs). A qualified ICR program must also demonstrate through peer-reviewed published research that the ICR program accomplished a statistically significant reduction for patients in 5 or more specific measures from the individual's levels before ICR services to their levels after receipt of such services. These measures include: (1) Low density lipoproteins; (2) triglycerides; (3) body mass index; (4) systolic blood pressure; (5) diastolic blood pressure; and (6) the need for cholesterol, blood pressure, and diabetes medications. To ensure that ICR programs in fact meet these standards, we are proposing that programs intending to operate as ICR programs apply to CMS to receive designation as qualified ICR programs. Only designated programs would then be eligible for Medicare coverage and would be required to undergo regular reevaluation to maintain such status. We are requesting public comments on establishing an annual re-evaluation process.

We are proposing that programs may apply to CMS to be designated qualified programs to provide ICR. To meet this designation, programs must submit to CMS detailed literature describing the program and the precise manner in which the program meets MIPPA provisions. Each program must also submit peer-reviewed, published research specific to the actual program applying for approval. The research must clearly demonstrate that the program under examination accomplishes at least the minimum outcomes as defined above. We are proposing, based on our general rulemaking authority that each ICR program must submit a detailed description of the items and services available to ICR patients and the capabilities of the facility in which the program takes place as well as the responsibilities of program staff. All materials shall be submitted to: Director, Coverage and Analysis Group, Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Mail Stop C1-09-06, Baltimore, Maryland 21244.

Following CMS review, ICR programs will either be notified of any missing information or inadequacies in their submissions (so they may resubmit in the future) or be notified of CMS designation as an ICR program. Designated programs will be identified in a list of ICR programs posted on the CMS Web site and in the **Federal**

Register. We are proposing that all designated programs must demonstrate continued compliance with MIPPA standards every year in order to maintain qualified status.

We are proposing that for an ICR program to maintain its designation by CMS as a qualified ICR program, the program must submit specific outcomes assessment information. Programs shall submit information for all patients who initiated and completed the full ICR program during the initial year-long CMS designation. For each patient, programs must identify the following: (1) The medical condition qualifying the patient for eligibility to participate in ICR; (2) the patient's improvement in coronary heart disease, reduced need for coronary bypass surgery, and/or reduced need for PCIs; and (3) the levels of the 5 or more measures identified above at the beginning and end of the program. Programs must also submit average beginning and ending levels of at least those 5 measures for the program as a whole. If any changes are made to the ICR program during the initial year-long CMS designation, such changes must be documented and submitted with the outcomes assessment information. Programs will have 30 days to submit this information to CMS following the end of the initial approval period. In the month following receipt, we will review the submitted information and determine whether the program continues to meet the payment standards. We believe that reevaluations of designated programs will assist CMS in ensuring that programs continue to demonstrate the outcome measures identified for initial designation. We are requesting public comments on annual program reevaluations requirements, the required information for re-evaluation proposed above and if an administrative appeals process should be established for ICR programs that no longer meet outcomes standards. We are also asking for public comments on the time period for reevaluations of ICR programs.

Section 144(a)(1)(B) of the MIPPA requires CR and ICR programs to be physician-supervised. In addition, section 144(a)(5) of the MIPPA requires the Secretary to establish standards to ensure that the physician, who has the appropriate expertise in the management of individuals with cardiac pathophysiology and is licensed to practice medicine in the State in which the CR or ICR program is offered, is responsible for the CR or ICR program. We propose to identify this physician who oversees or supervises the CR and ICR program in its entirety as the Medical Director. As required by

144(a)(5), we are proposing that the Medical Director must have training and proficiency in cardiovascular disease management and exercise training of heart disease patients. We also propose that the Medical Director, in consultation with other staff, must be involved substantially in directing the progress of individuals in the program. We are expressly seeking public comments on the precise level of expertise that is necessary for the Medical Director.

As discussed above, section 144(a)(2)(B) of MIPAA requires that a physician must be immediately available and accessible for medical consultations and medical emergencies at all times items and services are being furnished under the program. For purposes of this proposed rule we are identifying this physician as the supervising physician (that is, the physician that must be immediately available to furnish assistance and direction throughout the performance of CR and ICR services); we believe this physician also requires expertise in cardiac pathophysiology resulting from training or experience in cardiovascular disease management and exercise training of heart disease patients. This includes a physician billing Medicare Part B for providing services directly to a patient during a CR or ICR session. We are proposing standards for these physicians based on our general rulemaking authority which include expertise in the management of individuals with cardiac pathophysiology and licensure to practice medicine in the State in which the CR or ICR program is offered. We are expressly inviting public comments about the precise level of expertise that is necessary.

Please note that the program Medical Director may fulfill both roles of Medical Director and supervising physician (of individual CR and ICR services furnished to patients) provided that the requirements for direct physician supervision as required in §§ 410.26 and 410.27 are met when CR or ICR items and services are furnished, as discussed above.

We are requesting public comments regarding whether specific training and expertise standards are needed for the cardiac rehabilitation staff.

Section 1861(eee)(4)(C) of the Act provides for coverage of ICR programs that are provided in a series of 72 1-hour sessions (as defined in section 1848(b)(5) of the Act), up to 6 sessions per day, over a period of up to 18 weeks. Specific provisions for the number, duration, and time period for general CR programs are not identified in the

MIPPA; however we propose to maintain, with slight refinements, coverage requirements previously established in Pub. L. 100-03, section 20.10 through this rulemaking process. For eligible beneficiaries, general CR is provided for up to 36 1-hour sessions, up to 2 sessions per day with no fewer than 2 sessions per week, over up to 18 weeks, with contractor discretion to expand these limitations to not exceed 72 sessions for 36 weeks. This is based on section 1862(a)(1)(A) of the Act and our general rulemaking authority. By 1hour session, we mean that each session must last a minimum of 60 minutes.

e. Coding and Payment

(1) CR Payment

Currently, the following CPT codes are used for CR services described in section 144(a) of the MIPPA: CPT code 93797, Physician services for outpatient cardiac rehabilitation; without continuous ECG monitoring (per session); and CPT code 93798, Physician services for outpatient cardiac rehabilitation; with continuous ECG monitoring (per session). We are not proposing to revise these codes under the PFS because the CR program authorized by the existing NCD is essentially the same as that included in the MIPPA.

(2) ICR Payment

The statute requires that the hospital Outpatient Prospective Payment System (OPPS) payment amount for CR services be substituted for ICR under the PFS, specifically the payment for CPT codes 93797 and 93798 or any succeeding HCPCS codes for CR. We are proposing to create two new HCPCS codes for ICR services. These codes may only be billed by ICR programs that have been approved by CMS. The proposed codes are as follows:

- GXX28, Intensive cardiac rehabilitation; with or without continuous ECG monitoring with exercise, per session.
- GXX29, Intensive cardiac rehabilitation; with or without continuous ECG monitoring; without exercise, per session.

These HCPCS codes will be recognized under the PFS and the OPPS. Under the OPPS the existing CR HCPCS codes, CPT codes 93797 and 93798, are assigned to APC 0095 (Cardiac Rehabilitation) for CY 2009. Because the payment under the PFS for the two proposed ICR G-codes is required to be the same as the payment for CR services under OPPS, we are proposing to pay the same amount as will be established through rulemaking

for CY 2010. The proposed OPPS payment amount for CR services will be announced in the CY 2010 OPPS/ASC proposed rule. We are proposing that this amount will be adjusted for the appropriate locality by applying the GPCI under the PFS. The CY 2010 proposed APC assignments and payment rates for these two ICR G-codes will be published in the CY 2010 OPPS/ASC proposed rule. The proposed payment rate for the associated APC(s) will be included in Addendum A to the CY 2010 OPPS/ASC proposed rule.

We note that when a CR/ICR service is furnished in a hospital outpatient department, a physician cannot bill the Medicare contractor for CR/ICR unless the physician personally performs the CR/ICR service. To personally perform the CR/ICR service, the physician would provide direct care to a single patient for the entire session of CR/ICR that is being reported. In this case, the hospital would report the CR/ICR service and be paid the OPPS payment for the facility services associated with the CR/ICR session and the physician would report and be paid the PFS amount for the CR/ ICR service. A physician cannot bill under the PFS for CR/ICR services furnished in a hospital for which the physician furnishes only supervision or for services furnished in part by others. If the physician furnishes no direct CR/ ICR services for a given session or on a given day or provides direct CR/ICR services for less than the full session, then only the hospital would report the CR/ICR services and these services would be paid under the OPPS.

9. Section 144(a): Payment and Coverage Improvements for Patients With Chronic Obstructive Pulmonary Disease and Other Conditions—Pulmonary Rehabilitation Services

Section 144 of the MIPPA amended Title XVIII of the Act to provide for coverage of pulmonary rehabilitation (PR) under Part B, under certain conditions, for services furnished on or after January 1, 2010. This proposed rule would implement the new Medicare pulmonary rehabilitation program and establish the requirements for providing such services to Medicare beneficiaries with a diagnosis of moderate to severe chronic obstructive pulmonary disease (COPD). COPD is not only one of the more common of the diseases in the category of chronic respiratory diseases, it is one of the more severely debilitating, characterized by chronic bronchitis and emphysema. Other diseases and conditions in this category include persistent asthma, bronchiectasis, primary pulmonary hypertension, obesity-related respiratory disease, and ventilator dependency. This rule provides direction in implementing the MIPPA in order to ensure services are covered and enhance the patient's clinical outcomes.

a. Background

A PR program is typically a multidisciplinary program of care for patients with chronic respiratory impairment that is individually tailored and designed to optimize physical and social performance and autonomy. The main goal of an individualized PR training program is to empower and facilitate the individuals' ability to exercise independently; exercise is the cornerstone of the PR program. Exercise is combined with other training and support mechanisms necessary to integrate prevention and encourage long-term adherence to the treatment plan. The appropriate PR program will train and motivate the patient to his or her maximum potential in self-care, and improve his or her overall quality of life.

b. Provisions of Section 144 of the MIPPA

In pertinent part, section 144 of the MIPPA amended section 1861(s)(2) of the Act to add a new subparagraph (CC) establishing coverage of items and services furnished under a "pulmonary rehabilitation program." Pulmonary rehabilitation program is defined in new subsection (fff)(1) to mean a physician supervised program that furnishes several specific items and services. These include all of the following:

- Physician-prescribed exercise.
- Education or training (to the extent that the education and training is closely and clearly related to the individual's care and treatment and is tailored to such individual's needs).
 - Psychosocial assessment.
 - Outcomes assessment.
- Other items and services determined by the Secretary to be appropriate under certain conditions.

These components are to be provided in physicians' offices, hospital outpatient settings, and other settings determined appropriate by the Secretary. A physician must be immediately available and accessible for medical consultation and medical emergencies at all times when PR items and services are being furnished under the program. The individual's treatment is furnished under a written treatment plan that is developed by the physician for each beneficiary participating in a PR program. A physician must establish and review the plan and it must be signed by the physician every 30 days. This plan must include the individual's diagnosis, the scope of services to be

provided in terms of type, amount, frequency and duration, and the goals set for the individual. To be covered and paid by Medicare, the PR program must provide all of the specified mandatory items and services. With respect to the Secretary's authority to require additional items and services, we are not proposing any additional services at the present time; however, we may propose additional items and services in the future.

c. Proposals

Under section 144 of the MIPPA, we are proposing to create a new § 410.47, "Pulmonary Rehabilitation Program: Conditions for Coverage" under Part B to add the PR program as a Medicarecovered service. The new section 1861(fff) of the Act outlines the mandatory components of a PR program. In accordance with this new section, any facility providing a PR program must meet all of the requirements outlined herein. The MIPPA provides for coverage of PR services in two specific settings (physician's office, hospital outpatient) and authorized the agency to consider the addition of other settings. We are not proposing any other settings at the present time.

The PR provisions defined by section 144 of the MIPPA are effective January 1, 2010.

(1) Definitions

We are proposing the following definitions for the programs and services required by MIPPA as related to PR provisions.

- Individualized treatment plan: A written plan which describes the individual's diagnosis; the type, amount, frequency and duration of the items and services to be furnished under the plan, including specifics related to the individual's particular needs for education and training; and the goals set for the individual under the plan.
- Outcomes assessment: A
 physician's evaluation of the patient's
 progress as it relates to his or her
 rehabilitation. The outcomes assessment
 is in writing and includes the following:
 (1) Pre- and post-assessments, based on
 patient-centered outcomes which are
 conducted by the physician at the
 beginning of the program and at the end
 of the program; and (2) objective clinical
 measures of exercise performance and
 self-reported measures of shortness of
 breath and behavior.
- *Physician:* A doctor of medicine or osteopathy as defined in section 1861(r)(1) of the Act.
- *Physician-prescribed exercise:* Physical activity, including aerobic

exercise, prescribed and supervised by a physician that improves or maintains an individual's pulmonary functional level.

• Psychosocial assessment: A written evaluation of an individual's mental and emotional functioning as it relates to the individual's rehabilitation or respiratory condition.

This includes: (1) An assessment of those aspects of an individual's family and home situation that affect the individual's rehabilitation treatment; and (2) a psychosocial evaluation of the individual's response to and rate of progress under the treatment plan.

• Pulmonary rehabilitation: A short term physician-supervised program for COPD and certain other chronic respiratory diseases designed to optimize physical and social performance and autonomy.

(2) Coverage

We are proposing that Medicare Part B would cover PR for beneficiaries with moderate to severe COPD when ordered by the physician treating chronic respiratory diseases. A comprehensive PR program may be adapted for any person with chronic respiratory disease. The medical literature describes conditions associated with the possible need for PR including COPD, obesity-related respiratory disease, lung cancer, and neuromuscular diseases. However, the benefits of a PR program most strongly support its use for patients with moderate to severe COPD.

(a) Definition of Moderate to Severe COPD

Moderate to severe COPD is defined as GOLD classification II and III. The GOLD classification utilizes indices that measure airflow limitation and lung hyperinflation to determine severity of COPD. Specifically, the measurement of Forced Expiratory Volume (FEV) in the first second divided by the Forced Expiratory Vital Capacity (liters) (FEV1/ FVC) gives a clinically useful index of airflow limitation. In other words, the volume of air exhaled that can be forced out in one second after taking a deep breath divided by the maximum volume of air exhaled as rapidly, forcefully and completely as possible from the point of maximum inhalation equals a numerical value used to grade COPD severity. Moderate and severe COPD are defined

- GOLD classification II (Moderate COPD)) is defined as FEV1/FVC<70 percent and FEV1 ≥30 percent to <80 percent predicted with or without chronic symptoms (Cough, sputum production, dyspnea).
- GOLD classification III (Severe COPD) is defined as FEV1/FVC < 70

percent and FEV1 < 30 percent predicted or FEV1 < 50 percent predicted plus respiratory failure or clinical signs of right heart failure.

Section 144 of the MIPPA does not specify the medical conditions for which coverage and payment are authorized for a PR program, other than a reference in the title to "chronic obstructive pulmonary disease and other conditions". Although the spectrum of possible conditions for which PR may be covered is broad, the medical guidelines most strongly supported the benefits of a PR program for individuals with moderate to severe COPD. The major national and international respiratory organizations (that is, ATS/ERS, the American College of Chest Physicians (AACP) jointly with the American Association of Cardiovascular and Pulmonary Rehabilitation (AACVPR), and Global Initiative for Chronic Obstructive Lung Disease) have recommended PR as the standard of care in the treatment of moderate to severe chronic obstructive pulmonary disease represented by GOLD classification II or III. Because there is not data to substantiate significantly improved outcomes for any other medical conditions, we are proposing to allow moderate to severe COPD as the only covered condition. We propose to consider expanding coverage to patients with other medical conditions, should evidence support these additional uses. We would propose in our regulations to use the national coverage determination process to consider expanding coverage of PR for other chronic respiratory.

(b) Use of the NCD Process

We are proposing to use the national coverage determination process as authorized by section 1871(1) of the Act, to consider expanding coverage to items and services furnished by PR programs. The NCD process is open and transparent and provides an opportunity for public comments. Moreover, the NCD process affords CMS the ability to conduct a timely assessment of recent clinical evidence through a flexible and transparent process. It allows us to make uniform nationwide coverage determinations for items and services in a more flexible manner than rulemaking. In most circumstances, the NCD process is required to be completed within 9 to 12 months of the time that we accept a formal request for an NCD on a particular service. The NCD process will maximize the clinical benefit of PR for beneficiaries, and permit more rapid changes in response to emerging clinical evidence.

(3) Physician-Prescribed Exercise

Since the determination of the optimal time spent on each of the specific components within a PR program is highly individualized under the written plan of care, we are proposing to give the program medical director considerable flexibility. However, aerobic exercise is widely considered the cornerstone of pulmonary rehabilitation, and practice guidelines in the medical literature suggest exercise training of the muscles of ambulation as an essential component of a PR program. Each session must include some physicianprescribed aerobic exercise. We recommend both low- and highintensity exercise to produce clinical benefits. It is suggested that exercise sessions involving a combination of endurance and strength training (to increase muscle strength and muscle mass) be conducted at least twice per week to achieve physiological benefits. Exercise may include use of treadmills, bicycles or other equipment, and should provide increased pulmonary function, strength, endurance, and flexibility.

(4) Education or Training Under the PR Program

Section 144 requires that education or training must meet the statutory requirements that mandate that it must be closely and clearly related to the individual's care and treatment, as well as meeting the specific needs of the individual. As part of the written individualized treatment plan the physician should evaluate and include only that education and training which addresses the needs particular to the patient that will further their independence in activities of daily living. The training and education prescribed should assist patients in learning to adapt to their limitations and improve the quality of their lives. Patients with COPD often use respiratory therapy modalities and equipment to aid their breathing. Education and training should be provided as necessary to ensure proper use and compliance with the physician's prescription. Instruction should include proper use, care, and cleaning of home respiratory equipment. Examples of equipment for which instruction would be appropriate include nebulizers/compressors, transtracheal oxygen (TTO), peak flow meters, and oxygen-conserving devices. Current medical literature provides for education as an integral component of pulmonary rehabilitation. The supervising physician must ensure the education or training helps further the

primary objective of understanding and self-management of the chronic respiratory disease, specifically focused on COPD, including educational information on prevention and treatment of exacerbations. Examples of training sessions include those on respiratory techniques for physical energy conservation, work simplification, and relaxation techniques. Skills training and education also encourage behavioral changes by the patient, which can lead to improved health and long-term adherence. For example, brief smoking cessation counseling, as appropriate and respiratory problem management, should be included. Other topics for education may include the proper use of medications and nutrition counseling.

(5) Psychosocial Assessment

Section 144 of the MIPPA requires a psychosocial assessment as part of the PR program; we propose that it should be a written assessment. The initial assessment by program staff will evaluate aspects of the individual's family and home situation that may affect his or her treatment, and consider at the outset if referrals to support groups, community and/or home care services are necessary. Individual psychological considerations will also be addressed. For example, smoking is well known to be a cause of COPD. Depression and anxiety are commonly reported concerns for this patient population. Psychosocial intervention could help facilitate behavioral changes, such as smoking cessation, as well as assist with managing symptoms such as dyspnea. The assessment should include a written evaluation of the patient's need, as appropriate, for depression management, stress reduction, relaxation techniques, and strategies for coping with lung disease. This proposed rule does not propose any changes to the existing NCD (210.4) for "Smoking and Tobacco-Use Cessation Counseling."

The psychosocial assessment should include thorough screening and evaluation of the individual's lifestyle and other behaviors. Prior to each 30day review of the individualized treatment plan, the program staff will conduct an evaluation of the individual's response to, and rate of progress under, the treatment plan and make recommendations to the physician as necessary. While the individualized treatment plan discussed below will assure that patients begin PR with a program tailored to their needs, periodic re-evaluations are necessary to ensure that their psychosocial needs are in fact

being met.

(6) Outcomes Assessment

Section 144 of the MIPPA also requires that the PR program include outcomes assessment. In this proposed rule, we define outcomes assessment as an objective clinical measure of the effectiveness of the PR program for the individual patient. Patient-centered outcomes should be measured at the beginning of the PR program, prior to each 30-day review of the individualized treatment plan, and no later than at the end of the PR program. All such assessments are considered part of the PR program and as such are conducted in the appropriate settings and may not be billed separately. These measures should include clinical measures such as a 6-minute walk, weight, exercise performance, selfreported dyspnea (exertional and with daily activities), behavioral measures (supplemental oxygen use, smoking status), and a quality-of-life assessment. Some of the common program outcome measures examined in PR are functional exercise capacity, survival, and ADLs.

(7) Individualized Treatment Plan

Section 144 of the MIPPA requires that the physician develop, sign, and review an individualized treatment plan. In recognizing that PR programs are inherently highly individualized, we are proposing that the physician shall define and set the parameters, including types, amount, frequency and duration of the services, and goals, for the individual's treatment plan that include each of the four component services within the maximum duration of the program. The MIPPA requires the physician to establish the written individualized treatment plan at the start of the program and conduct subsequent reviews every 30 days. This plan may initially be developed by the referring physician or the PR physician. If the plan is developed by the referring physician who is not the PR physician, the PR physician must also review and sign the plan prior to initiation of PR. We would expect the supervising physician to have initial direct contact with the individual prior to subsequent treatment by auxiliary personnel. We would also expect at least one direct contact with the beneficiary in each 30day period. Regardless, PR staff must provide both outcome and psychosocial assessments to the responsible physician prior to the 30-day deadline. Even if the PR staff makes recommendations for modifications to the program the physician will still be responsible for modifying the plan as needed, and reviewing and signing the plan prior to implementation for the

individual. The MIPPA also requires written specificity relating to the type, amount, frequency and duration of items, and services furnished to the individual. Patients with chronic respiratory disease require individual attention, and assessments which address individualized needs must be designed to meet realistic individual goals. Therefore, the individualized plan of care should specify the mix of services necessary to address the patient's needs, as identified through the initial assessment, and based upon changes in the patient's condition. Further, it must include measurable and expected outcomes and estimated timetables to achieve these outcomes. The outcomes specified in the patient plan of care should be consistent with current evidence-based professionallyaccepted clinical practice standards.

(8) Settings

In the MIPPA, the Congress has identified 2 appropriate settings for pulmonary rehabilitation, and also authorized the agency to provide additional settings for the PR program. We considered whether these new requirements should extend to CORFs, which are governed by different statutory provisions in section 1861(cc) of the Act. Given the differences in the statutory language, we do not propose extending the PR program requirements to CORFs. Individuals requiring PR program services have a chronic respiratory disease and are in need of supervised aerobic exercise, not physical therapy. Conversely, in the CORF setting physical therapy is the cornerstone component and a mandatory service, while exercise is not. Thus, the PR program is for an inherently different patient population, and allows for the first time, payment for exercise for COPD patients. Therefore, we propose not to include the CORF as a setting for a PR program. The respiratory therapy services performed in a CORF are part of a CORF program of services and not part of a PR program. We would consider the inclusion of additional settings through future rulemaking.

Both physician offices and outpatient settings must meet the standards as defined in the rule for safety and emergency care. These include both the immediate availability of the physician during the PR program and certain equipment requirements. In order to ensure proper safeguards in the statutorily-prescribed settings, the setting must have the cardio-pulmonary, emergency diagnostic and therapeutic equipment accepted as medically necessary by the medical community for

emergency treatment related to a chronic respiratory disease condition. Some examples of this equipment are oxygen, defibrillators, and cardio-pulmonary resuscitation equipment. The setting must have all equipment and staff necessary to provide all of the statutorily-mandated items and services. We would expect that any additional settings which may be added through future rulemaking would similarly need to meet all of the aforementioned requirements.

(9) Physician Supervision

Section 144 of the MIPPA includes requirements for immediate and ongoing physician availability and accessibility for both medical consultations and medical emergencies at all times items and services are being furnished under the program. We are proposing to define such availability in accordance with existing definitions for direct physician supervision in physician offices and hospital outpatient departments at § 410.26(a)(2) (defined through cross reference to § 410.32(b)(3)(ii)) and § 410.27(f), respectively. Direct supervision, as defined in the regulations, is consistent with the language of the MIPPA because a physician must be present and immediately available where the services are being furnished. A physician must also be able to furnish assistance and direction throughout the performance of the services, which would include medical consultations and medical emergencies.

For PR services furnished in physicians' offices and other Part B settings paid under the PFS, this means that the physician must be present in the office suite and immediately available to furnish assistance and direction throughout the performance of the service or procedure in accordance with $\S 410.26(\bar{b})(5)$. It does not mean that the physician must be in the room when the service or procedure is performed. For PR services provided to ĥospital outpatients, direct physician supervision is the standard set forth in the April 7, 2000 OPPS final rule with comment period (68 FR 18524 through 18526) for supervision of hospital outpatient therapeutic services covered and paid by Medicare in hospitals and provider-based departments of hospitals. We currently define and specify the requirement for direct supervision for services provided in provider-based departments of hospitals at § 410.27(f). For this purpose, the physician must be on the premises of the location (meaning the providerbased department) and immediately available to furnish assistance and

direction throughout the performance of the procedure. This does not mean that the physician must be present in the room when the procedure is performed. If we were to propose future changes to the physician office or hospital outpatient policies for direct physician supervision, we would provide our assessment of the implications of those proposals for the supervision of pulmonary rehabilitation services at that time.

The MIPAA provisions state that in the case of items and services furnished under such a program in a hospital, physician availability shall be presumed. As we have stated in the CY 2009 OPPS/ASC final rule with comment period (73 FR 68702 through 68704), the longstanding presumption of direct physician supervision for hospital outpatient services means that direct physician supervision is the standard and we expect that hospitals are providing services in accordance with this standard.

(10) Physician Standards

The MIPPA authorizes the Secretary to establish standards to ensure that only a physician with expertise in the management of individuals with respiratory pathophysiology and who is licensed by the State where the PR program is offered shall be responsible for the program and direct the individual's progress. We propose to identify the physician who oversees or supervises the PR program in its entirety as the program medical director, and this may be the same physician providing, and billing for, the PR services. We are proposing that the program medical director must have training and proficiency in chronic respiratory disease management and exercise training of chronic respiratory disease patients. We further propose that the standards for program oversight shall include substantial involvement in the monitoring and direction of the patients' progress, and by implication, the staff that assists in furnishing the services. As part of his or her responsibility and accountability for the program, the program medical director will be expected to retain all records and documentation for each beneficiary which are ordinarily compiled in their clinical practice. We propose that the substantiation of the program medical director's expertise in respiratory pathophysiology would correlate to experience in the provision of care for individuals with chronic respiratory diseases. For purposes of referral for PR services, we are proposing to use the definition of "physician" specified in section 1861(r)(1) of the Act which

defines "physician" as "a doctor of medicine or osteopathy legally authorized to practice medicine and surgery by the State in which he or she performs such function or action (including a physician within the meaning of section 1101(a)(7) of the Act)." We also propose that a supervising physician must be immediately available and accessible for emergencies and consultations.

(11) Sessions

Currently, PR is conducted with a widely varying number of sessions. We are unaware of any data that specifies an exact number of sessions that should be included in a PR program. However, published professional guidelines generally recommend ranges, typically 2 or 3 sessions per week over a period of 12 to 18 weeks for maximum physiological benefits. This equates to a range of approximately 24 to 54 sessions in total; the mean is 39 sessions. Since the primary goal of PR is to facilitate and encourage independent exercise at home, we believe coverage of 36 sessions in the facility setting is appropriate. Further, the current NCD (20.10) for cardiac rehabilitation allows for initial coverage of up to 36 sessions. Since the goals and objectives of these two programs are similar with respect to the patients' ability to achieve selfmanagement of their diseases, we believe those limits are appropriate here. Therefore, we are proposing to allow up to 36 sessions for services provided in connection with a PR program. Patients should generally receive 2 to 3 sessions per week, which are a minimum of 60 minutes each. We propose to allow no more than one session per day, since these beneficiaries have significant respiratory compromise and would not typically be capable of doing more than one aerobic exercise session. We are especially interested in comments regarding the proposed optimal number of sessions, while acknowledging that each individual has a different degree of

(12) Other Items and Services

The MIPPA allows the inclusion of additional items and services as required elements of a PR program, under certain specific conditions. We are not proposing any additional items and services at the present time. We may consider the addition of other items and services through future rulemaking.

d. Coding

We are proposing to create one HCPCS code to describe and to bill for the services of a PR program as specified

in section 144(a) of the MIPPA, GXX30, Pulmonary rehabilitation, including aerobic exercise (includes monitoring), per session per day. This G-code is to be billed when the patient performs physician-prescribed aerobic exercises that are targeted to improve the patient's physical functioning and may also include the other aspects of pulmonary rehabilitation, such as education and training. Because the physician's role in the PR program is defined in a similar manner to that in the cardiac rehabilitation program, we believe that the physician work component should be analogous to that of CPT code 93797, cardiac rehab without telemetry. Therefore we are proposing work RVUs of 0.18 RVUs for this new G-code. Using this same reference code, we are proposing that the malpractice RVUs be 0.01 RVUs.

To establish the PE RVU payment for the proposed new PR G-code, we reviewed the PE inputs of similar services, particularly those of the respiratory therapy HCPCS codes, G0237 and G0238, as well as the cardiac rehabilitation codes, CPT codes 93797 and 93798. Given the various individuals, acting under the supervision of a physician, can make up the PR multidisciplinary team, we believe that the clinical labor for the PR G-code can be best represented by the following labor types taken from the PE database: The nurse "blend" (RN/LPN/ MTA), the respiratory therapist (RT), the social worker/psychologist and the medical/technical assistant—which we selected to represent various specialists involved in furnishing this service; these are valued at \$0.37, \$0.42, \$0.45, and \$0.26 per minute, respectively. Using an average of these values, \$0.375 per minute, we are proposing to use the nurse blend labor type found in the cardiac rehabilitation CPT codes, at \$0.37 per minute, as the typical value for the PR clinical labor and assigning 28 minutes of clinical labor time for the new PR G-code based on the various components of the proposed PR program.

For the equipment PE inputs, we reviewed the direct PE inputs for similar existing codes and are proposing a pulse oximeter (with printer), a 1-channel ECG, and a treadmill. Since no typical supplies were listed for similar existing codes in the PE database, we have not proposed any specific supplies for this proposed new G-code.

10. Section 152(b): Coverage of Kidney Disease Patient Education Services

Section 152(b) of the MIPPA provides for coverage of kidney disease education (KDE) services for patients. The following is an outline of our proposals to implement the statutory amendments.

a. Background

The kidneys have several life-sustaining functions. Waste and excess fluid is removed by the kidney through filtration and the concentration of salt and minerals in the blood is maintained. Additionally, the kidneys help regulate blood pressure, are involved in the process of red blood cell production, and are needed for bone health. When kidneys are damaged, these functions are impaired.

Kidney damage can occur for a variety of reasons and may develop quickly (acute renal failure) or slowly. By definition, chronic kidney disease (CKD) is kidney damage for 3 months or longer, regardless of the cause of kidney damage. CKD typically evolves over a long period of time and patients may not have symptoms until significant, possibly irreversible, damage has been done. Complications can develop from kidneys that do not function properly, such as high blood pressure, anemia, and weak bones.

When CKD progresses, it may lead to kidney failure, which requires artificial means to perform kidney functions (that is, dialysis) or a kidney transplant to maintain life. There are tests to help detect kidney disease. Currently, the most important measurement of kidney function is called glomerular filtration rate (GFR) and is a measure of how quickly blood is filtered through the kidney's filter, which is called the glomeruli.

Patients can be classified into 5 stages based on their GFR, with Stage 1 having kidney damage with normal or increased GFR to stage 5 with kidney failure, also called end-stage renal disease (ESRD). Once patients with CKD are identified, treatment is available to help prevent complications of decreased kidney function, slow the progression of kidney disease, and reduce the risk of other diseases such as heart disease.

While predicting the timing of progression from stage IV CKD to kidney failure is difficult due to the lack of data, anticipatory objective information for the stage IV CKD patient is critical for management of comorbidities, prevention of uremic complications, and informed decision-making about renal replacement options and their respective benefits and risks. Collins notes from United States Renal Data System (USRDS) data from 2007 that "despite the large number of patients with varying stages of CKD, only approximately 100,000 reach end-stage renal disease (ESRD) annually in the

United States." ⁶ CKD primarily affects the elderly and commonly coexists with other chronic diseases including hypertension, diabetes, and cardiovascular disease. Consequently, the risk of mortality and morbidity are increased substantially with advancing CKD stages.

Individuals with CKD may benefit from educational interventions due to the large amount of medical information that could affect patient outcomes including the increasing emphasis on self-care and patients' desire for informed, autonomous decision-making. There is evidence that many pre-dialysis patients lack knowledge about their condition and may develop a sense of despair regarding their condition. Predialysis education can help patients achieve better understanding of their illness, dialysis modality options, and may help delay the need for dialysis. Education interventions should be patient-centered, encourage collaboration, offer support to the patient, and be delivered consistently.

b. Statutory Authority

Section 152(b) of the MIPPA amended section 1861(s)(2) of the Act by adding a new subparagraph (EE) "kidney disease education services" as a Medicare-covered benefit under Part B. This new benefit is available for Medicare beneficiaries diagnosed with Stage IV CKD, who in accordance with accepted clinical guidelines identified by the Secretary, will require dialysis or a kidney transplant. KDE services will be designed to provide comprehensive information regarding:

• The management of comorbidities, including delaying the need for dialysis;

• Prevention of uremic

complications:

• Options for renal replacement therapy (including hemodialysis and peritoneal dialysis, at home and incenter, as well as vascular access options and transplantation);

• Ensuring that the beneficiary has the opportunity to actively participate in his or her choice of therapy; and

• Tailored to meet the needs of the beneficiary involved.

c. Public Meetings

Section 1861(ggg)(3), as added by section 152(b) of the MIPPA, requires that the Secretary set standards for the content of the KDE services after consulting with various stakeholders, who to the extent possible, had not

received industry funding from a drug or biological manufacturer or dialysis facility. On November 6, 2008, and December 16, 2008, we held two feedback sessions to solicit stakeholder comments regarding the implementation of section 152(b) of the MIPPA. Both feedback sessions were open to the public. In addition to the feedback sessions, we conducted an internal review of the available medical evidence, literature, and currently available CKD patient education programs. Transcripts from both events are available on the CMS Web site at http://www.cms.hhs.gov/ CoverageGenInfo/ 08 CKD.asp#TopOfPage.

(1) The November 6, 2008 Feedback Session

The first feedback session was conducted as a Special Open Door Forum (ODF) at the CMS Headquarters on November 6, 2008. Approximately 200 people, representing approximately 70 organizations, participated via teleconference.

The majority of stakeholders cited the National Kidney Foundation Disease Outcomes Quality Initiative (NKF KDOQI) guidelines that define Stage IV CKD as a GFR measurement of 15-29 ml/min/1.73m2, for purposes of classification and evaluation of CKD. Stakeholders recommended a variety of modalities for providing education services. One-on-one sessions between the educator and the patient were recommended to facilitate comprehension of the information. Stakeholders indicated that diagnoses of CKD can be devastating for some patients and patient outbursts, crying, and other disruptions can derail the educational process for large groups. Since all patients do not have the same learning styles or need for information, one stakeholder recommended that each individual be assessed by the treating physician or nonphysician practitioner (NPP) under the supervision of the treating physician for their learning needs and style preferences before or upon referral for KDE services.

Some stakeholders suggested that group education sessions would be appropriate and beneficial for patients, but did not comment specifically on the applicability to the Medicare population. Stakeholders reported that within existing programs, patients were going through a shared experience and group sessions helped facilitate discussion. Other stakeholders recommended that initial education sessions be performed in a group setting, with one-on-one follow-up sessions. We received recommendations

⁶Collins AJ, et al. "Who Should be Targeted for CKD Screening? Impact of Diabetes, Hypertension, and Cardiovascular Disease." American Journal of Kidney Diseases, Vol 53, No 3, Suppl 3 (March), 2009: pg. S71.

regarding session length from 15 minutes to 2 hours, or as long as deemed necessary by the educator or the patient.

Some stakeholders recommended against using the Web or telemedicine since these modalities may not be appropriate or facilitate effective comprehension of material in older adults. Other stakeholders indicated that we needed to keep in mind that a patient's uremia may impair comprehension of the materials, that these patients are sick, and that the elderly often need to have information provided in a simplistic, repetitive manner.

Regarding the clinically appropriate topics and content standards for KDE services, various stakeholders indicated that the following information should be included in the curriculum:

- Basic overview of kidney functions and CKD pathophysiology.
- Survival rates based on choice of treatment or if the patient declines treatment
- Quality of life and psychosocial adjustments.
- Structured, unbiased, uniform information about all renal replacement modalities, with no appropriateness assumptions presented by the educator.
 - The right to decline treatment.
 - Evidence-based content.
- Prolonging remaining kidney function.
- Patient participation in management of kidney disease.
 - Sexuality and fertility issues.
 - Transplant options.
 - Smoking cessation.
 - Medication compliance.
- Financial support and insurance coverage.
 - Diet and exercise.
 - Vocational rehabilitation.
- Treatment and management of comorbidities.
- (2) The December 16, 2008 Feedback Session

On December 16, 2008, the second feedback session was hosted at the Agency for Healthcare Research and Quality (AHRQ). Approximately 60 people representing approximately 40 organizations participated. In preparing for this meeting, we researched and developed a list of approximately 30 experts and educators that are currently providing kidney disease education to individuals or treating patients with CKD, only 10 of which were able to participate. To accommodate those stakeholders that were unable to attend the AHRQ stakeholders meeting, we accepted additional feedback at the following e-mail address: CKDEducation@cms.hhs.gov.

We asked each meeting attendee to fill out a disclosure statement that described any industry funding he or she had received from a drug/biological manufacturer or dialysis facilities, since the MIPPA requested that we consult with various stakeholders, to the extent possible, that had not received such industry funding. The majority of the meeting participants or the organizations represented had received industry funding with few exceptions.

When asked about the accepted clinical criteria for classifying someone with Stage IV CKD, most stakeholders stated that Stage IV CKD is best defined as an individual with an estimated GFR of between 15 and 29 or 30 ml/min/ 1.73m2. One stakeholder suggested that to decrease variability between creatinine methodologies, they recommended using a laboratory that traces its serum creatinine technique to IDMS (Isotope dilution mass spectrometry reference measurement procedure). This stakeholder also indicated that the MDRD (modification of diet in renal disease) study equation has been slightly modified to account for labs that are traceable to IDMS.

We asked the stakeholders to report on the different modalities of education that would be appropriate for kidney disease patient education. One stakeholder indicated that considerations need to be made regarding the educational needs of different communities and cultures. Several stakeholders indicated that faceto-face or group sessions are the preferred modalities for providing education services. One stakeholder indicated that groups larger than 20 may make it harder for all participants to ask questions. Stakeholders recommended that we allow flexibility to balance the needs of individual CKD patients that have varying degrees of need for information and education. Several stakeholders indicated that curriculum content should include information regarding all renal replacement therapy options (including no treatment), vascular access options, available support services, and management of co-morbidities including diabetes, blood pressure management, bone disease, and mineral metabolism.

Stakeholders recommended numerous frequency and duration combinations. One stakeholder recommended a variety of combinations of six 1-hour classroom group sessions including one session per week (over a 6-week period); six sessions over a weekend (3 sessions on Saturday; 3 sessions on Sunday); or all 6 sessions on 1 day during a weekend. This stakeholder also recommended that sessions should be standardized so that

an individual can take sessions when they are offered to meet their scheduling needs. Stakeholders recommended sessions that lasted between 15 minutes and 2.5 hours. One stakeholder indicated that pre- and post-assessments should be included as part of the education programs.

When asked what factors in existing education programs have led to the best patient outcomes, we received a variety of responses such as varying the training format, providing information repetitively, and presenting information at the appropriate reading level for the audience. Stakeholders recommended that all aspects of the education services be provided in an objective and neutral manner, not skewing the information toward one or more renal replacement therapy modalities.

d. Implementation

Consistent with section 1861(ggg) of the Act, we are proposing to amend 42 CFR part 410 to add new § 410.48 for KDE services as a Medicare Part B benefit.

(1) Definitions (proposed § 410.48(a))

As related to the implementation of section 1861(ggg) of the Act, we are proposing the following definitions in § 410.48:

 Kidney Disease Patient Education Services: Consistent with section 1861(ggg)(1) of the Act, we are proposing to define Kidney Disease Patient Education Services as face-toface educational services provided to patients with Stage IV CKD. We are proposing that the services be provided in a face-to-face manner based on stakeholder feedback received during the consultation meetings and our general rulemaking authority. Face-toface education is consistent with sections 1861(ggg)(C)(ii) and (iii) of the Act, which provide that the services should be designed to ensure that the beneficiary has the opportunity to actively participate in the choice of therapy, and that the services be designed to be tailored to meet the needs of the beneficiary involved.

Some stakeholders recommended that sessions be conducted face-to-face due to varying patient literacy levels. Other stakeholders recommended against using Web-based education resources since the elderly may not be as comfortable with or lack access to the Internet. In light of these considerations, we believe that face-to-face education services are the most appropriate means for providing these services.

• Physician: For purposes of KDE services, a physician will be defined using the definition in section 1861(r)(1)

of the Act; it defines "physician" as "a doctor of medicine or osteopathy legally authorized to practice medicine and surgery by the State in which he or she performs such function or action (including a physician within the meaning of section 1101(a)(7) [of the Act]."

 Qualified Person: Consistent with section 1861(ggg)(2)(A) of the Act, for purposes of KDE services, we are proposing to define a "qualified person" as a physician (as defined in section 1861(r)(1) of the Act); a physician assistant, nurse practitioner, or clinical nurse specialist (as defined in section 1861(aa)(5) of the Act, and implemented in § 410.74, § 410.75, and § 410.76 of this subpart). A provider of services located in a rural area is also included in the statute's definition of a qualified person. Section 1861(u) of the Act defines "provider of services" to be "a hospital, critical access hospital, skilled nursing facility, comprehensive outpatient rehabilitation facility, home health agency, hospice program or, for purposes of sections 1814(g) and section 1835(e) [of the Act], a fund". We are proposing to define a "qualified person" to include a provider of services located in a rural area and would include each of these healthcare entities except for a "fund."

We do not believe that it would be appropriate to recognize a fund described by sections 1814(g) and 1835(e) of the Act as a "qualified person". These funds are defined as providers of services only for the limited purpose of paying for the services of faculty physicians when they furnish certain services under the authority of sections 1814(g) and 1835(e) of the Act. These funds are not licensed as hospitals; they do not bill Medicare and do not receive payment. Moreover, these funds do not comply with Medicare conditions of participation and do not have provider agreements with Medicare. Because we do not believe that it would be appropriate to include "funds" in the definition of a "qualified person" for purposes of the KDE benefit, we are proposing to exclude funds described by sections 1814(g) and section 1835(e) of the Act from our definition of a provider of services located in a rural area as defined in section 1886(d)(2)(D) of the

In order for a provider of services to be a "qualified person," the entity must be located in a rural area. We are proposing to include in the definition of a "qualified person", only those hospitals, critical access hospitals (CAHs), skilled nursing facilities (SNFs), comprehensive outpatient rehabilitation

facilities (CORFs), home health agencies (HHAs), and hospice programs that are located in a rural area under section 1886(d)(2)(D) of the Act (as defined in our regulations at § 412.64(b)(ii)(C)) and to include hospitals and CAHs that are reclassified from urban to rural status pursuant to section 1886(d)(8)(E) of the Act, as defined in § 412.103. Specifically, § 412.64(b)(ii)(C) defines "rural" to mean any area outside an urban area, which § 412.64(b)(ii)(A) defines as a metropolitan statistical area (MSA) as defined by the President's Office of Management and Budget (OMB). Therefore, we believe that a hospital, CAH, SNF, CORF, HHA, or hospice program that is not physically located in an MSA should be considered "rural" for this benefit.

Section 1886(d)(8)(E) of the Act, implemented in § 412.103, requires us to treat hospitals that meet specified criteria as geographically rural under section 1886(d)(2)(D) of the Act even though they are physically located in an MSA. Because the statute identifies these hospitals as rural, we believe that it is appropriate to consider these hospitals a qualified person for purposes of the KDE benefit. The Conditions of Participation for CAHs in § 485.610 also include a provision to allow a hospital located in an urban area to reclassify as rural for purposes of becoming a CAH through section 1886(d)(8)(E) of the Act, as defined in § 412.103. Because a hospital or CAH specified under section 1886(d)(8)(E) of the Act is treated as being located in a rural area under section 1886(d)(2)(D) of the Act, we are proposing to recognize those hospitals or CAHs as a "qualified person" for purposes of the KDE benefit.

- Renal Dialysis Facility: The Congress has provided in section 1861(ggg)(2)(B) of the Act that a "renal dialysis facility" may not be a "qualified person." We are defining this term, consistent with § 405.2102 of this title, as "a unit which is approved to furnish dialysis service(s) directly to ESRD patients."
- Stage IV Chronic Kidney Disease:
 Section 1861(ggg)(1)(A) of the Act states that KDE services shall be furnished to beneficiaries diagnosed with Stage IV CKD, who according to accepted clinical guidelines identified by the Secretary, will require dialysis or a kidney transplant. Based on stakeholder feedback, we are proposing to define Stage IV CKD as kidney damage with a severe decrease in GFR quantitatively defined by a GFR value of 15–29 ml/min/1.73 m², using the Modification of Diet in Renal Disease (MDRD) Study

formula. Because there are currently no agreed upon accepted clinical guidelines that describe the stage IV patients who would eventually require dialysis or a kidney transplant, we are proposing to cover all stage IV patients.

During both the November 6, 2008, and the December 16, 2008 feedback sessions, the majority of stakeholders indicated that Stage IV CKD is currently determined as kidney damage with a severe decrease in the estimated GFR value (15 to 29 mL/min/1.73 m²). While there appeared to be agreement among the stakeholders regarding the estimated GFR values for the diagnosis of Stage IV CKD, some stakeholders indicated that only using the estimated GFR value to determine the severity of a beneficiary's CKD may be insufficient. To decrease variability between creatinine methodologies, stakeholders recommended using a laboratory that traces its serum creatinine technique to IDMS and that the MDRD study equation has been slightly modified to account for labs that are traceable to IDMS.

(2) Covered Beneficiaries (Proposed § 410.48(b))

Consistent with section 1861(ggg)(1)(A) of the Act, we are proposing that KDE services be furnished to beneficiaries with Stage IV CKD based on the definition of Stage IV CKD defined in proposed § 410.48(a), and have been referred for such services by the physician managing the beneficiary's kidney condition.

(3) Standards for Qualified Persons and Exclusions (Proposed § 410.48(c))

We are proposing to require that a qualified person be able to properly receive Medicare payment under 42 CFR part 424 (Conditions for Medicare Payment). In § 410.48(c), we are proposing to establish exclusions from the term "qualified person." Consistent with section 1861(ggg)(2)(B) of the Act, we specifically exclude a hospital, CAH, SNF, CORF, HHA, or hospice that is physically located outside of a rural area under § 412.64(b)(ii)(C), except for a hospital or CAH that is treated as being located in a rural area under § 412.103. In addition, consistent with section 1861(ggg)(2)(B) of the Act, a renal dialysis facility is not a qualified person.

While we are not proposing specific education, experience, training, and/or certification requirements at this time,

⁷Levey, A.S., Greene, T., Kusek, J., and Beck, G.A. J Am Soc Nephrol. 2000. 11: p. 155A.; Levey, A.S., Bosch, J.P., Lewis, J.B., Greene, T., Rogers, N., and Roth, D. Ann Intern Med. 1999 Mar 16; 130(6):461–70.

we are specifically seeking public comments on the appropriate level of education, experience, training, and/or certification appropriate for a qualified person to effectively provide KDE services and may provide such provisions in the final issuance of this rule or in future rulemaking. Factors to consider include specific education and expertise regarding the topic and ability to explain these areas for the purpose of patient education:

- General kidney physiology and test results that would be associated with CKD.
- Psychological impact of the disease on the beneficiary, and impact on family, social life, work, and finances.
- The management of comorbidities (such as cardiovascular disease, diabetes, hypertension, anemia, bone disease, and impairments in functioning) common in persons diagnosed with CKD.
- Renal replacement therapeutic options, treatment modalities and settings, and advantages and disadvantages of each treatment option.
- Diet, fluid restrictions, and medication usage to include side effects and informed decisionmaking.
- Encouragement of patient active participation in decisionmaking and the ability to tailor educational needs to the individual beneficiary.
- Other areas of health deemed important to patients with CKD.
- (4) Standards for Content of Kidney Disease Patient Education Services (Proposed § 410.48(d))

We believe that patient education needs vary by severity of the disease, the age of the patient, the patient's comorbid conditions and disabilities, the patient's primary language and culture, and desire to learn more about the disease and treatment options. Education services are more effective if the services are tailored to meet an individual beneficiary's needs. We are proposing that KDE services include the content as specified in proposed § 410.48(d). According to an article by Paula Ormandy 8 in the Journal of Renal Care, patients are most interested in receiving information on the following topics, which was echoed by many stakeholders during the feedback sessions.

- Basic information regarding CKD, how the kidneys work, what happens when the kidneys fail, and the permanence of the disease.
- Survival rates with and without renal replacement therapy and survival

- rates if the patient refused treatment for their CKD.
- The need for kidney transplantation.
- Ûnbiased information about renal replacement therapy (RRT) options including advantages and disadvantages for all modalities.
- Adequate information regarding why some RRT options were not viable for a patient.
- How different RRT options affected the patient's co-morbid conditions.
- Effect of RRT choices on lifestyle, such as treatment flexibility and treatment session length.
- Whether a patient will need assistance based on RRT modality choice and training requirements for helpers.
 - The right to refuse treatment.
- Effects of the disease, and the subsequent treatment, on the patient's physical appearance.
- Patient recognition of the symptoms that would empower the patient with the knowledge to seek help.
- Disease and treatment complications related to renal replacement therapy such as hypertension, catheter migration, temporary/permanent loss of dialysis access, and risk of infection at the access sight.
- How to control and manage consequences of complications and symptoms (for example: treatment for itchy skin or insomnia).
- The ability to travel and organize holidays depending on RRT choice.
- Maintenance of social relationships, activities, and commitments.
- How the disease and RRT may affect the patient's ability to continue working.
 - Available support services.
- Medication management, including side effects and risks related to non-compliance to prescribed medication regimen.
- (5) Session Specifications (Proposed § 410.48(e))
- (a) Limitations on the number of sessions: Consistent with section 1861(ggg)(4) of the Act, we will limit the number of KDE sessions to six (6).
- (b) Session Length: In the absence of supporting evidence for session length, we are proposing to define the session length as 60 minutes which coincides with the session length of some programs in existence and is the approximate average of stakeholder suggested session lengths.

(c) Individual and Group Session Format: Consistent with section 1861(ggg)(C)(iii) of the Act, we are proposing that the qualified person

tailor the design of the education services to meet the needs of the beneficiary based on whether the beneficiary needs more individualized education, would benefit more from a group environment, or a combination; and consider any communication accessibility needs based on disability, language and health literacy.

During the feedback sessions, we received a variety of recommendations regarding how education services should be provided, including a combination of group sessions, one-onone sessions, and multi-media presentations. Stakeholders recommended that one-on-one sessions, between the beneficiary and the educator, facilitated quicker comprehension of the education materials than group sessions, and provided the best opportunity to tailor the sessions to meet the patient's needs. Other stakeholders indicated that group sessions provide patients with the benefit of responses to questions posed by different group participants.

Medical services, generally speaking, are provided to beneficiaries on an individual basis. Beneficiaries can also benefit from the interaction in a group setting. We believe that the beneficiary, in consultation with the referring physician, will be able to best determine the education services modality that most effectively meets his or her needs.

(6) Outcomes Assessment

The intent of the education services is for the beneficiary to take the information he or she has learned during the educational sessions in order to facilitate active participation by the beneficiary in the healthcare decisionmaking process with the physician managing his or her kidney condition. We believe that it is important that beneficiaries be assessed at the conclusion of the education sessions and are proposing that program assessments be used by the educators and CMS to assess the effectiveness of the education services, to help improve the programs for future participants, and better facilitate patient understanding of the material.

During the AHRQ stakeholders meeting, various stakeholders indicated that it was important to monitor the effectiveness of the education services to improve the content and delivery of KDE services. Assessing the effectiveness of the KDE services through assessments can be an effective way of measuring how beneficiary needs are being met. Some existing education programs have pre- and posteducation session assessments and are usually administered immediately

⁸ Ormandy, P., "Information Topics Important to Chronic Kidney Disease Patients: A Systematic Review." *Journal of Renal Care* 34(1), 19–27, 2008.

following the conclusion of the education sessions.

We are proposing, based on stakeholder feedback and our general rulemaking authority, that qualified persons develop outcomes assessments and that each beneficiary be assessed during one of the education sessions. We are proposing that the outcomes assessment measure beneficiary knowledge about CKD and its treatment for the purpose, and as a contributor to, the beneficiary's ability to make informed decisions regarding their healthcare and treatment options.

According to an article by Gerald Devins in the Journal of Clinical Epidemiology, an outcomes assessment or test should be able to "measure the adaptive value of ESRD-related knowledge as a contributor to psychosocial and physical well-being, * * * reliably and validly assess patient knowledge about ESRD and its treatment," * * * "be easy to administer and score," and * * * "require only basic reading skills." 9

After completing the KDE services, the beneficiary should be able to take the information learned and use it to make informed choices about their healthcare during future consultations with the physician managing the beneficiary's kidney condition. It is important that the assessments be tailored to the beneficiary's reading level and language if the assessment is not administered by the qualified person that provided the education services, and be made available to CMS in a summarized format upon request.

We are specifically seeking public comments regarding the development and administration of the outcomes assessments. Factors to consider include:

- Specific topics that should be included as part of the assessment;
- Whether standardization of the outcomes assessment is feasible and/or should be considered;
- The applicability of any standardized assessments that may currently be in existence;
- The feasibility of providing both pre- and post-education assessments;
- Methods for collecting assessments and disseminating best practices for KDE services.
- e. Payment for KDE Services

Section 152(b) of the MIPPA creates a new benefit category for KDE services.

The MIPPA amends section 1848(j)(3) of the Act, which allows for payment of KDE services under the PFS. KDE services are covered when they are furnished by a qualified person as defined in proposed § 410.48(a) and that meets the requirements of proposed § 410.48(c). We note that there is a possibility that a beneficiary may receive services from more than one "qualified person"; however, payment should be made to only one qualified person on the same day for the same beneficiary.

The "incident to" requirements for physician services at section 1861(s)(2)(A) of the Act do not apply to KDE services because the MIPPA requirements are explicit, in that the education services must be provided by a qualified person, which is defined as a physician, nurse practitioner, clinical nurse specialist or physician assistant, and also includes a provider of services located in a rural area. In the past, we have taken the position that the "incident to" provision does not apply to the implementation of a new service with a distinct benefit category under the PFS. Therefore, the "incident to" requirements will not apply to KDE services.

Rural health clinics (RHCs) do not meet the statutory definition of a provider of services (as defined in 1861(u) of the Act) and cannot be separately paid for furnishing KDE services.

Section 1861(ggg)(4) of the Act limits the number of KDE services that a beneficiary may receive to six sessions. We are proposing to create two HCPCS codes, GXX26 (individual) and GXX27 (group), to describe and to bill for KDE services. The two G-codes consist of 1hour face-to-face KDE services for an individual or group. We are proposing to pay both GXX26 and GXX27 at the nonfacility rate. We are also proposing that GXX26 educational services related to the care of chronic kidney disease; individual per session will be crosswalked to CPT code 97802; and that GXX27, educational services related to the care of chronic kidney disease; group, per session will be crosswalked to CPT code 97804. The rationale for the proposed pricing of the G-codes is based on the similarity of this service to medical nutrition therapy in the individual (97802) and group (97804)

In the CY 2010 OPPS/ASC proposed rule, we discuss our proposed payment for KDE to qualified persons who are hospitals, CAHs, SNFs, CORFs, HHAs, or hospices. Commenters should submit specific comments on our payment proposal for this benefit, including the

method and amount of payment, for qualified hospitals, CAHs, SNFs, CORFs, HHAs, or hospices in response to the CY 2010 OPPS/ASC proposed rule. We will discuss our final payment policy for these qualified providers in the CY 2010 OPPS/ASC Final Rule.

f. Effective Date

Medicare Part B coverage of outpatient kidney disease patient education services will be effective for services furnished on or after January 1, 2010.

11. Section 153: Renal Dialysis Provisions

Section 153 of the MIPPA requires changes to ESRD facilities for ESRD services effective January 1, 2010. The following is a summary of these changes.

Section 153(a)(1) of the MIPPA increases the current ESRD composite rate by 1.0 percent for services furnished on or after January 1, 2010. This also requires us to update the adjusted drug add-on. Since we compute the drug add-on adjustment as a percentage of the composite rate, the drug add-on percentage is decreased to account for the higher CY 2010 composite payment rate and results in a 15.0 percent drug add-on adjustment for CY 2010. As a result, the drug add-on amount of \$20.33 per treatment remains the same for CY 2010, which results in a 15.0 percent increase to the base composite payment rate of \$135.15. (See section II.I.6. of this proposed rule for further discussion.)

The composite rate paid to hospital-based facilities will be the same as the composite rate paid to independent renal dialysis facilities for services furnished on or after January 1, 2010. In addition, section 153(a)(2) of the MIPPA requires that in applying the geographic index to hospital-based facilities, the labor share shall be based on the labor share otherwise applied for renal dialysis facilities.

These MIPPA provisions are selfimplementing and require no substantive exercise of discretion on the part of the Secretary. A detailed discussion of the MIPPA provisions can be found in section III. of the CY 2009 PFS final rule with comment period (73 FR 69881).

12. Section 182(b): Revision of Definition of Medically-Accepted Indication for Drugs; Compendia for Determination of Medically-Accepted Indications for Off-Label Uses of Drugs and Biologicals in an Anti-cancer Chemotherapeutic Regimen

a. Background

(1) Process for Revising the List of Statutorily Named Compendia

Generally, compendia are "pharmacopeia providing information on drugs, their effectiveness, safety, toxicity, and dosing—are frequently used to determine whether a medication has a role in the treatment of a particular disease; these roles include both therapeutic uses approved by the U.S. Food and Drug Administration (FDA) and off-label indications" (Agency of Healthcare Research and Quality (AHRQ), Potential Conflict of Interest in the Production of Drug Compendia White Paper). 10 Compendia are published by various institutions and by traditional reference book publishing houses.

Section 1861(t)(2)(B)(ii)(I) of the Act lists the following compendia as authoritative sources for use in the determination of a "medically-accepted indication" of drugs and biologicals used off-label in an anticancer chemotherapeutic regimen: American Medical Association Drug Evaluations (AMA–DE); United States Pharmacopoeia-Drug Information (USP-DI) or its successor publication; and American Hospital Formulary Service-Drug Information (AHFS–DI). Due to changes in the pharmaceutical reference industry, AHFS-DI is the only statutorily-named compendium that is

In addition to these compendia, the statute provides an alternative method for identifying medically-accepted offlabel uses of drugs and biologicals in an anti-cancer chemotherapeutic regimen. Section 1861(t)(2)(B)(ii)(II) of the Act provides that local contractors may use supportive clinical evidence in peerreviewed medical literature" to make such determinations. Thus these medically-accepted uses could be identified even if there were no compendia recognized for this purpose. We discussed this in our response to comments in the CY 2008 PFS final rule with comment period (72 FR 66305).

currently in publication.

Section 1861(t)(2)(B) of the Act provides the Secretary the authority to

revise the list of compendia in section 1861(t)(2)(B)(ii)(I) for determining medically-accepted indications for offlabel use of drugs and biologicals in an anti-cancer chemotherapeutic regimen. Consequently, in § 414.930, we established an annual process to revise the list and establish a definition of "compendium" in the CY 2008 PFS final rule with comment period (72 FR 66222, 66303 through 66306, and 66404).

On March 30, 2006, the Medicare Evidence Development and Coverage Advisory Committee or MEDCAC (formerly the Medicare Coverage Advisory Committee (MCAC)) met in public session to advise CMS on the appropriate criteria for the recognition of compendia for the identification of medically-accepted indications of drugs and biologicals used in an anti-cancer therapy, and the degree to which the then listed and other available compendia displayed those criteria. The evidence the MEDCAC considered to derive its recommendations included a presentation of the technology assessment (TA) performed for AHRQ by staff of the Tufts-New England Medical Center (Tufts-NEMC) and Duke **Evidence-based Practices Centers** (EPCs), scheduled stakeholder presentations, as well as testimony from members of the public. As is customary, the MEDCAC panelists elicited additional information from the presenters and discussed the evidence in preparation for a formal vote. The MEDCAC recommended that the following criteria, referred to as "desirable characteristics," should be used to recognize compendia for identification of medically-accepted indications of drugs and biologicals in anti-cancer therapy:

- Extensive breadth of listings.
- Quick processing from application for inclusion to listing.
- Detailed description of the evidence reviewed for every individual listing.
- Use of pre-specified published criteria for weighing evidence.
- Use of prescribed published process for making recommendations.
- Publicly transparent process for evaluating therapies.
- Explicit "Not recommended" listing when validated evidence is appropriate.
- Explicit listing and recommendations regarding therapies, including sequential use or combination in relation to other therapies.
- Explicit "Equivocal" listing when validated evidence is equivocal.
- Process for public identification and notification of potential conflicts of interests of the compendia's parent and sibling organizations, reviewers, and

committee members, with an established procedure to manage recognized conflicts.

We incorporated the MEDCAC recommended desirable characteristics into the compendia review process. All information on this MEDCAC meeting can be found on the CMS Web site at http://www.cms.hhs.gov/mcd/viewmcac.asp?where=index&mid=33.

Although we did not rank these ten MEDCAC desirable characteristics, the MEDCAC desirable characteristics that addressed transparency and conflict of interest of compendia were considered to be of high priority (72 FR 66304 through 66305). In addition, we considered the need to enhance transparency in the compendia review process to preserve the integrity of the review process (72 FR 66222, 66303 through 66306, and 66404).

During the 2008 compendium review cycle, we considered requests regarding the following five compendia: The AMA–DE Compendium; National Comprehensive Cancer Network Drugs and Biologics (NCCN) Compendium; Thomson Micromedex DrugDex Compendium; Thomson Micromedex DrugPoints Compendium; and Clinical Pharmacology Compendium. Our decisions are posted on the CMS Web site at http://www.cms.hhs.gov/CoverageGenInfo/02_compendia.asp#TopOfPage. In

02_compendia.asp#TopOfPage. In summary, we issued the following decisions regarding those compendia requests:

- NCCN was added to the list of compendia.
- Thomson Micromedex DrugDex was added to the list of compendia.
- Clinical Pharmacology was added to the list of compendia.
- Thomson Micromedex DrugPoints was not added to the list of compendia.
- AMA–DE was removed from the list of compendia.

(2) MIPPA Requirement for Compendia

Section 182(b) of the MIPPA amended section 1861(t)(2)(B) of the Act (42 U.S.C. 1395x(t)(2)(B)) by adding the sentence, "On and after January 1, 2010, no compendia may be included on the list of compendia under this subparagraph unless the compendia has a publicly transparent process for evaluating therapies and for identifying potential conflicts of interests." There is a growing body of literature, including that from the Institute of Medicine (IOM), 11 that discusses the conflict of interest between research funding and

¹⁰ Agency for Healthcare Research and Quality. White Paper: Potential Conflict of Interest in the Production of Drug Compendia. (2009, April 27). Available online at http://www.cms.hhs.gov/mcd/viewtechassess.asp?from2=viewtechassess.asp&where=index&tid=64.

¹¹Institute of Medicine. Conflict of Interest in Medical Research, Education, and Practice. Available online at http://www.nap.edu/ catalog.php?record_id=12598.

research results. Some authors have stated that there is a conflict of interest if an entity has a financial, legal, or political interest that is counterproductive to the performance of their legal or ethical responsibilities. 12 Although this widely discussed correlation depicts a classic representation of a financial conflict of interest, we believe nonfinancial conflicts of interests also deserve attention. Nonfinancial conflicts of interests have the potential to interfere with honest reporting, transparency and fair review of applications submitted to compendia publishers.¹³ Therefore, in light of such concerns, the existence of financial and nonfinancial conflicts of interests would threaten the impartiality of the recommendations made in the compendia. We believe that section 182(b) of the MIPPA, "Revision of definition of medically-accepted indication for drugs * * * Conflict of Interest" is designed, in part, to address this issue in the compendia review

(3) Proposed Revisions of Compendia Standards

We believe that the implementation of this statutory provision that compendia have a "publicly transparent process for evaluating therapies and for identifying potential conflicts of interests" is best accomplished by amending the current definition of a compendium at § 414.930(a) to include the MIPPA requirements and by defining the key components of publicly transparent processes for evaluating therapies and for identifying potential conflicts of interests. In order to implement the MIPPA requirements concerning a publicly transparent process for evaluating therapies, we propose that a compendium could meet this standard by publishing materials used in its evaluation process on its Web site. This mode of publication provides broad contemporaneous public access to relevant materials. We believe that public access to such materials will increase transparency of the process used by compendia publishers for evaluating therapies and facilitate independent review of recommendations by interested parties. In addition, as discussed in the CY 2008 PFS final rule with comment period (72) FR 66305 through 66306), such

disclosure may assist beneficiaries and their physicians in choosing among treatment options.

As expressed in the February 14, 2008 letter from the U.S. Senate Committee on Finance to the CMS Acting Administrator Kerry Weems, "conflicts of interest have been proven in peerreviewed studies to have a significant impact on scientific outcomes and medical care." 14 Since compendia recommendations are generally dependent on evidence from peerreviewed studies, we believe that conflicts of interests may arise from relationships between individuals who substantively participate, such as individuals who contribute more than a clerical role, in the development of compendia recommendations and the applicants (for example, the manufacturer or seller of the drug or biological being reviewed by the compendium) for the inclusion of drug or biological recommendations in compendia. These relationships may involve, for example, publishers of compendia and peer-reviewed journals, their editorial or advisory boards, drug manufacturers, physicians or providers that derive income from the prescribing or administration of drugs, researchers that have a personal or academic interest in the drug study, or others who may provide incentives to influence the prescribing behaviors of physicians. 15 As illustrated in the AHRQ Potential Conflict of Interest in the Production of Drug Compendia White Paper, these potential financial and nonfinancial conflicts exist at the various stages of the evaluation process. The White Paper also describes compendia publication users (for example, the public, physicians, other caregivers, and public/ private insurers) and the objectives of each user when referencing the compendia. Therefore, these potential financial and nonfinancial conflicts may be problematic for users of the compendia to rely on the validity of the compendia recommendations.16

Section 182(b) of the MIPPA requires a publicly transparent process for: (1) Evaluating therapies, and (2) identifying potential conflicts of interests. In light

of these provisions, we are proposing regulatory safeguards to require that the publicly transparent process for evaluating therapies and identifying potential conflicts of interests include disclosure of certain relevant information. All currently listed compendia will be required to comply with these provisions, as of January 1, 2010, to remain on the list of recognized compendia. We view compendia publishers as generally responsible for the integrity of their publications. Therefore, we urge currently listed compendia publishers to submit evidence demonstrating compliance with the MIPPA provisions that "no compendia may be included on the list of compendia" unless the compendium has a publicly transparent process for therapy evaluation and conflict of interest identification to CMS no later than December 31, 2009. In addition, any compendium that is the subject of a future request for inclusion on the list of recognized compendia will be required to comply with these provisions. We believe that the statute is clear that no compendium can be on the list if it does not fully meet the standard described in section 1861(t)(2)(B) of the Act, as revised by section 182(b) of the MIPPA.

b. Revisions to § 414.930, "Compendia for Determination of Medically-Accepted Indications for Off-Label Uses of Drugs and Biologicals in an Anti-Cancer Chemotherapeutic Regimen"

We are proposing the following amendments to § 414.930(a):

- To revise the definition of "compendium" by adding an additional requirement that a compendium have a publicly transparent process for evaluating therapies and for identifying potential conflicts of interests.
- To add the definition of "publicly transparent process" for evaluating therapies. We propose that assurance of a publicly transparent evaluation process is best achieved by establishing a process that provides for public disclosure of the evidence considered and the review of that evidence leading to the development of compendia recommendations.¹⁷ By providing for this disclosure, we hope to ensure validity in the use of compendia for identifying medically-accepted uses of off-label treatments for purposed of section 1861(t)(2)(B) of the Act. Thus, we believe that in the interest of providing a publicly transparent process

for evaluating therapies and maximizing that transparency, a compendium should publish the complete application for inclusion, exclusion, or deletion of a therapy including criteria used to evaluate the request, on its Web site. We believe that in accordance with that publicly transparent process, a compendium should similarly publish the names of the individuals who have substantively participated in the development of compendia recommendations, along with transcripts of meetings and records of votes. This provides an opportunity for the public to consider the process used by the compendia in evaluating a specific therapy and independently reach conclusions about the adequacy of the application in light of the compendium's final recommendation. We request comments on the requirement for publication of a transcript and the suitability of other alternatives such as minutes or other documents.

 To add a definition regarding a "publicly transparent process for identifying potential conflicts of interests," and clarify the essential elements of such a process. We propose that a publicly transparent process for identifying potential conflicts of interests is best demonstrated by a process that requires public transparency regarding the competing financial and nonfinancial interests that may give rise to such conflicts. Thus, we believe that a compendium should have a process for disclosing by publication on its publicly accessible Web site, certain information regarding potential conflicts of interests associated with individuals who are responsible for the compendium's recommendations as well as their immediate family members (as defined in § 411.351). A process for providing disclosure of interests by immediate family members is necessary because such interests could represent potentially competing financial conflicts that could influence the review and individuals responsible for the compendium's recommendations.18

We believe that the process for identifying potential conflicts of interests should include information regarding ownership and investment interests of those individuals who are responsible for the compendium's recommendation. Such information should include the names of those entities with which the individual has an ownership or investment

relationship (similar to those relationships defined in § 411.354), the nature and length of the relationships, other financial relationships that may derive fron either a direct or indirect relationship (similar to thise relationships identified in 42 CFR 411.354, and the significance (for example, dollar value) of those relationships. By requiring a process for identification of such relationships, we are providing a process for the public to have access to information regarding potential conflicts of interests. We believe that information concerning the value of financial relationships is necessary because it would permit the public to assess the degree of influence that a relationship may have over an individual's decisions or judgments.19 We request comments on the suitability of this process or whether the compendia should prescribe its own process. In addition, we request comments specifically addressing whether information regarding immediate family members is necessary for conflict of interest determinations.

We note that the publishers of the four compendia that are currently recognized for this purpose have already adopted conflict of interest disclosure policies that are similar to our proposal. Though there are individual differences among the publishers, we note that these policies commonly include publication on the compendia publisher's Web site of the name of the individuals that participate in the generation of the compendia recommendation and the entity with which there is a relationship, the nature of the relationship (for example, salary, ownership, grant support), and the value of the relationship. Some include this information as it relates to family members of the individual.

Additional information with respect to the conflict of interest policies of those compendia we reviewed during the 2008 review cycle can be found on their Web sites. For the convenience of the reader we have listed below the Web sites where these policies may be found for each of the four currently recognized compendia.

- AHFS Drug Information: http://www.ahfsdruginformation.com/ off label/interest disclosure.aspx.
- Thomson Micromedex DrugDex: http://www.micromedex.com/about_us/editorial/ed_ConflictofInterest.pdf.
- Gold Standard Clinical Pharmacology: http://

www.goldstandard.com/editorial conflict.html.

• The National Comprehensive Cancer Network: http://www.nccn.org/ about/disclosure.asp?p=about.

In general, certain disclosure policies of the compendia provide for public disclosure of individuals involved in the recommendation to ensure against the appearance of potential conflicts of interests. We believe that a publicly transparent process which provides for the identification of potential conflicts of interest protects the interests of the public, as well as those individuals who participate in the compendia process.

Disclosures of conflicts of interests are triggered by the recommendation regarding the use of the drug or biological rather than by the application for the recommendation. Disclosures published in conjunction with compendia recommendation updates should remain publicly viewable for a reasonable period of time. Specifically, we believe that the disclosures remain available for a period of not less than 5 years. It is not uncommon that serious questions about the use of a drug do not arise until the drug has been used for several years. Thus the relevance of information regarding the development of compendia recommendations may not be recognized until several years after the clinical use in question. We believe that a period of 5 years is a reasonable balance between the burden of maintaining this information and the public's interest in timely access to this information. We welcome comments regarding whether or not a period of not less than 5 years is an adequate timeframe for this balance to occur.

We recognize that some individuals may participate substantively in the development of more than one recommendation. For example, an individual might participate in the review of several drugs or biologicals for a single compendia publisher. We recognize that a single relationship may present a significant conflict of interest in some cases but not others. For example, a process for disclosure by the compendium publisher would be required if an individual whose only conflicted relationship arises from significant income related to the use of a particular drug for lung cancer substantively participated in the compendia review of that drug for lung cancer or for a competitor treatment for lung cancer. If that same individual substantively participated in the compendia review of a different drug for a different disease, the compendia publisher might determine that there is no conflict of interest to disclose.

In § 414.930(b)(1), we are revising the CMS process for listing compendia for determining medically-accepted uses of drugs and biologicals in anti-cancer treatment to include consideration of a compendium's meeting of the regulatory definitions. We are also proposing to renumber the subparagraphs of § 414.930(b)(1) to accommodate this change.

Current § 414.930(b)(2) gives CMS the authority to generate an internal request to revise the list of compendia at any time.

H. Part B Drug Payment

- 1. Average Sales Price (ASP) Issues
- a. Immunosuppressive Drugs Period of Eligibility

Section 9335(c) of the Omnibus Budget Reconciliation Act of 1986 (Pub. L. 99–509) (OBRA '86) added subparagraph (J) to section 1861(s)(2) of the Act to define a benefit category for immunosuppressive drugs furnished to an individual who receives an organ transplant for which Medicare payment is made, for a period not to exceed 1 year after the transplant procedure. Coverage of these drugs under Medicare Part B began January 1, 1987.

Section 13565 of the Omnibus Budget Reconciliation Act of 1993 (Pub L. 103– 66) (OBRA '93) amended section 1861(s)(2)(J) of the Act to specify that the benefit category included immunosuppressive drugs furnished: During 1995, within 18 months after the date of the transplant procedure; during 1996, within 24 months after the date of the transplant procedure; during 1997, within 30 months after the date of the transplant procedure; and during any year after 1997, within 36 months after the date of the transplant procedure. Beginning January 1, 2000, section 227 of the Medicare, Medicaid and SCHIP Balanced Budget Refinement Act of 1999 (Pub. L. 106-113) (BBRA) extended the benefit period to eligible beneficiaries whose coverage for drugs used in immunosuppressive therapy expired during the calendar year.

Section 113 of the Medicare,
Medicaid and SCHIP Benefits
Improvement and Protection Act of
2000 (Pub. L. 106–554) (BIPA) revised
section 1861(s)(2)(J) of the Act to
eliminate the time limits for coverage of
prescription drugs used in
immunosuppressive therapy under the
Medicare program. Effective with
immunosuppressive drugs furnished to
an individual who receives an organ
transplant for which Medicare payment
is made on or after December 21, 2000,
there is no longer any time limit for
Medicare benefits. Although the

statutory benefit category no longer includes a time limit, our regulations at § 410.30(b) continue to reflect the time limits that applied previously. Therefore, we are proposing to make conforming changes to § 410.30(b) to remove the references to the time limits that applied under previous iterations of the statute. This technical change will reduce the potential for confusion about the scope of the benefit. We note that this proposal does not substantively affect Medicare coverage or benefits because it merely conforms the regulations text to the current benefit category, as specified in section 1861(s)(2)(J) of the Act. As noted above, under section 113 of the BIPA, immunosuppressive drugs have not been subject to a time limit since December 21, 2000.

b. WAMP/AMP Threshold

Section 1847A(d)(1) of the Act states that "the Inspector General of HHS shall conduct studies, which may include surveys to determine the widely available market prices (WAMP) of drugs and biologicals to which this section applies, as the Inspector General, in consultation with the Secretary, determines to be appropriate." Section 1847A(d)(2) of the Act states that, "Based upon such studies and other data for drugs and biologicals, the Inspector General shall compare the ASP under this section for drugs and biologicals with—

 The widely available market price (WAMP) for these drugs and biologicals (if any); and

• The average manufacturer price (AMP) (as determined under section 1927(k)(1) of the Act for such drugs and biologicals)."

Section 1847A(d)(3)(A) of the Act states that, "The Secretary may disregard the ASP for a drug or biological that exceeds the WAMP or the AMP for such drug or biological by the applicable threshold percentage (as defined in subparagraph (B))." The applicable threshold is specified as 5 percent for CY 2005. For CY 2006 and subsequent years, section 1847A(d)(3)(B) of the Act establishes that the applicable threshold is "the percentage applied under this subparagraph subject to such adjustment as the Secretary may specify for the WAMP or the AMP, or both." In CY 2006 through CY 2009, we specified an applicable threshold percentage of 5 percent for both the WAMP and AMP. We based this decision on the limited data available to support a change in the current threshold percentage.

For CY 2010, we propose to specify an applicable threshold percentage of 5

percent for the WAMP and the AMP. At present, the OIG is continuing its comparisons of both the WAMP and the AMP. In April 2008, we implemented a change in the weighting methodology for calculating ASP. Information on how recent changes to the calculation of the ASP may affect the comparison of ASP to WAMP or AMP is limited at this time. Since we do not have sufficient data that suggest another level is more appropriate, we believe that continuing the 5 percent applicable threshold percentage for both the WAMP and AMP is appropriate for CY 2010. Therefore, we are proposing to revise § 414.904(d)(3) to include the CY 2010 date.

As we noted in the CY 2009 PFS final rule with comment period (73 FR 69752), we understand that there are complicated operational issues associated with potential payment substitutions. We will continue to proceed cautiously in this area and provide stakeholders, including providers and manufacturers of drugs impacted by potential price substitutions with adequate notice of our intentions regarding such, including the opportunity to provide input with regard to the processes for substituting the WAMP or the AMP for the ASP. We welcome comments on our proposal to continue the applicable threshold at 5 percent for both the WAMP and AMP for CY 2010.

2. Competitive Acquisition Program (CAP) Issues

Section 303(d) of the MMA requires the implementation of a competitive acquisition program (CAP) for certain Medicare Part B drugs not paid on a cost or PPS basis. The provisions for acquiring and billing drugs under the CAP were described in the Competitive Acquisition of Outpatient Drugs and Biologicals Under Part B proposed rule (March 4, 2005, 70 FR 10746) and the interim final rule (July 6, 2005, 70 FR 39022), and certain provisions were finalized in the CY 2006 PFS final rule with comment period (70 FR 70236). The CY 2007 PFS final rule with comment period (72 FR 66260) then finalized portions of the July 6, 2005 IFC that had not already been finalized.

The CAP is an alternative to the ASP (buy and bill) methodology of obtaining certain Part B drugs used incident to physicians' services. Physicians who choose to participate in the CAP obtain drugs from vendors selected through a competitive bidding process and approved by CMS. Under the CAP, participating physicians agree to obtain all of the approximately 180 drugs on the CAP drug list from an approved CAP

vendor. The approved CAP vendor retains title to the drug until it is administered, bills Medicare for the drug, and bills the beneficiary for cost sharing amounts once the drug has been administered. The participating CAP physician bills Medicare only for administering the drug to the beneficiary. The initial implementation of the CAP operated with a single CAP drug category from July 1, 2006 to December 31, 2008.

After the CAP was implemented, section 108 of the MIEA-TRHCA made changes to the CAP payment methodology. Section 108(a)(2) of the MIEA-TRHCA requires the Secretary to establish (by program instruction or otherwise) a post payment review process (which may include the use of statistical sampling) to assure that payment is made for a drug or biological only if the drug or biological has been administered to a beneficiary. The Secretary is required to recoup, offset, or collect any overpayments. This statutory change took effect on April 1, 2007. Conforming changes were proposed in the CY 2008 PFS proposed rule (72 FR 38153) and finalized in the CY 2008 PFS final rule with comment period (72 FR 66260).

In the CY 2009 PFS proposed rule, we proposed several refinements to the CAP regarding the annual CAP payment amount update mechanism, the definition of a CAP physician, the restriction on physician transportation of CAP drugs, and the dispute resolution process (73 FR 38522). However, after the publication of the proposed rule, we announced the postponement of the CAP for 2009 due to contractual issues with the successful bidders. As a result, CAP physician election for participation in the CAP in 2009 was put on hold, and CAP drugs have not been available from an approved CAP vendor for dates of service after December 31, 2008. Physicians who participated in the CAP have transitioned back into the Average Sales Price (ASP) method of acquiring part B drugs for dates of service after December 31, 2008.

After the postponement was announced, we solicited public feedback on the CAP from participating physicians, potential vendors, and other interested parties. We solicited public comments on several issues, including, but not limited to the following: The categories of drugs provided under the CAP; the distribution of areas that are served by the CAP; and procedural changes that may increase the program's flexibility and appeal to potential vendors and participating physicians. We also hosted a CAP Open Door Forum

(ODF) on December 3, 2008, where participants had an opportunity to discuss the postponement and suggest changes to the program. We appreciate the comments that we have received.

In the CY 2009 PFS final rule with comment period, we stated that we would review the public comments and consider implementing changes to the CAP before proceeding with another bid solicitation for approved CAP vendor contracts. Based on this information, in this proposed rule, we are addressing items that were not finalized in the CY 2009 PFS final rule with comment period, and making additional proposals for the CAP. Our approach seeks to better define certain aspects of the program based on our experience. We also seek to continue to increase participation by minimizing the administrative burden for physicians and vendors who choose to participate.

a. Frequency of Drug Payment Amount Updates

As described in the July 6, 2005 IFC (70 FR 39070 through 39071) and § 414.906(c), payment amounts for drugs furnished under the CAP are set through a competitive bidding process, and as described in § 414.908(b), bids that exceed a composite bid threshold of 106 percent of the weighted ASP for the drugs in the CAP category are not accepted. The CAP payment amounts that are calculated from successful bids are updated from the time of the bidding period to the payment year. During the 2006 through 2008 CAP contract period, the initial update calculation used the change in the Producer Price Index (PPI) for prescription preparations to account for the time period between the bidding and the period in which the payment amounts were to be in effect, which was the middle of the first year of the three year CAP contract period (70 FR 39074). Finally, as specified in § 414.906(c), CAP payment amounts are updated again during the second and third year of the contract period based on the approved CAP vendor's reported reasonable net acquisition costs (RNAC). The annual updates are limited by payment amounts described in section 1847A of the Act and codified in § 414.906(c).

Section 1847B(c)(7) of the Act gives the Secretary the discretion to establish an appropriate schedule for the approved CAP vendor's disclosure of RNAC information to us, provided that disclosure is not required more frequently than quarterly. In the July 6, 2005 IFC (70 FR 39075 through 39076), we specified that each approved CAP vendor will disclose its RNAC for the drugs covered under the contract

annually during the period of its contract and that we would calculate an annual payment adjustment based on this information. We specified an annual disclosure of RNAC because it imposes the minimal burden on approved CAP vendors. In 2005, some commenters suggested that more frequent updates would be desirable. Additional feedback about the CAP that was obtained after the program's postponement in 2008, as well as comments on previous rules, indicated that potential vendors would like the frequency of price adjustments to increase. Various commenters have suggested a quarterly price adjustment in order to parallel to the ASP process, to better match payment amounts with increases or decreases in drug costs, and to attract vendor interest. We believe that quarterly adjustments would also lower approved CAP vendors' financial risks because CAP payment amounts will be better able to keep up with unanticipated drug cost increases and would benefit the Medicare program by reacting to significant cost decreases more promptly.

Quarterly price updates also will eliminate the PPI-based increase that currently occurs between the time bids are submitted and the first day of CAP claims processing. The application of the PPI-based payment adjustment described in the July 6, 2005 IFC (70 FR 39074) has resulted in situations where the ASP+6 percent payment amount has been exceeded during the first year of the 3-year approved CAP vendor contract. We do not believe that CAP payment amounts should exceed ASP+6 percent. In our discussion of bid ceilings in the July 6, 2005 IFC, we stated that the bid ceiling "ensures that the CAP will be no more costly to the Medicare program than the alternative method of paying for drugs at 106 percent of ASP. This ceiling is thus consistent with the possibility of realizing savings to the Medicare program. It would also serve to maintain a level of parity between the two systems, preventing a situation in which significant payment differentials might skew incentives and choices (70 FR 39070)." For this reason, and to remain consistent with current regulation text at § 414.906, we believe that all payment amounts calculated under the update process should be limited by the weighted payment amount established under section 1847A of the Act. We also believe that this approach will continue to provide for an "appropriate price adjustment" as required under section 1847B(c)(7) of the Act by improving responsiveness to unexpected price

changes, and continuing a prudent limitation on the magnitude of payment amount adjustments.

Our approach for implementing quarterly updates consistent with the ASP+6 percent limit on payment amounts would be based on composite bid price calculations, as described in the July 6, 2005 IFC (70 FR 39072 through 39073). Additional details about the process are described in further detail in section II.H.2.f. of this proposed rule (Annual CAP Payment Amount Update Mechanism). Briefly stated, the ASP+6 percent limit would be applied by comparing the (weighted) composite update payment amount, calculated from participating approved CAP vendors' reasonable net acquisition cost data, to most recent available weighted ASP prices for the same drugs. If the composite drug update payment amount exceeds the weighted ASP+6 percent payment limit, the composite payment amount for that group of drugs would be reduced to equal the ASP+6 percent limit by applying an equal percent reduction to each drug in the group. By way of example only, if a quarter's composite update payment was calculated as +2.3 percent, based on the median of all participating approved CAP vendors' data, but the calculated weighted ASP+6 percent limit for that group of drugs was +2.1 percent, the payment amounts for all HCPCS codes in the composite group would be increased by 2.1 percent in order to account for reported increases to the vendor's acquisition cost, but not to exceed the ASP+6 percent limit. This means that a 2.1 percent increase would be applied to CAP payment amounts for all HCPCS codes that are in the composite drug list and are being supplied under the CAP by one or more approved CAP vendors. For HCPCS codes that are priced separately, each code available through the CAP will be compared to the most recent ASP+6 percent limit for that code. CAP payment amounts for codes that exceed the ASP+6 percent limit will be reduced to ASP+6 percent. Each "Not Otherwise Classified" (NOC) drug described in § 414.906(f)(2)(iv), would also be updated on an individual (rather than composite) basis.

We are proposing to discontinue annual CAP payment amount updates and to implement quarterly CAP payment amount updates at § 414.906(c). Because of this proposed change, the special quarterly adjustments described at § 414.906(c)(2) (for the introduction of new drugs, expiration of drug patents or availability of generic drugs, material shortages, or withdrawal of a drug from the market)

will no longer be needed, so we propose deleting those provisions from the regulation, and instead adding details about the payment amount update process described in section II.H.2.f. of this proposed rule (Annual CAP Payment Amount Update Mechanism). A quarterly RNAC reporting and payment adjustment process would begin as soon as we entered into contracts with the approved CAP vendor(s); that is, beginning with the first quarter during which CAP claims are submitted under the contract. Thus, under this proposal, we would also eliminate the PPI-based adjustment for the time period between the time bids are submitted and the time claims processing begins under the contract, because that adjustment would no longer be necessary. We believe using one payment update process will be easier to administer and would minimize the potential for CAP payment amounts to exceed ASP+6 percent for the first contract year. In order to provide sufficient time for the calculation of payment amount updates, we are proposing that approved CAP vendors report quarterly RNAC data for drug purchased for use under the CAP during the previous quarter within 30 days of the close of that quarter. We have made corresponding changes to regulation text at § 414.906(c) and we welcome comments on these proposed changes.

b. Changes to the CAP Drug List

(1) CAP Drug List

In the July 6, 2005 IFC, we responded to comments on our proposed approach for determining the CAP drug categories and how we select the specific drugs in the CAP drug list (70 FR 39026 through 39034). As stated in the CY 2006 PFS final rule with comment period (70 FR 70237), the CAP is intended to provide beneficiaries with access to Medicare Part B drugs and maintain physician flexibility when prescribing medications. Our approach incorporated drugs commonly administered by the range of physician specialties that bill for Part B drugs (70 FR 39030) and resulted in a list of about 180 drugs that were available through the CAP during the CY 2006 through CY 2008 contract period. We also developed a number of methods by which an approved CAP vendor's CAP drug list could be changed (see Table 26 at 70 FR 70242).

We believe that our general approach, to provide a wide variety of drugs to a variety of physicians over a large portion of the United States, is on target. Although we believe that the CAP is a means for physicians to minimize their

drug inventory costs, we acknowledge that participation in the CAP cannot completely eliminate the need for participating CAP physicians to maintain at least a minimal drug inventory at the office. Many physicians who participate in Medicare also provide services to non-Medicare patients, and even physicians with a predominantly Medicare patient population may find it useful to keep a small stock of drugs on hand for unforeseen situations, such as emergencies and breakage.

During the CAP postponement, we became aware that both participating CAP physicians and potential vendors supported narrowing the CAP drug list. Both agreed that low cost drugs should be removed from the CAP. Although these items were initially included in the CAP so that an approved CAP vendor would be in a position to supply many of the Part B drugs that an office might administer, CAP physicians and the vendor community have stated that the inclusion of these items in the CAP creates an accounting, tracking, and claims submission burden for some participants. Based on these comments, we believe that low-cost, frequently utilized items, such as corticosteroid injections, could be removed from the list without significant impact on the CAP's utility to participating CAP physicians. Furthermore, it appears that physicians would be more interested in obtaining expensive products, such as biologicals, through the CAP. However, we are also mindful that narrowing the CAP drug list significantly also would decrease an approved CAP vendor's overall purchase volume, and we believe that this could limit the approved CAP vendor's ability to obtain volume-based discounts from the manufacturers or distributors from which it obtains drugs for use in the CAP. Creating a more tailored CAP drug category also could limit physician participation to one or several specialties, and may create a situation where sudden supply interruptions and unexpected changes to distribution channels could affect a greater proportion of drugs in the program than would be the case with a broader CAP drug category.

Nevertheless, we are proposing to create a new CAP drug category for the next round of CAP contracting. Our approach is intended to address comments about the administrative burden of tracking and billing low cost/high volume items while maintaining access to a variety of high cost items. We are proposing to identify the new CAP drug category using the existing CAP drug category as a starting point.

The 2008 drug list was compiled based on Part B drug claims data, the identification of specialties that frequently administer drugs under Part B, and public comment during rulemaking in 2005 (70 FR 39026 through 39033). We believe that using the 2008 CAP drug list as a starting point would maintain prescribing flexibility for a wide range of specialties and would also maintain access to a wide spectrum of drugs that have been utilized under the program previously. Furthermore, we do not believe it is necessary to develop a new approach because the 2008 CAP drug list was based on heavily utilized drugs in Medicare Part B physician practices; we believe that this approach is on target.

We propose to amend our list based on CAP physician participation, claims data, and comments indicating that the list should be narrowed to higher cost items. First, we would "filter" the original CAP drug category (drugs furnished in 2006 through 2009) by the specialties that most frequently prescribe drugs under the CAP, and the highest dollar volume CAP drugs (top 20 percent of allowed charges) compiled from 2008 claims data. This filtered list appears in Table 35, and we are proposing it as the starting point for the updated CAP drug category. A filtering process based on frequency of claims from a subset of physicians who might participate in the CAP cannot fully capture all drugs that may be used by certain specialties. In other words, the filtering steps described above narrow the CAP drug list based on physician specialties and dollar volume and do not necessarily preserve groups of drugs that certain prescribers may utilize, especially the less frequently utilized items in such groups. Therefore, we are also proposing to "fill in" groups of drugs with related items that do not appear on our list. We will consider "filling in" any drug or biological product that is physician-administered, has a reasonably high utilization in the Medicare population, is related to drugs

already in the CAP (for example, because of similar clinical uses), and is otherwise appropriate for inclusion in the program.

For example, we could consider adding a fourth hyaluronan viscosupplement to the drugs in Table 35, expanding the list of antibiotics, or antiemetics, or by adding a list of "new" and unweighted drugs as in 2006 by using simple claims data thresholds (70 FR 70238). The concept of "filling in" drug groups is supported by feedback from former participating CAP physicians who suggested that certain categories of drugs, such as antibiotics, be more fully represented. We are seeking comments on specific drugs that should be added to the draft list in Table 35.

We also are seeking comment on the method to assess whether a particular drug should be "filled in" so that it is included in the new, narrowed CAP drug category. For example, one process that we have considered and would like comment on is adding drugs from the 2009 through 2011 CAP vendor bidding list that did not pass the "filtering" step described above. The 180 item 2009 through 2011 bidding list was used during the approved CAP vendor bidding for the 2009-2011 contract, and includes CMS-approved items added to the original contract's bid list, as well as items approved for addition during the 2006-2008 contract period. (See the Downloads section at http:// www.cms.hhs.gov/CompetitiveAcquis forBios/03a vendorbackground.asp# TopOfPage). This list's weighting is based on claims volume data by HCPCS code units rather than dollar volume and provides a different perspective than a dollar volume sorting. We would add drugs from the 2009-2011 CAP Vendor bid list to the CAP drug category if the drug's weight is in the top 25 percent of the 2009–2011 CAP vendor bidding list, indicating frequent claims submission, and if the drug's clinical uses are similar to a drug on the proposed list in Table 35. This method

would result in the addition of a number of several commonly used antibiotics, two antiemetic) and several chemotherapeutic agents. Potential additions to our draft list identified by this method appear in Table 36.

Although this method helps "fill in" the proposed CAP drug list, this method still does not fully capture less frequently used drugs, or newly approved drugs. We welcome comments on this method and alternative methods of filling this proposed list.

In order to provide additional flexibility for participating CAP physicians and approved CAP vendors, and to allow for participants to further tailor the program to meet their needs, we are also proposing to add § 414.906(f)(2)(v) to allow approved CAP vendors to submit a request to CMS to add drugs (or biologicals) to the list of drugs furnished by the requesting vendor if there is sufficient demand and if the drug has therapeutic uses that are similar to other drugs already available through the CAP. The request and approval process would follow the existing regulations at § 414.906(f), and HCPCS code additions that are requested under this process would still be subject to CMS approval. This proposed process adds to the process for adding newly issued HCPCS codes under § 414.906(f)(2)(iii) and newly approved drugs without HCPCS codes (NOC drugs)under § 414.906(f)(2)(iv). It is intended to facilitate more complete access to groups of drugs that may be used by certain specialties, and drugs used to treat certain disease states without having to rely on rigid definitions of classes of drugs that may not apply well to actual clinical practice across a large and diverse geographic area. We believe that this addition to the methods for changing an approved CAP vendor's drug list (see Table 26 in the November 21, 2006 final rule (70 FR 70242)) will add to the flexibility of the program. We welcome comments on our proposal to update the CAP drug list.

TABLE 35—DRAFT CAP DRUG LIST FOR NEXT CONTRACT PERIOD

| Code | Procedure code description |
|-------|--------------------------------------------------------------|
| J0129 | INJECTION, ABATACEPT, 10 MG |
| J0215 | INJECTION, ALEFACEPT, 0.5 MG |
| J0585 | BOTULINUM TOXIN TYPE A, PER UNIT |
| J0587 | BOTULINUM TOXIN TYPE B, PER 100 UNITS |
| J0696 | INJECTION, CEFTRIAXONE SODIUM, PER 250 MG |

2. Removing Drugs From the CAP list

Although there are several methods under the CAP to add drugs to an approved CAP vendor's drug list, the current regulations do not specify a process for removing drugs from an approved CAP vendor's list. Our experience has shown that interruptions in availability can affect an approved CAP vendor's ability to supply CAP drugs during the course of a 3-year contract. For example, during the first contract period, we became aware of long-term and permanent drug unavailability, sometimes at the HCPCS level, due to removal of drugs from the market, or interruption of supply to an approved CAP vendor for reasons beyond the approved CAP vendor's

control, such as changes to drug distribution methods, changes in agreements between manufacturers and distributors and/or pharmacies regarding who may purchase certain drugs, and direct distribution arrangements.

In order to better respond to sudden, long-term changes in drug supply that are beyond the control of the approved CAP vendor, we are proposing to allow an approved CAP vendor to request the permanent removal from its CAP drug list of a HCPCS code for which no NDCs are available. Our proposal is intended to better manage situations where all NDCs from an entire HCPCS code unexpectedly become unavailable to an approved CAP vendor, and we would require the approved CAP vendor (1) to

document the situation in writing, including the unavailability of all NDC codes in a HCPCS code that is supplied under the CAP, (2) to describe the reason for the unavailability and its anticipated duration, and (3) to attest that the unavailability is beyond the approved CAP vendor's control. Approval of the deletion would apply only to the approved CAP vendor or vendors that requested the deletion. Our proposal is not intended to be used frequently, or to permit an approved CAP vendor to remove a HCPCS code from its CAP drug list simply because it has become unprofitable to provide itwe believe the payment amount adjustment proposals discussed in sections II.H.2.a. and f. of this proposed rule would address that concern.

Furthermore, our proposal is also not intended to be used for managing short-term unavailability, or unavailability of a finite duration—we believe the existing drug substitution policy described in § 414.906(f) already addresses those concerns. We are proposing to add this process as § 414.906(g) because those regulations currently provide for additions and substitutions to the CAP drug list, and would therefore require a written request to CMS, as well as CMS'

approval.

Participating CAP physicians who are affected by the deletion of a HCPCS code from an approved CAP vendor's drug list would have the option of remaining with their selected approved CAP vendor and using the ASP (buy and bill) methodology for obtaining the drug that has been deleted, or selecting another approved CAP vendor under the exigent circumstances provision at § 414.908(a)(2). We believe that the deletion of an expensive and highly utilized CAP drug by one approved CAP vendor in the middle of a physician election period could cause hardship for a practice if it had to revert to the ASP methodology of acquiring and billing for that drug. Such a situation would constitute an exigent circumstance. Given CAP's goal of improving access to drugs, allowing the participating CAP physician to switch approved CAP vendors outside of a regular election period in this instance would be prudent. We welcome comments on our proposals.

c. Geographic Area Served by the CAP

In the July 6, 2005 IFC (70 FR 39034 through 39036), we established a single, national competitive acquisition area for the initial stage of the CAP. This national distribution area included the 50 States, the District of Columbia, Puerto Rico, and U.S. territories. We recognized that designating a single national area might limit participation to those vendors that could compete to bid and supply drugs nationally, but we indicated this approach was a part of the phase-in plan for the CAP. We also discussed potential phase-in options for the future, stating that smaller areas might become a solution as the program expanded.

According to the vendor community, certain areas of the United States (especially Alaska, Hawaii, and the Territories) currently present logistical challenges and are associated with high drug shipping costs. Moreover, physician participation in these areas has been low; in 2008, physicians from Alaska, Hawaii, and the Territories represented less than 2 percent of total

participating CAP physicians.
Temporarily limiting the geographic areas served by the CAP could help limit costs and risks for approved CAP vendors associated with shipping drugs to distant parts of the country. However, we believe that the CAP is intended to provide services to all Medicare physicians (including those in distant parts of the country), and therefore, we do not believe that a limitation on the geographic area in which the CAP is available should be permanent.

Section 1847B(a)(1)(B) of the Act specifically requires the Secretary to phase-in the CAP with respect to the categories of drugs and biologicals in the program, in such a manner as the Secretary determines to be appropriate. We believe that this provision, particularly in conjunction with the statutory definition of a competitive acquisition area as "an appropriate geographic region established by the Secretary" provides broad authority for the Secretary to phase in the CAP with respect to the geographical areas in which the program would be implemented. As stated in the July 6, 2005 IFC, we considered several factors when defining geographic areas for the CAP, including aspects of vendors and their distribution systems, such as current geographic service areas, the density of distribution centers, the distances drugs and biologicals are typically shipped, and costs associated with shipping and handling (70 FR 39035). Taking these factors into consideration again, and considering entities who have bid on, or expressed interest in bidding on approved CAP vendor contracts, we believe that it is appropriate to use the authority granted under the Statute to temporarily narrow the area served by the CAP during the program's re-implementation. We appreciate the logistical issues associated with shipping drugs to remote areas and the uncertainties associated with transportation costs that have been described by the potential vendor community; however, we are reluctant to significantly reduce the area served by the CAP because at some point, the approved CAP vendor's volume would be affected and the likelihood of obtaining volume based discounts would decrease.

At this time, we are proposing to designate the CAP competitive acquisition area as the 48 contiguous States and the District of Columbia for the next round of CAP contracting. This change in the geographic area that is served by the CAP is meant as an interim measure under our phase-in authority and the statutory definition of a competitive acquisition area. We

believe that omitting Alaska, Hawaii, and the Territories from the CAP competitive acquisition area at this time will balance the need to revise the CAP to attract more vendors with the need to offer the maximum number of physicians a meaningful opportunity to participate. We believe that this proposal will encourage potential vendors to participate in the CAP because it would temporarily omit areas associated with low physician participation, long shipping times, and high shipping costs. Furthermore, this measure is unlikely to significantly decrease CAP drug order volume relative to historical physician participation in the CAP. However, we are aware that our proposal temporarily eliminates the CAP option for physicians in the areas not included in this CAP competitive acquisition area. Therefore, we are not proposing this definition of the CAP geographical area as a permanent solution. We will continue to assess the CAP and update plans for phase in activity in future rulemaking efforts, including determining the circumstances under which CAP participation will be offered to physicians in Alaska, Hawaii, and the Territories. We will also continue to consider modifying the definition of competitive acquisition area on the basis of regions, States, or some smaller geographic area, which might expand the number of vendors that could bid to participate in the program (70 FR 39036). We welcome comments on our proposal.

d. CAP Drug Stock at the Physician's

Our discussion about the CAP emergency restocking option in the July 6, 2005 IFC indicated that a participating CAP physician could not maintain a stock of an approved CAP vendor's drug in his or her inventory. This was done because we had reservations about potential program integrity and drug diversion issues (70 FR 39047).

Since that time, we have gained operational experience with the CAP and a better understanding of the ordering and drug delivery process. We have also received additional public feedback about the different ways that the program could be refined. Further, our experience with the CAP indicates that our concerns over program integrity and drug diversion have not come to pass. For example, we have received no complaints and have no information indicating that diversion has been a concern. Also, we have not received any negative feedback from the vendor community indicating a concern about

storing CAP drugs in physicians' offices. Therefore, we believe at this time it is appropriate to consider allowing additional flexibility to encourage CAP participation.

Our experience with the CAP, and our increased understanding about the options approved CAP vendors might have for furnishing drugs to a participating CAP physician's office also support considering additional flexibility in this area. For example, we are aware of electronic inventory control and charge capture devices that could be utilized in ways that conform to CAP regulations and are compliant with applicable State and Federal laws. Such devices utilize an electronic transaction based on a physician's order to track the administration of drugs from inventory to a specific patient and to document appropriate charges for the drug. We believe that such systems could fit into the current CAP framework when transactions in such systems are based on a physician's order, because such systems can track inventory, and can be used to capture patient charge data.

For these reasons, we are seeking to clarify our requirements for the manner in which CAP drugs are supplied to participating CAP physicians. Specifically, we are proposing to allow approved CAP vendors to utilize electronic transactions to furnish CAP drugs from nominal quantities of approved CAP vendor-owned stock located at the physician's office in response to specific prescription orders and to capture charges related to such transactions. Our proposal is also intended to clarify that entities with alternative approaches to supplying drugs that utilize an electronic transaction are welcome to participate in the CAP bidding process. We believe that this will allow for additional flexibility and efficiency in the ordering and delivery of drugs within the program because it allows for more efficient shipping of approved CAP vendor-owned stock and provides the option of CAP participation for physicians who use or may choose to use such drug inventory management platforms. This proposal does not change our position that a participating CAP physician shall not take title to or pay for CAP drugs, nor does it alter the requirements for information that must be submitted with a prescription order under Section 414.908(a) or the application of HIPAA to such data.

Furthermore, our proposal does not affect the applicability of State licensing requirements for an approved CAP vendor. As stated in the July 6, 2005 IFC (70 FR 39066), either the approved CAP vendor, its subcontractor under the

CAP, or both, must be licensed appropriately by each State to conduct its operations under the CAP. Therefore, if a State requires it, an approved CAP vendor would be required to be licensed as a pharmacy, as well as a distributor. We are not revising the requirements at § 414.908(c) and § 414.914(f)(9), and we note that sections 1847B(b)(6) and 1847B(b)(2)(B) of the Act continue to apply. In order to participate in the CAP successful bidders must continue to submit proof of pharmacy licensure, consistent with applicable State requirements.

Also, this proposal would not modify our definition of "emergency delivery or its corresponding requirements at § 414.902. As we stated in our July 6, 2005 IFC, the intent of the 1-businessday timeframe for emergency deliveries is to address the participating CAP physician's need for more rapid delivery of drugs in certain clinical situations with the approved CAP vendor's ability to ship the drug and have it delivered promptly in a nationwide delivery area (70 FR 39045). The emergency delivery timeframe still applies in situations when CAP drugs are not available in the office for electronic delivery.

Moreover, this proposal does not seek to change the CAP inventory requirements. CAP drugs belong to the approved CAP vendor, and as indicated in the July 6, 2005 IFC (70 FR 39048). participating CAP physicians are required to maintain a separate electronic or paper inventory for each CAP drug obtained. CAP drugs must be tracked separately in some way (for example, an electronic spreadsheet). CAP drugs do not have to be stored separately from a physician's own stock; that is, co-mingling of CAP drug with drug from a participating CAP physician's own private stock is acceptable as long as a record of approved CAP vendor-owned drug is kept in a manner that is consistent with $\S414.908(a)(3)(x)$ and the approved CAP vendor-owned drug can be accounted for, as needed.

Also, this proposal does not affect the CAP emergency restocking requirements. Section 1847B(b)(5) of the Act and § 414.906(e) provide criteria for the replacement of drugs taken from a participating CAP physician's inventory in the event of an emergency situation. When the emergency resupply criteria are met, a participating CAP physician can replace the drugs that were used from his or her own inventory by submitting a prescription order to the approved CAP vendor.

Our proposal seeks to clarify the potential approaches that a bidder may use (separately or in combination) to

supply drugs under the CAP. Our proposal does not seek to specify a particular approach that bidders must use in future responses to CAP bid solicitations or to strictly define the types of entities that could bid on CAP vendor contracts; for example, whether bidders must be pharmacies, drug distributors, or a hybrid of the two; whether bidders must utilize just in time shipping, or electronic inventory transactions to supply CAP drugs. We will consider approving bidders approaches that are consistent with the statutory framework, applicable laws, and regulations. We welcome comments on this issue.

e. Exclusion of CAP Sales From ASP Calculations

In response to the March 4, 2005 proposed rule, many commenters requested clarification about whether the prices determined under the CAP will be taken into account in computing the ASP under section 1847A of the Act. In the July 6, 2005 IFC, we responded that prices offered under the CAP must be included in ASP calculations (70 FR 39077). This was done because we initially believed that we did not have the statutory authority to exclude prices determined under the CAP from the computation of ASP under section 1847A of the Act. Section 1847A(c)(2) of the Act contains a specific list of sales that are exempt from the ASP calculation, and sales to approved CAP vendors operating under CAP are not included on that list (70 FR 39077). Comments received in response to the July 6, 2005 IFC opposed this policy (70 FR 70479).

Ultimately, as stated in the November 21, 2005 IFC, we recognized commenters' concerns about the effect of including CAP prices in the calculation of ASP and agreed that the best outcome for both the ASP methodology and the CAP programs would be one in which prices under CAP did not affect payment amounts under the ASP methodology. In particular, we found compelling arguments from commenters about the separation of the ASP and CAP programs and that the two programs are intended to be alternatives to each other. Therefore, we excluded units of CAP drugs that are administered to beneficiaries by participating CAP physicians from the ASP calculation for the initial 3-year approved CAP vendor contract period (70 FR 70479). Accordingly, the definition of "Unit" at § 414.802 was also revised to reflect this exclusion.

In our August 18, 2006 interim final rule, we further addressed concerns

pertaining to our definition of Unit. We published a PRA notice regarding a proposed modification of the OMBapproved ASP information collection requirements (CMS Form 10110 (OMB #0938-0921) about the collection of the number of CAP units excluded from the ASP calculation. In response, a commenter expressed concern over manufacturers' reliance on approved CAP vendors for information about the number of units of CAP drugs that are administered to beneficiaries by participating CAP physicians (71 FR 48132). Since approved CAP vendors are the only entities with direct information on CAP units administered, the commenter believed that the requirement to exclude units of CAP drugs administered to beneficiaries by participating CAP physicians placed the manufacturer in the untenable position of reporting ASP and certifying reports of ASP based on second-hand information from approved CAP vendors. Further, the commenter noted that manufacturers may not have timely access to this information and that they could not independently confirm its accuracy (71 FR 48132). Additional feedback received as part of our ongoing work with manufacturers also indicated that they were concerned that they would have difficulty obtaining information from approved CAP vendors that would be necessary to accurately exclude administered CAP units from the ASP calculation (71 FR 48132).

Therefore, we further revised the definition of unit to clarify that for the initial 3-year contract period under the CAP units of CAP drugs sold to an approved CAP vendor for use under the CAP would be excluded from the calculation of ASP (70 FR 48132).

In the July 6, 2005 and August 18, 2006 IFCs, we stated that we would examine the effect of this exclusion and, if necessary, revisit our decision at the end of the initial 3-year period of the CAP (70 FR 70480 and 71 FR 48132, respectively). Since then, operational experience has not indicated a reason for changing our policy of excluding CAP units sold to approved CAP vendors for use under the CAP from ASP calculations. Therefore, we are proposing to permanently exclude drugs supplied under the CAP from ASP calculations and make conforming changes to the definition of unit at § 414.802. We believe that this proposal will continue to promote the separation and independence of the two drug payment models. We welcome comments on this proposal.

f. Annual CAP Payment Amount Update Mechanism

In the July 6, 2005 IFC (70 FR 39076), we described a two-step process to calculate RNAC-based price adjustment if there is a change in the RNAC reported by a particular approved CAP vendor. We stated that "we would adjust the bid price that the vendor originally submitted by the percentage change indicated in the cost information that the vendor disclosed. Next, we would recompute the single price for the drug as the median of all of these adjusted bid prices." The two-step process contemplated that there would be more than one approved CAP vendor at the time prices were to be adjusted and that all successful bidders would participate in the CAP.

However, during the first round of CAP contracting, after offering more than one contract, we entered into a contract with only one successful bidder. Thus, during the 2008 price update calculation process, we developed an approach to account for the lack of RNAC data for bidders who chose not to participate in the CAP. In the CY 2009 PFS proposed rule, we stated that the approach we used to adjust prices for the 2008 contract year is consistent with § 414.906(c) and with the July 6, 2005 IFC because it retains a two-step calculation based on the approved CAP vendor's RNAC, as well as the calculation of a median of adjusted bid prices.

We also posted our approach on the Approved CAP Vendor page of the CMS CAP Web site at http://www.cms.hhs.gov/CompetitiveAcquisforBios/15_Approved_Vendor.asp. The percent change in RNAC for 2008 was calculated based on data supplied by the approved CAP vendor. This percent change in RNAC was used as a proxy for the percent change in RNAC for successful bidders that chose not to become approved CAP vendors.

Then, in the CY 2009 PFS proposed rule (73 FR 38522 through 38523), we proposed to continue using this approach for future CAP payment amount updates where the number of approved CAP vendors is less than the number of successful bidders. We proposed that the average of the approved CAP vendor-supplied RNAC data would be used as a proxy for data from vendors who bid successfully but are not participating in the CAP. For example, if the payment amounts for the first year of a CAP contract are based on five successful bidders, but only four have signed contracts to supply drugs under the CAP (that is, there are four

approved CAP vendors), only RNAC data collected from the four approved CAP vendors would be used to calculate the percent change in the RNAC. The average of the four approved CAP vendors' adjusted payment amounts would be used as a proxy for the RNAC of the successful bidder that is not participating in the CAP. The updated CAP payment amount would then be calculated as the median of the five data points (one data point for each approved CAP vendor's updated payment amount, and one data point calculated using the average of the approved CAP vendors' RNAC). Similarly, if there were five successful bidders but only three chose to become approved CAP vendors, the average of the three approved CAP vendors' RNAC would be the proxy for the RNAC of the two bidders who did not participate. The median of those five data points would become the updated

CAP payment amount.

Our approach in the CY 2009 PFS proposed rule was intended to provide us with a flexible method for updating CAP prices, to be consistent with our original policy as stated in the July 6, 2005 IFC, and to account for bidders or approved CAP vendors who are not participating in the program at the time the price updates are calculated. However, our approach was limited in scope because it was made during a contract period and during bidding for an upcoming contract and we did not want to make any significant changes to the CAP program which could affect contractual obligations. Furthermore, we received a comment in response to the CY 2009 PFS proposed rule that suggested the elimination of the proxy procedure so that payments would be based on actual data from participating vendors and would better reflect experience within the program. After additional consideration, we believe that it would be prudent to simplify and update our 2009 proposal in order to account for successful bidders who choose not to participate in the CAP, possible changes in the number of approved CAP vendors over the life of a 3-year CAP contract, and to allow for flexibility in setting the frequency of payment amount adjustments as described in section a. above. We believe that our updated proposal is easier for the vendor community to understand and for us to implement. Furthermore, our revised proposal is not constrained by concerns about the impact of changes on an active contract.

We are proposing to clarify that the RNAC-based adjustment calculations are intended to apply only to approved CAP vendors (not all bidders), and that the most recent CAP payment amount

(for example, the previous year's or the previous quarter's payment amount) will be the starting point for making the subsequent period's adjustment. Simply put, we are proposing to eliminate the use of proxy data for bidders that are no longer participating in the program. Instead, we propose to use RNAC data only from approved CAP vendors that are participating in the CAP at the time that an RNAC-based price update is being calculated. We are also clarifying that the starting point for the payment amount adjustment is the most recent payment amount. The percent change calculated from each participating approved CAP vendor's RNAC data will be applied to the most recent payment amount by recomputing the single price using the median of all participating

vendors' adjusted prices. For example, if quarterly adjustments beginning at the start of claims processing approved CAP vendor's contract as described in section a. above are implemented, and the post bid period's CAP payment amounts are calculated based on five successful bids, but only four approved CAP vendors are participating when CAP claims processing begins, the RNAC-based payment amount adjustment for the first quarter of CAP claims would be based on RNAC data provided by the four approved CAP vendors that will be furnishing drugs under the CAP. The four approved CAP vendors would be required to submit a quarter of RNAC data within thirty days of the close of the quarter to which the data applied, prior to the beginning of CAP claims processing for the new contract. We would apply the percentage change in RNAC reported by each of the four approved CAP vendors to the CAP payment amounts calculated from successful bids, and the adjusted payment amount would be the median of those four adjusted amounts. Assuming that these four vendors are still furnishing drugs during the second quarter, calculations for the second quarter would apply the RNAC-based adjustment calculated from the four vendors' data to the first quarter's

payment amount.

This process would apply to the composite bid drug list as amended by rulemaking, meaning that a single weighted percent change in RNAC is calculated for all drugs in the composite bid list and that single percent change is applied to all drugs in the list. For drugs that are bid as separate line items, such as drugs that were included in addendum B of the 2006 bidding period (see 70 FR 39072 and updated as addendum G in 70 FR 70238) or for drugs that are added during a contract

period, each HCPCS code will be adjusted as a separate line item. Such codes will not be included in the composite, weighted drug list. Our process will continue to assign a single payment amount to all approved CAP vendors that supply a given HCPCS code; we do not intend to have more than one payment amount for any HCPCS code under the CAP or for individual "NOC" drugs described in § 414.906(f)(2)(iv).

This updated approach is flexible, and we believe it can accommodate a variety of scenarios, including a changing number of approved CAP vendors and changes to the frequency with which payment amount updates are made. It provides a straightforward and accurate clarification of the price adjustment mechanism described in regulation text. We believe that this proposal remains consistent with our original preamble language and with our CY 2009 PFS proposal, because it retains the two-step calculation using the percent change in RNAC. Finally, we believe that our approach will eliminate any perception that nonparticipating vendors can significantly affect CAP payment amount adjustments. We welcome comments on our proposal and corresponding regulation text changes at § 414.906(c).

g. 2009 PFS Proposals

(1) Definition of a CAP Physician

In the July 6, 2005 IFC, we stated that section 1847B of the Act most closely describes a system for the provision of and the payment for drugs provided incident to a physician's service (70 FR 39026). In the November 21, 2005 IFC (70 FR 70258), we stated that for the purposes of the CAP, a physician includes all practitioners that meet the definition of a "physician" in section 1861(r) of the Act. This definition includes doctors of medicine, osteopathy, dental surgery, dental medicine, podiatry, and optometry, as well as chiropractors. However, this definition does not include other health care professionals, such as nurse practitioners (NPs), clinical nurse specialists (CNSs), and other professions such as physician assistants (PAs) who may be able to legally prescribe medications and enroll in Medicare. Our 2005 CAP definition was not intended to exclude these practitioners who are appropriately billing Medicare for legally prescribed medications administered in a capacity that would be classified as incident to a physician's services if the medications were administered by a physician. We are

concerned that the existing CAP definition of a physician is unnecessarily restrictive and could potentially affect access to the CAP for a small segment of providers that should be eligible for participation in the CAP in situations where they currently bill Medicare separately and appropriately.

In the CY 2009 PFS proposed rule (73 FR 38523), we proposed to further clarify that, for the purposes of the CAP, the definition of a physician included all practitioners that meet the definition of a "physician" in section 1861(r) of the Act, as well as practitioners (such as NPs, CNSs and PAs) described in section 1861(s)(2)(K) of the Act and other practitioners who legally prescribe drugs associated with services under section 1861(s) of the Act if those services and the associated drugs are covered when furnished incident to a physician's service. While we believed that most practitioners described in section 1861(s)(2)(K) of the Act would bill under specific physician provider numbers, it was not our intent to exclude practitioners who are able to bill independently for drugs associated with services that are covered when provided by a physician and legally authorized to be performed.

In response to our CY 2009 proposed rule, only a few commenters were concerned about the inclusion of inadequately trained practitioners and risks to patient safety under this expanded definition. Another commenter stated that this definition goes beyond the scope of the provisions in the MMA and the strict definition of "physician" in the statute. However, the majority of comments supported this

proposal.
